1893. NEW ZEALAND.

EDUCATION:

SIXTEENTH ANNUAL REPORT OF THE MINISTER OF EDUCATION.

[In Continuation of E.-1, 1892.]

Presented to both Houses of the General Assembly by Command of His Excellency.

Office of the Department of Education,

My Lord,—

Wellington, 10th May, 1893.

I have the honour, in accordance with the provisions of "The Education Act, 1877," to submit to your Excellency the following report upon the progress and condition of public education in New Zealand during the year ending the 31st day of December, 1892.

I have, &c.,

W. P. REEVES.

His Excellency the Right Hon. the Earl of Glasgow, Governor of New Zealand.

REPORT.

This report is supplemented by an appendix which contains, besides statistical tables, the reports of the Education Boards and of the School Commissioners; and also by other parliamentary papers as follows: E.-la, Inspector-General's Report on Examination for Certificates; E.-lb, Reports of Inspectors of Schools; E.-2, Native Schools; E.-3, Industrial Schools; E.-3a, Costley Training Institution; E.-4, School for Deaf-mutes; E.-5, New Zealand University; E.-6, i—E. 1.

University of Otago; E.-7, Canterbury College; E.-8, Auckland University College; E.-9, Secondary Schools.

Public Schools.

In the last quarter of 1892 the average attendance—on which the capitation grant, the principal source of the Boards' income, depends—for the first time reached and exceeded one hundred thousand. In the year 1878, the first year of the operation of the Education Act now in force, the average attendance for the year was 45,521, and for the last quarter of the year 49,435. For 1892 the corresponding numbers are 99,070 and 100,917; and these numbers exceed those for 1891 by 2,012 and 4,653 respectively. Table A shows the progress in school attendance during the whole period of the operation of the Act.

TABLE A .- SCHOOL ATTENDANCE AND YEARLY INCREASE FROM 1877 TO 1892.

The main particulars of the attendance of the year in the several education districts are set forth in Table B. A comparison of local attendances for the fourth quarter with the attendances for the fourth quarter in the preceding year is of little value, because the attendance in the last quarter of 1891 was abnormally low in consequence of the prevalence of influenza. In 1892 most of the districts had, as usual, a larger attendance in the last quarter than in the three other quarters; but Auckland and Westland are exceptions to this rule. only district in which the average for the year is less than the average for 1891 is Wanganui, and there the difference is very slight, being merely the difference between 6,109 and 6,104. The case is explained by reference to the alteration of the boundaries of Stratford County, which had the effect of transferring the care of some schools from the Wanganui Board to that of Taranaki. standing this change, the attendance for the fourth quarter of 1892 in Wanganui exceeds by 471 that of the corresponding quarter of 1891. Only two districts show a diminished attendance for the whole year in a comparison of the data for 1892 with those of 1891: North Canterbury shows a loss of 245, and Nelson a loss of 67.

The mean roll for the year is estimated by the following method: The state of the roll at the end of every week is ascertained, and, the average state of the roll having been deduced for each quarter, the mean of the four quarterly averages is the mean roll. For 1892 this number is 122,860. The average attendance—99,070—is to this roll-number as 80.6 to 100. This is the highest ratio yet recorded. In 1891, and also in 1889, the highest preceding level—80.3 per cent.—was attained. Table A shows that, with slight fluctuations, there has been a steady increase from 73.6 in 1882 to 80.6 in 1892. The highest ratio of attend-

ance to roll-number appears in Otago (85·1 per cent.), and the lowest (72·3 per cent.) in Taranaki.

The number of children on the school-rolls at the end of 1892 was 122,620, and this number includes 1,433 Maori (and half-caste Maori) children. The number of such children in attendance at public schools is greater than it was in 1891, and the number of public schools having such children in attendance has also increased. The following table—which takes no notice of the children (2,133 in number) attending Native schools—shows the distribution of Maori children in the several education districts:—

As usual, the number of boys attending the public schools exceeds the number of girls, the proportion—51·7 to 48·3—being almost invariable. There is no noteworthy change in the proportion of children of any particular age to those of another age, except that there seems to be a slight tendency to increase in the proportion (now about 14 per cent.) remaining at school after reaching the age of thirteen years. The proportion above the age of ten years (46·9) is the same for 1892 as for 1891. Assuming that the average age of the children between five and six is five years and a half, and so on, it appears that the average age of all the children is nine years and ten months.

TABLE C.—AGE AND SEX OF PUPILS, DECEMBER, 1892.

The average position of the children with respect to standards appears (from an investigation of Table D) to be about a quarter of a standard below the Second Standard. In arriving at this conclusion it is assumed that there are two preparatory classes, and that they contain equal numbers of children; and, further, that on an average the children in a standard class have been in the class six months. Comparing this status—of about a quarter of a standard below Standard II.—with the average age of the children (nine years and ten months), we have reason to assume that the average age of passing the Second Standard is about ten years and one month. The returns summarised in Table E agree perfectly with this result.

TABLE D.—Classification by Standards, December, 1892. (See Table No. 2, Appendix, p. 2.)

It is gratifying to observe that the proportionate number of children in preparatory classes is declining, and that this is not accounted for by any change in the proportionate number of children at the lowest ages. On this subject the Otago Înspectors say, "No fewer than 1,217 pupils over eight years of age were not presented for Standard I., but in most cases what appeared to be sufficient reasons were assigned for their being withheld from examination. The reasons most commonly given were lateness in entering school, irregularity of attendance, and dulness. Of the validity of these reasons it is very difficult for us to form a trustworthy opinion; but we cannot but feel disappointed that the age at which Standard I. is on the average passed should continue to be so high as nine years and one month." The Westland Inspector says, "The ratio appears to me excessive, and hardly excused by the reasons given by the head-teachers, such as 'irregular attendance' and 'hopeless laziness'; but I believe that, the matter having now been brought prominently under notice, an immediate attempt will be made by the teachers to secure improvement." The Auckland Inspectors report, "There were presented in preparatory classes 1,702 children more than eight years old. We do not consider this number excessive. . . . Irregular attendance and short time at school" are the chief causes. "There are . . many Maori and half-caste children." The Taranaki Inspector says, "The instructions to Inspectors now require from them a statement of the number of children over eight years of age who have not been presented in

E.-1.

Standard I. . . . The number is 352, or about 34 per cent. of the pupils in the preparatory classes. The reasons assigned . . . have been classed as follows: Irregular attendance, 142; weak health, 19; recent admission, 106; incapacity, 31; not sufficiently advanced, 54. . . . The 31 returned under 'incapacity' is, I consider, a fair estimate of this unhappy class; and, of those unfortunately 'not sufficiently advanced,' the majority owe their backward state of preparation to inefficient instruction, as well as to the frequent changes of teachers in the schools of the district."

The following are extracts from other reports on this subject:—

Wanganui:—

In the new standard regulations a very important clause has been inserted, which provides that, when a pupil over eight years old is presented in Class P., the principal teacher shall give the Inspector a written explanation of the reason for not presenting the pupil in Standard I.; and, further, that the Inspector shall report to the Minister of Education on the number of such cases, and on the sufficiency of the reasons assigned for them. Thus, while the Act does not make presentation in Standard I. at the age of eight years compulsory, it clearly fixes the age at which a pupil should, in the ordinary course, pass into that standard. To comply with the regulation, after each annual examination every child over seven years old, or between the ages of seven and seven years and eleven months, of which seven years and a half may be taken as the average, should be transferred to the class preparing for Standard I.; and this would make the average maximum age for passing the standard about eight years and a half. Now, for each of the years 1890 and 1891 the average age in the whole colony for passing Standard I. was nine years. In the Wanganui District the average age in 1890 was nine years and four months (exceeded by Taranaki only, nine years and five months), while in 1891 it was nine years and five months (exceeded by Hawke's Bay only, nine years and a half). In 1892 the average age was nearly nine years and a half, but no comparison can be made, as the returns from the other districts are not to hand. This would seem to indicate that children have been kept back in the infant departments, and in some cases we know this has undoubtedly been so. But there are many cases in which it is impossible—nay, it would be absolutely pernicious—to present pupils in Standard I. at the age of eight years, for in not a few of the bush schools pupils do not come to school until they are seven years old, or even more, and to force on such children without a thorough grounding in the rudimentary work would be a grave error of ju

Of the 2,752 children in the preparatory classes, 610, or 22 per cent., were over eight years old. In the majority of cases the reasons given for non-presentation in Standard I. were satisfactory (especially as when many of the schools were examined the new regulations had not yet been a year in force), and were—(1) the advanced age at which school-life was begun; (2) incapacity of the Maori pupils for overtaking the work, especially in reading; (3) irregular attendance.

Hawke's Bay:—

The new regulations require an Inspector to include in his annual report a statement of his opinion with respect to children presented for examination in the preparatory classes who are more than eight years of age. In some schools far too many children are so presented. Napier affords a notable example, where 121 pupils, or more than 10 per cent. of the whole, were examined as preparatory pupils, although at an age when they might fairly be expected to pass Standard I. At Gisborne twenty-one children over the age of eight years were examined in the preparatory class, and at Port Ahuriri there were twelve. A careful analysis of the causes for the low presentations shows that bad health, natural dulness, inability of parents to provide boots or clothes, and irregular attendance of children are among the principal reasons stated by the teachers, but irregular attendance is urged as the chief cause of all. The results of the examinations in their effects upon irregular pupils support this view, as the standard failures are mostly made up of children who do not attend school at least 320 times within the school-year.

Nelson :=

In compliance with the latest instructions to Inspectors, I have ascertained from head teachers what are their reasons for not presenting such children in Standard I. I find that there are in all 200 such cases in this district. The reasons assigned may be grouped under three heads: Shortness of school-life, irregularity of attendance, and exceptional dulness. Sixty-nine children had attended school for a month only before the examination, eighty-nine had attended very irregularly, and thirty-eight were set down as being hopelessly dull. The number held back for these reasons does not seem to me excessive, and the explanations of the teachers are apparently fully borne out by the facts. The fact is that hitherto, in the Nelson District, the tendency to be guarded against has been in quite an opposite direction to that of unduly keeping back scholars from presentation in the First Standard.

North Canterbury:—

During the year a fillip has been given to the presentation in Standard I. by the departmental regulation which prescribes that a reason shall be assigned where children over eight years of age are still retained in Class P. It is not clear that the object of the regulation is to hasten the presentation, and any hastening of the presentation, unless the children are thoroughly well prepared, or are exceptionally old, we have consistently deprecated; but there is no doubt its tendency is in that direction. We have kept a more or less complete record of children for whom the required reason has been assigned, and find that the proportion is substantially the same in town and country schools, though the town schools might naturally be expected to have an advantage in the earlier

age at which children are able to attend. In both cases the proportion is as nearly as possible 5 per cent. of the total school enrolment. The probable explanation of the equality is that a higher ideal of what is necessary for the First Standard requirements prevails uniformly in the town schools than on the average in the country. The reasons assigned are almost invariably such as to fall conveniently under the four heads—(1) insufficient time at school, (2) irregular attendance, (3) mental or physical incapacity, and (4) ill-health. Though these groups are not exclusive of each other, and though little may be learned from group 3, which is made up of very mixed elements, ranging from "dulness" to imbecility or physical deformity, yet the numbers ranked under each head may contain some features of interest. In fourteen city and suburban schools, with a roll-number of 8,161 children, there were in all 410 over eight years included in Class P. on the date of examination. Of this number, 165 belong to group (1), 87 to group (2), 102 to group (3), and 56 to group (4). With the sufficiency of the reasons given we have pleasure in expressing ourselves fully satisfied. In this district there are, we believe, comparatively few children ranked at examination below Standard I. who ought, so far as the teacher's efforts are concerned, to occupy a higher position in the school classification.

The average ages at the time of passing the several standards are lower in the Wellington Education District than in any other part of the country, and higher in Wanganui than anywhere else. Experience may prove that the most excellent teaching and the most reasonable interpretation of the standards could not bring the average ages much lower than they now are in Wellington, where the mean of the average ages is eleven years and two months. It is perhaps too much to hope that this may, without some counterbalancing disadvantage, be reduced to ten years and six months, which would be the mean if the First Standard were passed at eight years of age, and the others at intervals of a year, as was originally contemplated.

^{*}In the report issued last year failures in South Canterbury were entered in error as 29.6. The correct number was 21.0.

The standard passes for 1892 number 63,113, and this number is 52.6 per cent. of the number of pupils belonging to the schools at the time of inspection. The percentage of passes has been steadily rising from 35.1 in 1882 to 50.2 in 1891 and 52.6 in 1892. The percentage of failures—14.1—is the lowest yet recorded. In 1886 the analysis of the school-rolls on inspection days was as follows: In preparatory classes, 37.1 per cent.; above the Sixth Standard, 0.6; absent, 3.7; "excepted," 3.2; failed, 12.9; passed, 42.5. The corresponding analysis for 1892 is—Preparatory, 32.7; above Standard VI., 1.1; absent, 2.3; "excepted," 2.7; failed, 8.6; passed, 52.6.

The general percentage of failures in the several standards is as follows: Standard I., 6.5; Standard II., 7.4; Standard III., 17.6; Standard IV., 21.8; Standard V., 21.2; Standard VI., 13 per cent. The percentage of failures is very low in Wellington and in Nelson. As in former years, the Fourth and Fifth Standards seem to have presented the greatest difficulty to the pupils.

The figures in Table H supply very little information that is not implicitly contained in Table D. There are only two districts that have any pupils not yet learning to write, and only four that have any not learning arithmetic. The number of girls not learning needlework is less than the number of girls below the class preparing for Standard I. The number of children not receiving instruction in drawing is less than 7 per cent. of the number attending. Military drill is taught by officers of the Permanent Artillery at the large schools in the principal towns.

E.—1. viii

The tables of ages and standards throw light on the numbers of new pupils entering in the year and of pupils finally leaving the schools. Table B taken by itself is misleading. The number of admissions shown in that table is 49,190, and the number of cases of "leaving" is 46,093 (including 7,244 which is the difference between the roll-number at the end of 1891 and the roll-number at the beginning of 1892). The census statistics show that, taking one year with another, the annual addition of new pupils cannot be much more than The very much greater number (49,190) shown in Table B is accounted for by the practice of regarding as a new-comer a pupil who returns after an absence of a complete quarter, and by the migration of families from district to From a comparison of the tables of ages for 1891 and 1892 (assuming the accuracy of the returns of age) it is certain that at least 15,674 new pupils under the age of ten years entered in 1892, and that at least 12,577 pupils above the age of ten really left during the year. From a comparison of the tables of standards for the two years one could only make sure of the admission of 14,754 new pupils and the retirement of 11,657. With respect to the 11,657, it is ascertained from the tables that 3,656 remained at school until they had passed the Sixth Standard; 2,032 left after passing the Fifth; 2,547 after passing the Fourth; 2,363 after passing the Third; 1,059 after passing the Second. probable that the number actually leaving school during the year did not exceed 13,000, and the position as to standards of 11,657 out of this number is known, and may be stated as follows: Out of 100 pupils leaving, $31\frac{1}{2}$ have passed Standard VI.; $17\frac{1}{2}$ have passed Standard V.; 22 have passed Standard IV.; 20have passed Standard III.; 9 have passed Standard II. A small proportion of the pupils leave to enter schools for secondary instruction.

The number of schools rose during the year 1892 from 1,255 to 1,302, and the mean of the average attendance per school from 76·7 to 77·5. In 1878 the mean number of children per school was 67·7.

TABLE J.—Number of Schools, December, 1892.

(In this enumeration every couple of half-time schools is reckoned as one school, except in the column for number of such schools.)

^{*} Includes one vacancy.

The number of teachers above the rank of pupil-teacher at the end of 1892 was 2,130. Included in this number are 131 who had not been examined for certificates, and 54 who had failed at examination. There were also 94 who had achieved "partial" success at examination. There were 1,826 certificated teachers, and 25 others who had passed the certificate examination. The proportion of teachers qualified by examination varied from about 50 per cent. (in Marlborough) to very nearly 100 per cent. (in Otago), the mean proportion for the whole of New Zealand being 87 per cent. When the results of the January examination of 1893 are taken into account, it is found that this proportion is raised to $89\frac{1}{2}$ per cent. (1,905 out of 2,130).

^{*} A deposit of £74 13s., passed to a deposit account, causes a discrepancy between this table and the corresponding table of last year.

The total outlay on maintenance (£371,490 15s. 11d., the sum of the first four items of expenditure in Table N) differs by less than £400 from the amount of the capitation grant payable for the four quarters of the year (£367,150) and the inspection subsidies (£4,000).

The balances in hand (£51,098) were for the most part held against liabilities incurred. It appears from Tables O and P that there were unpledged balances to the extent of £21,000, but that, on the other hand, there were liabilities unprovided for to the extent of £11,000.

The Boards generally complain of the inadequacy of recent grants for school-buildings. Even in districts in which population is not rapidly increasing there is a constant shifting of population from the towns and older settlements to the interior. During 1892 the number of schools carried on in buildings not belonging to the Boards grew from 78 to 94, of schools without residences from 358 to 400, of schools with less than 8 square feet of floor-space for the unit of average attendance from 12 to 18, and of other schools with less than 10ft. from 48 to 59. On building accounts at the end of the year seven Boards had available balances amounting in all to £4,040 14s. 11d., while the remaining six had incurred liabilities to the extent of £10,376 4s. 10d. in excess of the balances of their building funds.

Education Reserves.

The contributions made by School Commissioners towards the expenses of the primary schools in 1892 amounted to £37,027 2s. 2d. This is practically colonial revenue, the payments of the capitation grant being reduced by £37,027 2s. 2d. on account of it. The Commissioners' reports are printed in the Appendix (pp. 95–105). Table S is a summary of their accounts.

xiii E.-1.

NATIVE SCHOOLS.

During 1892 two Native schools—Onuku (Akaroa), and Port Molyneux (Clutha)—were taken over by the Education Boards of North Canterbury and Otago respectively. The school at Te Kao (Northern Peninsula) was closed at the end of the year on account of the infrequent attendance of pupils; it is not unlikely that a renewed interest may be shown before long, if the necessity of working on the gumfields becomes somewhat less urgent than it has been. The Mangamuka School (Hokianga) also was closed: it is possible that if the building had been a mile or two nearer the principal settlements an attendance such as to justify the continuance of the school might have been kept up. Rotoiti School stands in a district now abandoned, and is consequently disused; but land near Te Ngae has been given and is about to be surveyed as a site for a school that will accommodate the children of several districts on the east of The school at Taita (Kaihu Valley) has been closed, there being Lake Rotorua. no sufficient population at hand; but a new school is to be opened at once at the flourishing settlement of Opanaki, about six miles away, where the Maori people have provided a building for school use.

Two schools that had been closed for some time—Whakarapa (Hokianga), and Te Awahou (Rotorua)—were reopened during the year; and an experimental school at Waiomio (Bay of Islands), which has since failed, was subsidised. The number of schools in operation at the end of the year was 67, including a part-time school at Matihetihe and the subsidised school at Waiomio, but not including the four boarding-schools. Three of the 67 being discontinued at the

end of 1892, the new year began with 64 schools.

Since the year ended, the schools at Ahipara (Mangonui) and Otamatea (Kaipara) have been discontinued, in consequence of diminished attendance; and the schools at Matakohe (Kaipara) and Tangiteroria (Northern Wairoa), having become European rather than Maori schools, are to be closed at the end of June, that the Education Board may be free to act.

One new school has just been opened at Otamauru (Whakatane) with every prospect of success, the Native people having shown their zeal and earnestness by erecting temporary buildings for school and residence. Difficulties with

respect to titles have hitherto stood in the way of progress in the cases of the proposed schools at Parapara (Mangonui) and Te Ngaere (Whangaroa).

For some time past the attendance at Native schools has been declining, while the efficiency of the teachers has been increasing. The payments to the teachers under the Native School Code of 1886 were made to depend much more on efficiency than on average attendance, with the result that the capitation cost came at last to be unjustifiably high. A new code has therefore been issued, which took effect at the beginning of April, 1893, and which establishes a close relation between attendance and cost. It is computed that under the new code the total of the salaries of Native-school teachers will be reduced by more than £2,000.

The teachers receiving salary in the December quarter were—58 masters with salaries ranging between £205 and £51; 9 mistresses (£175 to £52 10s.);

21 assistants (£55 to £10); and 36 sewing-mistresses (at £20).

The number of children on the rolls of the 67 schools in December was 2,113, the average roll-number for the year being 2,218. The average attendance for the December quarter was 1,623, and for the whole year 1,634. The average attendance for the year is 73.7 per cent. of the average roll-number for the year.

The Maori children were 73 per cent. of the number on the roll; the Europeans were 17 per cent.; and the children of mixed race, 10 per cent. boys numbered 1,181, the girls 952. The children below the age of five years were 2 per cent. of the roll-number; 54 per cent. were between five and ten;

40 per cent. between ten and fifteen; 4 per cent. above fifteen.

The expenditure on Native schools (including £70 7s. 11d. received from Native reserves funds) was £14,290 4s., made up of the following items: Salaries and allowances to teachers, £10,929 9s. 3d.; school requisites, £335 9s. 10d.; repairs and small works, £461 19s. 8d.; inspection (including travelling), £637 3s. 8d.; grants to boarding-schools and travelling expenses of scholars.

E.—1. xiv

£1,541 1s. 10d.; buildings, fencing, and furniture, £315 5s. 4d.; sundries, £69 14s. 5d.

In the four Native boarding-schools (of which three are Church of England schools and one Roman Catholic), there were at the end of the year 65 pupils maintained by arrangement with the Education Department, 43 of these being holders of scholarships. At St. Stephen's, Parnell, there were 10 Government pupils and 39 others; at Te Aute, Hawke's Bay, 12 Government pupils and 62 others, of whom 12 were Europeans; at Hukarere (girls' school), Napier, 20 Government pupils and 32 others; and at St. Joseph's (girls' school), Napier,

23 Government pupils and 8 others.

Apirana Turupu Ngata is a standing evidence of the efficiency of the instruction provided for the young people of the Maori race. Apirana was, as a small boy, a promising pupil of the Native school at Waiomatatini, in the Waiapu district. He was sent to Te Aute College, a boarding-school for Maoris, and while he was there he passed the matriculation examination of the New Zealand University. The Trustees of the Te Makarini Scholarships Fund then gave him an extra scholarship tenable at Canterbury College, and at the end of last year he passed the first section of the examination for the degree of LL.B. essay from the pen of Apirana has been published in a Christchurch newspaper, and since published in pamphlet form, with the title "The Past and Future of the Maori. The essay is an able one, and displays a considerable command of the English tongue. With vigorous declamation he declares that the teachers set a bad example in matters of health, morality and religion, and that Minister after Minister neglects to make inquiry as to their qualifications. It is scarcely necessary to say that frequent and careful investigation is made with respect to their qualifications, and that, if Apirana has any sufficient ground for making this attack, the facts on which it is based are not known to the department. He has been asked to render the department a great service by disclosing the facts, but declines to do so. He acknowledges that the charges are "exaggerated, and founded on too limited an experience," and intimates that, if his choice must lie between supplying information to substantiate them and unreservedly withdrawing them, he prefers to withdraw them unreservedly.

The Inspector's report is printed as a separate paper (E.-2).

INDUSTRIAL SCHOOLS.

The number of "inmates" of industrial schools was 1,492 at the beginning and 1,489 at the end of the year. The admissions were 225; the discharges were 228. The annual number of admissions, which fell from 340 in 1885 to 158 in 1890, has now been rising for two years. This rise has not augmented the number of children maintained by the schools; on the contrary, the number of resident inmates has declined in the two years from 544 to 527, and the number of boarded-out children from 427 to 419. The number of young people licensed to employers or friends has increased during the same period from 454 to 508. The principal changes in the numbers for 1892 appear in Table T.

The number 543 ("at service, &c.") is made up as follows: 391 at service; 117 licensed to friends; 15 absent without leave; 5 at Costley Institute on probation; 3 in hospital; 3 in lunatic asylums; 2 in blind asylum; 6 in refuges;

1 in prison.

The cases admitted (225) may be classified in different ways. As to the ostensible causes of admission, 118 were destitute, 11 vagrant, 46 were living in disreputable places, 11 were uncontrollable children, 4 were admitted by arrangement with their relatives, 35 were convicted of offences. As to the parentage, it may be deduced from Table U that in 43 cases both parents were of unsatisfactory character; that in 97 cases one or other of the parents—the father in 43 cases, the mother in 54—was not of good character; that 53 cases were, so far as known, cases of simple indigence; and in 32 cases there are no data on which to base an opinion. As to religious profession, 101 belong to the Church of England, 78 are Roman Catholic, 39 Presbyterian, 5 Methodist, 1 Baptist, 1 Hebrew.

