1947 NEW ZEALAND

WATERFRONT INDUSTRY COMMISSION

ANNUAL REPORT AND STATEMENT OF ACCOUNTS FOR THE YEAR ENDED 31st MARCH, 1947

Presented by Leave of the House

SIR,--

21st August, 1947.

I have the honour to submit a report covering the activities of the Commission for the year ending 31st March, 1947.

A. E. Bockett, Commissioner.

The Hon. the Minister of Labour.

1. INTRODUCTION

During the year ended 31st March, 1947, two changes were made in the constitution of the Commission. In the first instance the Waterfront Control Commission, which comprised three full-time Commissioners and which had operated since April, 1940, and had rendered most useful service in that capacity, was replaced on 1st July, 1946, by the Waterfront Industry Commission of five members. The Government's decision to reconstitute the Commission with two members representing the employees, two representing the employers, and an independent chairman was made following an intimation by one member of the Commission that he wished to resign and following a number of requests by employers and workers for a reconstruction of the Commission along these lines. Assurances were given by representatives both of employers and workers that they would operate as a Commission in the best interests of the industry, but, unfortunately, this did not prove to be the case.

In December, 1946, there was a concerted refusal to work overtime as a protest against the decision of the Chairman of the Commission regarding guaranteed wage payments to waterside workers. Following a meeting of the Commission held in January, 1947, to discuss this dispute, the Chairman (Mr. Justice Ongley), with the concurrence of the other members of the Commission, reported that the Commission was unable to find even a basis of discussion of the dispute, that it could not make any decision, and was unable to function as a Commission. Because of the Commission's failure to function, the Chairman tendered his resignation, which was received with great regret, as he had given very valuable service in a most difficult position, and a second change was made in the Commission's constitution. Regulations were gazetted declaring vacant the offices held by members of the Commission and providing for the appointment of a sole Commissioner as an interim measure. Mr. A. E. Bockett, General Manager of the Commission, was appointed as sole Commissioner pending some agreement being reached between employers and employees and the Government as to the future of Commission control of the industry. Discussions on this matter are still taking place.

2. TURN ROUND OF OVERSEAS AND COASTAL SHIPPING

(a) OVERSEAS VESSELS

Published in the Appendix (page 70) is a table showing the time spent on the New Zealand coast by overseas vessels each year from 1939 to March, 1947. Vessels which discharged and loaded spent an average of 52 days on the coast for the year 1946–47, compared with an average of 42 days spent on the coast in 1939, while vessels which loaded only spent an average of 26 days on the coast for the year 1946–47, compared with an average of 27 days spent on the coast in 1939.

(b) COASTAL VESSELS

Coastal vessels are taking longer to turn round to-day than pre-war. An examination of voyage reports of vessels engaged in the east coast trade shows that these vessels during the year ending 31st December, 1946, took approximately twice the time for the round trip than taken during the year ending 31st December, 1939. There was, however, a 50 per cent. increase in the average tonnage of cargo handled per trip. This increase was not sufficient to offset the additional time taken in turn round, and the total tonnage handled by these vessels during the year showed a reduction of 34 per cent. on 1939 figures.

3. FACTORS AFFECTING THE DESPATCH OF SHIPPING

(a) REDUCTION IN WORKING-HOURS

Prior to the war vessels were worked 8 a.m. to 10 p.m. (midnight to finish) Mondays to Fridays inclusive, and 8 a.m. to 5 p.m. on Saturdays. During last year the working-hours were 8 a.m. to 9 p.m. (10 p.m. to finish) Mondays to Fridays inclusive, and 8 a.m. to noon on Saturdays (5 p.m. to finish). This represents a reduction of approximately 9 hours per week, or 13 per cent., on pre-war working-hours. The reduction in the working of meal-hours has also affected despatch of ships. Prior to the war it was customary to regularly work meal-hours at the large hatches, while to-day meal-hours are only worked to finish a hatch or ship.

(b) RATES OF WORK

(i) Overseas Vessels

The all-port average rate of loading overseas vessels has shown a further increase during the year and compares favourably with the rate of loading pre-war. The following are rates of work per net gang-hour for loading butter, cheese, and meat:—

| Class of Cargo. | - | by Shipowners in Piece-work Proposals, 1938. | Rate, 1945-46. | Rate, 1946-47. |
|--|-------|--|-------------------|-------------------|
| Butter (boxes) Cheese (crates) Mutton and lamb (care | ases) | 550 210 550 | 673 253 758 | 738 259 794 |

The all-port average discharging rate for overseas vessels shows a reduction from 12·79 tons per gang per hour to 12·15 tons per gang per hour. This rate is far from satisfactory and there is ample room for an improvement. Apart from the efforts of the men there are other factors affecting the rate of discharge—e.g., congestion of wharf and railway sheds, change in nature of cargo from measurement to weight, &c.

(ii) COASTAL VESSELS

The following are the net rates of work per gang per hour for the past seven years:—

| Year. | | Union S.S. Co. | Small Coastal. |
|-----------|--|----------------|----------------|
| 1940-41 | | 12.49 | 16.53 |
| 1941-42 | | $13 \cdot 49$ | 16.18 |
| 1942 - 43 | | $13 \cdot 75$ | $16 \cdot 37$ |
| 1943-44 | | $14 \cdot 29$ | $17 \cdot 2$ |
| 1944 – 45 | | $14 \cdot 37$ | $17 \cdot 29$ |
| 1945-46 | | 13.76 | $16 \cdot 71$ |
| 1946 - 47 | | $13 \cdot 63$ | 16.07 |

The figures show a falling off in the rate of work both for Union Steam Ship Co. and small coastal vessels during the last two years. The results are disappointing, particularly in view of the improvement which has been maintained in the rate of loading overseas ships.

H—45

(c) CONGESTION OF WHARF AND RAILWAY SHEDS—SHORTAGE OF RAILWAY TRUCKS

7

An important factor affecting the discharge of overseas vessels and the loading and discharging of coastal ships is the congestion which has occurred in wharf and railway sheds mainly brought about through the handling of cargo on the wharves being carried on for approximately fifty-nine hours per week while delivery from wharf and railway sheds to merchants' stores is only effected on an average of forty hours per week.

During the war years Cargo Control Committees operated under the Cargo Control Emergency Regulations 1942, and these Committees performed a very useful service in directing merchants to take delivery of goods in overtime hours in order to prevent congestion of sheds. These regulations were revoked in July, 1946, and it may be necessary to either reintroduce the regulations or to give the Commission sufficient power under the Waterfront Industry Emergency Regulations to deal with the matter.

