SECTION 12.—FINANCE AND EXPENDITURE

(a) *Vote "Labour and Employment" (£798,097 Net)*

(1) Expenditure by the Department of Labour and Employment is subject to annual appropriation by Parliament in terms of the Public Revenues Act, 1926, and provision is made for this expenditure to be met from the Consolidated Fund under vote "Labour and Employment." This vote is divided into five subdivisions, set out below. The figures shown against the total vote above and the amount against each subdivision is the net expenditure in each case after the sums received by the Department under the Treasury revenue item "Departmental receipts" have been deducted.

(2) *Subdivision I: Administration (£359,817 Net).*—As this is the first year's expenditure recorded under this vote for the administration expenses of the combined National Employment Service and Department of Labour, the net expenditure of £359,817 can only be compared with the totals of vote "National Employment Service"
