

APPENDICES.

In an earlier part of this paper it was stated that the table showing the number of children between the ages of five and fifteen in the provincial districts was given in that form (showing the provincial districts) because it was desirable, for purposes of comparison, to obtain a continuous and unbroken record. The education districts were remodelled in 1882, when fresh districts were created. The following table shows the number of children from five to fifteen years of age in the education districts from the year 1882. To some extent one table is a duplicate of the other, but for purposes of accuracy it was thought better to furnish both :—

Appendix A.