The 228 discharges include 5 deaths: at Nelson Industrial School, a girl between eight and nine died of brain fever and worm fever; a girl of eighteen, placed at service from Burnham, died of typhoid fever; a boy of eighteen, placed at service from Caversham, also of typhoid; a boy of nearly fifteen, at Caversham, of epileptic convulsions and coma; and an infant, boarded out from Caversham, died at the age of one year, of bronchitis. The discharges by warrant of His Excellency the Governor numbered 204; by transfer to Costley Institute, 10; by marriage, 2; by attaining the age of twenty-one, 7.

TABLE W.—Cost of Government Schools, 1892.

The expenditure on the Government schools (Table W) is rather less for 1892 than for 1891. The net cost (to the Government) is less by £2,200, the alteration being in great part due to the payment by Charitable Aid Boards of large sums that were in arrears. If the gross outlay (£15,512) is divided by the average number on the school-rolls (1,137), the capitation cost is about £13 13s., and the net cost (to the Government) is about £5 19s. Another calculation is as follows: If from the gross outlay is deducted the amount of salaries, rent, and insurance (regarding these items as a fair equivalent for services rendered in connection with young people not maintained by the schools, but placed at service or with friends), and if the remainder (about £12,900) is divided by the average number of children living in the schools or boarded out (652), the capitation cost is about £19 15s.

The Government expenditure on "private" schools (Table X.) is rather larger for 1892 than for 1891, the increase being accounted for by the growth of the schools.

TABLE X.-GOVERNMENT EXPENDITURE ON PRIVATE SCHOOLS, 1892.

The Auckland Industrial School for Boys at Kohimarama has—from some cause or causes not exactly known—been dwindling for some years. The Costley Institute was intended to relieve this school of the care of its most promising inmates, and is accomplishing its purpose (see separate paper, E.-3A). The number of commitments to the school of late years has been very small. The capitation cost of a very small school is necessarily very high, and from that point of view is obnoxious to adverse criticism. On all grounds it has been deemed expedient to close the school, the few inmates that could not be suitably disposed of in Auckland being transferred to Burnham. The institution is not, however, abolished; the manager of the Auckland Girls' Industrial School has been made manager also of the boys' school, and is therefore the legal guardian of the Kohimarama inmates now at service, or boarded out, or licensed to their friends.

Some additional information with respect to industrial schools will be found in a separate paper (E.-3).

DEAF-MUTE INSTITUTION.

The number of pupils at the Sumner school at the end of 1891 was 50; by the end of 1892 it had declined to 46. The expenditure for 1892—£3,447—is less by £172 than that of the preceding year; the contributions made by parents—£493—exceed those of 1891 by £169. A change has been made in the management, in conformity with the recommendation of a Commission, after inquiry held last November. A steward and matron have been appointed, and the housekeeping expenses are directly defrayed by the Education Department; and the arrangement under which, according to the agreement made with him in England, the Director received a capitation payment for the board of the pupils has been cancelled. The items of the expenditure for 1892 are: Salaries, £1,259; board of pupils, £1,520; rent, £399; travelling, £33; Commissions of Inquiry, £75; sundries, £161. (See Paper E.-4.)

THE BLIND.

As stated in last year's report, the blind pupils formerly sent to Melbourne and Sydney have been recalled. Nine of them, with eleven other pupils, have been maintained at the Jubilee Institution for the Blind in Auckland. One pupil having left in 1892, the number at the end of the year was 19. For necessitous cases approved by the Government the Education Department pays at the rate of £25 a year each, recovering a part of the cost from the parents if possible. The outlay on this account was made during the first part of 1892 from the Charitable Aid vote, as in former years, but from the 1st April, 1892, it is borne on the Education estimates. Without taking into account the sums paid as subsidy under the Hospitals and Charitable Institutions Act (£1,655), the Jubilee Institution received from the Charitable Aid vote and the Education Department in 1892 grants amounting to £442 1s. 7d. Sundry travelling expenses defrayed by Government are not included here.

University and Colleges.

The report (E.-5) of the Chancellor of the University of New Zealand shows that the number of graduates by examination is now 373, and that the degrees

xvii E.—1.

obtained at the last examination were—D.Sc., 1; LL.D., 1; M.A., 28; B.A., 35;

B.Sc., 4; LL.B., 4; M.B., 4.

The students at affiliated colleges (see E.-6, E.-7, E.-8) were as follows: Auckland University College, 80 men (including 39 not matriculated), and 57 women (41 not matriculated); Canterbury College, 165 men (59 not matriculated), and 180 women (100 not matriculated); Otago University, 177 men (32 not matriculated), and 36 women (5 not matriculated).

SECONDARY SCHOOLS.

The reports of secondary schools are in a separate paper (E.-9). Their current income from endowments in 1892 was £25,868, and from school-fees £20,766; and the salaries amounted to £28,567. The advance in the number of pupils, which last year was referred to as indicating the turn of the tide, is still maintained. The most important statistics are set forth in Table Y.

·Reserves under "The University Endowment Act, 1868."

The accumulated income from these reserves, which is applicable to the purposes of higher education in such manner as the General Assembly may direct, was, at the end of 1892, as follows: In Taranaki, £489 0s. 11d.; in Westland, £155 12s. 6d.; in Canterbury, £971 1s. 4d.

CIVIL SERVICE EXAMINATIONS.

The examinations required by "The Civil Service Reform Act, 1886," were held in January, at the same time and under the same arrangements as the examinations for teachers' certificates (see paper E.-1a). There were 230 candidates for the Junior Examination, and 64 for the Senior.

Table No. 8.

List of the Public Schools in the several Education Districts, with the Expenditure for the Year 1892, and the Names, Status, and Emoluments of the Teachers as in December, 1892.

Nore 1.—Every couple of half-time schools is bracketed, and is reckoned as one school in the consecutive numbering.

Note 2.—In the column for "Position in the School" "M" and "F" distinguish sex; "Pr." means Principal of a school having departments, with a head-teacher for a department; "D," head of a department; "H," head of a school; "M" or "F" (standing alone), sole teacher; "A," assistant teacher; "P," pupil-teacher; and "S," sewing-teacher.

REPORTS OF EDUCATION BOARDS.

AUCKLAND.

Auckland, March, 1893.

In accordance with section 102 of "The Education Act, 1877," the Board presents the following

report of its proceedings for the year 1892:-

Board.—At the annual election in March, 1892, Mr. Buckhurst and Mr. Luke were re-elected, and Mr. J. L. Kelly was elected to fill the seat vacated by Mr. Lennox. Mr. Kelly resigned his seat in September, and Mr. Henry Wilding was elected in November to fill the vacancy. Twenty-seven meetings of the Board were held during the year, with an average attendance of seven members. One meeting lapsed for want of a quorum. An executive committee, consisting of the whole Board, held seventeen meetings, with an average attendance of four members. The members of the Board who retire in March, 1893, are Messrs. Cooper, Moat, and Udy. They have been re-elected.

Public Schools.—There were 289 schools in operation at the end of the year, including eighteen half-time schools. New schools have been opened at Buckland, Greenhithe (Lucas Creek), Hukerenui West, Kirikiri (Thames), Mangawhara, Pakiri, Pongakawa, Port Charles, Riverhead, Sandspit (Wairoa), Tara Road (Mangawai), Taupaki (Woodhill), Te Akatea and Waingaro, Te Rangi (Whangamarino); total, fourteen. The Karaka (No. 2) aided school was closed in August, owing to decreased attendance. Sixty-seven schools in this district—i.e., 23 per cent. of the whole number—have an average attendance of less than twenty scholars.

Teachers.—The number of teachers has increased from 667 to 728, classified as follows:—

				Male.	r'emale.	Total.
Head teachers	,	 		176	104	280
Assistant teachers		 		27	120	147
Pupil-teachers	•••	 	• . •	69	186	255
Sewing teachers		 			46	46
				-		
Totals		 		272	456	728

All teachers above the rank of pupil-teachers are certificated, except ten who are classified

partial E, and six who are not yet classified.

During the course of the year sixty teachers have left, and 124 have entered or rejoined the service. Of the sixty who left, twenty were teachers in charge of schools, twenty were assistant teachers, and twenty were pupil-teachers. Of the 124 who entered or rejoined the service, ninety-seven entered as pupil-teachers, and twenty-seven above that rank.

The following table shows the result of the annual examination of pupil-teachers and candi-

dates for employment held in June, 1892:—

Class.	I	Examiı	ned.		Passe	d.	Failed.				
Candidates for employment Pupil-teachers, first year Pupil-teachers, second year			M. 39 18 11	F. 109 58 31	Total. 148 76 42	M. 25 11 10	F. 59 46 29	Total. 84 57 39	M. 14 7 1	F. 50 12 2	Total. 64 19 3
Totals	•••		68	198	266	46	134	180	22	64	86

All the candidates who qualified have received employment, excepting four who have not yet reached the minimum age of fifteen. Candidates who have passed the University matriculation or senior Civil Service examination are admitted to the rank of third-year pupil-teachers after serving a probation of three months; and, similarly, candidates who have passed the junior Civil Service examination are admitted as first-year pupil-teachers. At the end of the year there were twenty-five ex-pupil-teachers fully certificated waiting promotion to higher rank. All but eight of these have since been promoted.

ATTENDANCES.—The following table shows the increase in the attendance of scholars:—

Period.	Number of Schools.	. 1	Roll-number	:.	Average Attendance.					
1901	289 276	Males. 12,044 11,687	Females. 11,427 11,062	Totals. 23,471 22,749	Males. 9,713 9,666	Females. 9,127 9,014	Totals. 18,840 18,680			
Increase	. 13	357	365	722	47	113	160			

The average attendance was 82 per cent of the roll-number. At the end of December, 1892, there were 546 scholars above school-age, and 397 who had passed the Sixth Standard.

Scholarships.—Fifty-two scholarships—seventeen senior and thirty-five junior—were held during the year. Of these, forty-one were held at the Auckland College and Grammar School, seven at the Thames High School, and four at private schools which had been placed under inspection in accordance with the requirements of the Act.

accordance with the requirements of the Act.

Finance.—The receipts from all sources amounted to £95,462 19s. 9d., including a balance of £16,359 8s. 5d. brought forward at the beginning of the year. The total expenditure during the year was £79,678 12s. 3d., leaving a balance of £15,784 7s. 6d. unexpended at the end of the year. A sum of £3,000 was transferred from Maintenance Account to the Building Fund in order to provide for liabilities incurred in building teachers' dwellings. There still remained a net balance of £5,000 at the credit of Maintenance Account, after providing for all liabilities thereon, at the 31st December, 1892. The parliamentary grant of £5,350 for school-buildings was wholly inadequate to meet the demands arising through the extension of settlement in country districts. The statutory capitation grant of £3 15s. for each child in average attendance was applied as follows: On teachers' salaries, £3 2s. per head; on grants to Committees for incidental expenses and repairs of buildings, 7s. 2d. per head; on inspection and examination of schools, 2s. per head; on departmental management, 2s. per head; balance unexpended, 1s. 10d. per head. An increase has been made in the scale of allowances to School Committees. The scale of teachers' salaries is under revision.

Buildings.—The requirements of this district are many and urgent. Buildings are required for eighteen schools which are now housed in temporary buildings. Sixty schools (having an average attendance of over twenty each) are without teachers' dwellings, and in sixty-six smaller schools no residences are provided for the teachers. The cost of building eighteen schools and sixty dwellings, at the moderate estimate of £200 for each building, would be more than £15,000, or nearly three times the yearly amount derived from the parliamentary grant for school-buildings, without leaving anything available for new and contingent requirements. Unless, therefore, some special provision be made, Auckland can never attain to an equal footing with other districts of the

colony in regard to school-buildings.

MISCELLANEOUS.—The Board regrets to have to report more than one instance of irregularity on the part of teachers in the marking of school attendance during the year. The Inspectors are required to examine the registers on the occasion of their visits to the schools and to report any irregularity which may come under their notice. But the Board relies chiefly on the sense of honour in its teachers for a strict and loyal adherence to the regulations under which the school registers are to be kept. In connection with this matter, the Board would recommend a return to the system of "working average," as representing more accurately the normal attendance of scholars.

The Board gratefully acknowledges the co-operation received from the School Committees and Commissioners throughout the district in carrying out the necessary regulations for the conduct of school matters, and in exercising a general supervision over the school property.

Samuel Luke, Chairman.

TARANAKI.

Sir,—

Taranaki Education Board, New Plymouth, 10th April, 1893.

In the terms of "The Education Act, 1877," I have the honour to transmit the report of the Education Board for the year ending 31st December, 1892.

The Board.—At the annual election in March the retiring members were Miss Heywood and Messrs. John Andrews and R. G. Bauchope. Miss Heywood and Mr. Bauchope were re-elected,

59

and Mr. E. G. Allsworth was elected in the place of Mr. Andrews. The Board then consisted of the following persons, viz.: Mr. T. Kelly (Chairman), Miss Heywood, Messrs. G. A. Adlam, E. G. Allsworth, R. G. Bauchope, H. Faull, E. Olson, D. Teed, and J. Wade. Mr. Kelly was re-elected Chairman for the year. The Board held twenty-four ordinary and one special meeting during the year, and the attendance of members has been as follows, viz.: Mr. Kelly, 21; Miss Heywood, 22; Mr. Adlam, 23; Mr. Allsworth, 18; Mr. Bauchope, 23; Mr. Faull, 24; Mr. Olson, 21; Mr. Teed, 16; and Mr. Wade, 24.

Schools.—There were forty-five schools in operation at the beginning of the year, and one has

been opened—viz., the Rowan Road School—making the total of schools now open forty-six.

Teachers.—The number of teachers in the employ of the Board was 108, classified as follows: Head-teachers, 31 males, 16 females; assistant teachers, 3 males, 8 females; pupil-teachers, 4 males, 23 females; sewing-teachers, 23 females: total, 38 males, 70 females.

Notwithstanding the fact that the Board cannot offer the same scale of salaries to teachers as other Education Boards where population is more dense, it is satisfactory to find, from the Inspector's report and the Board's knowledge, that the quality of the education now given in the Board's schools is gradually improving, and the acquirements of the children in the essentials of primary education are not below those of other education districts. This is owing to the fact that the staff of teachers now employed by the Board is more efficient, and that the majority of the teachers take a deep interest in the very important work which is committed to their charge—a work of great responsibility, and one in this district attended with many difficulties and discouragements.

Drawing.—It is satisfactory to find that drawing, the basis of all technical work, is gradually assuming an important position in school teaching. So long as the elementary drawing taught is of a practical character, calculated to teach the hand and the eye to work in harmony, it will be found to be of great advantage in after life on the farm, in the workshop, and the manufactory, helping to make skilled workmen and workwomen, by giving them a truer conception of the form and shape of material things, and creating a new faculty by stimulating invention.

ATTENDANCE.—The roll-number on the 31st December, 1891, was 2,997; on the 31st December, 1892, the number had increased to 3,148, an addition of 151, the result of an increase of population in The average attendance of 1891 was 2,094, equal to 72 per cent. on the roll, as against 2,351 for 1892, equal to 74.6 per cent., showing an increase of 2½ per cent. in the attendance of This improved attendance is no doubt due to the active efforts of some of the School Committees to enforce the compulsory attendance clauses of the Education Act. The increase is specially noteworthy, as the past year has been distinguished for its excessive rainfall through every month of the year, averaging in the bush districts, where population is now rapidly extending, about 100in. for the year; and where the so-called roads are but extended mud-holes, effectual barriers to school attendance on the part of young children for many months in the year.

Scholarships.—Two scholarships in Class A and four in Class B were awarded by the Board during the year. One of the candidates in Class A declined to take up the scholarship awarded. The annual payments on account of scholarships for the year was £125 11s. 3d.

Buildings.—The Board has, during the year, built a new school at Rowan Road, a teacher's residence at Fitzroy, and made additions to the Norfolk Road and Midhirst Schools. The attendance at the Stratford School, which is the centre of a district which is rapidly increasing in population, filled the school to overflowing, and forced the Board to anticipate the building grant for 1893 to make an addition to the school, which now accommodates 250 children. This addition is now complete, but it is possible that still further school accommodation will be required during the present year.

Owing to the small building grant received—a sum altogether inadequate to meet the requirements of the district and the rapid extension of settlement—the Board has been unable to comply with the demands of several out-districts for school-buildings, and has also been compelled to refuse to build cottages for the necessary accommodation of teachers where no house can be procured. It is evident to the Board that the Legislature, having undertaken the duty of providing for the primary education of the children of the colony, should seriously consider the case of those persons who take up the arduous work of extending settlement, and see that their children receive at least equal chances of obtaining the elements of education that are afforded to urban populations.

In order to overcome the difficulties which surround pioneer settlement, such as a sparse population and the absence of good ordinary roads, the Board must necessarily provide a larger number of small schools in bush districts compared with what would be deemed necessary in older-settled districts. If such a policy is not adopted a large proportion of the children living in such districts must, as a matter of fact, grow up without education. Such a result should, if possible, be prevented, and a special remedy should be applied in order to meet this special evil. has before represented that the distribution of the building grant on a population basis is not calculated to meet the requirements of districts where small settlements in the bush are extending rapidly, and, in the absence of any special vote, requested that the rents of educational lands within the district should be given to the Board to meet the urgent wants of the settlers. The Board considers the request to be a reasonable one, and again respectfully urges the Minister to give the matter the serious consideration which its importance demands.

School Committees.—The School Committees of this district now number thirty-two, and, as a general rule, to each new school is allotted a school district and a Committee of local management. This system involves more work, but it has the advantage of securing persons as Committeemen who take an interest in school work, and it affords a wider electoral basis for the election of members of the Board. The school is also more likely under such a system to receive that special attention to its local wants which it is the duty of School Committees to provide. The total payments made by the Board to the various School Committees in aid of revenue during the

year by way of capitation and special grants was £701 11s. 3d.

REVENUE AND EXPENDITURE OF THE BOARD.—The revenue of the Board from all sources for the year, including the balance of £1,855 14s. 10d. over from last year, was £11,583 13s. 5d., and the expenditure £10,050 7s. 1d., leaving a credit balance of £1,533 6s. 4d., against which, however, there were liabilities amounting to £1,119 14s. 1d.

THOMAS KELLY, Chairman.

The Hon. the Minister of Education.

THOMAS KELLY, Chairman. E. VEALE, Secretary.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

WANGANUI.

Sir,— Education Office, Wanganui, 6th March, 1893.

In compliance with the provisions of the Education Act, I have the honour to submit my report of the proceedings of this Board for the year ending the 31st December, 1892.

Board.—The members who retired by rotation in December, 1891, were Mr. Gilbert Carson (Chairman), Mr. J. N. Fry, and the Rev. J. Ross, and they were all re-elected. The Board now consists of Mr. G. Carson (Chairman); Mr. Henry Sanson, of Campbelltown, Sandon; Mr. George S. Bridge, of Waverley; Rev. John Ross, of Turakina; Mr. James W. Baker, of Warrengate; Mr. J. N. Fry, of Makino; Mr. John Notman, of Wanganui; Mr. G. A. Hurley, of Manaia; and Mr. R. E. Beckett, of Marton. The Board has met regularly on the last Monday and Tuesday in each month, and has been much assisted in the interim by the executive committee, consisting of the town members—Messrs. Carson and Notman—and Mr. James W. Baker, of Warrengate.

Schools.—At the end of 1892 there were ninety-five schools in operation in this district, with a roll-number of 8,393, and an average attendance of 6,365, being an average of 75.08 per cent. of the roll-number. This, although low, is an improvement upon the last quarter of 1891, which was 72.18. The June return showed an unusual falling-off in the average attendance, owing to the severe effects of the influenza, several schools being closed, whilst the attendance at others was very considerably reduced. With a view of increasing the average attendance, the Board obtained the sanction of the proper authorities to use the police as truant inspectors, and, in order to enlist their sympathies in the work, decided upon a scale of payments where an increase was shown. The plan has not as yet been long enough in operation to test its efficacy, but, as the compulsory clauses of the Act are inoperative, the Board hopes that the scheme may be useful.

Teaching Staff.—The schools are at present staffed by exactly 200 teachers, consisting of 107 males and 93 females, including five probationers, besides a number of cadets. Of the 200 teachers, thirty-eight are head male teachers, three are head female teachers, thirty-nine are male teachers in sole charge of schools, fifteen are female teachers in sole charge of schools, twelve are male assistants and twenty-two are female assistants, eighteen are male junior assistants and pupil-teachers, and fifty-three are female junior assistants and pupil-teachers. During the year the Board has found it necessary to use every effort to promote the junior assistants who have been trained in their service either to the charge of country schools or to assistantships in large schools.

School Districts.—New school districts have been formed at Hurleyville, Awatuna, and Nikau, and the boundaries of a large number of others have been readjusted and gazetted. This

work entailed a considerable amount of trouble on the part of the Board members.

School-buildings.—New schools have been erected at College Street, Palmerston North, Awatuna, Hurleyville, Ratanui, Kiwitea, and Aratika; and extensive additions have been made to the buildings at Eltham, Hawera, Jackeytown, Ashurst, Hunterville, Karere, and Colyton. New residences have been erected at Awatuna, Jackeytown, and Otakeho; and repairs have been made to buildings at Brunswick, Okaiawa, Sandon, Foxton, Patea, Kapuni, Stony Creek, Mount View, Mosston, Denlair, and Taonui. Grants have also been made to Committees for repairs to fences and school sites in various parts of the district. New schools are now very urgently required at Ohingaiti, Taikorea, Nikau, Westmere, Meremere Road, Whareroa, Kohi, and Onga. A large

number of new residences are also urgently needed, as well as repairs to the old ones. Apart from these works, which are of a very urgent nature, a large proportion of the buildings require painting in order to preserve them from decay, but the Board is quite unable to undertake these important works for want of funds. The new school erected at Palmerston North is one of the finest in the district, but the Board has not been able to complete the surroundings. These and other minor works of a pressing nature demand their early attention as soon as Government can supply them with funds for the purpose.

Technical School.—The Board has erected a suitable building for a technical school in a central position, on the corner of the infants' school site, Victoria Avenue, Wanganui, and has furnished it with a complete set of casts and apparatus. They have also obtained a decree of the Supreme Court to enable them to use the Rees bequest to supplement the funds for carrying on this work. The first term began in September last, when a prospectus was issued setting forth full particulars of the instruction to be given. It is contemplated to use only the interest of the bequest, which, with the moderate fees to be charged, it is hoped will cover all expenses. Mr. David Blair, F.L.S., was appointed art master, and the Board hopes that this useful institution may be largely taken advantage of by teachers, pupils, and the general public. I append a short report from the art master.

Scholarships.—The annual competition for the Board's scholarships was held in June last, when the following awards were made: To F. Martin, of the Hawera School, George McFarlane, of the Hawera School, May Sutherland, of the Warrengate School, and Margaret Dive, of the Hawera School, each a scholarship of £40 a year, tenable for two years; to Maggie Gordon, of the Wanganui Girls' College, one of £36 a year, tenable for two years; and to H. Bertram, of the Wanganui Boys' School, one of £17 10s. a year, tenable for two years. The annual examination of pupil-teachers was held also in June, simultaneously with the scholarships. For the First Class 7 were examined, and 6 passed and 1 failed; for the Second Class, 18 were examined, 15 passed and

Wanganul Boys School, one of £17 10s. a year, tenable for two years. The annual examination of pupil-teachers was held also in June, simultaneously with the scholarships. For the First Class 7 were examined, and 6 passed and 1 failed; for the Second Class, 18 were examined, 15 passed and 3 failed; for the Third Class, 30 were examined, 18 passed and 12 failed.

Finance.—The statement of receipts and expenditure for the year, with the assets and liabilities, are herewith appended. Although Return No. 4 shows a credit balance of £487 8s. 3d. on the Building Account, and £704 13s. 4d. on the General Account, there is actually a large debit balance. Return No. 6, the statement of assets and liabilities, shows that there is a debit balance of £271 0s. 11d. on the General Account, and £1,192 7s. 9d. on the Building Account, making a total indebtedness of £1,463 8s. 8d. at the end of the year. In order to meet the heavy call made upon them for building, the Board transferred a further sum of £2,000 (making £6,000 in all) from the General to the Building Account during the year, but the above liability remains notwithstanding. The Board would especially direct your attention to these facts, and would point out that settlement is spreading so fast along this coast that the demands made upon them are altogether beyond the means at their disposal, with the result that they are placed in a most unenviable and anomalous position, not only in being involved in debt without the means to meet their liabilities, but also from the fact that they are obliged to refuse daily urgent demands made upon them by settlers and School Committees in all parts of the district.

For particulars respecting the state of education in this district I beg to refer you to the Inspectors' report.

I have, &c.,

The Hon. the Minister of Education.

GILBERT CARSON, Chairman.

GILBERT CARSON, Chairman. A. A. Browne, Secretary.

