# GOVERNMENT INSURANCE DEPARTMENT.

## STATEMENTS

IN CONNECTION WITH THE VALUATION OF LIABILITIES (FOURTH AND FIFTH SCHEDULES)

FOR THE

TRIENNIUM ENDING 31ST DECEMBER, 1908.

---

*Presented to both Houses of the General Assembly pursuant to Section 38 of "The Government Life Insurance Act, 1908."*

---

WELLINGTON.

1909.

REPORT BY THE ACTUARY  
RESPECTING THE  
VALUATION OF THE LIABILITIES  
UNDER LIFE POLICIES AND ANNUITIES  
OF THE  
NEW ZEALAND

# Government Insurance Department,

In terms of Section 36 of "The Government Life Insurance Act, 1908."  
(See Fourth Schedule.)

## I.

THE date up to which the valuation was made was the 31st December, 1908.

## II.

The principles upon which the valuation and distribution of profits were made were as follows:—

- (1.) *Principles of Valuation.*—The valuation has been made upon a strictly "net premium" basis; in other words, no credit whatever has been taken for any extra premiums or loadings, the net premiums alone having been valued for inclusion among the assets. The liability has been ascertained by taking the difference between the present value of the sums assured (including reversionary bonuses) and the present value of the net premiums (derived from the Institute of Actuaries H<sup>m</sup> Table with 3½ per cent. interest). Where the original premiums have been reduced by the application of amounts received in consideration of the surrender of bonuses or former policies the present values of such reductions have been added to the liability. In all cases where an extra premium was payable the policy has been valued at the true age, and a full proportion has been reserved for the unexpired risk for which the extra premium had been paid. Adequate extra reserves have been made for limited-premium policies and the immediate payment of claims in the case of whole-life assurances, and allowance has been made for the actual incidence of the premium income. Reserves have been made for Deferred Annuities equivalent to the premiums paid accumulated at 4 per cent. Endowments have been valued as sums certain payable at the end of their respective terms, and mortality has only been taken into con-

*FOURTH SCHEDULE.*

sideration where the premiums are payable during the joint lives of the child and purchaser,  $3\frac{1}{2}$  per cent. compound interest being used; the surrender value has been taken as the minimum reserve. Annuities have been valued by the English Government Annuitants Mortality Experience (1883), using  $3\frac{1}{2}$  per cent. interest for those issued prior to the 20th May, 1896, and 3 per cent. interest for those issued subsequently. In the case of annuity-assurances the value at age 60 of the annuity has been computed by the 1883 English Annuitants Experience and treated as an endowment payable at age 60, which has then been valued, in combination with the insurance portion of the contract, by the Institute H<sup>m</sup> Table, with  $3\frac{1}{2}$  per cent. interest.

The valuation has been made in duplicate, and the policies valued in groups where practicable.

(2.) *Principles of Distribution of Surplus.*—The divisible surplus is distributed among the policyholders entitled to participate as a uniform reversionary bonus per cent. on sums assured and existing bonuses, for each premium paid since the last division; and an interim bonus is also paid, at the same rate, in respect of those policies which may be surrendered or become claims before the next distribution of surplus. The approximate profit from favourable mortality in the General Section and the Temperance Section respectively has been ascertained and specially divided among the members of the respective sections. The result is that temperance policies will, on this occasion, receive reversionary bonuses at a slightly higher rate than general policies which are like them in all other respects.

The divisible surplus has been converted into reversionary bonuses by means of the H<sup>m</sup> Table of Mortality with  $3\frac{1}{2}$  per cent. interest, the reversion for a continuous assurance having been used for whole-life policies.

III.

The Tables of Mortality used in the Valuation were,—

- (1.) For Assurances, the Institute of Actuaries H<sup>m</sup> (Healthy Males) Table;
- (2.) For Annuities, Finlaison's 1883 Government Annuitants Tables.

IV.

The rate of interest assumed in the valuation was  $3\frac{1}{2}$  per cent., except in the special cases mentioned in paragraph II (1), where a higher reserve was considered necessary.

V.

