The monthly returns made by the several institutions show the average number of resident children for each month. From these returns the average number for the year is ascertained. The following table has been compiled with a view to show the average number of resident children in each institution for the financial year ending the 31st March, 1883; the total cost to Government of each institution for the same period; and the average yearly, weekly, and daily cost of each child:—

AVERAGE NUMBER AND COST OF CHILDREN AT INDUSTRIAL SCHOOLS AND ORPHANGES FOR FINANCIAL YEAR 1882-83.

INSTITUTIONS.	Average Number of Resident Children.	Total cost to Government of each Institution after deduction of recoveries.	Average Cost per Child.			Expenditure on Buildings not included in preceding columns.
			For Year.	For Week.	For Day.