TECHNICAL SCHOOL.—REPORT OF THE ART MASTER.

Sir,— Wanganui, 13th March, 1893.

I have the honour to submit the following report in connection with the above school

during the year 1892.

The school was opened on the 20th September, immediately the building was completed. The arrangement of rooms is found to answer in every respect the requirements of the work at present, but the lighting for evening work is not so satisfactory as it might be. This is generally found to be a difficulty in rooms for art work, which is only overcome by experience in each case. I hesitate to suggest the "Onslow" lamps (such as is used in the Board room) because of the first cost, but I find that by recent improvements this will be almost saved in two years by reason of the reduced cost of gas consumed, apart from the fact that they are much better adapted to the requirements of the work.

As the school opened on the 20th September, the students were only at work during the last term of the year. The casts and appliances, which were expected from London in time for the opening, did not arrive during the term, so that the work was carried on at a considerable disadvantage. The few examples and models provided by the Board, however, enabled a beginning to

be made in all classes.

The numbers of students who attended the different classes during the term were as follows: Morning—drawing and painting, 7. Evening—drawing and painting, 16; engineering, 3; architecture, 3; arithmetic, 8; shorthand, 11. Saturday art classes for teachers and pupil-teachers under the Board, 50. Girls' College, painting class, 4. Total, 102.

Although some very creditable work was done by students attending the morning and evening art classes during the three months we were open, I thought it advisable, as the studies were all of an elementary nature, and the casts had not arrived from London, to postpone the public exhibition

of students' work till the end of 1893.

The small number of students who joined the engineering and architectural classes is due, I think, partly to the fact that many who would have joined the classes did not know of their existence, and that others who did were not prepared to go through the preliminary course of free-hand and geometry required by the syllabus of their work. A more liberal system of advertising in the local newspapers, together with leaflets in connection with each subject for distribution to the apprentices and men in the workshops, would, I think, be the means of increasing the attendance. The preliminary freehand and geometry, although highly advisable, might be incorporated with the technical drawing connected with the work of these classes.

The attendance of fifty at the Saturday art class for teachers, between 12 and 3, was more than I could instruct unaided. I therefore took the town teachers from 10 to 1, and the country teachers from 12 to 3; the hour common to both classes—namely, from 12 to 1—being devoted to lectures on second grade, perspective, and geometry. From 1.30 to 2.30 was devoted to lectures on the work as required by the primary-school syllabus—namely, Standards I. to VI., freehand; Standard IV., plane geometry; Standard V., scale drawing; Standard VI., solid geometry and model drawing.

I have, &c.,

The Chairman of the Wanganui Education Board.

DAVID BLAIR, Art Master.

WELLINGTON.

Sir,— Wellington, 31st March, 1893. In accordance with section 102 of "The Education Act, 1877," I have the honour to

present the following report for the year ending 31st December, 1892:—

Board.—At the commencement of the year the Board consisted of the following members: Messrs. J. R. Blair (Chairman), G. Beetham, W. C. Buchanan, A. W. Brown, F. H. Fraser, W. W. McCardle, Dr. Newman, Rev. J. Paterson, and J. Young. On the 31st March Messrs. J. R. Blair, G. Beetham, and Dr. Newman, who retired by rotation, were re-elected, no other candates being nominated. An extraordinary vacancy occurred in consequence of the resignation of Mr. Brown. Two candidates were nominated to fill the vacancy, and the voting resulted in the election of Mr. W. A. Fitzherbert. Twelve ordinary and two special meetings were held during the year, with the following attendance of members: Mr. Fraser, 14; Dr. Newman, 14; Mr. J. R. Blair, 13; Rev. J. Paterson, 12; Mr. Young, 11; Mr. Beetham, 10; Mr. McCardle, 10; Mr. Fitzherbert, 7; Mr. Buchanan, 5; Mr. Brown, 1.

A thorough examination of all accounts is made by the Finance Committee before each monthly meeting. Matters affecting the Technical School are dealt with by the Special Committee, but the business does not call for regular meetings. At the first meeting after the election of the three retiring members, Mr. J. R. Blair was unanimously elected Chairman, and the following standing committees constituted: Finance—Dr. Newman, G. Beetham, F. H. Fraser, Rev. J. Paterson; Technical School—G. Beetham, F. H. Fraser, Dr. Newman, J. Young; Pupil-teacher Selection for City, Hutt County, and West Coast—G. Beetham, F. H. Fraser, J. Young; Pupil-teacher Selection for Wairarapa—G. Beetham, W. C. Buchanan, and W. W. McCardle: the Chairman to be ex officio

a member of each Committee.

Schools.—At the close of the year there were eighty-seven schools in operation, with 11,846 children on the books, an increase of 671 on the previous year's numbers. Of these, 162 were Maoris. For the purpose of classification these schools are arranged as follows: Under 15 pupils in average attendance, five; 15 and under 20 pupils, ten; 20 and under 25 pupils, seven; 25 and under 50 pupils, twenty-four; 50 and under 75 pupils, ten; 75 and under 100 pupils, six; 100 and under 150 pupils, eight; 150 and under 300 pupils, seven; 300 and under 500 pupils, seven; 500 pupils and upwards, three. Of these, eleven were aided schools.

The teachers in the Board's service were: Heads of school—male, 42; female, 9: total, 51. Sole teachers—Male, 16; female, 20: total, 36. Assistants—Male, 28; female, 47: total, 75. Pupil-teachers—Male, 12; female, 116: total, 128. Sewing-teachers—Female, 8. Total, 298.

New schools were opened at Hawera, Mangamahoe, Kaituna, and Newman.

New buildings were in course of construction at Mauriceville East, Masterton (Infant School), Makara, and Te Aro (Infant School), and additions were being effected at Levin and Vogeltown. Contracts were let for new schools at Hawera, Rangitumau, Cross Creek, Tokomaru, and Te Horo, but, beyond putting the timber on the ground for the purpose of becoming seasoned, no progress had been made in the erection of either of these up to the close of the year.

In compliance with the requirements of the amended regulations of the City Council, the whole of the drainage of each of the city schools has been thoroughly overhauled, and efficient traps and ventilation provided. The sanitary arrangements of these schools are now carried out, in every instance, in the most complete manner possible, and in strict accordance with the improved modern sanitary arrangements. An agreement has been made with the City Council, under which, for a fixed annual sum of £50, no less than 2,400,000 gallons of water are available yearly for flushing purposes within the city boundaries; beyond this quantity payment is made by meter at a reasonable rate.

Outside of the ordinary capitation grant made to School Committees for maintenance and petty repairs, it has been found necessary during the year to meet considerable demands which could not

fairly be charged against the Board's share of the special grant for school-buildings.

Pupil-teachers.—At the December examination of pupil-teachers seventy-seven candidates came up. Of all, ten failed to obtain promotion, two on account of age only; four who had not held appointments for six months were not counted as failures, four only being counted as failures. Three pupil-teachers had to retire on account of unsatisfactory work. The seventy-four pupilteachers now in the Board's service are classified—Fifth year, 19; fourth year, 15; third year, 23; second, year, 14; first year, 3.

Scholarships.—The usual annual scholarship examination was held in the month of October;

123 candidates were examined in all—seventeen from the Wairarapa, twenty-seven from the country

districts, and seventy-nine from the city schools.

In accordance with the results of the examination, the following scholarships were awarded: City, [six boys, four girls]; Wairarapa, [two boys, one girl]; country districts, [one boy, three girls].

TECHNICAL SCHOOL.—This department has undoubtedly increased its usefulness during the

year. The number of students is now over four hundred. The examinations have shown proof of a very much higher value in work than in previous years. This is, no doubt, largely owing to the improved accommodation and facilities provided by the Board. In English examinations especially the success is marked, the report showing that out of forty-five works done at the personal examination only two failed, and in geometrical drawing also in the Central School there was only one failure.

The school has now been affiliated to the City and Guilds of London Institute for the Advancement of Technical Education, and any section of technical work may now be examined and certificates awarded by that institution. Prizes and periodicals have been freely contributed by the trades, and by private persons interested in the successful working of the school.

During the past year 5,343 papers were submitted for the local and South Kensington ex-

aminations, and 2,921 certificates were issued.

Inspection.—From the annual report of Messrs. Lee and Fleming it will be seen that steady and satisfactory increase is shown in the work of the upper standards, the condition throughout being generally progressive.

COMMITTEES.—As in past years, the relations between the Board and Committees have been most cordial. A great measure of the success of the year's work is undoubtedly due to the earnest work of the School Committees.

I have, &c.,

The Hon. the Minister of Education.

J. R. Blair, Chairman.

REPORT OF THE DIRECTOR OF THE TECHNICAL SCHOOL.

Wellington, 27th March, 1893. SIR,-I have the honour to submit my report upon primary drawing and the work of the Technical School for 1892, as follows:

Primary Drawing.

Satisfactory progress has been made during the year in primary drawing. A larger number of schools were visited than in the previous year; information has been afforded the staff generally upon methods and matter in connection with drawing wherever it was requisite. The schools are well supplied with appliances necessary to enable them to comply with the requirements of the syllabus. A copy of the report made after my visit to each school has this year been supplied to each head teacher. Class use of the small set of models as supplied to the schools has, I think, done a great amount of good. Giving, as it does, a sound basis for future work, these early lessons in geometric form will be found invaluable in plane and solid geometry and model drawing.

FIRST-GRADE DRAWING EXAMINATION.—In this examination the following were the results: The total number of papers issued was 5,036; and the number worked 4,487. Subdivision of papers: Freehand—785 passed, 898 failed; geometry—866 passed, 660 failed; scale—593 passed, 309 failed; model—169 passed, 207 failed: total—2,413 passed, 2,074 failed.

Of the above papers, 475 were taken by schools not under the Wellington Board, and 281 passes were recorded. Number of papers excellent—Wellington District, 351; outside schools, 41: total, 392. Number of papers good—Wellington District, 254; outside schools, 32: total, 286. Individual candidates—Wellington District, 2,705; outside schools, 255: total, 2,960. Individual passes—Wellington District, 1,662; outside schools, 189: total, 1,851. Schools presenting can-Individual didates, 83.

Increase upon 1891—Papers worked, 737; papers passed, 510; individual candidates, 415;

individual passes, 172; schools presenting candidates, 18.

The constantly-increasing interest in this examination, and the results obtained, show its value in connection with the system of education adopted by your Board. Already its effects are apparent in the students attending the evening technical classes, who, in a great measure, hold some or all of the first-grade certificates, and can therefore, upon entering the central school, pass more readily to the special work in connection with their daily employment.

The sound practical work done in the first-grade drawing in the schools of this district will be invaluable from a commercial point of view, and the teachers are to be congratulated upon the

earnest manner in which they have worked, and the results they have obtained.

As showing the appreciation in which the system is held, applications have been made from fifteen schools outside the Wellington District, these schools being from the Wanganui, Westland, Greymouth, and Marlborough Districts, and the Art School, Palmerston; and it is proposed by some of these centres to establish the system as far as possible throughout their own districts. It will be seen by the summary that 475 papers were taken by these outside schools, and that 281 passes were

In the freehand papers, proportion was the cause of failure in the larger number of cases; the nod of blocking-in also requires careful attention. The geometrical papers have given conmethod of blocking-in also requires careful attention. clusive proof that the syllabus in geometrical drawing recently issued can be readily accomplished in ordinary class work in the schools. Neater working is necessary in a large number of schools. The scale papers were generally good, and the model drawing shows marked progress. In the latter subject, attention is urged to the drawing of the ground-plan of the objects as they rest upon the board.

Attention was called in the separate report upon the examinations to the necessity for greater care in the selection of candidates, and the filling-in of returns and lists supplied to the examiner.

RETURN SHOWING CERTIFICATES ISSUED IN FIRST GRADE SINCE THE EXAMINATION WAS INSTI-RETURN SHOWING CERTIFICATES ISSUED IN FIRST GRADE SINCE THE EXAMINATION WAS INSTITUTED.—1884—81 freehand; 1885—128 freehand, 105 geometry; total, 233: 1886—232 freehand, 284 geometry; total, 516: 1887—170 freehand, 57 model, 103 geometry, 72 scale; total, 402: 1888—302 freehand, 47 model, 154 geometry, 108 scale; total, 611: 1889—403 freehand, 91 model, 477 geometry, 147 scale; total, 1,118: 1890—689 freehand, 75 model, 821 geometry, 381 scale; total, 1,966: 1891—557 freehand, 143 model, 743 geometry, 460 scale; total, 1,903: 1892—785 freehand, 169 model, 866 geometry, 593 scale; total, 2,413. Totals—3,347 freehand, 582 model, 3,553 geometry, 1,761 scale—8,833.

Scholars in the city and suburban schools holding full first-grade certificates have received regular instruction in the Technical School during the past year. The Board have now awarded twelve

instruction in the Technical School during the past year. The Board have now awarded twelve scholarships for a second year's course of instruction. This examination was held in December last, when the following scholars were selected: T. Hazelwood, Harold Clarke, W. Davidson, P. King, G. Nicholls, G. London, M. Short, F. Poynter, H. Pitcher, A. Shine, E. J. Davis, S. Cooper, the majority being from the Newtown School, and others from the Thorndon and

Mount Cook Girls' Schools.

Fifty scholarships tenable for this year have also been awarded to scholars from primary schools holding the full first-grade certificate. It has been found necessary to limit the number, owing to the fact that it would be simply impossible to receive all those who now hold the full certificate, as in former years. A further advantage is that a higher standard of excellence may be looked for.

Instruction to teachers and pupil-teachers has been continued as formerly, daily, with special Wednesday and Saturday classes, and the results are very satisfactory. One head teacher of a city school has set an excellent example in attending the classes for instruction, and I fail to see how the drawing can be satisfactorily controlled unless the subject is understood by those in authority; first and second assistants, especially, would do well to make themselves thoroughly acquainted with second-grade drawing. There are still a number of teachers who make no attempt to obtain

instruction in model drawing, and, so long as this is the case, many schools must fail to comply with the syllabus requirements, or to obtain drawing scholarships. The attendance of some of the pupil-teachers has been unsatisfactory.

South Kensington Examinations.—The following teachers were successful in the Kensington examinations of the third or higher grade: Elizabeth Benbow, Jessie Richardson, Clara Treadwell, Kate Lawson, Mary White, William Rowntree. Particulars will be found under the heading of "Examinations," Technical School.

LOCAL EXAMINATIONS.—The following teachers were successful in the third or higher grade: Mary Newton, Laura Baird, Mary White, John Williamson, Marion Wilson, Eliza Evans, Jessie Richardson, Kate Lawson, Clara Treadwell, and Jessie Newton.

The following have completed their second-grade certificate in accordance with the requirements of the Board: Elizabeth Benbow, Andrew Burns, Mary Braithwaite, Frederick Connell, May Christie, Laura Baird, James Gifford, Helen Hutchen, Clara Meager, Agnes Olsen, Jessie Tait, William Rowntree, Charlotte Scale, Mabel Young.

A large number of the teachers are also competing annually in the South Kensington second-

grade examinations, with excellent results.

Technical School.—Number of Students.

		418	431	434	422

-giving an average increase upon 1891 of 122 students.

The following occupations are represented amongst the students of the evening classes: Engineers, 29; pattern-maker, 1; boiler-maker, 1; watchmakers, 4; fitter, 1; blacksmiths, 2; joiners, 8; carpenters, 9; carriage-builder, 1; cabinetmakers, 3; plumbers, 3; upholsterer, 1; jeweller, 1; printer, 1; wood-turners, 2; drapers, 2; tinsmiths, 2; dressmaker, 1; engravers, 2; clerks, 3; photographers, 3; painters, 2; architects' assistant, 1; Civil servant, 1; saddler, 1; draughtsmen, 2; mantle-maker, 1; surveyor, 1; bookseller, 1.

IMPROVEMENTS.—During the year the increase of students necessitated the completion of the architectural room and of the instructors' room; the life-room ceiling was also lined. These improvements have considerably facilitated the work of the school. It is absolutely necessary, however, that the roof should be lined, as the dust and dirt from the rafters is rapidly destroying

the casts and appliances: the casts especially should be kept as free as possible from dust.

Classes.

Drawing and Painting.—These classes have all shown very marked improvement during the year. The examination papers of both day and evening classes call for special mention as being a long way ahead of previous years. The appointment of Mr. James M. Nairn to the additional charge of the morning class is very satisfactory. The life class is now a part of the ordinary school course in the day, but admission is still restricted to those doing satisfactory drawings from the antique as a pass. The sketch club retains its position as one of the best means of drawing out the originality of the students. Some very good results, especially in designs, have been obtained

during the year. Machine Drawing.—Mr. Ferguson, in his report upon the machine drawing, expresses his high appreciation of the good work done in connection with the class. He also says, "I notice that the age of the students ranges from 15 to 22, and I presume they are all, or nearly all, apprentices. There must be, however, many young mechanics in Wellington who, having passed through the apprenticeship stage, rank as journeymen, but who could undoubtedly benefit by the advantages to be derived from attendance at a drawing class, and I trust that some effort may be made to induce them to avail themselves of the facilities for learning mechanical drawing which your system offers." The attendances at the class have unfortunately been irregular, owing to the demand made by the ironfounders on the apprentices to work overtime. It is hopeless to expect satisfactory progress unless a change is made in this respect. Contributions of models have been received from the foundries of Messrs. Robertson and Co. (twelve models), E. Seager (two models), and J. T. Glover (two models), and have been of the greatest value to the class. The Railway Department have also contributed forty-one blue prints for the use of this class. This class is indebted to the master ironfounders for the valuable prizes awarded.

^{*} In the third and fourth quarters the College and High School students were instructed at their respective schools, the fees being paid by the governors to the Board.

† Decrease owing to the South Kensington examination being over in July.

Building Construction.—Mr. Clere, the examiner, reports very favourably, and congratulates the class upon the useful work done. In connection with this class, models of sanitary appliances have been ordered from England, and a model of a roof was made by W. Strange-Mure for class illustration. The text-books upon building construction have been in constant demand throughout the year. A free public lecture was delivered by Mr. Campbell, the instructor, upon "Healthy Homes," and was fairly well attended. The course of class lectures upon bricklaying, carpentry and joinery, plumbing, plastering, roofing, and design has been continued throughout the year. The building-construction class-room, being in an unfinished state, is now being lined and completed by the students themselves, the Board finding the material. This class is indebted to the master builders for valuable prizes; and to the sawmillers for a prize, the contribution of a periodical, and the payment of half their apprentices' fees.

Wellington College and Girls' High School.—At both these institutions classes are held by the Technical School; thus the connecting-link from primary to secondary, and from thence to the technical work, has at last been formed. Scholars who hold drawing scholarships from the primary schools, and who are now in attendance at either of the above institutions, receive free instruction for the period of their scholarship. The progress of both classes has been of a satis-

factory character.

Examinations.

The usual examinations were held during the year. As showing the increase in the work of the school, I may state that the number of papers examined during the year was 5,092, and the number of certificates issued was 2,921. The number of certificates issued in all grades since the school was established in 1886 is 11,838, subdivided as follows: Primary or first grade, 8,833; intermediate or second grade, 1,939; higher or third grade, 516; and South Kensington, 550.

school was established in 1886 is 11,838, subdivided as follows: Primary or first grade, 8,833; intermediate or second grade, 1,939; higher or third grade, 516; and South Kensington, 550.

Second Grade (Local).—Total number of papers taken, 436, subdivided as follows: Freehand, 144 candidates—84 passed, 60 failed; 6 excellent, 13 good. Geometry, 79 candidates—40 passed, 39 failed; 10 excellent, 5 good. Perspective, 55 candidates—36 passed, 19 failed; 5 excellent, 5 good. Model, 117 candidates—57 passed, 60 failed; 3 excellent, 9 good. Memory, blackboard, 41 candidates—12 passed, 29 failed. Total, 436 candidates—229 passed, 207 failed; 24 excellent, 32 good. Number of individual candidates examined, 234; successful, 169.

In this examination the papers, with the exception of freehand, were much on a level with previous years. In the freehand papers a rather marked improvement was noticeable. Memory-drawing candidates are evidently under the impression that it is not necessary to practise, and that anything moderately blocked in will do. It should be understood that a well- and carefully-studied

drawing is required.

The following students have this year completed their second-grade certificate: Florence Broome, Winifred Holt, Gertrude Hughes, Sara Jollie, Isabel Kayll, Jessie Newton, Alice Perry.

THIRD GRADE (LOCAL).—Total number of papers taken, 169—passes, 111; failures, 58. Individual candidates, 58; individual passes, 48. Papers passed First Class excellent, 24; passed First Class, 33; passed Second Class, 32. Passes in machine and building construction, 14. The

following are the individual results:

First Year's Course.—Outline from cast: First Class excellent—Florence Broome, Muriel Burnett, Mary Newton, Sara Jollie; First Class—Christabel Jollie, Alice Perry, Daisy Willis, Florence Chatfield, Alice Paul, Laura Baird, Mary White, John Williamson; Second Class—Marion George, Gertrude Hughes, Mary Moore, Myrtle Lee. Outline from models: First Class excellent—Muriel Burnett, Christabel Jollie; First Class—Florence Broome, Alice Perry, Laura Baird, Mary White; Second Class—Daisy Willis, Florence Chatfield, John Williamson, Eliza Evans, Jessie Richardson. Painting in sepia: First Class excellent—Florence Broome, Ethel Baker; First Class—Julia Hart; Second Class—Winifred Holt, Muriel Burnett. Modelling: First Class—May Lingard; Second Class—Hilda Hamerton. Machine drawing: Robert Sinnet, Edward G. Brown, S. A. Murray. Building construction: Thomas McFarlane, Harry Franklin, Stephen White, Charles Downie.

Second Year's Course.—Outline from the cast: First Class excellent—Florence Broome, Muriel Burnett, Sara Jollie, Ida Watty; First Class—Alice Perry, Ethel Baker, Clara Treadwell; Second Class—Marion George, Mary Lingard, Harry Seed, Maria Evans. Light and shade, from models: First Class excellent—Sara Jollie, Alice Perry, Mary Lingard, Ethel Baker, Clara Treadwell; First Class—Florence Broome, Christabel Jollie, Jessie Newton, Harry Seed, Maria Evans; Second Class—Mary White, Gertrude Hughes, Hilda Hamerton, Kate Lawson, Julia Hart, Winifred Holt, Ida Watty. Light and shade, from the cast: First Class excellent—Sara Jollie, Alice Perry; First Class—Mary Moar, Marion Wilson, Mary Lingard, Ethel Baker, Harry Seed; Second Class—Laura Baird, Ida Watty, Maria Evans, Florence Broome, Muriel Burnett. Monochrome painting: First Class—Marion George, Mary Lingard, Ida Watty, Maria Evans; Second Class—Florence Broome, Sara Jollie, Alice Perry. Still-life painting: First Class excellent—Sara Jollie; Second Class—Alice Perry, Ida Watty. Design: First Class excellent—Florence Broome, Milly Igglesden, Ethel Baker. Drawing from life: Mary E. Richardson, Mabel Hill, R. N. Anderson, Sara Jollie, Mary Lingard. Geometry: Hilda Hamerton, Evelyn Dasent. Perspective: Hilda Hamerton. Machine drawing: Alexander Riddell, Percy Didsbury, George Odlin, Edward G. Brown, H. T. Paterson, H. P. Wakelin, J. Plimmer. Building construction: William J. Strange-Mure, Joseph Roe. A very marked improvement was manifest throughout the papers of this examination.

Science and Art Department—South Kensington.

37 failed.

22

16

The following were the results of the examination under this department:—

SECOND GRADE—

First Class. Second Class.

Freehand ... 92 candidates 14 41

 67 E.-1.

In the latter subject only one Wellington candidate failed. Maria H. Evans has this year

completed her full second-grade certificate.

THIRD GRADE.—Number of papers submitted, 54; passes, 50. In the central school there couly two failures out of 48 papers. The full returns give 9 passes First Class excellent, 20 were only two failures out of 48 papers. The full returns give 9 passes First Class excellent, 20 First Class, and 21 Second Class. The passes were as follows: Outline from the cast: First Class First Class, and 21 Second Class. The passes were as follows: Outline from the cast: First Class excellent—Sara Jollie, Evelyn Dasent, Maria Evans, Mary Lingard; First Class—Elizabeth Benbow, Ethel Baker, Harry Seed, Winifred Holt, Alice Perry, Jessie Richardson; Second Class—Ida Watty. Shading from the cast: First Class excellent—Sara Jollie, Maria Evans; First Class—Christabel Jollie, Alice Perry; Second Class—Elizabeth Benbow, Ida Watty, Hilda Hamerton, Winifred Holt, Harry Seed, Kate Lawson, Ethel Baker, Gertrude Hughes. Wanganui: Second Class—Minnie Jones. Perspective: First Class—William Strange-Mure; Second Class—R. N. Anderson. Plant-drawing in outline: First Class—Mary E. Richardson, R. N. Anderson. Painting from still-life: First Class excellent—Mabel Hill, Sara Jollie; First Class—Mary E. Richardson. Building life: First Class excellent—Mabel Hill, Sara Jollie; First Class—Mary E. Richardson. Building construction: Second Class—George Hooper, Joseph Roe, William Strange-Mure.

