The results of the examination were satisfactory. In the highest division work to the Junior University Scholarship standard had been undertaken with satisfactory results. The matriculation class did very satisfactory work. The work of the junior division might have been stronger in accurate knowledge of the ground covered. This division, however, contains some pupils who have been for only a short time in the class and could not have been expected to make much progress.

The work attempted has been very heavy, two pupils who have been three years at secondary work covering the ground for the Junior University Scholarship. This is a high ideal of progress for the teachers to place before themselves, and they must be congratulated on the success attained.
