NOTES.—(1) As regards pulmonary tuberculosis, the figures prior to 1908 are not altogether comparable with those for the years 1908 onwards as they did not apparently include deaths certified as being due to "tuberculosis" (not further defined), which have since been treated as due to "pulmonary tuberculosis."

(2) Standard used for standardized rates—England and Wales, 1901: Male and female rates calculated on "persons" (distribution; "persons" rates calculated on male and female distribution.