The following works were also accepted towards the completion of the art-class teachers' certificate: Ethel Baker, outline from cast, shading models; Evelyn Dasent, geometry; Maria Evans, geometry, shading cast, shading models; Winifred Holt, geometry; Sara Jollie, shading cast; Mary Lingard, outline from cast, geometry, shading models; Kate Lawson, shading cast, shading models; Alice Perry, shading cast, outline from cast; William Rowntree, geometry; William Strange-Mure, shading cast; Clara Treadwell, geometry, shading models; Mary White, geometry, shading models; Ida Watty, outline cast, shading models, shading cast.

Harold Rochefort for mechanical drawing obtained the maximum number of marks, and had

Harold Rochefort, for mechanical drawing, obtained the maximum number of marks, and had he been a student of any English art school under the department he would have received an award of a free scholarship to the value of £3. Maria H. Evans has this year completed her artclass teachers' certificate, being the eighth certificate obtained.

City and Guilds of London Institute for the Advancement of Technical Education.

During the year the school has been affiliated to the City and Guilds Institute. Candidates from any part of the colony may now present themselves through the school for any of the undermentioned sections. It may be mentioned that the examiners are men of the highest repute in their several departments. The examinations are in two grades—(1) ordinary; (2) honours. The ordinary examination is intended principally for apprentices and journeymen; the honours examination for foremen, masters, managers, and teachers. Candidates may enter themselves in either grade, except in certain subjects in which they are required to obtain the ordinary grade first. Candidates may obtain a first or second class in either grade. If a second class is obtained they may sit again for the higher classifications. The examinations will be held about June. Applications for permission to sit should therefore be made on or before the 18th February. A registration

fee of 2s. 6d. per section will be charged for this examination.

The subjects of examination are as follows: 1, Salt manufacture; 2, alkali manufacture; 3, soap manufacture; 4, bread-making; 5, brewing; 6, spirit manufacture; 7, coal-tar products; 8, sugar manufacture; 9, painters' colours, oils, and varnishes; 10, oils and fats, including candle manufacture; 11, gas manufacture; 12, iron and steel manufacture; 13, paper manufacture; 14, photography; 15, pottery and porcelain; 16, glass-making; 17, dressing of skins; 18, leather 14, photography; 15, pottery and porcelain; 16, glass-making; 17, dressing of skins; 18, leather tanning; 19, boot and shoe manufacture; 20, silk-dyeing; 21, wool-dyeing; 22, cotton-dyeing; 23, cotton and linen bleaching; 24, calico and linen printing; 25, wool and worsted spinning; 26, cloth-weaving; 27, cotton-spinning; 28, flax-spinning; 29, linen-weaving; 30, silk throwing and spinning; 31, silk-weaving; 32, jute-spinning; 33, jute-weaving; 34, lace manufacture; 35, framework knitting and hosiery; 36, hat manufacture; 37, telegraphy and telephony; 38, electric lighting and power distribution; 39, electro-metallurgy; 40, metal-plate work; 41, plumbers' work; 42, silversmiths' work and plated; 43, goldsmiths' work and plated wares; 44, watch and clock making; 45, mechanical engineering; 46, road-carriage building; 47, rail-carriage building; 48, typography; 49, lithography; 50, raising and preparation of ores; 51, mine-surveying; 52, milling (flour manufacture); 53, carpentry and joinery; 54, ship's carpentry; 55, ship's joinery; 56, brickwork and masonry; 57, plasterers' work; 58, dressmaking; 59, wood-work (for teachers of elementary schools); 60, cotton-weaving. work (for teachers of elementary schools); 60, cotton-weaving.

I hope that advantage will be taken of these examinations by the various trades, and especially

by the apprentices.

Scholarships.

The Board scholarships, one in each of the following classes—day class, building-construction class; evening class, mechanical-drawing class—were competed for at the December examination. The scholarships are tenable for a period of two years, and consist of a certificate and free instruction. They were all keenly contested, and have fully justified the Board's decision to award the same.

In the day-class scholarship (seven competitors), Sara Jollie was the successful candidate, with 440 marks out of a possible 500, for five papers, obtaining four First Class excellents, and one Second Class pass. Mary Lingard followed, with 408 marks, obtaining two First Class excellents, two First Class, and one Second Class pass. Florence Broome came third, with 405 marks; Alice Percy, 395 marks; and Ida Watty, 390—showing how close the competition was.

In the evening-drawing-class scholarship (five competitors), Harry H. Seed was the successful candidate, with 220 marks out of a possible 300, having two First Class and one Second Class pass; Clara Treadwell came next in order of merit, with 208 marks; and Jessie Newton, 185 marks.

In the mechanical-drawing-class scholarship (six competitors), Edward G. Browne was successful, with 86 marks out of a possible 103, E. G. Odlin being next in order of merit, John D. Plimmer third.

In the architectural and building-construction section, William J. S. Strange-Mure was successful against Joseph Roe.

Prizes.

The following prizes were awarded in the various classes for the year's work ending December:— 1. Evening drawing class, for the best progress — John Gerrard; Lady Glasgow's prize.

2. Day classes, for the best progress—Florence Broome; Dr. Martin's prize, value £2 2s. 3. The best life study (competitive)—Mary Lingard; Mr. Alexander's prize, value £2 2s. 4. Architectural students not engaged in any sawmill, for the highest pass in the building-construction examination—Harry Franklin; Builders' Association prize, value £3. 5. Special prize in the above section—Thomas McFarlane; the Directors' and Mr. Campbell's prize. 6. Architectural students not engaged in any sawmill, for the best architectural drawing—Stephen S. White and Herbert Jenkins; Builders' Association prize, value £2. 7. Architectural students engaged in the saw-mills, for the best progress generally—Joseph Roe; the sawmillers' prize, value £2. 8. Mechanical students connected with the Wellington foundries, for the best mechanical drawing-Edward G. Odlin; the ironfounders' prize, value £2. 9. Mechanical students as above, for the second-best drawing in order of merit—Harry P. Wakelin; the ironfounders' prize, value £1. 10. Third-best drawing—Alexander Riddell; Mr. Ferguson's prize, 10s. 11. For the best set of subject sketches—Muriel Burnett; Mr. Tolhurst's prize, value £1 1s. 12. The best set of still-life studies—Alice Perry; Mrs. Rhodes's prize, value £1 1s. 13. The best set of designs—Florence Broome; Mr. Buchanan's prize, value £1 1s. 14. The best series of memory drawings—Florence Broome; Mr. Brandon's prize, value £1 1s. 15. Teachers' classes for the best procress—Marion Wilson Mr. Brandon's prize, value £1 1s. 15. Teachers' classes, for the best progress—Marion Wilson and George W. Kirk; the Directors' prize, value £1 1s. 16. The best holiday landscape—Ethel Smith; Mr. Nairn's prize.

Library.

The library now consists of 198 volumes upon technical and science and art subjects. A large number of text-books and handy volumes are circulated amongst the students in connection with

their special requirements and trades.

The additions to the library during the year have been as follows:—Purchased: Mechanical section—Elements of Machine Design, Workshop Appliances, Railway Appliances, Engineering Journal (51 vols.), Fragments of Science, Manual of Hydrology, Strength of Bridges and Roofs, Works in Iron, Bridges and Roofs, Tredgold on the Stam-engine (3 vols.), Heat considered as a Mode of Motion, Chemistry as applied to Arts (2 vols.), Mechanics and Hydrostatics, Mechanics and Mechanism; architectural section—Building Construction (2 vols.), The Builder, Examples of Building Construction, Carpentry and Joinery, Plain Handicrafts, Elementary Building Construction, Home Drainage; art section—Geometrical Drawing, Bent Iron Work, Art of Brass Repoussé Work, Art of Retouching, Magazine of Art, Handbook of Perspective, Perspective Charts, Ornamental Draughtsman. The following contributions have been made during the year: By Mr. Grady—Illustrated Catalogues, Gold and Silver Work (3 vols.); by Mr. Dempsey—Ancient Art, Painting, by Leonardo da Vinci (2 vols.); by Mr. Baillie—Flemish School of Painting and Dutch School of Painting (2 vols.); by Mr. J. R. Blair—Set of life-sized anatomical diagrams; by Mr. G. A. Johnston—Sketches by Vandyke.

Prepropress The following contributions have been received to the Branch Contributions of the contributions of the contributions have been received to the Branch Contributions of the contributions have been received to the contributions of the contributions have been received to the contributions of the contributions have been received to the contributions of the contributions have been received to the contributions of the contributions have been received to the contributions of the contributions

Periodicals.—The following contributions have been received: The Engineer, from the publishers; Work, from Messrs. Cassell and Co.; The Decorator, from Messrs. Baillie Brothers; The Electrician, from Lady Glasgow; The Art Journal, from Mr. Pearson; Engineering, from the Education Board; The Architect, from Mr. Hamilton; The Building News, from Sawmillers' Association. The above are placed for the use of the students, and at the end of the year

are bound and added to the library.

Distribution of Prizes and Certificates.

The prizes and certificates were presented in the large hall on the 2nd September by the Countess of Glasgow, in the presence of a large assembly of persons, the Chairman of the Board, Mr. J. R. Blair, presiding. The class-rooms and the works of the students were afterwards thrown open for inspection. His Excellency the Governor and the Countess of Glasgow visited the school during the forenoon of the same day, and inspected the work of the school.

General Remarks.

During the early part of the year I called a meeting of the master tradesmen, with a view to obtaining their assistance in connection with their several trade departments represented in the school. The meetings were undoubtedly productive of good, and I sincerely hope that the same expression of goodwill and assistance may long continue, for undoubtedly great advantages may be derived upon both sides by combined efforts in the direction of sound instruction to the trade apprentices and younger journeymen. I am satisfied that the work of the year has been a decided improvement upon past work, and I trust that we have now satisfactorily proved the necessity and value of our technical school. The spread of our system to other parts of the colony alone gives proof of a general desire to adopt the system as a good one.

THANKS.—My thanks are due to all those whom I have named, and who have so generously contributed to the successful year's working, either by contributions of prizes, models, diagrams, books, or periodicals; to Messrs. W. Ferguson and F. de J. Clere, who acted as honorary examiners; and to my staff, of whom I may say that more energetic or earnest workers I could not I have, &c.,

possibly have.

The Chairman, Wellington Education Board.

ARTHUR D. RILEY, Director.

HAWKE'S BAY.

SIR,-

Education Office, Napier, 1st January, 1893. In accordance with the requirements of "The Education Act, 1877," I have the honour to forward a report of the Board's proceedings for the year ending the 31st December, 1892.

The Board consists of the following members, viz.: The Hon. J. D. Ormond, M.L.C. (Chairman), J. W. Carlile, Esq., J. G. Gilberd, Esq., R. Harding, Esq., Captain W. R. Russell, M.H.R., Rev. D. Sidey, F. Sutton, Esq., G. H. Swan, Esq., and T. Tanner, Esq.

Schools.—The number of schools in operation at the close of 1891 was forty-eight. Six additional have been opened during the year—viz., Port Awanui, Waipiro, Tiniroto, Pukahu, Maharahara, and Wimbledon. These schools are subsidised by the Board, and are situated in isolated districts. They will however prove of great service in affording the means of advention to a number districts. They will, however, prove of great service in affording the means of education to a number of children who would otherwise grow up without instruction. I might here point out that a considerable number of the children at Port Awanui and Waipiro are Natives who avail themselves of the Board's schools.

SCHOOL ATTENDANCE.—The following return shows a comparative statement of the number of children on the roll and the average attendance in the schools under the Board from 1878 to date [not all printed] :-

Year.		Average	Weekly	Number	on the Ro	11.	Average Attendance.							
	March.	June.	Sept.	Dec.	Average for Four Quarters.	Per- centage Increase Previous Year.	March.	June.	Sept.	Dec.	Average for Four Quarters.	Per- centage Increase Previous Year.		
1888 1891	5,902	6,361	$5,841 \\ 6,251$	5,758 $6,300$	1,789 5,867·25 6,303·75 6,548·75	3.8	4,686 4,922		$4,673 \\ 5,109$	4,627 4,864	4,679·75 4,992·25	8·3 2·9 6·0		

The average attendance bears a fair but inadequate proportion to the number of children on the books. This is partly owing to epidemics which have been prevalent during the past year, but it is more particularly due to the fact that parents neglect to see that their children attend more regularly at school, and to the unwillingness of School Committees to enforce the compulsory clauses. An attempt has been made by the Government to assist School Committees in enforcing the compulsory clauses, but, I believe, with insufficient results.

School Committees.—These local institutions continue to do good work. In numerous cases

the Committees have raised locally funds for desirable improvements which have been subsidised by the Board. This has enabled the Board to extend its assistance in the way of repairs, fencing, painting, and other necessary works, the supervision of which is undertaken by the Committees, and generally with satisfactory results. By this means nearly all the most pressing applications received from School Committees during the past year have been met by the Board. I am glad to say that the relations between the Board and Committees continue to be of the most satisfactory nature.

School-buildings.—Two new schools have been erected, and additions made to three schools, To the numerous and repeated applications for schools in new districts and teachers' during 1892. residences in the old the Board have been obliged to give the stereotyped reply, "No funds." This is both disheartening and unsatisfactory. I must again point out to the Government the inadequacy of the funds furnished to the Board to provide the accommodation requisite to afford fitting school-room for the children of this district, and, were the compulsory-attendance clauses strictly enforced, there would in many cases be insufficient room in which to teach the children. The want of teachers' residences is another pressing necessity. Competent teachers often refuse appointments because there is no provision for living in reasonable comfort, and although house-rent is allowed it does not in very many cases meet the necessities of the situation. As the grant for buildings was quite insufficient to meet the requirements of the district, the Board has provided from the School Fund the sum of £1,000 to aid in erecting school-buildings, and in making additions, &c., and generally to assist in providing for the most pressing requirements.

Scholarships.—Nineteen scholarships have been awarded for 1892, making thirty-nine scholarships in existence. The country schools have again been very successful this year in the competition, seven scholarships having been gained by them. The benefit resulting from the gaining of a scholarship is beginning to be more recognised, the tenure being for two years, with a prospect of two years' further tuition, as a scholarship-holder may obtain a Commissioners' scholarship in the High School. This enables him to prepare for the matriculation or higher examinations.

Pupil-teachers.—Amended regulations are in course of preparation for pupil-teachers. It is intended to alter the date of examination from December to July. This will enable the Board to avoid having too many examinations at one period of the year, and will give pupil-teachers who have passed their fourth year a few months in which to prepare for the annual certificate examination, which takes place in January. Fifty pupil-teachers presented themselves for examination. Thirty-eight of these passed, and twelve failed to fulfil the requirements under the regulations. The number of males fitting themselves for employment as teachers in comparison with females bears a very unequal proportion, and this is, I believe, found to be the case throughout New Zealand.

SEWING.—This useful branch of education, I am glad to state, has received more attention at the hands of the teachers than heretofore, although there is still room for improvement. The lady examiners in their reports state that their remarks and suggestions are being attended to. They call especial attention to the fact that incomplete samples are being forwarded to them, and wish the teachers' attention to be directed to the duty of sending finished work.

Income and Expenditure.—The income of the Board from all sources amounts to £22,681 12s., to which should be added the balance from last year of £2,963 18s. 6d. The expenditure shows

E.-1.70

that the cost of maintenance of schools, of allowance to School Committees, together with money paid to the Building Fund, was £19,740 8s. 11d. The expenditure on buildings was £2,163 4s. 4d., making a total of £21,903 13s. 3d. This leaves a credit balance of £3,741 17s. 3d.; but, as the sum of £750 received from the School Commissioners is included in this, the actual credit balance is £2,991 17s. 3d. I have, &c.,

The Hon. the Minister of Education.

J. D. Ormond, Chairman.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

MARLBOROUGH.

Sir,—

Blenheim, 15th March, 1893. In accordance with the provisions of "The Education Act, 1877," I beg to submit the report of the Education Board of the District of Marlborough for the year ending 31st December, 1892. At the commencement of the year the Board consisted of the following persons: Mr. A. P. Seymour (Chairman), the Hon. Colonel Baillie, Messrs. Thomas Carter, J. M. Hutcheson, C. H. Mills, W. B. Parker, E. Paul, H. C. Seymour, and J. Ward. The three members retiring by rota-

tion in March were Messrs. A. P. Seymour, C. H. Mills, and the Hon. Colonel Baillie, who were re-elected without opposition.

MEETINGS.—The Board held thirteen meetings during the year. The average attendance at these meetings was 5.5; and the individual attendance was as follows: Mr. E. Paul, 12; A. P. Seymour, 11; Thomas Carter, 8; J. M. Hutcheson, 8; W. B. Parker, 8; C. H. Mills, 7; H. Seymour, 7; J. Ward, 6; and the Hon. Colonel Baillie, 5.

The Board records with regret the loss it has sustained by the death of Mr. Joseph Ward, which sad event took place in November. He had been a member continuously from the time of the Board's first constitution, and had rendered most efficient service. Though not strictly coming within the limit of this report, I cannot help alluding to a further loss caused by the death of Mr. Edmund Paul, which occurred very suddenly in January, 1893. He also was a member of the Board continuously from its commencement, and gave long and faithful services, which, together with those of Mr. Ward, the Board desires herein most heartily to acknowledge and record. The vacancy caused by the death of Mr. Ward was filled by the election of Mr. John Duncan.

School Districts.—There are now twenty-five school districts within the Marlborough Education District. A new school district, called Grove, was formed out of a portion of the Queen Charlotte Sound District, another portion of which was declared a separate school district, and called the Cullensville District. The boundaries of these were duly described and notified as required by the Act.

Schools.—At the end of the year there were forty-four schools in operation. Four schools have been closed and five opened during the year, all of these being small aided schools.

ATTENDANCE.—The average weekly roll-number for the district has increased from 2,052 at the end of 1891 to 2,089 at the end of 1892, and the average attendance from 1,660 for the December quarter of 1891 to 1,691 for the corresponding quarter of 1892. For some years past there has been a small but steady annual increase in the number of children in the district, and a corresponding increase in the number of schools, but on account of the scattered condition of the population these have nearly all been small aided schools; and several applications for aid to such schools may be safely expected during the current year.

BUILDINGS.—The small balance on hand on Building Account at the beginning of the year, the uncertainty as to the amount likely to be received from the grant for buildings, and the late period of the year when this amount was notified and received, necessarily limited the Board's expenditure under this head to the most urgently needed repairs to existing buildings. A small grant in aid of a building for school purposes, erected in Fabian's Valley, was the only expenditure on new buildings during the year and government and a second a second and a second buildings during the year, and several much-needed works were unavoidably and indefinitely postponed. The rapid increase of population at Springlands, however, has compelled the Board to take steps for providing additional accommodation in that district, and a new wing to this school will be one of the first works undertaken. The Blenheim Infant School is also much overcrowded, and, being a very old building, enlarged to its present size by repeated additions, it is impossible to provide sufficient and satisfactory accommodation for this important school by any scheme of further

E.-1.71

enlargement; and the Board has it in contemplation to erect an entirely new building of more suitable dimensions, and specially adapted for the teaching and training of the preparatory classes, with a view to the introduction of some modification of the kindergarten system, for which, it is needless to say, the present building is totally unfit.

Frequent and urgent demands are made at the meetings of the Board for some much-needed repairs to buildings or fences in all parts of the district, and, but for the assistance of the School Committees in making temporary provision for some works, and in contriving to do without others, the Board would find it impossible to meet a tithe of the demands upon the Building Fund. In one instance (Grovetown) it was found absolutely necessary, on sanitary grounds, to purchase an additional piece of land to enable the Committee to remove the out-offices from a dangerous proximity

Scholarship.—For some years past the Board has granted one scholarship annually, of the value of £40, and tenable for two years. The Governors of Nelson College forego the usual tuition fees in these cases, so that the actual value of this scholarship is £52 10s. per annum. scholarship was first established there has been, as mentioned above, a steady increase in the average attendance in this district, which has now reached a number that will enable the Board to do something more in this direction, and probably an additional scholarship will be offered every second year. This would bring the Board's annual expenditure on scholarships up to the amount to which the district is entitled under the Act, and will render necessary a revision of the scholarship regulations.

Finances.—The new scale of payments to Committees mentioned in my last report as having been recently adopted has so far worked satisfactorily, owing in a great measure to the loyal assistance and co-operation of the several Committees. To the Blenheim Committee especially great credit is due for the able and economical manner in which they have carried on their work on an allowance little more than two-fifths of what previous Committees had been in the habit of receiving. The saving thus effected has enabled the Board to increase the salaries of several assistant teachers, and to devote some portion of its ordinary revenue (in anticipation of the building grant)

to the repair and improvement of buildings.

School-воокs.—In consequence of the difficulty experienced by teachers in obtaining a constant supply of school-books the Board some two years ago undertook the duty of keeping a stock, and supplying the Committees and teachers from the office. The books are sold at a very small advance on cost price, to cover the expense of freight, cartage, &c. The plan has given general satisfaction to the teachers and the parents, who can now depend upon obtaining what they want at a very great reduction on the prices formerly paid, and this without any extra cost to the Board. The Board's arrangements under this head are, however, somewhat hampered by the uncertainty hanging over the whole question of book-supply in the colony, which has necessitated the procuring of small supplies from the colonial booksellers, instead of obtaining them direct from the publishers, which could only be done now at the risk of having a large stock of books thrown upon our hands in the event of the Government deciding upon uniform sets of books throughout New Zealand.

The Hon, the Minister of Education.

I have, &c., A. P. SEYMOUR, Chairman.

Examined and found correct, except that a deduction of £10 19s. has been made instead of £10 1s. 9d. in the payments to the late Secretary.—James Edward FitzGerald, Controller and Auditor-General.

NELSON.

Nelson, 4th April, 1893.

SIR.-I have the honour to lay before you the report of the Nelson Board of Education for the

year ending the 31st December, 1892.

The members of the Board at the beginning of the year were—Messrs. H. A. Tarrant (Chairman), Talbot, Clayden, Hursthouse, Dencker, Shephard, Phillips, Harkness, and Franklyn. At the annual election of three members of the Board, held on the 15th March, the three retiring members, Messrs. Hursthouse, Talbot, and Dencker, were re-elected. Mr. Lock was elected to fill the vacancy caused by the death of Mr. Samuel Clayden, Mr. Maginnity being elected to fill the seat vacated by the resignation of Mr. Harkness. Two special and twelve ordinary meetings of the Board were held during the year, the average number of members present at each meeting being 7.5.

Ninety-six schools were at work at the close of 1892, the number of scholars on the roll being 5,888. The average attendance for the December quarter was 4,562. The teaching staff consisted of 166 teachers, 60 of whom were male and 106 female teachers. Thirty-six probationers (equiva-

lent to pupil-teachers) are included in this list.

The diminution in the number of uncertificated teachers, referred to in the Board's last report, is still going on. Formerly these unqualified persons actually outnumbered those who held certificates. Now uncertificated teachers are almost entirely restricted to small aided and household schools. Teachers, indeed, who continue to hold even an aided school, without providing themselves with the necessary qualification, are at present looked upon as occupying an anomalous and indefensible position. The probationer system, although it has done much good and has turned out many valuable young teachers, still falls somewhat short, in several respects, of what might fairly be expected from it. The original intention of the scheme was that young persons, after a three years' course of training, should get their certificates, and apply for one of the small country schools where vacancies are constantly occurring, and where they might gradually qualify themselves, by actual experience, for promotion to a higher appointment. In many cases this has been done; but it is found that some probationers of even six years' standing cannot be induced to quit their places in town schools for the rougher but better-paid country schools, some of which are vacant almost every month. Promotion is thus blocked, the training of fresh teachers is arrested, and promising young candidates who are anxious to enter the service are excluded for years. If no other remedy can be found, a fixed rule, limiting the term of service of probationers to four years, might be adopted.

The extension of household schools would seem to require careful watching, lest abuses should creep in. There are two risks. One is that, owing to the low rate of remuneration that can usually be afforded, only ill-qualified persons can, as a rule, be induced to accept such posts. Indeed, a child's Sixth Standard pass-card is not infrequently produced as being evidence of the possession of sufficient literary qualifications. The other is the converting of the teacher into something like a household drudge, by way of eking out a subsistence. It could surely never have been contemplated by the Legislature that settlers in remote neighbourhoods should be helped by Education Boards to obtain a cheap governess who at the same time should fulfil the duties of a

maid-of-all-work; and yet this has actually been done.