Delays to shipping are frequently brought about through shortage of railway trucks, and it is not uncommon at railway ports for labour to be sent home while ships remain idle because discharging or loading operations cannot be carried on until sufficient trucks are made available. The Railways Department has placed orders overseas for additional trucks, and as these come to hand the position will improve.

(d) SHORTAGES OF LABOUR

The centralization of overseas shipping at Auckland and Wellington and the transhipment of South Island cargo from these ports have frequently resulted in shortages of labour. Steps have been taken to increase the union membership at the main ports, but there will still be occasions during rush periods of shipping when sufficient labour will not be available. The increased union strength should, however, result in a considerable reduction in delays through labour shortages.

Every endeavour is made to obtain non-union labour, but due to the employment position in the country only a limited number of non-unionists are available.

(e) TONNAGES HANDLED PER VESSEL

The saving in space through telescoping of meat has resulted in larger quantities of freezer cargo being loaded to overseas vessels than pre-war. There is also a larger number of vessels arriving to-day in ballast for loading only, and it appears that the average tonnage of cargo discharged from overseas vessels is greater to-day than was discharged prior to the war.

While coastal vessels are taking much longer to turn round, the average tonnage per round trip is considerably greater than previously carried.

(f) DISPUTES INVOLVING STOPPAGES OF WORK

Published in the Appendix (page 71) is a table summarizing the man-hours lost through stoppages of work on the waterfront during the period of Commission control and for the four-year period 1937 to 1940 prior to Commission control.

During the year ended 31st March, 1947, the percentage of man-hours lost through disputes involving stoppages of work was 2.64 per cent., as against an average of 0.51 per cent. for the preceding six years. This substantial increase was due to two major disputes. The first dispute involving a loss of approximately 29,000 man-hours affected only the port of Auckland, where a stoppage of work occurred on account of priority being given by the Commission to the discharge of cement on the vessel "Herekino." An additional loss of approximately 250,000 man-hours involving all ports was brought about through action being taken by the union to restrict work to a five-day forty-hour

week as a protest against decision of the Chairman of the Commission regarding guaranteed wage payments. This dispute covered a period of approximately seven weeks and resulted in serious delay to overseas and coastal ships and an accumulation of cargoes at all main ports.

(q) SHIP REPAIRS AND ANNUAL SURVEYS

During the war years, in order to keep vessels in commission, major overhauls were deferred, and during 1946 annual surveys of coastal shipping occupied considerably more time than the average taken prior to the war. Breakdown of winches and shore cranes were also more frequent in 1946 due to the round-the-clock working of ships during the war. This position should be remedied within the next twelve months.

(h) SPELLING

It has been the practice for some years at main ports for men employed in refrigerated chambers to work hour-about. This practice has spread to general cargo vessels, and the extension is no doubt due to the long hours of work performed by waterside workers at main ports during the war years. While the Commission considers that reasonable rest periods should be allowed to workers, the systematic spelling now in operation cannot be justified. Discussions are taking place between the Commission, the union, and the employers with a view to obtaining the co-operation of all parties to eliminate unreasonable spelling and introduce reasonable rest or "smoke-oh" periods. The provision of modern canteens on the waterfront at the various ports will materially help in the elimination of the spelling abuse.

(i) CENTRALIZATION OF OVERSEAS SHIPPING AT MAIN PORTS

The centralization of overseas shipping at main ports from an average of six ports per vessel pre-war as against an average of three ports last year has resulted in a quicker turn round of overseas ships. It should be appreciated, however, that with the cancellation of shift and Sunday work the majority of steaming-time between ports takes place outside working-hours. Further, when a vessel loads completely at one port men employed are inclined to become tired after working continually in the freezer for a fortnight or more eleven hours per day, Mondays to Fridays inclusive, and four hours on Saturday.

4. CO-OPERATIVE CONTRACTING

(a) VALUE OF CONTRACTS AND TONNAGES HANDLED

Summarized below is a statement showing value and tonnages handled under contract during the last two years, and total to 31st March, 1947:—

| | Ye | ar. | Number of Contracts. | Value. | Tonnage. |
|-------------------------------|----|-----|----------------------------|---|--------------------------------------|
| 1945–46 1946–47 1940–47 | | | 3,738 $3,717$ $21,674$ | £ 1,801,713 1,811,214 10,764,967 | 4,638,912 4,818,915 27,462,194 |

The total value of contracts during the year 1946-47 is approximately £10,000 greater than the preceding year, while the tonnage handled has increased by approximately 180,000 tons. The reduction in tonnage cost is due to the less amount of overtime worked during the year. The total value of contracts handled up to the 31st March, 1947, was approximately £10,750,000, comprising approximately 27,500,000 tons of cargo.

While the majority of vessels are to-day loaded and discharged under contract, there are certain bulk cargoes—namely, phosphate and sulphur—which are still worked on a wage basis. The Commission is investigating costs of handling these bulk cargoes with a view to them being placed under contract at all ports as soon as possible.

(b) COSTS OF CARGO HANDLING

Tables have now been printed by the Commission and are available to shipping companies and the union showing the stevedoring cost for various cargoes for each class of contract for the three years ended 31st March, 1946. Costs for the year ended 31st March, 1947, are being finalized and will be printed later as an Appendix to this report.

(c) PROFIT DISTRIBUTION

Included in the Appendix (pages 25-61) is a table summarizing the results of cooperative contract stevedoring and showing the amount of profit distributed at each port for each class of contract and the average profit per winch-hour for the six-year period 1940-46, for the year ended 31st March, 1947, and totals to that date.

An amount of £205,328 was distributed during the year at a "winch" time rate of 10.65d, per hour, as against £187,594 distributed for the year ended 31st March, 1946, at a rate of 10.48d, per hour, an increase of £17,734. The total amount of profit distributed from the commencement of contracting until the 31st March, 1947, was £1,061,233 at a "winch" time rate of profit of 9.36d, per hour.

5. AVERAGE HOURS OF WORK

Published in the Appendix (page 66) is a table showing the average hours of work per man-week (ordinary and overtime) by unionists for the fifty-two weeks ended 30th March, 1947. The average hours per week for all main and secondary ports was 42\frac{3}{4} (33\frac{1}{4} \text{ ordinary time, } 9\frac{1}{2} \text{ overtime), for the year ended 30th March, 1947, as against 41\frac{3}{4} (28\frac{1}{4} \text{ ordinary time, } 13\frac{1}{2} \text{ overtime) for the previous year. The average overtime hours were reduced by four hours per week and ordinary-time hours were increased by five hours per week, which shows an average increase on all hours of one hour per week over last year. The reduction in overtime hours is due to the cancellation (as from 8th September, 1945), of shift-work and work on Sundays, holidays, and Saturday afternoon (except where a vessel can finish by 5 p.m.). This is the first year where the full impact of this reduction is shown in the average overtime hours per week.