The whole of the loading, or the difference between the premiums payable to the office and the net premiums, amounting to £51,383 per annum and valued at £632,520, has been reserved for future expenses and profits; and in the case of limited-premium and paid-up policies, where the loading as well as the risk-premium is payable for a limited period only, a further reserve of £8,446 has been made to provide for expenses and profits when the premiums shall have ceased.

VI.

The Consolidated Revenue Account for the three years that have elapsed since the last valuation is given on page 5.

## FOURTH SCHEDULE.

## FOURTH SCHEDULE.

## VII.

1. The liabilities of the Department under life policies and annuities at the date of the valuation, showing the number of policies, the amount assured, and the amount of premiums payable annually under each class of policies, both with and without participation in profits, will be found in detail in the Valuation Summary, given on page 6.

2. The net liabilities and assets of the Department, with the amount of surplus, are shown in the Valuation Balance-sheet given on page 5.

## VIII.

All participating policies which were in force at the date of the valuation, however recently effected, share in the profits. The reversionary bonuses allotted to policies recently issued follow the sum assured—*i.e.*, they vest immediately, and are payable with the sum assured as a claim, however short the duration; but they do not acquire a cash value for surrender purposes until the policies to which they belong have been two years in existence.

## IX.

The results of the valuation are as follows :—

- (1.) The total amount of profit made by the Department during the three years ending the 31st December, 1908, including a balance of £16,887 11s. 7d. carried forward three years ago, was £262,334 4s. 2d., of which amount £13,138 5s. has been paid as interim bonuses during the triennium.
- (2.) The amount of profit divided among the policyholders as at the 31st December, 1908, was £192,430, which has been converted into reversionary bonuses amounting to £316,742. The number of policies which participated was 45,870, assuring the sum of £10,848,267, or, including reversionary additions, £11,917,165.
- (3.) The following are specimens of the bonuses which have been allotted, for the three years ending the 31st December, 1908, to ordinary whole-life policies for £100 in the General Section upon which all previously allotted bonuses had been allowed to remain :—

Number of Years in Force.	AGE AT ENTRY, 20.		AGE AT ENTRY, 30.		AGE AT ENTRY, 40.		AGE AT ENTRY, 50.		Number of Years in Force.
	Reversionary Bonus.	Cash Value.	Reversionary Bonus.	Cash Value.	Reversionary Bonus.	Cash Value.	Reversionary Bonus.	Cash Value.	
5	£ s. d.	£ s. d.	5						
10	3 1 0	0 14 6	3 1 0	0 18 6	3 1 0	1 3 11	3 1 0	1 10 6	10
15	3 4 0	0 17 1	3 4 0	1 1 11	3 4 0	1 8 3	3 4 0	1 16 3	15
20	3 7 0	1 0 4	3 7 0	1 6 3	3 7 0	1 13 6	3 7 0	2 2 2	20
25	3 13 0	1 5 0	3 14 0	1 12 8	3 11 0	2 0 3	3 11 0	2 9 2	25
30	3 19 0	1 11 0	3 15 0	1 17 6	3 14 0	2 6 6	3 13 0	2 15 0	30
35	4 3 0	1 16 8	4 1 0	2 5 11	4 0 0	2 15 4	4 0 0	3 4 4	35
	4 3 0	2 1 6	4 4 0	2 12 10	4 3 0	3 2 7	4 0 0	3 7 8	

(Bonuses 10 per cent. more than the above have been allotted to similar policies in the Temperance Section.)

The cash values of the reversionary bonuses are computed by the H<sup>x</sup> Table of Mortality, with interest at 4½ per cent.

MORRIS FOX,  
*Actuary.*

23rd March, 1909.

## R E P O R T

BY THE

# Government Insurance Commissioner,

In terms of Section 37 of "The Government Life Insurance Act, 1908."  
(See 5th Schedule.)

## STATEMENT OF THE LIFE ASSURANCE AND ANNUITY BUSINESS OF THE GOVERNMENT INSURANCE DEPARTMENT ON THE 31ST DECEMBER, 1908.

---

*Question 1.*—The published table or tables of premiums which are in use at the date above mentioned.

*Answer.*—The tables of premiums in use are contained in Appendix No. 1.