It has frequently been alleged as a defect in the management of this and of other Boards that, while some of the schools are overcrowded, others are far too large for the scanty numbers at present attending them. These criticisms, however, will have little weight with those who know how fluctuating is the population in districts where gold-mining and saw-milling are the staple industries. In such places constant, and apparently well-warranted, pressure is brought to bear on Boards to induce them to add largely to buildings that are for the time being admittedly too small. The required additions are at length made. The mines are exhausted or the available timber is all cut, but the half-empty buildings remain. It is worth considering whether all this constantly-recurring waste might not be obviated by putting up buildings the several parts of which should be so fitted and numbered that they might at little cost be taken down and removed to some new locality where a demand for them had sprung up.

The destruction by fire of two of the city schools, Bridge Street and Hampden Street, has brought into quite unexpected prominence a question that has for some time been under the consideration of the Board—the establishment of a central school for all boys who have passed the Second Standard. Whatever, possibly unavoidable, delays may be interposed, it is no longer a matter of doubt that ere long a satisfactory solution of a difficulty which, under precisely similar conditions, was settled with enviable promptitude in the cases of both Blenheim and Hokitika, will be arrived at by the Education Department. Another year will hardly be suffered to elapse before a roof is provided for the hundreds of boys who are scattered about the City of Nelson, at much

expense and more inconvenience.

The Hon. the Minister of Education.

I have, &c., H. A. Tarrant, Chairman.

GREY.

Education Office, Greymouth, 5th May, 1893. Sir, --

I have the honour to present the annual report of the proceedings of the Board for the year ended on the 31st December, 1892, in accordance with the provisions of clause 102 of the Edu-

The following persons composed the Board during the year: Messrs. Nancarrow, Marshall, White, and Smith, nominated members; and Messrs. Kerr, Petrie, and Byrne, elected members. Ten meetings were held during the year—eight ordinary meetings and two special meetings. At the meeting held on the 10th May, Mr. Nancarrow was elected Chairman, and Mr. Kerr Treasurer, for the ensuing year. Mr. Nancarrow was also reappointed to represent the Board on the Greymouth High School Board. The attendances of members during the year were as follows: Messrs. Nancarrow and Byrne, 10; Messrs. Petrie, Marshall, White, and Smith, 9; Mr. Kerr, 8.

There was no addition to the number of school districts.

Return No. 3 gives the list of teachers in the employ of the Board as on the 31st December, with their classification, the number being 20 male and 35 female: total, 55, as compared with 52 at the end of 1891. The return also gives the list of schools, classified, for the last quarter of the year, the total being 23 as against 22 at the end of 1891. The additional school is at Kokiri. At the end of the year ten uncertificated teachers were in the employ of the Board. Of these, three have matriculated, but have not complied with the other conditions for certificate; four are teachers of very small side-schools for which the Board can hardly expect to procure certificated teachers. Of the remaining three, two sat for examination, but have not yet obtained a certificate. pupil-teachers employed, eight held certificates obtained before the completion of their term of service. At the examination held in January one pupil-teacher and one junior assistant passed for Class E, and one teacher and one pupil-teacher for Class D.

Return No. 2 furnishes a list of scholars under the headings of "Ages, "Standards," and "Subjects of Instruction," the total number being 1,766, an increase of 69 on the total of the previous year. The average weekly roll-number for the year was 1,809, being an increase of 29 on the return for 1891, and 6 less than for 1890. The yearly variation is therefore very slight. The average attendance was 1,458, as compared with 1,365 for 1891, showing an increase of 93,

representing an increased revenue amounting to £348 15s.

On the General Account the Board received during the year £5,753 4s. 2d., and expended £5,727 15s. 4d., including a debit balance at the beginning of the year of £450 1s. 11d., the actual year's expenditure being therefore £5,277 13s. 5d. At the end of the past year the credit balance was £25 8s. 10d.

On Building Account the Board received during the year £1,591 4s. 5d., including a credit balance of £776 4s. 5d. existing at the beginning of the year, and expended £1,398 0s. 4d., leaving a

credit balance at the end of the year of £193 4s. 1d.

Return No. 4 gives the Board's balance-sheet for the year. Return No. 6 gives the statement of assets and liabilities on General Account and Building Account at the end of the year. On General Account there is a credit balance of £17 15s. 5d., and on Building Account of £163 19s. 5d. Return No. 7 furnishes a statement of expenditure on each school, under the headings of "Salaries," "Incidentals," and "Buildings."

The supplementary building grant for Greymouth and Taylorville Schools (£750) is thankfully acknowledged by the Board, but did not actually meet requirements, the expenditure being—Greymouth School, £591 0s. 1d.; and Taylorville, £333 12s. 6d.: total, £924 12s. 7d. The Board had therefore to take £174 12s. 7d. from the General Fund to complete those works. A new building was erected at Kokiri, costing (partially completed) £73 5s. 6d., the householders in that locality having petitioned for the establishment of a school.

The highest expenditure for repairs upon a country school was £47 0s. 10d., expended in repairing and painting the Notown School; and sums varying from that amount down to 7s. 6d. for Hatter's School were expended on sixteen schools. There was no building expenditure on Kynnersley and Orwell Creek Schools. The total for salaries was £4,264 11s. 2d., and for incidentals £93 1s.

At the end of the year there were still many urgent building requirements, the principal being-Addition to Dobson, Ahaura, Richardson, Cobden, and Paroa Schools; completion of Kokiri School; repairs to Kynnersley School, and some others. The reserves at Dobson, Ahaura, and Richardson should be fenced, and some clearing is also necessary at those places. A teacher's house is urgently required at Greenstone. Residences should also be provided at Taylorville,

Dobson, Richardson, Cobden, Paroa, Maori Gully, and Ngahere.

With a debit balance of £450 1s. 11d. at the end of 1891, it became necessary for the Board, early in 1892, to make some reduction of expenditure. The subject was considered at several meetings, and the following reductions were finally made: Salaries, £160; reduction and rearrange of the subject was considered at several meetings, and the following reductions were finally made: Salaries, £160; reduction and rearrange. ment of staff, £130; members' travelling allowance, £30; printing and advertising, £75; school requisites (chalk and ink only to be issued free to schools), £70; discontinuance of payment of railway fares, £30; grants to Committees abolished, £118 10s.: total, £613 10s. Against this amount had to be reckoned the ordinary yearly increase of payment to pupil-teachers, which brought the total decrease of expenditure to £538 10s. As the greater part of the reduction could only take effect for the latter half of the year, the debit would not even then have been covered but for the increase in average attendance, and a consequent increase of revenue.

At the end of the year eighteen pupil-teachers were employed by the Board: of these, five completed their term at the end of the year, and were re-engaged as junior assistants. Eleven sat for

examination in December; five passed and six failed.

Four scholarships—two town (open to Greymouth and Cobden Schools) and two country (open to all other schools)—were competed for in January, 1892. Sixteen scholars were present at

10—E. 1.

examination—seven from town schools and nine from country. Annie West and John McMillan, of the Greymouth School, were first and second respectively for the town scholarships; but, as they refused to accept the scholarships, Andrew A. Anderson and Elsie Holder became the possessors as being next on the list. The country scholarships were won by Emily Algie, Ngahere School (first), and Anna Dowling, Paroa School (second). On the whole the results were very satisfactory.

The report of the Inspector for the past year shows that a good level of efficiency is maintained

in the schools of the district, and that the teachers deserve commendation for their efforts.

The Board would again bring under your notice the insufficiency of the ordinary capitation grant for a district such as this. Of twenty schools out of a total of twenty-three, seven have an average of under 15 pupils, one under 20, four under 25, three under 50, and five under 75. A few schools of from 75 to 100, and 100 to 150, would help materially to assist the Board, but there are none of that class in the district. The salaries paid are consequently very low, and in some cases really insufficient to enable the teacher to maintain a decent and respectable appearance. The Board feel strongly that such conditions as these should not exist, and hope that you will favourably consider their application for an additional grant.

No difficulty was experienced in connection with election of Committees under the Act of 1891, and the Board desires to bear testimony to the readiness of Committees to assist the Board in all

matters connected with the management of the schools.

The Hon. the Minister of Education, Wellington.

I have, &c., R. Nancarrow, Chairman.

R. Nancarrow, Chairman. Edward Robinson, Secretary.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

WESTLAND.

Sir,— Hokitika, 22nd February, 1893.

I have the honour to submit the report of the proceedings of the Westland Board of Education for the year 1892.

The Board.—On the 31st day of March all the elected members of the Board and Messrs. Hudson and McWhirter (nominated members) retired, in accordance with sections 6 and 9 respectively of "The Westland and Grey Education Boards Act, 1888." To supply the place of these, Messrs. James Chesney, McLean Watt Jack (re-elected), and George Rodda were returned by the Committees, and Messrs. James Stephen Benyon and James Shilleto nominated by the Governor. These, with the addition of the existing nominated members, Messrs. Bevan and Grimmond, formed the new Board, Mr. Bevan being re-elected Chairman, and Mr. Jack Treasurer, whilst the former gentleman was also reappointed the Board's representative on the High School Board of Governors, Hokitika. Mr. Grimmond has continued to represent the Board as School Commissioner. Besides the twelve ordinary monthly meetings, the Board held six special meetings during the year, and one meeting of special Committee, the following being the attendance of members: Mr. Benyon, 8;

Mr. Bevan, 18; Mr. Chesney, 9; Mr. Grimmond, 12; Mr. Hudson, 7; Mr. Jack, 18; Mr. Rodda, 9; Mr. Shilleto, 11; and Mr. McWhirter, 5.

75

Schools.—The number of schools in operation this year is thirty-three, as against thirty-one last year, the increase being due to a small aided school opened on Cook's River, and another, a half-time school, reopened in the Otira Gorge. A building for a much-needed side-school at Dillman's in connection with Kumara School, which the Board has had in view for some time past, is now in course of completion, and will be opened very shortly. Also at Jackson's, on the Christ-church Road, where a considerable population has recently gathered, the Board has undertaken to maintain a teacher. At the petition of the settlers a new school district has been formed for Kawhaka, the school of which has hitherto been administered by the Humphrey's School Committee. Of the thirty-three schools in the district, four are half-time schools, and twelve, including two of the half-time schools, are aided schools, six of these latter being held in settlers' houses.

ATTENDANCE.—The statistics of the schools show 1,614 children on the roll at the end of the year, as against 1,625 a twelvementh before. The ratio of average attendance to average roll-number is encouraging, being 1,377 to 1,650, or 83.4 per cent.—i.e., 1.7 better than last year.

Teachers.—The number of teachers in the Board's employ, exclusive of pupil-teachers and one sewing-teacher, is twenty-three classified and twenty unclassified, or a total of forty-three, twenty-three being females. There are also twenty pupil-teachers and six paid monitors. Of the pupil-teachers, fourteen are females. Hence the total number of persons employed by the Board in a teaching capacity is seventy. In December the annual examination of pupil-teachers took place as usual, the results being as follows: For First Class—7 presented, 6 passed, 1 failed; for Third Class—6 presented, 5 passed, 1 failed; for Fourth Class—3 presented, 2 passed, 1 failed: total, 16 presented, 13 passed, 3 failed. Of the thirteen who passed, four did so with credit.

Buildings.—Only one new building has been commenced this year—viz., the schoolhouse at

Buildings.—Only one new building has been commenced this year—viz., the schoolhouse at Dillman's already referred to—but the school-building at Wanganui and the school residence at Goldsborough, mentioned in last year's report, have been completed, and school grounds at Upper Kokatahi and Goldsborough fenced. Also an addition has been made to the residence at Lower Kokatahi, and large and greatly-needed repairs to the school-building at Kumara effected, whilst the latter building, as well as those at Hokitika, Kanieri, Blue Spur, Kawhaka, Ross, and Donoghue's, has been painted. The new settlers at Jackson's petitioned for the erection of a school-building, but through lack of funds it was impossible for the Board to render the assistance asked for. A small building, however, to be transferred to the Board when completed, is now in process of erection there by the settlers themselves. And, lastly, the Board must repeat the statement of last year that several schools are still without residences, and that the constant calls for repairs to existing buildings are greater than the Board, with the funds placed at its disposal, is able to meet.

Scholarships.—Two examinations for scholarships have been held this year—one in January and one in December—the second in accordance with the revised rules of the Board, which made the date of the scholarship examination a month earlier. At the former of these examinations three candidates obtained scholarships, and at the latter four. During the year one scholar resigned his scholarship in order to go into business, leaving five in receipt of theirs to the end of the year. This is a branch of the Board's operations which it regards with particular satisfaction, both on account of the scope it affords for securing really valuable results in education, and also for the encouragement it gives to children of exceptional ability, and through them to all others, to persevere in study; of all which an excellent illustration appears this year in the fact that one of the five scholars mentioned above has just passed the matriculation examination of the New Zealand University. All five scholars have attended through the year at the Hokitika District High School.

Finance.—The Building Account for the year shows receipts (including a credit balance at the beginning of the year of £471 5s.) £1,241 5s., expenditure £586 3s. 6d., leaving a credit balance of £655 1s. 6d. This balance, however, is more nominal than real, as, though unspent, it has all been allocated, and still leaves many requirements unprovided for.

On General Account alone there is a debit balance of £105 19s. 8d., the receipts being £5,694 17s. 8d., and the expenditure £5,800 17s. 4d. Last year, too, there was a corresponding debit balance of £77 7s. 11d.; while the following table shows that, with a slight exception in favour of the past year, the Board's income on General Account alone has been steadily declining for some years:—

Year.	Ave	rage Attends	\mathbf{n} ce	Receipts	.	Expenditur				
rear.		for Year.		£ s.	d.	£	s. d.			
1889	 	1,423		5,918 16	1	5,702	14 3			
1890	 	1,385		5,793 18	11	5,762	17 5			
1891	 	1,362		5,621 0	8	5,698	8 7			
1892	 	1,377		5,694 17	8	5,800	17 4*	(<		
	* T.c	ee £77 7e 11	d dehi	t halance from	1891					

In view of these figures, the Board cannot but recognise the fact that its annual expenditure is now in excess of its income, and will consequently require revision. An investigation of the scale on which the Board remunerates its teachers shows that one principal source of loss is the large number of small aided schools in this district, and the very liberal manner in which these have hitherto been subsidised by the Board. The principle on which the Board has always acted has been to extend the advantages of the Education Act to every family in the district, and the Board will greatly regret to initiate any departure from this principle; but, in view of the steady contraction of its income, it becomes increasingly evident that some change in its policy in respect to aided schools has become imperative.

EFFICIENCY OF SCHOOLS.—For information on the progress made by the schools during the past year, and the state of education in the district generally, the Board refers you to the annual report of the Inspector, a copy of which is forwarded with this report.

I have, &c.,

The Hon. the Minister of Education, Wellington.

John Bevan, Chairman.

Examined and found correct.—James Edward FitzGerald, Controllor and Auditor-General.

INSPECTOR'S REPORT ON THE HOKITIKA DISTRICT HIGH SCHOOL.

Syllabus of Work done in the Year 1892.

Algebra.--Hall and Knight's—seniors to p. 151; juniors to p. 86.

Euclid.—Hamblin Smith's—seniors, Books I., II., III., Props. 1 to 20, with exercises to p. 71; juniors, Book I., with exercises to p. 71.

Arithmetic.—The whole subject.

Latin.—Seniors—Dr. Smith's Principia, Part I., and Part II., pp. 7 to 12, and 39 to 56; Barrow Allen's Latin Grammar to p. 104. Juniors—Dr. Smith's Principia, Part I. to Ex. 1., and Part II., pp. 1 to 10.

French.—Seniors—Dr. Smith's Principia, Part I. to Ex. lx., p. 138; Chardenal's First Course to Ex. 130 and pp. 175 to end. Juniors—Chardenal's First Course to Ex. 130 and pp. 175 to 186.

English.—Macaulay's Essay on Milton, Milton's L'Allegro ; Dr. Smith's English Grammar to p. 104.

Chemistry.—Roscoe to Fluorine (inclusive), p. 113; also theory as explained in Kemshead. Physical Geography.—Geikie's Physical Geography—juniors, to p. 161; seniors, pp. 161 to end.

Bookkeeping.—Chambers's Single Entry.

Average Percentage of Marks gained.—Algebra, 40; Euclid, 57; arithmetic, 51; Latin, 63; French, 57; English, 55; chemistry, 61; physical geography, 43. Mean per cent. for all subjects, 53:4.

These results are unsatisfactory as showing retrogression in the efficiency of the class, the general average of marks being 8 per cent. below that of last year. The retrogression is, however, greater than appears from the general average, as in at least two of the subjects—viz., chemistry and senior algebra—but little new work has been attempted this year. Yet even so the average percentage of marks obtained in algebra is no less than 28 per cent. below that of last year. It is greatly to be regretted that a subject so important should have been so seriously neglected. Apparently more blackboard teaching is required, and more thorough supervision of the daily work done by the scholars. One boy, however, a scholarship-holder, G. C. Rodda, did excellent work in the subject, gaining no less than 89 per cent. of marks in it, and that in senior algebra, although he is in rating a junior student; and, I may add, this was the highest percentage obtained by any scholar in this subject, whilst two scholars gained only 19 per cent. of marks apiece in the same work, one only 7, and one none.

It is necessary to add further that the junior Euclid shows results even more deplorable, a circumstance due, I think, in part to the fact that two widely different editions of Euclid's work are in use in the class, so that mental confusion is the almost inevitable result. Nor do these scholars

seem to have been properly drilled in the definitions of the science.

On the whole the literary results are better than the scientific, although here again the French exercises must be excepted, some of them being little less than a mass of blunders, implying either gross carelessness on the part of the scholars or almost complete ignorance of the idioms of the language. In English the results obtained were 6 per cent. better than last year; but even here there is great room for further improvement, as the average per cent. is only 55, the scholars showing little grasp of the author they are supposed to have studied. Nor do I look for better results in this subject until the scholars are required to commit to memory some of the choice passages of the author studied.

I regret that even the arithmetic and physical geography are greatly inferior to those of last year, especially the physical geography of the senior class, which would scarcely have obtained any marks at all save for the papers sent up by three scholars, good in this as in almost every other subject. Indeed, I should be doing wrong if I did not mention one instance of good arithmetic done by one of these three, a scholarship-holder, F. W. Furkert by name, who has obtained cent.

per cent. of marks in the subject.

A fault of a more general character also calls for comment. The papers presented to me by the scholars are some of the most slovenly in penmanship and spelling I have ever had to assess, some of them, indeed, being only legible at all by dint of the closest and most repeated scrutiny. It is not to be tolerated that high-school boys should be allowed to fall into such habits, which are simply the outcome of a false principle, that of preferring speed to excellence both in mechanical and mental work. If the work of these scholars were properly supervised day by day, and all slovenly work returned for correction, the Inspector would never see such papers as these on examination-day. And I will only add in conclusion, in the interests of the scholars themselves, that such slovenly penmanship must be fatal to the prospects of any boys destined for commercial pursuits.

In concluding my report I wish to emphasize this remark: that, whilst speaking in terms of censure of the work presented to me by the Rector's class at this examination, I must not be understood as necessarily blaming the Rector, on whose shoulders rest, from the very position he holds, the two scarcely compatible duties of general superintendence and class-teaching. Nor must I be understood as condemning the whole of the work presented by this class, the senior

Euclid being quite satisfactory, as well as both senior and junior Latin.

Finally, in one subject professed by the class, that of book-keeping, I have not attempted any examination, as it is not a subject which lends itself readily to a short examination. Also, the number of scholars on the roll of the class for the present quarter is fifteen, of whom one was absent and one excepted.

I have, &c.,

John Gammell, B.A., Inspector.

NORTH CANTERBURY.

Sir,—

Christchurch, 30th March, 1893.

I have the honour to present a report of the proceedings of the Education Board of the District of North Canterbury for the year ending 31st December, 1892.

The Board.—The three members who retired at the end of March, 1892, were Mr. Joyce, Mr. Saunders, and Mr. Parker Westenra, of whom Mr. P. Westenra did not stand for re-election. At an election held on the 10th March, Mr. Richard Westenra, Mr. Saunders, and Mr. Joyce were returned. Early in May an extraordinary vacancy occurred through the resignation of Mr. T. S. Weston. Mr. Weston had been one of the most active members of the Board, had served on nearly all the important Committees, and for the year previous to his retirement was Chairman. The Board passed a resolution expressing its regret at his resignation, and its appreciation of the valuable services he had rendered to the cause of education in this district. On the 2nd June Mr. Thomas William Adams was elected to fill the vacancy. At a meeting held on the 31st March, Mr. Anson was elected Chairman for the ensuing year; Mr. Peryman, Mr. Westenra, Mr. Wright, and Mr. Joyce were elected members of the Buildings Committee; and Mr. Montgomery, Mr. Saunders, Mr. Meredith, and Mr. Joyce of the Appointments Committee. From the 14th July to the 20th October, during the absence of four members who were called away to Wellington by their parliamentary duties, the Board met every fortnight, and, in addition to its ordinary business, performed the work usually undertaken by the Appointments Committee; but, upon the return of the four members at the close of the session, the three-weekly meetings of the Board and the weekly meetings of the Appointments Committee were resumed. During the year the Board held twenty ordinary and seven special meetings. The Buildings Committee met twenty times, and the Appointments Committee thirty-one times.

Buildings.—During the year 1892 new schools were built at Ealing, Eiffelton, and Riverside (these three had been authorised in the previous year), at Rokeby, and at Upper Ashburton Forks. Additions were made to the buildings at Christchurch West, Darfield, Doyleston, Eyreton West, Gough's Bay (aided), Rakaia, Rangiora, Southbridge, and Woodside; and additions to the sites at Amberley and Ferry Road. Considerable repairs or improvements were made at Greenstreet, Burwood, Chertsey, Courtenay, Ferry Road, Flaxton, German Bay, Hinds, Malvern, Okain's Bay, Port Levy, Prebbleton, Richmond, Weedon, Yaldhurst, and the Normal School. The total expenditure on buildings was £7,616 10s. 6d. The Board has been in a position of much embarrassment through the insufficiency of the funds at its disposal for building purposes. The amount allotted (£4,590) proved quite insufficient; and, after exhausting all means that could be made available, the Board was still obliged to leave unsupplied the urgent wants of some of the suburban districts, referred to in its last report, as well as new schools or additions and teachers' houses required in the country. The Board earnestly hopes that in the ensuing year the Government will see their way to make such provision for school-buildings as will enable it to do justice to the requirements of the

district.

Maintenance of Schools.—The expenditure on teachers' salaries during the year amounted to £54,906 12s. 4d., and the grants to Committees, with other incidental expenses, to £6,869 4s. 10d.; making a total of £61,775 17s. 2d. The average attendance for the year was 17,269. The cost per head of teachers' salaries was therefore £3 3s. 7d.; and the total cost of maintenance, including all incidental expenditure, was £3 11s. $6\frac{1}{2}$ d. per head. The following table shows the expenditure in salaries and incidentals for each year from 1878 [not all reprinted]:—

Year.			Salaries	Incide	enta	ls.	Totals.				
			£ s.	d.	£	s.	d.		£	s.	d.
1878			31,919 0	0	 6,276	6	9		38,195	6	9
1888			50,749 14	6	 6,400	7	5		57,150	6	3
1891			53,091 8	4	 6,989	6	5	• • •	60,080	14	9
1892			54,906 12	4	 6,869	4	10		61,775	17	2

Table No. 7* gives the amount spent in each school district for both salaries and incidentals, and the names and salaries of the teachers employed in each school. The total number of teachers in the Board's service at the end of the year (besides 47 sewing-mistresses) was 556—viz., heads of schools or departments or in sole charge, 145 males, 63 females; assistants, 35 males, 122 females; pupil-teachers, 59 males, 129 females. As compared with the number in 1891, there

were eleven more certificated teachers and eight fewer pupil-teachers.

ATTENDANCE.—The number of school districts at the end of the year 1892 was 155, and the number of separate schools 174. Of the latter, four (at Conway Flat, Godley Head, Gough's Bay, and Porter's Pass) were aided schools. The schools were classified as follows: Under 15 pupils, eleven; 15 and under 20 pupils, thirteen; 20 and under 25 pupils, eighteen; 25 and under 50 pupils, fifty-two; 50 and under 75 pupils, twenty-six; 75 and under 100 pupils, thirteen; 100 and under 150 pupils, thirteen; 150 and under 300 pupils, fourteen; 300 and under 500 pupils, nine; 500 and unwards. five.