6. RATES OF PAY: AVERAGE WAGE

No alteration was made in the basic rate of pay of waterside workers during the year. As from the 1st August, 1946, the rate of pay for Saturday morning was increased from time and a quarter to time and a half. A further improvement in working-conditions was also granted by the Commission from that date by the payment of 2s. meal-money where a worker is ordered back and attends, or is transferred from a job finishing after noon and before 5 p.m., for overtime at 6 p.m. or later, or at 1 p.m. on Saturdays.

Tables are published in the Appendix (page 67) showing the average wage of

waterside workers in the following returns:

(a) Return showing the average wage of unionists per man-week worked for years 1940-46, 1946-47, and 1940-47. (Note.—This return has been based on the man-weeks worked and does not show the true average weekly wage over the whole year, as all men are not employed for fifty-two weeks—see return of earnings according to income groups, Appendix, page 68).

(b) Return showing earnings of unionists for year ending 31st March, 1947, analysed according to income groups (Appendix, page 68).

(c) Return showing average total earnings, profit distributions, ordinary and overtime hours, weeks and holidays worked by unionists, with highest earnings for year ending 31st March, 1947 (Appendix, page 69).

There has been a further drop in the average wage from £10 fs. 7d. per man-week for the year 1945-46 to £9 13s. 5d. per man-week for the year 1946-47. This drop is due to the reduction in the amount of overtime worked. The total amount of earnings for union waterside workers at all main and secondary ports for the year ended 31st March, 1947, was £2,346,497, as against £2,535,475 for the year ended 31st March, 1946, a reduction of approximately £189.000.

7. GUARANTEED WAGE—GUARANTEED DAILY AND WEEKLY MINIMUM **PAYMENTS**

Prior to the introduction of the daily and weekly minimum payments, a guaranteed wage of £3 6s. per week applied to "A" Grade workers at the ports of Auckland, Wellington, Lyttelton, and Dunedin. This guarantee did not provide any material benefit to the great majority of waterside workers, and payments made from April, 1946, to the 10th March, 1947, was only £69 for the four ports.

In February, 1947, the Commission issued an order providing for the payment of daily and weekly minima to "A" Class union waterside workers (who complied with the conditions prescribed by the Commission) at all main and secondary ports on the following basis:—

(a) DAILY MINIMUM PAYMENT

Unionists are guaranteed work in each day, Mondays to Fridays inclusive, to the value of two hours at the ordinary-time general-cargo rate of pay or, failing provision of such work, are entitled to be paid that sum subject to their registering attendance at the Commission's Labour Engagement Bureau.

(b) WEEKLY MINIMUM PAYMENT

Unionists are guaranteed work in each week to the value of £5 or, failing provision of such work, are entitled to have their wages made up to that sum. The daily minimum payment is taken into account in determining payment of the weekly minimum guarantee, but a unionist is entitled to receive his daily minimum payment although his earnings may exceed £5 in the week.

The above guaranteed minimum payments operated as from the 10th March, 1947, except at the ports of Gisborne and Oamaru, where the guarantees operated as from the 17th March, 1947, and the 30th June, 1947, respectively. It was estimated by the Commission at the time of the introduction of these guaranteed payments that the cost The actual cost for three weeks' operation would be approximately £100,000 per annum. to 31st March, 1947, was £2,232 (£1,524 daily minimum and £708 weekly minimum). Detailed payments at each port are shown in table published in the Appendix (page 64).

8. ACCOMMODATION AND AMENITIES

Every endeavour has been made by the Commission to implement the undertaking given by the Government to do everything within its power, having regard to the present situation so far as building labour and materials are concerned, to speed up the provision of accommodation and amenities for waterside workers. Considerable progress has been made during the year. The position at each port is summarized as follows:— Auckland.—In co-operation with the Auckland Harbour Board, improvements have been made to the present waiting-room accommodation, and modern canteen facilities are being provided in the main waiting-room and at all main wharves. Some delay has been occasioned through shortage of building materials, but in the circumstances satisfactory progress has been made and it is anticipated that the canteen facilities will be available within the course of the next few months.

Wellington.—Improvements are being effected by the Wellington Harbour Board in lavatory and washing accommodation. The Commission has purchased the equipment of the Wellington Catering Co. and has effected a number of improvements in the main cafeteria. The Wellington Branch of the Union has accepted the responsibility for the management of the cafeteria, and hot meals are now being provided. Negotiations are still in progress with the Wellington Harbour Board regarding provision of canteen facilities at wharves distant from the main cafeteria.

Lyttelton.—A number of meetings have been held with all interested parties at Lyttelton, and it has been agreed that there is an urgent need for the provision of a new waiting-room at that port. The Harbour Board has given instructions to its architect to proceed with detailed plans of the new building, which it is estimated will cost over \$40,000. The erection of this building, having in mind the present acute shortage of building labour and material, will no doubt take some years, and the Harbour Board has decided, in the meantime, to effect urgent repairs to the present waiting-room.

Nelson.—The Commission has let a contract for the erection of a modern waiting-room and administrative offices at this port at an estimated cost of over £12,000. Work has commenced and satisfactory progress is being made.

Timaru.—Improvements to the accommodation at Timaru were effected during the year, and the facilities at this port are now satisfactory.

Greymouth.—The modern waiting-room and administrative offices erected by the Commission at Greymouth was officially opened by the Hon. James O'Brien on the 19th October, 1946. The facilities at this port compare more than favourably with facilities provided for any other body of workers.

Bluff.—Arrangements have been completed for the erection of a modern waiting-room on Harbour Board property at Bluff. Detailed plans and specifications are being completed, and it is expected that a start will be made on the building in the near future.

Apart from the buildings referred to above, the Commission has erected modern waiting-rooms and administrative offices at Napier and Westport. The Commission has spent over £30,000 in the erection of modern waiting-rooms and administrative offices and is committed to further expenditure estimated at approximately £30,000 in respect to waiting-rooms at Nelson and Bluff and canteen facilities at Auckland and Wellington.

9. ANNUAL HOLIDAYS AND STATUTORY HOLIDAYS

(a) ANNUAL HOLIDAYS

An improvement was made during the year in the qualifying conditions for the granting of annual holidays for union waterside workers. The original basis adopted whereby a unionist qualified for half a day's annual holiday for every fourteen days or fraction thereof that he was working or available for work was amended to provide that the unionist would receive a half-day's holiday for every eleven days or fraction thereof that he was working or available for work. It was also provided that where a unionist had worked or been available for work for not less than 1,800 hours during the holiday year he would be entitled to receive the full two weeks' annual holiday.

