

TABLE A.

No.	Name.	Date of Admission to Hospital, or "Laying-up."	Date on which Patient first felt ill.	Residence.	History as to Oysters.	Remarks.
1	K.	About June 12	About June 7	Auckland (took ill in Wellington)	Bottle of oysters eaten at supper on 25th May	(These three are the young men whose illness first led to the report as to oysters being the cause.
2	J.	"	" 7	Ponsonby, Auckland	Worked in his father's fish-shop, from which the bottles came used by 1, 2, and 3	No direct history of eating oysters. Patient died.
3	R.	"	" 8-9	Vulcan Lane, Auckland	Oyster-opener in B.'s shop	This shop has no connection with W.'s, but young W. (No. 4) often came to visit him at B.'s oyster-store.
4	F.W.	Hospital, June 13	"	Queen Street	..	
5	E.W.	" 13	" 7	Albert Street	..	
6	G.B.	" 17	" 10	Newmarket	No correct date, but was in the habit of eating oysters at W.'s or "the D."	Lives next door to W.'s fish-shop, and back premises adjoin.
7	A.M.	" 16	" 6	Queen Street	Frequently ate oysters before illness. Could not give dates	This is the only case of typhoid occurring amongst those present at this supper, although many others partook of the oysters.
8	J.B.	" 16	" 7	Napier Street	Ate oysters at a supper in a café, 18th May, only occasion he can remember till he began to feel ill	A doubtful case therefore. Somewhat vague as to date.
9	A.T.	" 17	" 10	..	Ate oysters at the C. Hotel about a fortnight before his illness began	J. and S. deal direct with the pickers.
10	E.C.	" 13	(?)	Tuakau (thirty-seven miles up country)	Got oysters in a bottle some weeks before admission	"
11	J.O.	" 2	(?)	Grafton Road, Auckland	Brother of No. 10, and shared the oysters	"
12	P.K.	" 18	About June 4	Parnell	His mother got a bottle of oysters in Victoria. Street three weeks before admission, and patient ate some	"
13	P.	July 2	" 14	Grafton Road	Ate oysters at D.'s a few weeks before illness	Very vague as to date.
14	J.F.	June 14	" 7	Eden Crescent	Got oysters about the end of May at a shop in Victoria Street, and also at B.'s	
15	F.S.	" 17	" 10	Warkworth (forty miles north of Auckland)	Had three bottles of oysters sent up from town three weeks before illness	It is just possible these oysters came from W.'s, as the shop is near the wharf.
16	H.P.	" 17	" 6	Waitara, near New Plymouth; came to Auckland about beginning June	Ate oyster about three weeks before he got ill while at Waitara, and again in Onehunga, a few days before at W.'s shop	Not a very definite case, but striking owing to the history of Auckland oysters. S. was dealing in Onehunga oysters as well as from Russell.
17	Q.H.	" 21	" 19	Arch Hill, Auckland	Ate oysters about three weeks before her illness, the last week in May	The only case where Auckland-grown oysters could be traced. About same time had oysters bought at B.'s store.
18	L.S.	Notified, June 15	" 8	Parnell	Frequently ate oysters before illness. Patient has left Auckland, so that I could not find dates or source	
19	Mrs. M.	Hospital, June 15	" 8	Baker Street	Ate oysters often before illness	Vague as to dates.
20	M.	" 18	" 12	Queen Street	Kept a small eating-shop. Did not deal in oysters, but about 6th June ate some mussels. Medical attendant informed me that patient had oysters towards end of May	Patient died, and therefore history is not reliable.