The following table gives the total number of children on the rolls, the number in average attendance, and the percentage of attendance, at the close of each year since the Education Act came into operation [not all reprinted]:—

Quarter ending 31st December,		District Schools.	Aided Schools.	Total of Schools.	On Roll.	Average Attendance.		Percentage.
1878		106	 4	 110	 13,647	 10,076	. , ,	73.83
1888		155	 1	 156	 20,388	 16,395		80.42
1891	•	166	 4	 170	 21,058	 17,075		81.08
1892		170	 4	 174	 21,230	 17,734		83.53

During great part of the year the attendance suffered much from the continued prevalence of influenza. The average recovered itself in the last quarter; but for the whole year, so far from making the usual advance on that of the preceding twelvementh, it fell short by 245, being 17,269

against 17,514.

Inspection.—The Inspectors' annual report, with its accompanying statistical returns, gives complete information as to the number of children examined, their classification, and general proficiency. It is gratifying to find that the Inspectors report a steady rate of improvement, though the larger number of passes as compared with those of the previous year may be partly attributable to the alterations recently made in the syllabus. But two very satisfactory features are to be noted: First, the continued increase in the number of children who pass the higher standards, with a corresponding decrease in the number of those below Standard I. The percentage of infants, which was 32.81 in 1890, fell to 31.29 in 1891, and in 1892 was still further reduced to 30.03; while, on the other hand, the proportion of children who passed Standards IV.—VI. rose from 14.11 in 1890 to 16.97 in 1891, and again in 1892 to 18.57. There could not be better practical evidence of the improved efficiency of the teaching, and particularly of the efficiency of the infant schools. Another point that deserves favourable notice is the reported progressive improvement of the smallest schools. There are forty-two schools in this district with an average attendance of less than twenty-five. Most of these are situated in the remote outlying parts of the district, the residents in which are entirely dependent on them for the means of educating their children. It is very satisfactory to know that they succeed in obtaining the services of a good class of teachers, and that, as a rule, the Inspectors find them so well conducted and in so efficient a condition.

Normal School.—The number of students admitted to the Normal School in January, 1892, was forty-three—twelve males and thirty-one females. Of the former, five were second-year students retained to make up the full complement required in the boys' department, as the number of male pupil-teachers who completed their term of service at the beginning of 1892 happened to be exceptionally small. The work of the instruction classes was much interfered with by illness among the students, caused by the prevailing epidemic; but thirteen of them had entered for and passed the matriculation examination, and all, with one exception, passed wholly or in all but some one subject the examination for teachers' certificates. In the practising school some important changes were made. The vacancy caused by the resignation of Mr. Hardie, promoted to be headmaster of Papanui School, was filled by the appointment of Mr. Pitcaithly, who entered on his duties upon the 1st of February; and at the same time the three additional assistants appointed at the end of the previous year, as mentioned in the last report, began work in their several departments—Mr. Evans in the boys' school, Miss McHaffie and Miss Grand in the girls' and infant schools respectively. Miss McHaffie had been temporarily employed in the girls' school during the last term of 1891. Towards the close of the year the Board resolved upon a considerable recon-

struction. It was thought advisable to place the whole institution under some recognised responsible head, and Mr. Colborne-Veel, who had been officially regarded as head of the Normal School since 1888, was now definitely appointed Principal. Applications were invited for the several positions in the boys' department, with the result that Mr. J. C. Adams, master of the Waimate District High School, South Canterbury, was appointed headmaster, and Mr. C. Aschman third master; Mr. Pitcaithly and Mr. Evans retaining their former places as second and fourth masters. No alteration was made in the girls' and infants' departments. These changes took effect when the school reopened after the Christmas holidays.

79

Scholarships.—The scholarship regulations were completely remodelled. The attention of the Board had been directed, as stated in the last report, to the very disproportionate extent to which, under the then-existing regulations, the scholarships were carried off by the children of large town schools, and a committee was appointed to consider how a more even distribution between town and country schools might be effected. Upon the report of the committee the Board resolved to allow candidates from country schools to enter with a year's advantage in point of age; at the same time the division into four classes was abolished, and the scholarships were allotted in two classes only, junior and senior. A town school was defined as one in which three or more certificated teachers are employed, and a country school as one in which the number of certificated teachers does not exceed two. The junior scholarships are now open to competition by candidates of not more than thirteen years of age if from a town school as defined, or than fourteen if from a country school; and the senior scholarships to candidates of not more than fifteen and sixteen respectively. The new regulations are printed in full in the appendix. Through several causes of delay they were not brought into force till the end of October, only a few weeks before the examination, which took place as usual in the middle of December. In these circumstances the results of the first examination under the new arrangement cannot be regarded as decisive. So far, however, they indicate that the alterations are likely to produce the desired effect, as on this occasion the scholarships were gained by candidates from the two groups of town and country schools in exact proportion to the number of entries from each.

The annual examination for scholarships was held on the 20th, 21st, 22nd, and 23rd December, 1892. The number of candidates examined for the Junior Class was 123 (85 boys and 38 girls), and for the Senior Class 12 (7 boys and 5 girls). Scholarships were awarded to eight boys and four girls in the Junior Class; to three boys and two girls in the Senior. The scholarships current at the end of 1892 were held as shown in the following table [not reprinted].

The Hon. the Minister of Education.

I have, &c., T. H. Anson, Chairman.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

SOUTH CANTERBURY.

Sir,—

Education Office, Timaru, 1st March, 1893.

In accordance with the 102nd clause of "The Education Act, 1877," I have the honour to present the following report of the proceedings of the Education Board of the District of

South Canterbury for the year ending with the 31st day of December, 1892:—
BOARD.—At the commencement of the year the Board consisted of the following members:
The Rev. Thomas Jasper Smyth; Mr. Melville Gray, J.P.; Mr. John Talbot, J.P.; Mr. William Barker Howell, J.P.; Mr. Robert Henry Pearpoint, J.P.; Mr. John Jackson, J.P.; Mr. George

Hampton Rhodes; Mr. William Storey; and Mr. Samuel William Goldsmith (Chairman). On the 31st March Messrs. S. W. Goldsmith, John Jackson, and G. H. Rhodes retired in terms of section 15 of the Act. The following gentlemen were nominated to fill these vacancies: Messrs. S. W. Goldsmith, John Jackson, G. H. Rhodes, William Balfour, and David Mitchell. Ross; and the voting resulted in the re-election of the retiring members of the Board. The retirement of the Rev. T. J. Smyth in May caused an extraordinary vacancy. The following gentlemen were nominated to fill this vacancy: Messrs. William Balfour, George Morton, George Henry Graham, and the Rev. Joseph White. The Rev. Joseph White was elected. At the usual meeting of the Board in April, Mr. S. W. Goldsmith was re-elected Chairman. The Board sat the true during the year, the day of meeting being the first Thursday in each month, at 11.15 a.m., except in January, when it met on the third Thursday. The average attendance of members for the year was 7.08.

Number of Schools.—On the 31st December, 1892, there were sixty-one schools in operation, Ashwick Flat and Blackburn Schools having been built and opened during the year. Of these sixty-one schools the classification was as follows: Under 15 pupils, two; 15 and under 20 pupils, two; 20 and under 25 pupils, fourteen; 25 and under 50 pupils, twenty-seven; 50 and under 75 pupils, five; 75 and under 100 pupils, four; 100 and under 150 pupils, one; 150 and under 300 pupils, four; 300 and under 500 pupils, one; 500 and upwards, one.

Of these sixty-one schools none were half-time schools. Redcliff School was closed during the greater part of the year, prior to removal to a more central site. The number of aided schools at the end of the year was eighteen.

ATTENDANCE.—From the accompanying return it will be seen that there is a steady increase in the roll-number of scholars attending the Board's schools, the average roll-number for the year

being 5,103, against 5,014 in the previous year. [Table only partially reprinted.]

Quarter ending		Number	Number of	Number	Average	e Working At	tendance.	Yearly
quarter ending			Teachers.	on Rolls.	Male.	Female.	Total.	Average.
1878 31st March 30th June 30th September 31st December 31st March 30th June 30th September 31st December 31st December 31st March 30th June 30th September 31st March 30th June 30th June		16 16 17 17 49 49 50 50 59 59 59	56 59 60 56 119 120 123 125 134 135 136 140	2,467 2,458 2,510 2,666 4,704 4,689 4,714 4,703 5,163 5,079 5,061 5,110	930 897 931 1,005 1,895 1,921 1,832 1,964 2,034 2,132 2,100 2,176	814 754 811 872 1,785 1,784 1,660 1,857 1,974 2,034 1,957 2,070	1,744 1,651 1,742 1,877) 3,680 3,705 3,492 3,821) 4,008 4,166 4,057 4,246)	1,753 3,674 4,116

Finance.—The balance-sheet of the Board, certified by the Auditor-General, is appended. The Building Account for the year shows a debit balance to the 31st December of £152 18s. 7d., leaving the Board with engagements to expend £1,070, not reckoning grants for unforeseen contingencies, all of which will have to be borne meanwhile by the Maintenance Fund, to be recouped,

possibly, out of the next building grant.

The Maintenance Account was for the same period £2,798 5s. 9d. in credit, out of which £1,352 15s. 9d. is due to reserve revenue, leaving to the Board as a credit to the end of the

year £1,445 10s.

Buildings.—During the year the Board has built new schools at Blackburn and Ashwick Flat; the Upper Otaio, Rangitata Station, Orari South, Woodbury, Rangitata South (master's house), Temuka, and Waimate Schools have been painted and repaired; additions have been made to the Waimataitai School and to the Geraldine master's house; the Redcliff School has been removed to a new site; and repairs and improvements have been made to the schools at Albury, Kakahu Bush, Milford, Pleasant Point, Seadown, Timaru Main and Side, Waihao, Upper Waitohi, and Winchester; besides a number of grants given in aid of repairs executed locally, of which a statement is given on Table 7. The funds placed at the disposal of the Board are, however, totally inadequate to enable the Board to cope with the urgency of the demands. Several schools require enlargement, and the Board would like to be able to build half a dozen residences in parts of the district where suitable accommodation cannot be obtained half a dozen residences in parts of the district where suitable accommodation cannot be obtained for the teachers. A return of these requirements has already been submitted to the Government.

COMMITTEES.—The Board has to thank the Committees of the various districts for the attention they have paid to the welfare of their schools, and for the uninterrupted maintenance of mutual confidence which has existed between them and the Board, as well as for the generous way in which

they have subscribed towards repairing their school-buildings and fences.

Scholarships.—Six scholarships were granted at the annual examination in January, making the number of scholarships up to date seventeen; and it is gratifying to note that the smaller schools are competing, and successfully, for the advantages offered by the system. The Board has to thank the Timaru High School Board of Governors for the liberality it has shown in admitting all the Board's scholarship-holders who could take advantage of it to the benefits arising from a High School training.

DISTRICT HIGH SCHOOLS.—The Inspector's report on the secondary work of the Board's District High Schools shows that eighteen scholars took part in the annual examination at Waimate, and thirteen at Temuka. At Waimate the subjects taken up were English, French, Latin, Euclid, and algebra; and at Temuka the same subjects, excepting English. The Waimate High School Board of Governors again contributed the sum of £75 towards the cost of maintaining an extra teacher for secondary work at the Waimate School.

Pupil-teachers.—The annual examination of pupil-teachers was held in July, when forty pupil-teachers and seventeen candidates for employment presented themselves. Of the forty pupil-teachers, three failed—one in the third year, one in the second, and one in the first. Of the candi-

dates, five passed and twelve failed. I have, &c.,

Samuel W. Goldsmith, Chairman.

The Hon. the Minister of Education, Wellington.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

INSPECTOR'S REPORT ON DISTRICT HIGH SCHOOLS.

Sir.— Education Office, Timaru, 9th February, 1893.

I have the honour to submit the following report on the special work of the District High Schools.

Eighteen scholars took part in the examination at Waimate, and thirteen at Temuka. The Temuka pupils carried on their work under great disadvantages, the headmaster being absent on leave, and the charge of the secondary work being in the hands of three others in succession before the session closed.

The following tables show the subjects taught, the number of pupils examined, the marks gained by each class, and the amount of work done in each subject:—

Waimate District High School.

Subject.	Course.	No. of Pupils.	Average Marks per Cent.	Amount of Work done.
English		13	67	(1) Higher Grade English, pages 1–68; (2) Abbott's How to write clearly; (3) King Lear.
Latin	Third	2	60	Abbott's Via Latina; Cæsar, Book I., chapters 1–30; Virgil's Æneid, Book II., 400 lines.
	Second	1	57	Abbott's Via Latina, pages 1-142, with Appendix I. of 1rregular Verbs.
	First, Sec. II.	3	64	Abbott's Via Latina, pages 1–83.
	" ´Sec. I.		66	Abbott's Via Latina, pages 1–39.
French	", Sec. I.	$egin{array}{c} 4 \ 3 \ 2 \end{array}$	76	Bué's First French Book, pages 1–66.
Euclid	Second		78	Books I. and II.
	First, Sec. II.	1	95	Book I.
	" Sec. I.	4	70	Book I. to Proposition 24.
Algebra	Third	1	100	Quadratic equations, problems, evolution, and surds.
O	Second	4	54	Fractions and simultaneous equations.
	" Sec. II.	3	88	Factors, G.C.M., L.C.M., and easy simple equations.
	" Sec. I.	7	92	Definitions, brackets, and four simple rules.

Temuka District High School.

Subject.	Course. No. of Average Marks per Cent.		Marks	Amount of Work done.

WAIMATE.

English.—Questions on the history of the English language were very well answered by this class, and the correction of the exercises from Abbott gave proof of careful tuition and frequent practice. "King Lear" was taken orally. The scholars had an excellent knowledge of the characters and incidents of the play; they had a capital understanding of the text, and gave from memory some of the more striking passages.

Latin.—Though there were no papers of outstanding merit from any of the pupils of the four Latin classes, still it speaks well for the teaching that no pupil gave in a paper that was not entitled

to be deemed creditable. The marks ranged from 50 to 71 per cent.

French.—Three girls took a first course in French, and gained very good marks. Their progress

had been remarkably even, only three marks coming between the first and third papers.

Euclid.—A very pleasing feature of all the Euclid papers was the orderly way in which the steps of the propositions were set down. Four of the papers were excellent, one was good, and two fair.

Algebra.—The appearance made in this subject reflects great credit on the pupils and on their teacher, no less than seven of the fifteen papers submitted being perfectly accurate, and only one paper in the lot falling under 50 per cent. in value.

TEMUKA.

Considering the difficulties surrounding the teaching of the secondary work in this school during the past session, I do not think it necessary to make special remarks with respect to each subject. I would just mention that William J. R. Gore, who was completing his fourth year as the holder of an Education Board scholarship, acquitted himself well in his four subjects—Latin, French, Euclid, and algebra; and that a few of the pupils gave in good papers in Latin. With these exceptions the rest of the papers were of a very indifferent quality, as many as ten being almost, if not altogether, worthless.

I have, &c.,

James Gibson Gow, M.A., Inspector.

The Chairman, South Canterbury Education Board.

OTAGO.

Sir,— Education Office, Dunedin, 16th March, 1893.
In accordance with section 102 of "The Education Act, 1877," the Board of the Education District of Otago has the honour to submit the following report of its proceedings for the year

Board.—At the commencement of the year the following members constituted the Board: Hon. John McKenzie, Hon. Thomas Dick, Messrs. Henry Clark, James Green, Michael Fraer, John Macgregor, Donald Borrie, Dr. Hislop, and Dr. Stenhouse. The Hon. John McKenzie, the Hon. Thomas Dick, and Mr. Clark retired in terms of section 15 of the Education Act. Seven candidates were nominated by the School Committees for the vacancies, and the voting resulted in the re-election of Mr. Clark, and the election of Messrs. Andrew McKerrow and John J. Ramsay. At the first meeting of the Board in April Mr. M. Fraer was appointed Chairman. The Board held twenty-seven meetings during the year. Dr. Hislop and Mr. Henry Clark were appointed members of the Board of Governors of the Otago Boys' and Girls' High Schools, and Mr. Borrie was appointed the Board's representative on the Waitaki High Schools Board. Mr. James Green continues to represent the Board as Commissioner of Education Reserves.

Number of Schools.—The last report of the Board showed that on the 31st December, 1891, there were 196 schools in operation. During the year a new school was opened at Hukinga, and a subsidised school was established at Moutere. The school at Taioma, on the line of the Otago Central Railway, was closed. The number of schools therefore in operation at the close of 1892 was 197. The Balclutha School has been raised to the position of a district high school. The establishment of schools has been sanctioned at Upper Junction, Galloway, Catlin's, and Houipapa. Buildings were erected and the school was ready to be opened in the first-named district at the end of the year. Twelve memorials for the establishment of schools were received during the year. Five of these were granted, four were declined, and the remaining three are still under consideration. The following shows the classification of the schools according to the average attendance: Under 15 pupils, fourteen; 15 and under 20 pupils, thirteen; 20 and under 25 pupils, eighteen; 25 and under 50 pupils, sixty-nine; 50 and under 75 pupils, twenty-eight; 75 and under 100 pupils, thirteen; 100 and under 150 pupils, thirteen; 150 and under 300 pupils, nine; 300 and under 500 pupils, ten; 500 and upwards, ten.

Teachers.—There were 511 teachers in the Board's service on the 31st December, classed as under: Male head-teachers, 80; male teachers in sole charge, 62; male assistant teachers, 54; male pupil-teachers, 40; female teachers in sole charge, 55; female mistresses, 80; female assistants, 56; female pupil-teachers, 68; female sewing-teachers, 16. This statement, as compared with that of the preceding year, shows a decrease of three teachers.

Pupil-teachers.—At the end of the year there were 108 pupil-teachers in the service of the Board. The annual examinations were held in December. The following statement shows the number that went up for examination, the number that passed, and the number that failed: First class—30 presented, 25 passed, 5 failed, 2 absent; second class—33 presented, 32 passed, 1 failed, 1 absent; third class—21 presented, 20 passed, 1 failed, 1 absent; fourth class—18 presented, 17 passed, 1 failed, 2 absent.

School Attendance.—The following is an abstract of the attendance at the public schools of this district from the institution of the Otago education scheme, in the year 1856, to the present time. At the beginning of 1878 the new Education District of Southland was created, and thirty-seven schools were handed over to the newly-formed Board [table not all reprinted]:—

			Schools.	Teachers.	atte	ended at	pils who all in he Year.	Daily	Average Attenda the Year	nce for	Attendance at the Close of the Year.			
		Year.		Number of	Number of	Dunedin.	All other Schools.	Totals.	Dunedin.	All other Schools.	Totals.	Dunedin.	All other Schools.	Totals.
1856–57		•••		5	7				115	121	236			
1867				56	85	1,216	3,151	4,367	897	2,045	2,942	919	2,436	3,355
1877				173	356	3,191	16,422	19,613	2,176	9,573	11,749	2,585	11,943	14,528
1887										15,110				
1891										15,249				
1892	•••		• • •	197	511	5,574	24,270	29,844	3,824	15,503	19,327	4,252	18,416	22,668

The returns for the year show an increase of 256 on the average attendance of the previous year, and of 679 in the number that attended at all during the year. The attendance shown by the above table, although an improvement on that of the past year or two, is still less than it would have been but for the large amount of sickness that prevailed in the district during the early part of the year.

The number of Maori and half-caste children attending the schools in the district is shown in the following statement: Maoris, 8 males, 7 females; half-castes living as members of a Native tribe, 7 males, 3 females; half-castes living among Europeans, 33 males, 29 females. Number of schools in which there were Maori or half-caste scholars, 10.

Scholarships.—Twenty-seven scholarships—thirteen junior and fourteen senior—were awarded in December. One hundred and eight candidates entered for the junior and forty-four for the senior examination. The Board of Governors of the Dunedin High Schools have for a number of years granted the privilege of three years' free education at their schools to all senior-scholarship candidates who, though failing to win scholarships, yet gain at least 50 per cent. of the attainable marks. Early in 1892 the Board decided to grant on similar conditions two years' free education to junior-scholarship candidates, and to this extremely liberal concession is doubtless attributable the large increase in the number of candidates, thirty more having entered for examination than in any previous year. Forty-five juniors and sixteen seniors qualified for free education, but of these perhaps about one-half will, through residing at a distance from Dunedin, be prevented from taking advantage of the privilege offered by the High Schools Board. The amount expended in scholarships was—Paid to holders, £1,178 10s.; expenses of examination, £38 18s. 2d.: total, £1,217 8s. 2d.

Inspection.—All the schools that were open throughout the year were examined, and nearly all were inspected. The following is an abstract of the work done by the Inspectors during the year:—

	 Inspector.		Time employed.	Distance travelled.	Inspection Visits.	Schools examined.*
Mr. Petrie Mr. Taylor Mr. Goyen	 ···	 •••	Hours. 1,928 1,952 1,994	Miles. 4,034 4,286 3,976	92 78 81	75 74 84

Of the pupils examined, 85 per cent. passed the standards for which they were presented—a better result than has been attained in any previous year. The percentage of failures for the whole district was 12, a result considerably more favourable than that of recent years. There is also considerable improvement in the marks given for "class"-subjects, and in those for additional subjects. As usual, very few children were absent from the examinations, and the absences were nearly all owing to sickness. The proportion of pupils excepted is still low and does not show any increase. The percentage of failures at a school may be taken as a rough measure of its efficiency. No fewer than 37 per cent. of the schools of the district show a percentage of failures of 10 or less, thus reaching a high level of efficiency; and 29 per cent. of them have a percentage of failures ranging from 11 to 20, which shows a very fair level of efficiency. In two-thirds of the remaining schools the percentage varies from 21 to 30. There is little change in the ages at which the various standards are passed; but it may be noted that the average age at which Standard I. was passed is one month higher than it was last year. No fewer than 1,217 pupils over eight years of age were not presented in Standard I. The reasons assigned for the withholding of these children from examination in the standard appeared to the Inspectors to be in most cases quite satisfactory. The permission to group classes for instruction in geography, history, and grammar, granted by the revised regulations, has proved a great boon to the teachers of the smaller schools. It has proved advantageous in the higher classes of some of the larger schools also. Considerable complaint is made by teachers about the weight of the drawing course in several of the classes, and the Inspectors are of opinion that the time required for teaching drawing has led to hurtful curtailment of the time available for teaching writing, more especially in the large number of schools taught by single teachers.

Drawing Department.—The report of the headmaster of the Drawing Department is appended. The classes were attended during the year by 404 students—viz., 86 teachers and pupil-teachers, 54 students in training, 103 pupils in the afternoon classes, and 161 artisans and other pupils in the evening. The expenditure on the department for the year was—Salaries, £550; incidental expenses, £75 11s. 6d.; amount received from fees, &c., £278 5s.: net cost, £347 6s. 6d.

Training College.—The report of the Rector of the Training College is attached. The attendance of students during the year was,—

Students in 1892—	N	[.	F.	Total.	Left during 1892—	M.	\mathbf{F} .	Total.
	3			73	Teaching in public schools	9	22	31
Admitted during 1892 .	1	6	27	43	Awaiting appointment	1	6	7
Left during 1892 .	1	2	32	44	On leave—at the University	1	3	4
On books, December, 189	2 3	5	37	72	Left the service	1	1	2

The cost of the institution for the year was—Salaries, £1,057 10s.; allowances to students, £1,351 11s. 1d.; incidentals, £9 8s. 2d.: total, £2,418 9s. 3d.

The Board desires to acknowledge the liberality of the Government in securing to it the sum of £500 as a grant in aid of the Training College expenditure. The Board, however, strongly presses upon Government the necessity of an adequate grant being made in future.

Arbor Day, and the Planting of School Grounds.—Arbor Day was observed in this district for the first time on the 4th August. The reports concerning the observance of the day show that the movement was heartily approved by teachers, Committees, and the general public. In some districts all other business was suspended for the afternoon, the schools vying with one another in making the day pleasant and successful. According to reports several thousand trees were planted throughout the district.