The cost of granting annual holidays to waterside workers at all main and secondary ports from August, 1944, to 31st March, 1947, is as follows:—

| 1944-45 (eight mo | nths)— | | | £ |
|---|----------|-----|------|-------------|
| Union | | | | 42,150 |
| Non-union | | | | 7,183 |
| 1945-46 | | | | |
| ${\rm Union} . \ .$ | | | | 71,241 |
| Non-union | | | | 10,240 |
| VE Day (2 da | | | | 13,272 |
| $	ext{VJ Day } (1\frac{1}{2} 	ext{ d})$ | ays pay) | | | 10,518 |
| 1946-47 | | | | |
| ${\rm Union} . \ .$ | | | | 84,885 |
| Non-union | | • • | | 9,826 |
| Tota | 1 | • • | | 249,315 |

(b) STATUTORY HOLIDAYS

In August, 1946, waterside workers obtained a further improvement in working-conditions by the payment for statutory holidays. The Commission agreed to the payment to unionists for nine statutory holidays during the year. A member is entitled to payment for a statutory holiday provided he is regularly employed or is regularly attending for employment during the twelve working-days ending Saturday preceding the holiday. In March, 1947, the Commission approved of payment of statutory holidays to non-union waterside workers who are regularly employed or regularly attend for employment during ordinary and overtime hours and who rely on waterfront work for a livelihood. The cost of granting payment for statutory holidays to union waterside workers at all main and secondary ports from 1st August, 1946, to 31st March, 1947, was £31,358. It is estimated that the annual expenditure will be approximately £75,000.

10. CARGO CONTROL COMMITTEES

The Cargo Control Emergency Regulations 1942 were revoked on the 31st July, 1946. These regulations provided for the appointment of Cargo Control Committees, the functions of which were to expedite and arrange for the removal of goods from wharf and railway sheds to prevent congestion. The Committees appointed under the regulations had power to direct merchants to keep their stores open and take delivery of goods from wharves and railway sheds in overtime hours. The revocation of the regulations has unfortunately resulted in congestion of wharf and railway sheds involving delays to shipping. While the loading and discharging of ships is carried on over a spread of fifty-nine hours per week, the delivery from wharf and railway sheds only takes place during forty hours per week. It may be necessary for the Government to re-introduce the regulations and appoint Committees with authority to direct that merchants' stores be kept open and delivery of goods taken from wharf and railway sheds in overtime hours.

11. GOVERNMENT STORE, AUCKLAND

The Auckland Cargo Control Committee ceased to operate as at 31st July, 1946, and, following a meeting held with representatives of the Accommodation Board, Industries and Commerce Department, Treasury, and the Waterfront Industry Commission, it was decided that the Commission should take over No. 3 Cargo Control Store and operate the store as a Government store for the storage of Government goods.

13 H—45

At the time the store was built assurances were given to the Wheat Committee that approximately 30,000 square feet of storage space would be made available for the Wheat Committee, and it was necessary to continue to provide this accommodation. Further, the Food Controller had no store available for sorting and storage of tea, and the Public Works Department was also in need of transit storage space for the removal of goods from wharf sheds.

The Commission accepted the responsibility for the operation of the store on the understanding that if any financial loss was incurred due to the fact that wheat was being stored at the rate of 2d. per ton per week as against the usual storage rate of 6d. per ton per week, that any such loss would be reimbursed to the Commission from the Consolidated Fund. It will be seen under the comments in Accounts' Section that the Stores Account shows a small profit for the financial year ending 31st March, 1947.

Apart from the storage of Government cargo, the store has also been used for storage of goods of private consignees to prevent congestion of wharf sheds. Goods for private consignees are only stored when the Commission is satisfied that alternative private storage accommodation is not available.

During the eight months ended 31st March, 1947, 10,184 tons of cargo was received into store and 14,236 tons delivered ex store. The quantity on hand at 1st August, 1946, was 6,992 tons and the balance on hand at 31st March, 1947, was 2,940 tons. The reduced quantity of goods in store as at 31st March, 1947, was due to substantial clearances of wheat and tea. The Commission has also found it necessary to keep sufficient space available for the sorting of tea on behalf of the Food Controller. A shipment of approximately 1,000 tons arrived into store in April.

The operation of the store was carried on very efficiently by the Commission's store staff at Auckland.

12. ACCOUNTS

(a) GENERAL

There have been several changes in the funds operated by the Commission during the year ended 31st March, 1947. The most important development concerned the establishment of a National Administration Fund (see Section (5)) concurrently with the operation of daily and weekly minimum payments as from 10th March, 1947. The Order (No. 11) provided that "The assets and liabilities as at the date of the coming into force of this Order, of the National Pay Office Fund, Annual Holidays Act Fund. and General Administration Fund shall be deemed to be part of the National Administration Fund and shall be used for the purposes set out under (a) above " (clause 2 (c)). The Commission has, in effect, consolidated all national funds, which are in the nature of administrative charges, into the one fund. This step also enables all levies of an administrative nature to be placed on a uniform hourly basis. A Guaranteed Wage reserve existed in the National Pay Office Fund, and unless it was considered desirable to create yet another separate fund for the purpose of financing the daily and weekly minimum payments, this would have been the fund to finance the new charges. The National Pay Office Fund, however, was financed by a percentage levy on income of other operating funds. This method of finance for charges, such as the daily and weekly minimum payments, which were related to the hours of work on the waterfront, was recognized as inequitable at the time when it was used in 1943-44 for the Industrial Rest Period Fund (see Sections (7) and (8), page 15, H.-45, 26th November, 1945). In the circumstances, therefore, it was considered preferable to convert the National Pay Office Fund percentage levy to a levy based on hours of work and combine the revised Pay Office levy with the annual holiday levy in the new National Administration levy of eightpence (8d.) per paid labour-hour. General Fund (Administration) finance. which was based on assessments on other funds and which was intimately bound up with H-45 14

the National Pay Office Fund, was also brought within the scope of the new National Administration Fund in order to further simplify the presentation of the Commission's annual accounts. At the same time the Commission undertook to include as much detail as possible for both expenditure and income headings in order that it might be possible to estimate what would have been the financial position of the various funds, if they had remained separate. In Section 5 of these comments, which deals with the National Administration Fund accounts, a detailed analysis is given of the main expenditure and income headings, relating them to similar expenditure and income in 1945–46. No separate sections, therefore, have been included in this year's accounts comments for the Annual Holidays Act, General (Administration), or National Pay Office Funds, which are now amalgamated in the one National Administration Fund.

By arrangement with the Government Departments concerned the Commission agreed to take over from the Cargo Control Committee at Auckland as at 1st August, 1946, and operate as a semi-Government Store the Committee's No. 3 store at Parnell. In order to segregate the finances of this store a "Store Fund" (see Section 6) was established.

