ANNUAL REPORTS OF DOMAIN BOARDS.

The UNDER-SECRETARY FOR LANDS to the Hon. the MINISTER OF LANDS.

SIR,—

Department of Lands, Wellington, 28th June, 1906.

I have the honour to transmit herewith a synopsis of the annual reports of Domain Boards for the year ended the 31st December, 1905, which have been furnished in accordance with section 7 of "The Domain Boards Act, 1904."

Reports on a number of racecourses and recreation-grounds, each administered under a special Act similar to the Domains Act, have also been obtained, and are published in a condensed form in the Appendix hereto.

During the year under review a form of lease suitable for domain lands was prepared and printed. Copies of the form are supplied to Domain Boards on application, and Chairmen and secretaries are consequently enabled to prepare leases as occasion requires. The use of the form will also have the effect of tending to make leases more uniform than has hitherto been the case.

Great difficulty is experienced in preventing the destruction of the natural bush on some domains. Every care, however, is taken to prevent such despoliation where the Department can exercise supervision, and it is hoped that the cutting of native foliage will cease altogether when the Boards fully realise the objects of the trusts they administer for the benefit of the people of New Zealand.

It has been suggested that complete supervision and control of all public domains can only be attained by the appointment of supervising officers, but I am glad to say that it is apparent that Domain Boards and trustees are now so thoroughly awakened to the necessity for a very careful administration of the areas with which they are intrusted, that I am able to report to you that I do not consider special inspection necessary other than is at present afforded by our own local officers when any special case arises.

The total number of domains on which reports of the year's operations should have been made is 399, and reports regarding 360 have been received. A list of the Boards that failed to furnish an annual report and particulars of the lands controlled by them will be found on pages 39 and 40.

The locality of each domain is shown on the accompanying maps.

I have, &c.,

WILLIAM C. KENSINGTON,
Under-Secretary for Lands.

The Hon. the Minister of Lands, Wellington.

As a result of the year's operations progress and improvement is noticeable all over the domain. The baths, dressing-boxes, shed, and terraces have been kept scrupulously clean, the caretaker's residence has been painted, and some concrete work has also been executed. Proposals for raising the wall at the northern end of the basin about 6 in. (thereby deepening the baths) for forming a smooth platform to enable ladies and children to enter the baths in comfort, and for extending the iron railing at the north-east corner, are under consideration. The utility of the pile groins at St. Clair has been proved in a marked degree; they have not only stopped erosion of the foreshore, but have built up the beach from 4 ft. to 6 ft. Marram-grass and lupins have been successfully planted on the sandhills facing the sea, the result being that the toe of the hills has been raised considerably. St. Kilda Beach has been made more accessible by the extension of the road for a distance of 3 chains—6 chains in all from the tram-line—and the placing of scrub groins and subsequent planting of marram-grass on the accumulated sand has proved a most effective method of making up the foreshore. The continuation of this work at the proper time and place will do away with a troublesome lagoon. A stagnant pool opposite Onslow House has been filled in, and the sandhills from the Queen's Drive to Tahuna Park have been fenced and planted with marram-grass and lupins. This area includes a site on which a band-rotunda is to be erected. The public road through the domain has received due attention, and the sanitary work has been performed in a satisfactory manner. A prolific crop of marram-grass and lupins was produced during the season, especially on the sewage-treated portions of the sandhills. It is considered that when the last patch of sand is covered with verdure, and the encroachment of the sea no longer possible, trees and shrubs may be planted, and this barren waste converted into a magnificent Marine Park. [NOTE.—This report is for the year ended 31st March, 1906.]