A large proportion of the teachers in the Board's service failed to realise the double responsibility of their positions, as occupants in charge of valuable properties and as instructors bound to set their pupils an example of industry, order, cleanliness, and all that tends to educate and refine. With a view to remedy this serious defect and to rouse some interest in the important matter of tree and flower culture, and to induce teachers to take greater care of the valuable properties intrusted to them, the Board issued the following circular, the good effects of which are already making themselves apparent in many parts of the district:—

The Education Board has had its attention directed to the fact that throughout the Otago District a number of the public-school buildings and their surroundings still present a cheerless and untidy appearance, and the Board regrets very much that in a number of instances no attempts have been made to enclose the school grounds with live fences, or to plant them with trees and shrubs, and that there are still many school gardens unworthy of the name. It may be urged by the teachers as an excuse for this state of matters, so far as they are concerned, that there is no absolute security for the repayment to them, in the event of their leaving, of any outlay made by them on the improvement of the school property. The School Committee and the settlers, who have also a considerable interest in this matter, could no doubt do very much to encourage and substantially assist the teacher to improve the appearance of the school-buildings and grounds by the planting of trees, shrubs, and live fences for shelter and ornament, and by the formation of a fruit, flower, and kitchen garden. But a very great deal might be done in this direction by the teacher himself, by the putting-forth of a moderate amount of personal effort. Because of the fitness of the thing, and because of the benefit he would himself derive from the exercise, the Board would urge upon every

^{*} Thirty-five of the schools in this column are reckoned twice over, as two Inspectors worked together in examining them,

85

teacher in occupation of an official residence the duty and advantage of devoting a portion of his spare time to the formation and cultivation of at least a small garden. The good example set by the teacher in this matter would undoubtedly exert a beneficial influence upon his pupils, and, through them, upon the families of the district; while, at the same time, the very fact of the teacher practically manifesting a desire to render the school premises attractive and becoming would in most instances induce the School Committee and the friends of the school to encourage his efforts and render him substantial assistance. It is extremely desirable that the public school should become, to the greatest possible extent, a source of good influences. The Board does not consider it unreasonable to expect also that the teachers should take such an interest in the school premises as to be willing to expend some little personal effort in keeping them in good order and repair. Experience has shown that a fair amount of watchfulness on the part of the teacher over the conduct of the scholars will do very much to preserve the school property from injury, and that the teacher over the conduct of the scholars will do very much to preserve the school property from injury, and that by any relaxation of such attention even the newer buildings, furniture, fencing, &c., soon become untidy, disfigured, and out of repair. The timely expenditure of a few minutes now and again by the teacher in driving a nail or two, in fixing a rail or a wire, or in putting in a support to a post, would frequently render a fence secure for a considerable time, which, if neglected, would soon become useless. The same may be said as regards the securing of a shingle, a board, or a piece of spouting, the clearing-out of a drain, and the attention given to the hinges and fastenings of doors, gates, and windows. The Inspectors have been directed to report very fully in each case on the condition of the school-buildings, furniture, fences, &c., and the attention that appears to be given by the School Committee and the teacher to their maintenance in good order and repair. The highly satisfactory and creditable condition of an increasing number of public-school properties shows what can be done by Committees and teachers who are actuated by proper motives regarding the important matters referred to in this memorandum.

Finance.—A certified statement of the Board's income and expenditure for the year is The sum expended in teachers' salaries (including bonuses on classification appended hereunto. and bonuses for instructing pupil-teachers) was £61,280 7s. 5d.; the sum paid to School Committees for incidental expenses was £4,444 10s.; the sum expended in the erection, enlargement, and improvement of school-buildings was £5,772 6s. 5d. A detailed statement of these payments appears in Appendix A, which table also gives the names of the teachers employed, their classifi-

cation, and the annual salary of each at the rate paid during the December quarter.*

Truancy.—Towards the close of 1891 the Board had its attention directed to the necessity that existed for the adoption of measures for gathering into the schools those children who, through the carelessness or neglect of their parents or guardians, seldom or never attend school, and spend their time in the streets or on the wharves. It was represented that the efforts of School Committees to enforce the compulsory clauses of the Act had ended in total failure, partly because the police—the only agents at the disposal of Committees—were found to be, from the very nature of their calling, unsuitable as truant officers, and partly because School Committees were decidedly averse to incurring the odium which the prosecution of parents or guardians naturally entailed upon The Board appointed a committee, consisting of Dr. Hislop and the Hon. T. Dick and J. Macgregor, to obtain all necessary information on the subject, and to report as to the advisability of appointing an officer who would be in a position to take effective measures for the suppression of truancy. In December, 1891, this committee reported that, after duly considering the subject remitted to them, they were of opinion that it would be well for the Board to appoint temporarily a Truant Officer, but that no steps should be taken in the meantime in the direction of establishing a special truant school. In accordance with this recommendation, the Board, in March of 1892, appointed as Truant Officer Mr. Robert T. Aitken, the inspector for the Society for the Prevention of Cruelty to Animals, on the understanding that his time should be divided equally between the business of the Board and that of the society.

The nature and scope of the Truant Officer's duties were set forth in a circular addressed by the Board to School Committees, whose assistance and co-operation in the work were invited. It was soon apparent, however, that Committees were disinclined to take upon themselves the responsibility of summoning neglectful parents, and for a time the officer's duties were restricted to visiting and verbally warning these parents. This initial difficulty was, however, overcome by the officer getting himself appointed Clerk to the various Committees, and since then he has acted with a free hand so far as they are concerned. A further difficulty was experienced when the summoning before the Court of a batch of contumacious parents was decided upon. It was found that a strict adherence to the procedure specified in the Act would entail a delay of nearly four months, and, as a matter of fact, it was not till December that the Board's solicitors advised that all the legal formalities had been complied with, and that an order of the Court might be reasonably expected. It is plain that a radical alteration in the compulsory clauses of the Act must be made in the direction of placing the suppression of truancy entirely in the hands of Boards, and, while providing proper safeguards against any harsh or tyrannical action on their part, of so simplifying the legal procedure that, in cases of continued parental neglect, their officers may act with promptitude and effect. Mr. Aitken has brought zeal and tact to bear upon the performance of his duties, and, notwithstanding the difficulties mentioned above, his efforts have without doubt materially diminished truancy in Dunedin and suburbs.

During the nine months ending 31st December the cases of 468 children who were found by the officer on the streets or about the wharves, or of whose truant habits he had been informed by head teachers, were inquired into, and the parents warned. One hundred and twenty-two notices were served on parents, twenty-four neglectful parents who had been repeatedly warned were summoned before the Court, and twenty-one orders to send children to school were obtained. the reopening of the schools after the midsummer recess the whole of the children against whom orders were issued have, with two exceptions, attended school with commendable regularity.

Up to the present no objection has been raised by School Committees or head teachers to receiving into their schools those children whom the officer has detected as confirmed truantplayers, and the Board's experiment so far seems to prove that, without the establishment of a special truant school, the streets can be cleared of children who are neglected, and therefore in danger of falling into vicious ways. By order of the Board.

The Hon. the Minister of Education.

P. G. PRYDE, Secretary.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

REPORT OF THE ART MASTER.

Sir,-

I have the honour to submit my annual report on the School of Art for the year 1892.

The school was open every day from 8 a.m. to 4 pm., and from 5.45 p.m. to 9 p.m. The classes were open to the general public, whether in pursuit of art as a profession or as amateurs. Classes for teachers and pupil-teachers, students in training, and evening classes for artisans were also carried on.

The total number of students who received instruction during the year was 404: this is a decrease of twenty-four since last year. The total includes eighty-six teachers and pupil-teachers, fifty-four students in training, 103 students who attended the day classes, and 161 students who attended the evening classes.

The pupil-teachers of the city and suburban schools were regular in their attendance. A few from country schools who could not attend the regular classes were instructed on Saturdays. The following are the results of the pupil-teachers' second grade examination in drawing: The total number examined was 105, of whom ninety-nine were successful; eighteen passed in freehand drawing; twenty-one in model drawing; thirty-three in practical, plane, and solid geometry; and twenty-seven in perspective.

The students attending the Training College, as a part of their training, were exercised in drawing on the blackboard on a large scale, from copies, from models, drawing in light and shade from the round, and in practical, plane, and solid geometry. Forty-two students, having passed satisfactory examinations, received certificates of competency to give instruction in elementary drawing.

During the session twelve mining students from the Otago University were in attendance, four of whom, having completed their term, received certificates for freehand and model drawing, practical, plane, and solid geometry, and mechanical drawing.

The course of instruction in landscape painting direct from nature has been continued with the happiest results. Twelve excursions were made to various localities, when the weather was suitable.

The class for studying the living model is highly appreciated by the students, amongst whom are some of very good promise, and whose works during the session show a great advance. The studies of Master J. Kilgour and Miss B. Cannon deserve special mention.

The evening classes were open as usual. Forty-two students attended the classes for practical, plane, and solid geometry, mechanical and architectural drawing, and 119 those for freehand and model drawing, drawing and shading from the round, and painting. The progress made by the students in the various classes was most satisfactory, and their care and attention merited all commendation.

My assistants have performed their duties most satisfactorily during the year.

At the close of the session an exhibition of upwards of 400 drawings and paintings done by the students during the year was open to the public for five days. The exhibition was well attended, and was highly spoken of by the Press.

The Secretary, Otago Education Board.

I have, &c.,

DAVID C. HUTTON, Art Master.

The following list shows the occupations of the students who attended the evening classes: Architects, 4; blacksmiths, 2; bookbinder, 1; boilermaker, 1; brass-finishers, 4; bricklayer, 1; commission agent, 1; carpenters, 9; clickers, 2; coach-builders, 2; coach-painters, 3; compositor, 1;

E.-1.

carriage-builder, 1; clerks, 8; cabinetmakers, 7; coffee-grinder, 1; drapers, 6; dressmakers, 4; engineers, 11; electrical engineer, 1; engravers, 5; fitters, 2; grainers, 2; grocers, 2; ironmongers, 5; jewellers, 1; lithographic artist, 1; machinist, 1; milliner, 1; moulder, 1; mining engineers, 2; patternmakers, 2; photographic artists, 3; photographic printer, 1; plasterers, 3; plumbers, 2; painters, 9; printer, 1; retouchers, 8; storeman, 1; saleswomen, 4; signwriters, 6; students, 14; tailoress, 1; teacher, 1; wireworkers, 2; no occupation, or home duties, 10: total, 161.

87

REPORT OF THE RECTOR OF THE TRAINING COLLEGE.

Sir,-

I have the honour to submit my report on the Training College for the year 1892.

The following was the attendance: First-year students—16 males, 27 females; second-year students—20 males, 15 females; third-year students—4 males, 1 female; fourth-year students— 1 male, 1 female: total, 41 males, 44 females.

No change was made in the teaching staff during the year.

The following are the results of examinations affecting the students' classification as teachers: Twenty-one students kept terms at the Otago University. Three passed the New Zealand University honours examination, securing the M.A. degree; three passed the B.A. degree examination, and qualified for B certificate; five passed the first section of the B.A. degree examination, and qualified for C certificate; one received a partial pass for C certificate; nineteen passed the New Zealand University matriculation examination. Twenty-five passed the D examination, and ten made a partial pass—most of the latter have to pass in only one subject to complete their examination for D certificate; four passed the E examination, and one made a partial pass; eighteen received special mention for excellence in the D and E examinations—one of them in six

subjects, one in three subjects, and six in two subjects.

The students devote every fifth week during the session to practice in teaching and management of classes in the ten associated schools of the city and suburbs. The students attending the University take their practice in teaching during the recess. The verbal and written reports of the headmasters show that good work is being done. Every Friday afternoon is devoted to model and criticism lessons in the Normal School. A large proportion of time and attention is thus devoted to the practical part of the student's training. I have to thank the headmasters and assistant teachers of the associated schools for the valuable help so cordially given us in this im-

portant department of our work.

At the request of the Board I visited the Wakari School, and observed Mr. Patterson's method of teaching two blind pupils along with the other pupils of the school. I have since taught several of the second-year students to read and write the embossed Braillé type for the blind. Want of the necessary apparatus prevented us taking up arithmetic. The students should have no difficulty in acquiring a knowledge of the system and its simple apparatus sufficient to enable them to begin the education of blind children, should such be in the neighbourhood of schools to which they are appointed. With sympathy, patience, and ordinary skill, I have no doubt they would be successful I have, &c.,

The Secretary, Otago Education Board.

W. S. FITZGERALD, Rector.

INSPECTORS' REPORT ON DISTRICT HIGH SCHOOLS.

SIR,— We have the honour to submit our report on the special work of the District High Schools for the year 1892. Palmerston District High School.

A considerable number of the pupils come by train, and do not reach school till a comparatively late hour in the forenoon. The Rector was absent from duty for about four months through ill-health. The following notes indicate the quality of the work, which, considering the

circumstances of the school during the year, is of a very satisfactory character.

English.—The class read the whole of "Hamlet," studied the English composition in Dr. William Smith's English Series, and read a good part of "Chambers's Advanced Reader." The story of "Hamlet" was well known; difficult words and short passages were very satisfactorily explained; and some longer passages were paraphrased with fair success. Considerable attention has been given to spelling and to common errors in composition.

Latin.—In Class I. the translation was good; questions on parsing and accidence were very satisfactorily answered; questions on syntax were insufficiently explained; but Latin composition was very fairly done. The pupil in Class II. was absent. In Classes III. and IV. the translation and parsing were well done; elementary accidence was fairly known; and the composition was on the whole fair—several pupils answered well in it. Class V. did fairly.

French.—The pupils knew very well the work read.

Geometry.—The pupil in Class I. gained 70 per cent. of the marks. In Class II. two pupils passed well; of the remaining pupils two gained half marks, and the other two less than half marks. In Class III. three of the papers were of very high merit; of the rest two were of good

and three of poor quality.

Algebra.—The work of the pupil in Class I. was not well set out, but in other respects it was very satisfactory character. In Class II. two pupils did well, three fairly, and one very poorly. of a very satisfactory character. In Class III. one pupil gained full marks, one 80 per cent., two 60 per cent., and the remaining four less than 50 per cent. of the marks. For the time they have been at the subject the pupils of Class IV. have done a large amount of work, and about half of them have a good grasp of the principles underlying it.

Higher Arithmetic and Mensuration.—One pupil cleared the paper, one did fairly, and the rest

poorly.

English.—The extracts from "Hamlet" in the Royal School Series have been very thoroughly studied. The sense of the dialogue was well understood, and difficult words and phrases were readily explained by most of the pupils. Some longer passages were on the whole well paraphrased. Abbott's little book has been studied to good purpose, but we doubt if it is a very suitable text-book, as it does not contain a sufficient number and variety of easy examples for criticism. The lower class has not studied any prose, an omission which it is desirable to

Latin.—Class I. has gained a very good knowledge of the texts read. The translation was readily and accurately done, and the questions in accidence and syntax were well answered. Latin composition was of very fair quality. The pupils of Class II. gave a good translation of the text. Questions in grammar were answered with fair accuracy and moderate readiness.

Composition has received very satisfactory attention.

French.—Class I. did well both in translation and in grammar. The translation of Class II. was generally creditable, and the grammar fair. Most of the pupils of Class III. showed an accurate knowledge of the work read.

 \mathbf{E} .—1.

Geometry.—In Class I. one pupil passed an excellent and two a fair examination. Class II. four pupils did well, four fairly, and five very poorly.

Algebra.—In Class I. two of the pupils passed an excellent and two a moderate examination. Of the pupils of Class II. three gained full marks, six 80 per cent., one 60 per cent., and one 20 per cent. of the marks. In Class III. two pupils cleared the paper, eight did well, three fairly, and two poorly.

Agriculture	•	I.	11	Analysis of limestone, of earth containing iron, and of bonedust.

English.—The pupils read the text of "Hamlet" (Royal School Series) with great fluency and very considerable spirit. Difficult words were readily and clearly explained; phrases and short passages were not quite so well handled. A paraphrase of two longer passages was, on the whole, very creditably done. The prose extracts read have been studied chiefly with the view of illustrating characteristics of style. Nichol's little work on composition has been fairly mastered.

Latin.—The pupils of Class I. made an excellent appearance in this subject; they translated readily and with considerable taste. Class II. did about as well as Class I.; their work was marked by great thoroughness and accuracy. Latin composition was fairly done by most. The pupils of Class III. have also gained a good knowledge of what they have read.

French.—This subject has been taken up again during the present year. Six of the pupils gave

in very good papers, and the other three answered fairly.

Geometry.—Class I. answered fairly, and Class II. well. Nearly all the pupils of Class III. gained full marks. It would be well if more attention were given to neatness in the figures and the writing-out of the proofs. References to propositions quoted were rather sparing.

Algebra.—Two pupils of Class II. did poorly, two fairly, and three very well.

most of the pupils of Classes I. and III. was of very high merit.

Agriculture.—The analyses in this subject have been worked out in all their details by the pupils themselves. Lawrence District High School.

	.	II.	11	Todhunter's, to end of Simple Equations.
		III.	10	Todhunter's, to end of Fractions.
Arithmetic (Higher)		I.	6	Goyen's Higher Arithmetic and Mensuration.

English.—No prose has been read by this class, an omission which it would be well to remedy. The matter, language, and incidents of the play read were well known by most of the pupils. A longer passage was well paraphrased by a good many, and fairly by the others. Derivation has received considerable attention. Under composition the sentences set for criticism were properly

corrected, but the nature of the errors was seldom pointed out.

Latin.—The translation was fairly given, but the sentences were turned in the Latin rather than in the English fashion. This is most likely a result of too great devotion to strict literalness of translation. A class at this stage should be expected to construe into good English. Grammar and parsing were very well known. The syntax questions were fairly answered, but the uses both of cases and of moods were seldom sufficiently explained. The composition was on the whole good, and in several cases excellent. In Class II. the translation was accurately done, but with too little regard to English idiom and order. The rest of the work was of very satisfactory quality. All the work of Class III. was most accurate.

French.—In all the classes the translation was done with ease and accuracy. The grammar

was very well known by nearly all the pupils.

Geometry.—All the classes answered very creditably in this subject. The demonstrations were

full and clear, and the references accurately quoted.

Algebra.—Classes I. and III. did their work in a very satisfactory manner. Of the twenty pupils ten gained full marks. In Class II. the mechanical work was well done by all, but the problems proved too difficult for more than half the pupils.

Higher Arithmetic and Mensuration.—Two pupils gained over 90 per cent. of the marks, one

50, and the three others under 50 per cent.

Balclutha District High School.

Subject	i.	Class.	Pupils examined.	Amount of Work done.						
English	•••	I.	16	Hamlet, Royal School Series; Dr. William Smith's English Grammar.

Algebra		I.	1	Hamblin Smith's, 200 pages.						
J		II.	4	Hamblin Smith's, 117 pages.						
		III.	11	Hamblin Smith's, 66 pages.						

English.—The text of "Hamlet," Royal School Series, was read with considerable spirit; difficult words and brief passages were very fairly explained, and a longer passage was on the whole fairly paraphrased. In a few condensed and difficult expressions, the speaker's train of thought might have been interpreted in some cases with greater exactness and nicety. No prose has been read by this class, and, beyond the correction of faulty sentences, there has been little systematic instruction in composition. These are matters that can be better provided for in future years.

Latin.—The pupil in Class I. has done excellent work in this subject. She is not, however, strong in composition. Class II. have learned the exercises of Part I. and the translations of the fables very thoroughly. A few pupils know the grammar well, and nearly all satisfactorily.

French.—The work professed was very well known by a few of the pupils, and very fairly by

the rest.

Geometry.—The pupil in Class I. gained full marks; and Class II. did very fairly. With one

exception the pupils of Class III. gained full marks.

Algebra.—The pupil of Class I. obtained full marks. Of Class II., two pupils passed a very good, one a fair, and one a poor examination. The pupils of Class III. answered fairly; four of them gained 60, and the rest 50 per cent. of the marks.

We have, &c.,
D. Petrie,
Wm. Taylor,
P. Goyen,

The Secretary, Otago Education Board.

SOUTHLAND.

Sir,—

The Board of the Education District of Southland has the honour, in conformity with the provisions of "The Education Act, 1877," to present the following report of its proceedings, and of the progress of education throughout its district, for the year ending the 31st December, 1892:—

91 E.—1.

THE BOARD.—At the commencement of the year the gentlemen constituting the membership of the Board were: Mr. George McLeod, M.A. (Chairman), and Messrs. James W. Bain, Alfred Baldey, George Froggatt, Dr. Hodgkinson, George Lumsden, Donald L. Matheson, James Mackintosh, M.H.R., and Robert McNab, M.A., LL.B. There retired in order of rotation Messrs. Froggatt, Mackintosh, and Dr. Hodgkinson. For the three vacancies so created six nominations were received, and the voting resulted in the election of Messrs. Froggatt, Mackintosh, and Thomas MacGibbon, the two former being re-elected. At the first meeting of the reconstructed Board, held on the 1st April, Mr. D. L. Matheson was unanimously elected Chairman for the then ensuing year. During the year the Board held one special and twelve ordinary meetings, and the Executive Committee met twenty-three times. Seven meetings of specially-appointed committees were also held during the year. At all of these a very satisfactory attendance of members was registered, the average for meetings of the Board being eight, and for the Executive Committee seven, and this notwithstanding the fact that one member (Mr. Mackintosh, M.H.R.) was absent on leave during the whole of last session of Parliament. The following figures indicate the attendances of individual members: Board meetings—Mr. Bain, 13; Mr. Baldey, 13; Mr. Matheson, 13; Mr. Froggatt, 12; Mr. Lumsden, 12; Mr. McLeod, 12; Mr. McNab, 11; Mr. Mackintosh, 8; Mr. MacGibbon (nine months), 6. Meetings of Executive Committee — Mr. Lumsden, 22; Mr. Froggatt, 21; Mr. McNab, 21; Mr. Matheson, 20; Mr. McLeod, 20; Mr. Bain, 17; Mr. Baldey, 17; Mr. MacGibbon, 11; Mr. Mackintosh, 10. Mr. D. L. Matheson (re-elected) and Mr. Robert McNab were appointed to represent this Board on the Board of Governors of the Southland High Schools; while Mr. Thomas Denniston continued to officiate on behalf of the Board as Commissioner of the Education Reserves of Otago and Southland.

Schools.—During the year just ended the number of schools under the jurisdiction of the Board has been increased by the establishment of five new schools in the Districts of Oreti Plains, Waikawa Valley, Big Beach, Eastern Bush, and Springbank; while the school formerly in existence at Kingston, but for many years past closed owing to sparseness of population, has been reopened. The half-time school at South Forest Hill, owing to a marked decrease in the attendance, was closed on the 30th June last. The number of schools in operation at the close of the year preceding that to which this report refers was 115. The changes above indicated increase the number to 120. Of this number eight schools are worked on the half-time principle, with fairly satisfactory results, when the disabilities under which they exist are taken into account. In twelve outlying districts the average attendance in each instance does not reach twenty, which is the Board's minimum entitling a district to the establishment of a school. Provision is, however, made in the Board's regulations for assisting districts which, by reason of sparseness of population, are not able to guarantee the minimum attendance of pupils. In such cases a capitation grant of £3 10s. per pupil in average attendance is made towards a teacher's salary, and an additional grant of 5s. per pupil towards the incidental expenses of the School Committee. By this means the educational necessities of even the most remote parts of the district are, in some measure at least, provided for. The increase of schools previously noted is about the average rate for the past seven years, and is a tolerably just indication of the progress of settlement in this educational district. The opening-up of the western district, which has already been initiated, will doubtless in the near future create an unusually heavy demand for educational privileges in that quarter, to meet which will prove a heavy tax on the Board's resources.

Attendance of Pupils.—At the close of last year (1891) the aggregate number of pupils on the attendance registers was 8,587, with an average attendance of 7,041 for the last quarter of that year. The corresponding figures for the year just ended are 8,999 and 7,479 respectively, showing an increase in the roll-number of 412, and in the average of 488. This satisfactory feature is accounted for in part by the opening of new schools before referred to, and also by an increased attendance at many of the schools already in existence. The mean average attendance for the whole year is 7,225, or an increase of 415 over that of the year preceding. The percentage of average attendance to roll-number for the year 1892 was 80.5, the highest on record for this district. A reference to the statistics of the past six years shows that for the five years preceding 1892 the mean percentage of average attendance to roll-number was 77.2; while, as above stated, the year 1892 showed a percentage of 80.5, which record exceeds that of the mean average for the whole colony for any one year, or series of years, since the constitution of the present education system.

In October, 1891, the Board appointed a Drill Instructor and Truant Officer. When the last annual report was written a sufficient time had not elapsed to judge accurately as to the wisdom of the Board's action in this matter. It is now evident that the satisfactory increase in the percentage of average attendance in this district must, in a very considerable degree at least, be attributed to the appointment of this officer. There appears to the Board no other possible explanation of the circumstance, especially in view of the fact that during the whole of the year the influenza epidemic raged with unabated severity in many parts of the district. An increase of 3·3 per cent. in average, as compared with the previous five years, represents an actual increase of 296 pupils. It would perhaps be difficult to gauge accurately what this fact represents in the benefits which have accrued to the children of negligent or indifferent parents, who have thus been compelled to do simple justice to their offspring. Without entering into minute calculations as to the actual pecuniary value of the services of a Truant Officer, the Board may safely assume that the extra expenditure in salary and travelling expenses is amply justified by the results achieved. Much better would be the results were such officers endowed by the Legislature with power to prosecute offending parents or guardians. While, however, the Board may congratulate itself on the improvement manifested by the district as a whole in the matter of attendance, it still remains a painful fact that, with reference to many of our school districts, the Inspectors and teachers have frequently to complain of the carelessness and indifference often manifested by parents in the welfare of their children, as evidenced by their repeated absence from school. It not infrequently happens that members of School Committees, who should be regarded by their neighbours as

E.—1. 92

models to imitate, are the most flagrant offenders in this connection. The compulsory clauses of the Act, as at present constituted, are practically inoperative; and further legislative action is highly desirable to enable Boards to cope successfully with an evil which tends so seriously to nullify their best efforts to secure the highest results. Too much responsibility is cast on the Committee of the district, members of which are very often disinclined to incur the odium of a prosecution of neighbours with whom they may be otherwise on friendly terms.