During the financial year ended 31st March, 1947, internal changes occurred in two other funds. As from 1st August, 1946, the Annual Holidays Act Fund levy was increased from 2½d. to 4d. per paid labour-hour to provide for the cost of granting paid statutory holidays to waterside workers. As explained earlier, this amended levy was, as from 10th March, 1947, included in the over-all national administration levy. The other fund affected was the Supervision Fund (see Section 7), As from 30th September, 1947, the Commission handed back to the shipping companies concerned the responsibility for the supervision of waterside labour at the ports of Auckland and Wellington. The supervision levies, therefore, ceased at those ports from that date.

Summarized, the funds operated by the Commission as at 31st March, 1947 were as follows:—

| Name of Fund. | | | Date from which Fund operative. |
|-------------------------------|-----|--|---------------------------------|
| Buildings | | | 1st April, 1944. |
| Consolidated (vote, "Labour") | | | 9th April, 1940. |
| Co-operative Contracts | | | 10th July, 1940. |
| National Administration | | | 10th March, 1947. |
| Store | | | 1st August, 1946. |
| Supervision | . : | | 29th April, 1942. |

Detailed statements of account for each of these funds are included in the Appendix. In addition, a table is given (Appendix, page 88) showing in summarized form the fund totals of expenditure and income as well as Appropriation Account headings and Accumulated Funds Accounts for the period 1940–46, the year 1946–47 and the full period of the Commission's activities, 1940–47. Percentages are shown in each case to indicate the relation of each fund to the total operations of the Commission. A full comparison between the figures in this table and the figures in the similar table for 1945–46 (H.–45, 19th August, 1946, pp. 78–79) is not possible, owing to the amalgamation

of some funds. In bringing forward the figures for 1940–46 the amounts and percentages for those funds, now amalgamated, have been combined. The following points, however, are of interest as compared with 1945–46:—

(i) Totals of expenditure and income have again fallen. For 1946–47 the decreases are £178,172 and £126,632 respectively, as compared with 1945–46 figures. The aggregate totals for 1940–47 are now:—

(ii) Total profit distributions on Co-operative Contracts and Supervision Funds again show an improvement. For 1946–47 the increase is £17,388, as compared with 1945–46. The aggregate of profit distributions for the period 1940–47 is now £1,017,173 (excluding equivalent profit distributions 1940–43 inclusive).

(iii) The Co-operative Contracts Fund, which is directly concerned with the discharging and loading of shipping, accounts for 88.47 per cent. of the Commission's income for 1946-47 and 88.32 per cent. of expenditure. Over the whole seven years of the Commission's activities this working fund has accounted for 92.18 per cent. of income and 92.23 per cent. of expenditure.

(iv) Administrative costs are equivalent to 4·12 per cent. of "total income" and 4·55 per cent. of "total expenditure," a decrease of 0·10 per cent. and 0·26 per cent. respectively as compared with 1945-46. Details are:—

| Fund. | | ge of Total ome. | Percentage of Total Expenditure. | | |
|--|--------------|---------------------|-------------------------------------|----------|--|
| | 1945-46. | 1946-47. | 1945-46. | 1946-47. | |
| Consolidated (vote, "Labour") | 0.46 | 0.47 | 0.50 | 0.52 | |
| General (Administration) National Administration | 1·43 ·· | 3·65 | 1.62 | 4.03 | |
| (part cost = £95,407) National Pay Office | $2 \cdot 33$ | • • | 2.69 | | |
| Totals | $4 \cdot 22$ | 4.12 | 4.81 | 4.55 | |

(v) After appropriations it was possible to carry down a balance of £24,963 to Accumulated Funds Account as at 31st March, 1947. This compares with a transfer back from Accumulated Funds of £4,634 as at 31st March, 1946, in order to provide for the appropriations for 1945–46.

(b) BUILDINGS FUND

(See Appendix, page 73)

During the year ended 31st March, 1947, the erection of two further buildings was completed. A small central pay office building at Timaru was opened on 23rd May, 1946. At Greymouth the watersiders' assembly hall and Commission's offices were officially opened on the 19th October, 1946. The accounts for these two buildings, and also for the Westport building which had been opened on the 16th March, 1946, were

H-45 16

finalized during the financial year. This resulted in further expenditure of £9,078 being brought to charge. The figure of £210 for works in progress represents initial costs of the Nelson assembly hall and offices which it is expected will be completed during the coming financial year. It is also anticipated that a small central pay office building at Gisborne will be completed, and that an assembly hall and offices at Bluff will be well advanced in construction before the 31st March, 1948.

The total book value of buildings erected (less depreciation) or in progress as at 31st March, 1947, was £32,565, an increase of £8,469 as compared with 31st March, 1946. It is estimated that the cost of the buildings being erected at Nelson, Bluff, and Gisborne will be not less than £30,000, so that the total commitments of the Buildings Fund as at 31st March, 1947, were not less than £63,000. For the year ended 31st March, 1947, the Commission has again set aside £5,000 from the Co-operative Contracts Fund and £5,000 from the National Administration Fund as additions to the Buildings Reserve Account, making a total of £50,000 in this account as at 31st March, 1947.

In accordance with the policy initiated in 1944–45, the Commission has again charged the funds of ports where buildings have been erected with a maintenance levy of 5 per cent. on the original capital cost. For the year ended 31st March, 1947, these levies amounted to £1,329. After provision for depreciation (£728) and administration charges (£34), the balance of £567 has been transferred to Accumulated Funds, making a total of £794 available as at the 31st March, 1947, to meet future repairs and maintenance charges on these buildings.

(c) CONSOLIDATED (VOTE, "LABOUR") FUND

(See Appendix, page 87)

Although the parliamentary appropriation from Consolidated Fund (vote, "Labour") for this section of the Commission's administrative expenditure is £12,250 for the year ended 31st March, 1947, as compared with £12,670 for 1945-46, it has since been found necessary to include a further £1,454 in respect of 1946-47 in the estimated appropriation required for 1947-48. This will represent a net increase of £1,034 as against the appropriation for 1945-46. Of this amount £626 is due to increased costs of members' fees and travelling-expenses. Additional administrative salaries consequent upon the reorganization necessitated by the establishment of the part-time Commission as from the 1st July, 1946, account for the balance of £408.

The net expenditure provided by way of charges or grants from Consolidated Fund (vote, "Labour") for the full period 1940–47 now aggregate £79,644, or an average of £11,378 per year. The estimated net expenditure of £17,079 for 1947–48 makes provision for the salaries and expenses of the full-time Commission which is expected to be reconstituted shortly.

