

Plan of Type for catching Rabbits

* Tunnel through which Rabbits pass on to the tip board and must be built slightly on the ascent to the tip board, the tippler of the board wants to be about

5 inches wide, the jumpover which the Rabbits pass must be about 6 inches high, and must be made of scentless wood or Rabbits will not pass over.

Plan of Trapping Bank

The uprights here represent stakes driven through the furrow into the ground and the upper line is a wire passing from stake to stake along which the wire netting is tied to hold it up.