With reference to the method of calculating the average attendance, this Board desires to reiterate the opinion that a reversion to the system of "working average" would prove a most beneficial reform. Where the daily bread of a teacher and his family depends upon so uncertain a basis, it appears to the Board that every precaution should be adopted to insure that the method of calculation should be as equitable as is possible, and not subject to variation by circumstances over

which those most directly interested have no control whatever.

Teaching Staff.—On the 31st December, 1891, there were 196 teachers in the service of the Board. At the close of the year to which this report refers there were 211, an increase of fifteen for the year. This increase is due in part to the opening of new schools during the year, but more particularly to an alteration made in the Board's regulation with respect to the number of pupils which would justify the appointment of a pupil-teacher. Previously the number fixed by regulations as entitling a school to the services of a first pupil-teacher was an average attendance of fifty. This regulation has been amended by substituting the figures "45" for "50," and to this circumstance is partly due the increase in the staff here noted. The Board has reason to congratulate itself and the district on the work of its teaching staff as a whole. Methodical and conscientious effort to promote the best interests of the pupils under their control characterizes the work of a large majority of the Board's teachers, as is evidenced by the reports of the Inspectors which are read at each monthly meeting of the Board. There are some, however, who apparently regard their position simply as a means of livelihood, with no higher aim than to secure such success as will obviate the necessity for degradation or dismissal. Needless to say that the services of such are retained only till such time as their places can be filled by more competent and enthusiastic teachers. The law of the "survival of the fittest" operates here, as elsewhere, with unerring precision. It is satisfactory, however, to be able to place on record the fact that these latter form but an insignificant part of a meritorious whole.

Scholarships.—The usual yearly examination for scholarships was held on the 28th June last, and three following days. An additional examination centre was this year established at Queenstown, where candidates from the Lake County and adjoining districts were permitted to present themselves. This innovation will prove a great boon to many intending candidates, obviating as it does the necessity for an expensive journey to Invercargill, and will doubtless justify the extra expenditure involved. Forty-four candidates presented themselves for examination. Of this number, twelve qualified themselves for scholarships by obtaining 60 per cent. or upwards of the attainable number of marks. To the most meritorious of these were awarded five scholarships—two, of the value of £20 each, tenable for three years, to Edith Brown (Waihopai) and Isabella H. Watson (Middle), as resident candidates; and three, of the value of £35 each, also tenable for three years, to non-resident candidates, Honora Gorman (Dipton), Jessie Lind (Makarewa), and Cuthbert Whitaker (Dipton). In addition to the foregoing, the Board awarded two scholarships, of the value of £35 each, but tenable for one year only, to Agnes Dickie, of Tuturau,

and Thomas A. MacGibbon, of Mataura.

The number of candidates for this year's examination was very considerably in excess of that of any previous year, a fact that seems to indicate a growing interest in the Board's scholarship scheme, and a desire on the part of many of the most talented of our young people to secure the advantages of that superior education which it is the sole end and aim of that scheme to confer.

The attendance at the Southland High Schools is substantially increased by the presence from year to year of from fifteen to seventeen scholarship pupils, the majority of whom, but for the help afforded by the Board's Scholarship Fund, it is safe to say, would probably be unable to obtain the benefits of a secondary education. The privilege of free education at the High Schools for a period of one year is still conferred by the Board of Governors on those competitors who, though unsuccessful in gaining a scholarship, obtain at least 60 per cent. of the total number of marks. A further concession of one-third of the ordinary class fees is made by the same body to country scholarship-holders—this in view of the circumstance that they are compelled to reside away from their parents' homes while fulfilling the conditions of attendance at the High School under which the scholarships are granted. In the recently-published results of the University scholarship and matriculation examinations, the scholarship pupils attending the Southland High Schools appear

to have gained considerable distinction.

Pupil-teachers.—The annual examination of pupil-teachers in the service of the Board was held simultaneously with that for scholarships. In all, thirty-eight candidates, classified as follows, presented themselves: Class I.—6 presented, 5 passed, 1 failed; Class II.—12 presented, 11 passed, 1 failed; Class III.—10 presented, 10 passed; Class IV.—10 presented, 9 passed, 1 failed: totals—38 presented, 35 passed, 3 failed. From these figures it will be seen that a very satisfactory percentage of the examinees succeeded in gaining promotion to the higher grade; and in most cases, it may be added, stood the test with a considerable number of marks to their credit in excess of the minimum required for a "pass." This result indicates careful and conscientious preparation on the part of both teacher and taught. It should be noted that, in addition to the thirty-eight candidates present at the examination, there were in the service eight pupil-teachers who had completed their course of study and passed the final examination prior to the year 1892. The Board did not, except in two instances where their term of apprenticeship had long expired, terminate abruptly the engagements of these young people, preferring to give them fair opportunity of securing such other appointments in the service, the duties of which their training and experience

93 E.—1.

amply qualified them to discharge. A slight amendment made to the Board's pupil-teacher regulations during the year made the adoption of this course practicable. The preponderance of female pupil-teachers reported on previous occasions still continues, there being at the close of the year

nine males and forty-nine females acting in this capacity.

SCHOOL COMMITTEES.—The Board desires again to place on record its hearty appreciation of the great interest manifested by a majority of the School Committees in the welfare of their respective schools. The Board invariably gives due consideration to the recommendations of the local authority ere deciding on any matter of importance as affecting the school or teachers in any particular district. Very considerable sums are raised by entertainments and other means in many school districts towards the expense of maintaining schools and grounds in an efficient state of repair and in purchasing suitable school appliances and apparatus. The Board is ever ready to encourage such praiseworthy efforts by granting a subsidy equal to the amount so collected locally. year ending 31st March, 1892, no less a sum than £941 8s. 8d. was received by School Committees throughout the district from local sources. This amount is in excess of that raised in any previous year. It is quite safe to assert that the expenditure of this large sum, together with the subsidies paid by the Board thereon, has been judiciously effected, and with the result that many useful and beneficial works have been carried out, to the great comfort and convenience of teachers and pupils Many of these improvements it would not otherwise have been possible to overtake. amicable relations hitherto existing between the Board and its School Committees have been fully maintained during the past year. The Board, while maintaining its prestige as the superior authority, has ever striven to act so as to secure the confidence and co-operation of the Committees in promoting the educational welfare of the community, and this fact the Committees as a whole have been ready to recognise and appreciate.

Inspection of Schools.—It is scarcely necessary in this report to deal in detail with the subject of the inspection and examination of schools. The Inspector's annual report gives exhaustive and detailed information on the condition and progress of education generally throughout the district. The results of the work done by individual schools, as represented by a record of the percentages of passes and failures, as well as by the marks obtained in class and additional subjects, are given in tabulated form; and, so far as figures may be relied on, afford proof of the general efficiency of the schools of the district. The examination and inspection reports of schools visited during the preceding month are read at each meeting of the Board. Generally speaking, these are of a satisfactory nature; when otherwise, the teacher concerned is given an opportunity of supplying such explanation as he may desire to offer. In the opinion of the Board, the time has now arrived when the inspection subsidy paid to this district should be increased. In comparison with other education districts where the same amount of subsidy is received, the work involved in the efficient inspection and examination of schools is here attended with very much more expense. In this district the number of schools in operation is on the average about one-third more than in those districts with which it is sought to institute a comparison. The employment of two Inspectors is therefore an absolute necessity. An additional reason is found in the circumstance that so large a proportion of the schools in this district are situate in localities far removed from railway communication, and to visit which involves an extra expenditure of both time and money. In view of these facts it is hoped that the department will give favourable consideration to the Board's appli-

cation (recently made) for an increase in the inspection subsidy.

Buildings.—The demand for new buildings, additions, and grants for repairs and improvements has been unusually heavy during the past year. This demand it would have been utterly impossible to satisfy, even in a moderate degree, without some extraneous assistance such as was available from a balance to credit of Maintenance Account. In this Board's experience the very great responsibility involved in the oversight of such a large number of schools and residences could not be undertaken out of the annual grants specifically made for this purpose. The amount to the credit of the Building Account at the beginning of the year 1892 was £2,120. During the year a sum of £3,152 5s. 10d. was expended in building operations, this being an increase over that of the previous year of £501. Of this amount, £1,999 17s. was spent in the erection of new or the extension of existing buildings; £826 13s. in improvements to buildings and the erection of sheltersheds, fencing, and similar works; £57 0s. 1d. for furniture and apparatus; £81 18s. 10d. in the purchase, survey, and transfer of school sites; £167 18s. 11d. as cost of plans and inspection; and £18 18s. for advertising tenders. The grants for building purposes made by Government to this district for the year amounted to £2,050. To this amount must be added a special grant from Government of £196 19s. 4d. received as cost of the reinstatement of the teacher's residence at Wrey's Bush, which was unfortunately destroyed by fire in January, 1892; and £34 16s. received as donations to the Building Fund. These sums give a total of £2,281 15s. 4d. as receipts for building purposes during the year. It will thus be seen that, so far as the outlay for building purposes was concerned, the expenditure exceeded the receipts by no less a sum than £870 10s. 6d. Without a substantial sum to credit of the Maintenance Account, the Board would have been absolutely crippled in its efforts to provide suitable school accommodation for the increased number of pupils in attendance at its schools. As it is, the pressing claims of many school districts have only been partially satisfied, while in others temporary expedients have been adopted to meet present necessities. It is obvious that, in a district where the progress of settlement is steady and continuous, a great demand for school accommodation will always exist, while claims for the repair and improvement of buildings already erected will also be ever present and pressing, especially when the perishable nature of the materials used in their construction is taken into account.

The works of greatest importance successfully taken in hand during the year have been the erection of new schools, with supply of the necessary furniture and apparatus, in the districts of Waikawa Valley, Tisbury, Greenhills, Oreti Plains, and Springbank; and additions, rendered necessary by increase of population, to the schools at Balfour, Bluff, Gordon, and Otama. Small and inexpensive cottages for the accommodation of the teacher, in each case containing two or three

rooms, and suitable only for an unmarried person, have been erected in the districts of Scott's Gap, Mataura Island, and Riverside; while much-required additions have also been made to the teachers' residences at Balfour, North Wairio, Edendale, Otara, Lumsden, and Winton. In addition to the foregoing works, a new residence has been provided for the teacher at Gummie's Bush, the old building, erected over twenty-nine years ago, being altogether past profitable repair. From a perusal of the foregoing list it will be seen that a large amount of work has been accomplished, all of which was absolutely essential to the welfare and comfort of the teachers and pupils in the various districts interested. The teacher's residence at Roslyn Bush was destroyed by fire in May last. A searching investigation by the Police Department and local Committee failed to elicit any reliable data as to the origin of the fire. With the consent and approval of the Government, a contract for the erection of a new building, not so commodious as the one destroyed, but yet large enough for the requirements of the present teacher, was entered into; and has (February, 1893) now been completed at a cost of £150 15s. 6d. This amount will, of course, appear in the Board's accounts for 1893. The requirements of the next year will, so far as the Board is able to foresee, be quite as extensive as during the past year. The opening-up for small-farm settlement of the extensive and fertile Waiau district must of necessity establish a demand for the erection of new schools, and the consequent expenditure of a very considerable sum for buildings, which cannot long be ignored. The first claims from this district have been satisfied, in part at least, by the establishment of a school at Eastern Bush, and the recognition of a demand from settlers at Feldwick for a similar privilege.

Finance.—The financial year was commenced under very favourable auspices. Both Building and Maintenance Accounts were considerably in credit, the former to the extent of £2,120, the latter £3,090 18s. The aggregate income of the Board, including credit balance from last year, was £35,232 0s. 7d. The Board's general statement of receipts and expenditure for the year, duly certified by the Auditor-General, is appended hereto, and shows in detail the sources of the Board's income. A sum of £23,126 18s. 3d. was received as capitation grants on the average attendance during the year; £3,556 9s. 4d. in respect of rents from primary reserves; £2,050 as parliamentary grant for buildings; £517 6s. 2d. for scholarships; £300 as inspection subsidy: these, with other minor receipts, constituted the Board's revenue for the year. The principal items in the Board's expenditure were as follows: Teachers' salaries, including rent-allowances, and bonuses paid for the instruction of pupil-teachers, £22,788 6s. 4d.; to School Committees for ordinary incidental expenses, £1,596 18s. 5d.; for erection and maintenance of school-buildings and residences, &c., £3,152 5s. 10d. These, with other less important amounts, as shown in the balance-sheet, make up the total of the Board's expenditure, and leave a balance to credit of £5,408 17s. 4d. This balance is, however, considerably affected by the statement of assets and liabilities, from a perusal of which it will be seen that the Board's assets, in addition to credit balance, are set down at a sum of £150, due for re-erection of teacher's residence at Roslyn Bush. The known liabilities aggregate £1,306 6s. 3d.: of this sum, £574 12s. 8d. is chargeable against the Maintenance Account, and £731 13s. 7d. against that for buildings. After making due provision for debts due as above, the net balance to credit of the Board will stand at £4,252 11s. 1d., and from this amount the large expenditure necessary for building operations during the current year will require to be drawn.

By order of t

The Hon. the Minister of Education, Wellington.

WELLINGTON.

SIR,—

16, Queen's Chambers, Wellington, 31st March, 1893.

I have the honour, on behalf of the School Commissioners for the Wellington Provincial District, to submit for the information of His Excellency the Governor and the Government their fourteenth annual report, being that for the year ending 31st December, 1892.

During the year and subsequent to the date of their last report the Commissioners leased several reserves, which make the sum-total of transactions for the year as follows, viz.: Eight town sections, seven village sections, four suburban and fifteen rural sections, of a total area of 2,631 acres 3 roods 32 perches, producing an annual rent of £311 0s. 6d.

The Commissioners were possessed of six unprofitable reserves upon which they had to pay rates, and were liable for fencing and other charges, and to which there was no means of access; for fourteen years—every year—these reserves were offered for leasing, but found no tenant; so, on the 19th November last, His Excellency was recommended, under authority of the 243rd section of the Land Act, to proclaim that the reserves may be sold under the provisions of "The Land Act, 1892." They are as follows, viz.: Harbour District Sections Nos. 35, 36, 38, and 40, and Upper Maungaroa Sections Nos. 48 and 56.

During the month of January, 1893, the Commissioners held their annual sales of leases, which resulted in the disposal of six town sections, of the area of 7 acres 2 roods 19 perches, for £7 10s.; one village section, 1 acre 2 roods 5 perches, for £1; and seven rural sections, 2,301 acres 1 rood, for £156 9s. 5d.: or, in all, fourteen sections, containing 2,310 acres 1 rood 24 perches, for £164 19s. 5d. In the year 1892, seven sections, of the aggregate area of 3,118 acres, were set aside for primary education, four of which, of a total area of 1,838 acres, have been let at satisfactory prices. Inquiry is constantly being made for sections which are shown on the survey-plan as reserves for primary education but which have not yet become vested in the Commissioners.

During the year the Commissioners have paid over to the Education Boards within the district, under authority of the 21st section of "The Education Reserves Act, 1877," the sum of £2,150, in the following proportions, viz.: Wellington Education Board, £1,346 10s. 2d.; and Wanganui Education Board, £803 9s. 10d. A further sum of £1,100 is available for primary education. There is available also for secondary education the sum of £110 15s. 2d., which is distributable between the Girls' High School, Wanganui, the Wellington College, and the Wellington Girls' High School, in the following sums, viz.: £41 7s. 10d., £34 13s. 8d., and £34 13s. 8d. respectively. All these moneys have been paid over during the March quarter, 1893.

The Commissioners desire me to again draw attention to the very small amount available for secondary education. The above sum (£110 15s. 2d.) represents more than the present annual income, as it includes a credit balance of £1 16s. 1d. (vide balance-sheet), and when divided between three institutions the benefit derived by each is very small.

The Commissioners again urge the necessity for making further reserves for secondary education, and they trust that this appeal may be successful.

The Commissioners have very few reserves left unoccupied which are of a marketable character, and therefore, if there are any lands laid off for primary education in the Wellington District, they will be glad to see them gazetted before next session of Parliament.

Appended is statement of receipts and expenditure for the year ending the 31st December, 1892.

I have, &c.,

The Hon. the Minister of Education, Wellington.

J. R. Blair, Chairman, School Commissioners.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

HAWKE'S BAY.

Office of the School Commissioners, Napier, 25th March, 1893. In compliance with your circular of 15th December last, I have the honour to report as follows for the past year:-

There were two auction sales of leases during the year. At the first, thirteen town, seven suburban, and twelve rural lots were offered; only four suburban lots were sold, at an aggregate rental of £8 8s.; all the other lots were passed in. At the second auction sale, one suburban and five town lots were offered, but they were all passed in. Since the auction sales, however, one suburban and three town lots have been leased, at an aggregate rental of £31 10s. With the exception of one suburban lot the lands leased during the year had not been occupied before.

Enclosed herewith is a copy of the General Statement of Receipts and Expenditure for the

past year, duly audited and certified to as correct by the Controller and Auditor-General.

It will be observed, from the Statement of Assets and Liabilities which accompanies the Statement of Receipts and Expenditure, that the rents outstanding at the end of the year amounted to £382 8s. 10d. This large amount is partly accounted for by a number of rents falling due shortly before the statement was made up, and it also included £96 7s. 6d. due by three lessees whose leases have been forfeited. As it was found impossible to recover these arrears the amount has been since written off. I have, &c.,

The Secretary for Education, Wellington.

Thos. Humphries, Chairman.

CANTERBURY.

Government Buildings, Christchurch, 4th January, 1893.

In accordance with Order in Council of date 17th September, 1878, I have the honour to

In accordance with Order in Council of date 17th September, 1878, I have the honour to forward the report of the School Commissioners for the Canterbury Provincial District for the year

ending 31st December, 1892, together with a copy of its accounts, duly audited.

The total area of the primary-education estate under lease on the 31st December, 1892, was 68,057½ acres, producing an annual rental of £15,590 6s. 6d. Of this area, 24,200 acres is contained in Pastoral Run No. 5, which was obtained from the Government in the early part of the year under the provisions of "The Educational Endowments and Reserves Exchange Act, 1891," in exchange for the Board's Reserves Nos. 1126–28 and 1178, containing 1,308 acres of good agricultural land in the Waimate district, which was acquired for "village settlements."

The fixed deposit of £189 11s. 5d. which matured on the 21st December, 1892, has been

renewed for one year.

In the accounts, from the arrears due 1st November, 1891, the sum of £122 19s. 7d. has been written off as irrecoverable. This amount was the half-year's rent in advance of Lot 1 of Reserve 1129, and proceedings were instituted in the Supreme Court against the lessee (who was practically bankrupt) for recovery of the land, and when this was obtained the land was relet by tender and a good tenant procured.

During the year, seven reserves, containing in all 1,759½ acres, were relet by tender, for 14 years or thereabouts, at satisfactory rentals; one of these reserves, containing 375½ acres, being

subdivided and let in three lots to different tenants.

I have, &c.,

H. R. Webb, Chairman of the School Commissioners.

The Hon. the Minister of Education, Wellington.

H. R. Webb, Chairman, School Commissioners.

4th January, 1893.

H. H. PITMAN, Steward of Education Reserves.

Examined and found correct.—James Edward FitzGerald, Controller and Auditor-General.

OTAGO.

Sir,—

In accordance with Order in Council dated the 17th December, 1878, and in conformity with circular from the Education Department dated the 15th December last, I have the honour to submit the following report of the School Commissioners of Otago for the year ending the 31st

December, 1892:—

MEETINGS.—During the year the Commissioners held twelve meetings, which, with the exception of three (held during the parliamentary session), were attended by the whole of the

Commissioners, and at which a large amount of detail work was transacted.

Leases entered into during Year.—During the year five pastoral, forty agricultural, and twelve town sections were leased by auction. The total area of the pastoral sections was 1,324 acres, leased to five tenants; and the annual rent was £42 2s. 4d., or an average of about $7\frac{5}{8}$ d. per acre. The area of the agricultural sections was 5,957 acres, leased to thirty-one tenants, the majority of the holdings being under 200 acres each. The annual rent was £1,001 1s. 8d., or an average of 3s. $4\frac{1}{4}$ d. per acre. The town sections contained 1 rood each, and they were leased to twelve tenants; the total annual rent being £10 10s. The most of the agricultural sections are contained in a block of land taken from Run 194, Wendonside, which was referred to in the Commissioners' last annual report.

School Commissioners' Management.—In the month of June the Hon, the Minister of Lands commissioned Mr. J. E. March, Steward of Village Settlements for the colony, to inquire as to how and in what manner the education reserves in Otago and Southland were being administered. While questioning the authority of the Minister in making such an inquiry, inasmuch as they are answerable to Parliament alone for the proper administration of the reserves, the Commissioners were pleased to afford Mr. March all the information in their power, and they willingly placed their books and documents at his disposal. Mr. March made an exhaustive and comprehensive investigation, and the Commissioners understand that he reported the result to the Minister; but they are unaware of the nature of his report, as they have been unable to obtain a copy of it, although they have applied on more than one occasion.

LIMITATION OF AREAS.—In opening up new blocks for settlement, the Commissioners have been desirous of encouraging close settlement, but they have found that they have no power to limit the area which may be taken up by one lessee. They have repeatedly in their annual reports referred to this matter, and have requested that power should be given them to place a wise

limitation on the area to be held by any one individual.

Consent of Governor to leasing Reserves.—The Commissioners would also draw your attention to the inconvenience and delay that are caused by the necessity of obtaining the consent of His Excellency the Governor to the leasing of education reserves, as required by section 245 of "The Land Act, 1892." They are of opinion that, if the above-named section were altered so as to make it apply only to areas of over, say, 500 acres, the interests of close settlement would not suffer, and a large amount of delay and inconvenience would be saved. Both of the foregoing matters were fully referred to in the last annual report.

SETTLEMENT AT TE ANAU.—In terms of "The Otago School Commissioners Empowering Act, 1892," the Commissioners have arranged with the lessee of Run 301B, Te Anau, for the surrender of a block of 500 acres on the shore of Lake Te Anau, and they have entered into a contract to

have it subdivided, with a view to offering it for settlement at an early date. The subdivision will be as follows: 100 sections of half an acre each, 20 sections of five acres each, 10 sections of ten acres each, I section of forty acres (already leased to Snodgrass), and the balance into sections of from twenty to twenty-five acres each.

REDUCTION OF RENTS.—It is satisfactory to report that during the year the Commissioners have not had so many applications for reduction of rents as occupied so much of their time and attention in former years. This would seem to indicate that the tenants are now fully satisfied with the terms upon which they hold their lands, and that they are participating in the general

prosperity which now exists in this part of the colony.

ARREARS OF RENT.—Of the sum of £3,637 11s. 11d. shown in the Statement of Receipts and Expenditure as arrears of rent, &c., on 31st December, 1892, £1,468 2s. 7d. has been collected since the commencement of the current year. All rents are debited half-yearly in advance—a considerable portion as late as the month of December—and in consequence a number of them are

not paid until after the close of the year.

Notwithstanding that the rent-roll has been considerably increased during the year by the subdivision of Run 194, the arrears on 31st December, 1892, are £411 10s. 4d. less than they were on the corresponding date in 1891. Considering the fact that the Commissioners have nearly eight hundred tenants under their control, this result may be regarded as fairly satisfactory. In a great many instances the lessees in arrear have extensive improvements on their holdings, for which they are entitled to receive full valuation at the end of their leases; and in some of these cases the

Commissioners have not considered it necessary to press for full payment of the amounts due.

Expenses of Management.—Of the sum of £1,497 10s. 4d. shown in the Statement of Receipts and Expenditure as expenses of management, £284 7s. 4d. was paid for roads and surveys, &c., and should not be looked upon as an annual charge. The sum of £36 6s. 6d. was received for preparing leases by the Commissioners' staff, and ought to be deducted from the cost of management. By this arrangement a very large saving to the tenants in the cost of securing their titles was effected. £77 6s. 4d. was paid to the Government in the shape of railway-fares, stamps, and telegrams; while £17 13s. 7d. was paid to County Councils, Road Boards, and boroughs for rates.

Balance-sheet —A copy of the balance-sheet and Statement of Receipts and Expenditure

during the year, certified by the Controller and Auditor-General, is annexed hereto.

The Hon. the Minister of Education.

I have, &c., J. P. Maitland, Chairman.