(d) CO-OPERATIVE CONTRACTS FUND

(See Appendix, page 75)

The accounts of the Co-operative Contracts Fund for the year ended 31st March, 1947, again show very gratifying results in so far as the profit-earning income is concerned. While there has been a reduction of £157,075 in total income as compared with 1945–46, this was expected in view of the cessation of services performed on behalf of American authorities at Auckland, and of night shift, Sundays, and similar special overtime work, which operated for the full financial year during 1946–47. On the other hand, 82·61 per cent., or £1,911,993, of the total income of £2,314,627 was profit-earning during 1946–47, as against 74·19 per cent., or £1,833,713, in 1945–46, an increase of £78,280, or 8·42 per cent. It will be noted that while the increase in co-operative contracts income was £9,500, equivalent contracts income has risen by £68,780. This is largely due to the fact that the Commission assumed responsibility as from the 2nd December, 1946, for the payment of all wages, &c., due to waterfront workers employed by the New Zealand

Government Railways Department, which is the body chiefly concerned in the payment of equivalent profit distribution. It was considered more correct to include the income received to cover wage payments subject to equivalent profit distribution under the heading "Equivalent Contracts" than to treat such amounts as "Non-contracts"—that is, wages basis only.

Net profit, which for the year ended 31st March, 1947, was £222,691, is an increase of £11,023 over the previous year and is equivalent to a return of 11\frac{3}{2} per cent. on profit-earning income as against a return of 11\frac{1}{2} per cent. in 1945-46. There has been a substantial increase of £20,935 in profit distributions and grants as compared with 1945-46. At £210,788 the appropriations under these headings amount to 94.65 per cent. of the total net profit for 1946-47, which compares with 89.70 per cent. for 1945-46. The appropriation of £5,000 to Buildings Reserve absorbs a further 2.25 per cent. of net profit, leaving a balance of £6,902, equal to 3.10 per cent. of net profit, to be carried down to Accumulated Funds Account, the balance of which, as at 31st March, 1947, was £35,435.

In view of the continued downward trend in total Co-operative Contracts Fund income it has been necessary to increase the percentage assessment for administration in order to cover costs on a peacetime basis. As from the 1st April, 1946, therefore, the Commission has fixed this assessment at 1½ per cent. on total income instead of 1 per cent.

(e) NATIONAL ADMINISTRATION FUND

(See Appendix, page 78)

This is a new fund established as from the 10th March, 1947, in terms of the Commission's Order No. 11. The main reasons for setting up this fund are outlined in Section (1), General, of these comments. The classes of expenditure now covered in National Administration Fund and the funds previously responsible for such expenditure and which are now amalgamated in the new fund are—

| Class of Expenditure. | Previous Fund. |
|-----------------------|--|
| | Annual Holidays Act. National Pay Office General (Administration). |

The income to cover this expenditure is derived from a National Administration Fund levy at the rate of eightpence (8d.) per paid labour-hour and is a flat rate applicable equally to ordinary and overtime, union and non-union hours. This levy, of course, has operated only from 10th March, 1947, and is exclusive of assessment income and parliamentary appropriation in respect of general (administration) expenditure, which is referred to later. The balance of income for the year ended 31st March, 1947, has been derived from individual fund levies as constituted prior to the 10th March, 1947. The details concerning the various sources of income are:—

(i) Annual Holidays Act Levy (1st April, 1946 to 10th March, 1947).—For the period 1st April, 1946, to 4th August, 1946, this levy remained at $2\frac{1}{4}$ d. per paid labour-hour. As from the 5th August, 1946, the levy was increased to 4d. per paid labour-hour in order to provide for the cost of nine paid statutory holidays per year. It was estimated that a levy of $2\frac{1}{4}$ d. per paid labour-hour was equivalent to £100,000 per annum and that the additional $1\frac{3}{4}$ d. per paid labour-hour would produce £75,000 in a full financial year.

(ii) National Pay Office Levy (1st April, 1946 to 10th March, 1947).—This levy has remained at 2 per cent. on other income of the Commission not only during the period this fund was in existence during the 1946–47 financial year, but also right from the date of establishment of the National Pay Office Fund on the 1st April, 1943. As pointed out, however, in last year's comments (H.-45, 19th August, 1946, p. 11), it had become necessary to review the national pay office levy because of the continued fall in value of the other income of the Commission to which this levy was directly linked. At the same time it was decided to convert the levy from the percentage on income to a rate per paid labour-hour for inclusion in the new national administration levy. As from the 10th March, 1947, therefore, the 2 per cent. national pay office levy became 13d. per paid labour-hour. It was considered that this revised levy would not only provide sufficient income to cover the normal peacetime operation of central pay offices and labour engagement bureaux, but would also prove a more stable and equitable basis of charging than the former percentage based on total earnings, ordinary and overtime.

(iii) Daily and Weekly Minimum Payments (10th March, 1947, to 31st March, 1947).— The annual total of these payments, according to the Commission's earnings and employment records for the year prior to their commencement, was expected to approximate £100,000. To provide, therefore, for these costs a levy of 2½d, per paid labour-hour was

required (see (i), Annual Holidays Act levy).

(iv) General (Administration) (1st April, 1946, to 31st March, 1947).—The services covered by the income for general (administration) are:—

(a) Preparation of co-operative contracts fund accounts by port local offices of the Commission.

(b) Checking, issue, and collection of all accounts by the Commission's Head Office and general Head Office expenses in connection with the operation of the various funds of the Commission, including the keeping of all statistical records and accounts and preparation of annual statments of account.

(c) The portion of administrative salaries and expenses of both Head Office and port local offices which are included in the grant from Consolidated Fund (vote.

"Labour"), (see Section (3)).

The services under headings (a) and (b) are financed by internal percentage assessments on the other operating funds of the Commission. As at the 31st March, 1946, these assessments were at the rate of 1 per cent. on Co-operative Contracts Fund income and 2 per cent. on other fund incomes. For the same reasons as mentioned in connection with (ii), National Pay Office Levy, it has been found necessary to increase these assessments to $1\frac{1}{4}$ per cent. and $2\frac{1}{2}$ per cent. respectively for the year ended 31st March, 1947. The cost of heading (c) is covered by annual parliamentary appropriation.

