two. As showing the success of the standard of teaching of the curriculum prepared by the late Professor Ulrich, out of these sixty-two associates, &c., of the School of Mines, eleven are at present in charge of or on the staff of ten Schools of Mines in six colonies—viz., Tasmania, Victoria, South Australia, Western Australia, Queensland, and New Zealand. Besides these in teaching positions, nearly the whole of those who left the school up to the end of 1899 (forty-five in number) hold responsible positions in many of the various branches of mining work and in many countries.

Regretting as I do the incident which has necessitated my making up this report, it has been a pleasing duty to tabulate and place on record the results obtained by the school since its inception, and under the directorship of Professor Ulrich. I wish also to express my thanks to the other

members of the staff who assisted me in every way in carrying on the work of the school.

D. B. Waters, A.O.S.M.,

Lecturer on Metallurgy and Assaying,
31st March, 1901. and Acting-Director of the Otago School of Mines.
