

REPORTS ON MAORI PRISONERS.

Weekly Reports on Sick and Wounded Maori Prisoners (Continued.)

"Marion" Hulk, } off Kawau.		Commencing 20th and ending 27th August, 1864.					{ S. SAM.	
Diseases.	Remained.	Admitted.	Discharged.	Died.	Remaining.	Remarks.		
Debility ...	2	...	...	...	2	The sick during the week have, as a rule, progressed favourably, though the two cases of consumption alluded to in the daily reports are still in a very precarious state. Hotua, who seems to brighten up occasionally, has been of late in an alarmingly weak condition, and suffering from great difficulty of breathing. Withal he appears satisfied and composed, being at the same time conscious of the serious nature of his malady. Tipene has not manifested any marked signs of improvement, and the tumour of which he complained remains much in the same state as when last reported upon. Both these patients are allowed wine and other nourishments liberally. The prisoners have been regularly at their work, and are very submissive and orderly. The weather during the week has been somewhat variable, though the temperature continued equal and moderate. Rations and water good.

"Marion" Hulk, } off Kawau.		Commencing 27th August, and ending 3rd September, 1864.					{ S. SAM.	
Debility ...	2	...	1	...	1	One death occurred during the week, caused by long standing organic disease of the chest. Tipene has not improved in the slightest degree, though he says he feels much stronger, and able to relish his food. The remaining patients under treatment have done remarkably well. The prisoners have been actively employed, and enjoy good health. The hulk is in perfect order. Heavy falls of rain during the week preventing the men doing much out-door work. Temperature steady and moderate. Rations properly issued, and of good quality. The natives orderly, satisfied, and comfortable.