Summarized, the composition of National Administration Fund income as at

31st March, 1947, was:-

| Class of Expenditure. | Charges. | | | |
|--|--|--|--|--|
| Annual holidays Statutory holidays Central Pay Offices and Labour Engagement Bureaux Daily and weekly minimum payments | $2\frac{1}{4}$ d. per paid labour hour. $1\frac{3}{4}$ d. ,, $1\frac{3}{4}$ d. ,, $2\frac{1}{4}$ d. ,, | | | |
| Total national administration levy | 8d. ", | | | |
| General (Administration) | | | | |

In accordance with the undertaking given by the Commission to shipping companies when this fund was established the details shown in the Revenue Account are sufficient, in conjunction with the summary of the composition of the national administration levy, to enable income and expenditure to be classified for comparative purposes as follows:—

19

(i) Annual Holidays (1st April, 1946, to 31st March, 1947).—The total income relating to annual and statutory holidays for the year ended 31st March, 1947, amounts to £150,892, being the sum of Annual Holidays Act levies (£141,200) and sixteen thirtyseconds of national administration levies of £19,384 (£9,692). Of this total, £35,300 represents levies of 2¹/₄d, per paid labour-hour for the period 1st April, 1946, to 4th August, 1946. This leaves a balance of £115,592 in respect of levies at 4d. per paid labour-hour for the period 5th August, 1946, to 31st March, 1947, of which nine-sixteenths, or £65,020, refers to annual holidays, and the statutory holidays proportion of sevensixteenths equals £50,572. The separate income for costs of annual holidays for the year ended 31st March, 1947, was therefore £100,320, as against £98,938 in 1945-46, an increase of £1,382, or 1.4 per cent. On the other hand, expenditure on union and non-union annual holiday pay (including administration assessment of 21 per cent. on income, as for a separate fund) increased by £13,758, or 16.5 per cent., to £97,218 as compared with 1945-46. The net surplus was therefore £3,102, or 3.1 per cent. of income. The increase in union annual holiday pay is due, firstly, to a change in the basis of computing such pay, and, secondly, to an increase in union membership.

The basis of computing union annual holiday pay was altered as from the 1st August, 1946, to one half-day for every eleven qualifying days instead of for every fourteen qualifying days. The maximum for each holiday year still remains as twenty-two half-days. For the period 1st August, 1946, to 31st March, 1947, however, it was possible for a unionist to earn a maximum of nineteen half-days accrued annual holiday pay, as compared with fifteen half-days under the previous basis. The effect, therefore, is to bring a greater proportion of the total annual holiday pay due to charge during the first eight months of the holiday year.

Reference to the summary of union membership (page 24) shows that the total union membership at main and secondary ports as at 31st December, 1946, was 6,150, as compared with 5,917 as at 31st March, 1946 (H–45, 19th August, 1946, p. 14). This is an increase of 4 per cent. during the nine-months period, and further members have been admitted since that date. On the other hand, non-union holiday pay for 1946–47, which amounted to £9,825, is a reduction of £415 on the cost for 1945–46.

- (ii) Statutory Holidays (1st August, 1946, to 31st March, 1947).—As indicated in the comments on annual holidays, the income for statutory holidays for the eight months ended 31st March, 1947, amounted to £50,572. Expenditure on statutory holiday pay (including administration assessment of $2\frac{1}{2}$ per cent. on income, as for a separate fund) amounted to £32,621, leaving a net surplus of £17,951. As, however, only five out of nine statutory holidays fell during the eight-months period covered by the revenue, and also in view of the introduction of proportionate payments to unionists as from the 10th March, 1947, and of payments to regular non-unionists as from 24th March, 1947, there is an estimated contingent liability of £10.750 as at 31st March, 1947, which would reduce the net surplus to £7,201, or 14.2 per cent. of income.
- (iii) Daily and Weekly Minimum Payments (10th March, 1947, to 31st March, 1947).— The income apportionable under this heading equals nine thirty-seconds of the national administration levy of £19,384—that is, £5,451. Expenditure during this short period at the busy time of the export season (including administration assessment of $2\frac{1}{2}$ per cent. on income, as for a separate fund) amounted to £2,369, leaving a net surplus of £3,082.
- (iv) Central Pay Office, Labour Engagement Bureau, and General (Administration), (1st April, 1946, to 31st March, 1947).—The total income for this portion of the National Administration Fund for the year ended 31st March, 1947, amounted to £95,925,

inclusive of £3,908, representing the administrative assessments on annual holidays, &c., income allowed for in Sections (ii) to (iii). This is an increase of £7,055, or 7.9 per cent., on the comparative figure for 1945–46 (omitting inter-fund transfers). Expenditure for the year ended 31st March, 1947, amounted to £95,407, as compared with £95,281 in 1945–46 for General (Administration) and National Pay Office funds (again omitting inter-fund transfers). While expenditure has remained stable, the increase in income through adjustment of assessments and levies has enabled a combined deficit of £6,411 to be converted into a small surplus of £518, or 0.54 per cent. of income.

During the year the Commission established additional central pay offices at the ports of Greymouth (as from 21st October, 1946) and Gisborne (as from 24th March, 1947). As from 10th March, 1947, it was also arranged that all waterfront wages payable at the port of Onehunga would be handled by the Commission's Auckland office. A central pay office will be established at Oamaru during 1947–48 at the time that daily and weekly minimum payments come into operation at that port. Central pay offices will then be in existence at all main and secondary ports throughout New Zealand. Central pay office activities were further extended during the year ended 31st March, 1947, with the assumption by the Commission, as from 2nd December, 1946, of the responsibility for advancing and paying waterfront wages, on behalf of the New Zealand Government Railways Department, at all main and secondary ports, with the exception of the Port of Oamaru. The Commission now pays through its central pay offices the wages, &c., of all waterfront labour, at main and secondary ports, except that employed by the Wellington and Nelson Harbour Boards.

(v) Summary (1st April, 1946, to 31st March, 1947).—The total income of the National Administration Fund for the year ended 31st March, 1947, was £248,360, comprising £152,435, or 61·38 per cent., in respect of holiday and minimum payments, and £95,925, or 38·62 per cent., for office administration. Expenditure totalled £223,707, of which 57·35 per cent., or £128,300, was for holiday and minimum payments, and £95,407, or 42·65 per cent., was for office administration. Out of the net balance of £24,653, £5,050 was appropriated to Buildings Reserve, leaving a balance of £19,653 to be credited to Accumulated Funds Account. This offset the almost equivalent adverse balance of £19,873 which was debited to the combined Accumulated Funds Accounts as at 31st March, 1946.

Accumulated Funds Account balances totalling £14,671 in respect of Annual Holidays Act, General (Administration) and National Pay Office Funds were transferred to National Administration Fund as at 1st April, 1946. With the credit balance brought in as at 31st March, 1947, this account had a total credit of £34,324 at that date.

(f) STORE FUND

(See Appendix, page 82)

It was urgently necessary to maintain storage space at Auckland to handle Government goods, particularly on account of the Food Controller and Wheat Committee, which had previously been provided for by the Cargo Control Committee stores under the jurisdiction of the Commission. Upon the cessation of Cargo Control Committee activities, therefore, as at 31st July, 1946, the Commission was asked by the Departments concerned to continue to operate the No. 3 Cargo Control Store at Parnell, as a Government store, on the same basis as had pertained under the Committee. The Commission agreed to this request on the understanding that any financial loss on the storage account would be made good, in view of the reduced rates pertaining to one major class of goods. At the same time the Commission arranged to continue to supply labour service for the inward and outward handling of goods stored and to take over plant which had been

H-45

acquired by the Cargo Control Committee to facilitate stacking not only in the Committee's stores, but also in wharf sheds and merchants' stores, as these services enabled more effective use to be made of the storage space available to the Committee for urgent purposes.

To segregate the financial transactions relating to the operation of this store by the Commission a Store Fund was established as from 1st August, 1946. The subsidiary activities of cargo handling and plant hire were also brought within the scope of this fund. In order to show the true financial position, credit has been taken for additional storage charges amounting to £496, representing the loss of revenue on the one major class of goods stored at a specially reduced rate. Total revenue for the eight months' period to 31st March, 1947, amounting to £10,053, of which £3,788, or 37.68 per cent., was in respect of storage and sundries, £3,398, or 33.80 per cent., was for handling charges and plant hire, accounted for the balance of £2,867, or 28.52 per cent. It will be noted that each of the three main activities contributed substantially to the income of the fund.

The main items included in the total expenditure of £8,206 (representing 81·64 per cent. of income) are wages of casual labour (including overtime), £2,961 (36·09 per cent.); rent, £2,403 (29·28 per cent.); and store salaries, £1,144 (13·94 per cent.). A net balance of £1,847, equal to 18·36 per cent. of income, is transferred to Appropriation Account. Out of this net balance a sum of £1,500, representing approximately the net surplus on handling and plant charges, has been set aside as a Plant Purchase Reserve, and the balance of £347 has been carried down to Accumulated Funds Account. It will be noted that this credit balance, which in effect represents the net surplus on storage charges, would have been showing as a debit balance of £149 if the adjustment of £496 in respect of the loss of storage revenue had not been included in the income.

(g) SUPERVISION FUND

(See Appendix, page 84)

The major development during the year ended 31st March, 1947, which affected the accounts of the Supervision Fund was the cessation of the Commission's responsibility for supervision of waterfront labour at the ports of Auckland and Wellington as from 30th September, 1946. At the remaining ports of Nelson, Picton, Westport, and Greymouth Commission supervision of waterfront labour continued throughout the financial year, and no further ports were brought within the scope of this branch of the Commission's activities.

As would be expected, therefore, the income and expenditure figures for this year show substantial reductions as compared with 1945–46. Income from levies was only £29,796, a decrease of £26,249 on 1945–46. Total expenditure at £31,591 is less by £25,108 than for 1945–46. It will be noted that, while "insurance," "overtime," &c., and "Wages" all show equally substantial reductions, this was not the position so far as "Salaries," &c., was concerned. This is because at the secondary ports of Nelson, &c., the supervision is performed by one or more permanent supervisors on annual salaries, while at Auckland and Wellington the work was carried out by permanent staff mainly on weekly wages.

The continued downward trend in Co-operative Contracts Fund income (see Section (4)), on which Supervision Fund levies are based, is again reflected in the net deficit of £1,795 in this fund transferred to Appropriation Account for the year ended 31st March, 1947. It is an increase of £1,141 on the net deficit for 1945–46. In order to provide for this loss and also for profit distributions (in most cases payable in relation to similar payments from Co-operative Contracts Fund) it has been necessary to transfer back to Appropriation Account a further £2,505 from wartime profits of this fund. The net balance of Accumulated Funds Account as at 31st March, 1947, is now £10,911.

On the application of shipping companies, the Commission has agreed to refund pro rata the net balances in Accumulated Funds Account in respect of the ports of Auckland and Wellington. This decision, however, is subject to the net losses at secondary ports being first deducted. It is also expected that suitable adjustments will be made in the rates of levies for the remaining secondary ports to ensure that their income is placed on a sound footing to meet the cost of supervision services on a normal peace-time basis.

13. CONCLUSION—EXTENDED CONTRACTING—FUTURE OF COMMISSION

The present co-operative contracting system provides for "payment by results" in respect of cargo handling, or "winch time" only. In order to provide a further incentive to and reward for more efficient work it is proposed to extend the co-operative contract tonnage or unit rates by including rates for performing non-cargo handling work, such as hatches and gear, rain, minima, shunting, and other sundry cargo-handling delays, extra labour, special cargo rates, dirt-money, &c. The only labour-costs not to be included in the proposed extended contract will be the difference between overtime and the basic wage rates.

With the introduction of the extended form of contracting it is proposed to transfer to the workers a greater degree of the direct responsibility for the efficient management and performance of waterside work. It is very desirable to obtain closer co-operation and good will between workers and employers and the education of workers to accept a greater share in the management of the industry, and the responsibility which goes with it will, it is hoped, result in improved relationships and the speedier handling of cargoes and despatch of ships.

Negotiations are proceeding between the Government and representatives of employers and workers regarding the future form of Commission control.

(Sgd.) A. E. Bockett, Commissioner.

Notes.—(1) During the war years engine repairs, which were previously performed overseas, were earried out in Now Zealand.

(2) Reduction in working-hours have been effected as follows:—

(a) Main Ports.—Reduction from 10 p.m. to 9 p.m. cessation of work became operative as and from 3rd January, 1944. Shift-work and work on Sundays, holidays, and on Saturday afternoons (except where vessels could finish by 5 p.m.) cancelled as from 8th September, 1945.

(b) Secondary Ports.—Shift-work cancelled as from 8th September, 1945. Work on Saturday nights, Sundays, and holidays cancelled as from 26th November, 1945. With regard to the cessation of work on Saturday afternoons and at 9 p.m. on ordinary week-days, subsequent action was taken at the various ports to bring the hours into line with those worked at main ports.

and 8 a.m. to noon on Saturdays (5 p.m. to finish). This represents a reduction of approximately nine hours per week, or 13 per cent. on pre-war (3) During the war years, overseas vessels were worked extended hours on Saturday nights, Sundays, and holidays, and also under a shift system from 11 p.m. to 7 a.m. Prior to the war, overseas vessels were worked 8 a.m. to 10 p.m. (midnight to finish), Mondays to Fridays inclusive, and 8 a.m. to 5 p.m., Saturdays. During the year ended 31st March, 1947, these vessels were worked 8 a.m. to 9 p.m. (10 p.m. to finish), Monday to Friday inclusive, working-hours.