*Question 2.*—The total amount assured on lives for the whole term of life which are in existence at the date above mentioned, distinguishing the portions assured with and without profits, stating separately the total reversionary bonuses, and specifying the sums assured for each year of life, from the youngest to the oldest ages.

*Question 3.*—The amount of premiums receivable annually for each year of life, after deducting the abatements made by the application of bonuses in respect of the respective assurances mentioned under heading No. 2, distinguishing ordinary from extra premiums.

*Answer to Questions 2 and 3.*—This information is contained in Appendix No. 2, and similar information in respect of other policies is given in Appendices Nos. 3, 4, 5, 6, and 7.

## FIFTH SCHEDULE.

**Question 4.**—The total amount assured under classes of assurance business other than for the whole term of life, distinguishing the sums assured under each class, and stating separately the amount assured, with and without profits, and the total amount of reversionary bonuses.

**Question 5.**—The amount of premiums receivable annually in respect of each such special class of assurances mentioned under heading No. 4, distinguishing ordinary from extra premiums.

**Question 6.**—The total amount of premiums which has been received from the commencement upon all policies under each special class mentioned under heading No. 4, which are in force at the date above mentioned.

*Answers to Questions 4, 5, and 6 are contained in the following table:—*

Class of Assurance.	Number of Policies.	Sums assured.	Reversionary Bonuses.	ANNUAL PREMIUMS.		Total Ordinary Premiums Received.
				Ordinary.	Extra.	
<b>WITH PROFITS.</b>

## FIFTH SCHEDULE.

**Question 8.**—The amount of all annuities other than those specified under heading No. 7, distinguishing the amount of annuities payable under each class, the amount of premiums annually receivable, and the amount of consideration-money received in respect of each such class, and the total amount of premiums received from the commencement upon all deferred annuities.

## ANSWER TO QUESTION 8.

## THE AMOUNTS OF ALL ANNUITIES OTHER THAN THOSE SPECIFIED UNDER HEADING NO. 7.

Class of Annuity.	Amount of Annuities.	Annual Premiums.	Single Premiums.	Total Premiums received to 31st December, 1908.
Deferred (Premiums not returnable) ..	£ 63 12 8	£ 24 10 7	£ 200 0 0	£ 425 9 1
Deferred (Premiums returnable) ..	34 0 0	44 0 0	..	218 3 6
Deferred (Annuity Assurances)* ..	2,636 10 6	546 4 0	69 12 10	4,035 12 8‡
Deferred (Annuity Assurances)† ..	2,538 10 10	565 3 4	29 14 0	3,436 16 11‡
Totals .. ..	£5,272 14 0	£1,179 17 11	£299 6 10	£8,116 2 2

\* And temporary assurances for £11,198.

† And whole-life assurances for £9,297.

‡ These amounts are also given in answer to Questions 5 and 6.

**Question 9.**—The average rate of interest at which the funds of the Department were invested at the close of each year during the period since the last investigation.

*Answer.*—At the close of each financial year the average rate of interest at which the funds of the Department were invested for that year was as follows:—

	£ s. d.
1906 ... ...	4 9 10
1907 ... ...	4 10 3
1908 ... ...	4 12 2

**Question 10.**—A table of minimum values, if any, allowed for the surrender of policies for the whole term of life, and for endowments and endowment assurances; or a statement of the method pursued in calculating such surrender values, with instances of its application to policies of different standing, and taken out at various interval ages, from the youngest to the eldest.

*Answer.*—The minimum surrender values for whole-life and endowment assurance policies issued at the present rates of premium are given in Appendix No. 8. In the case of simple endowments, with return of all premiums at death of nominee, the premiums are returned without interest, as surrender value. Other endowments are treated specially.

*FIFTH SCHEDULE.*

*Question 11.*—A statement to be furnished of the manner in which policies on unhealthy lives are dealt with.

*Answer.*—When proposals are made on lives which, although not of such inferior quality as to merit total rejection, are considered not to reach the requisite standard for insurance at the ordinary rates of premium, such proposals are accepted at increased rates. Great refinement is not attempted in the assessment of lives, proposals being as a rule either accepted at par, with an extra premium of 10s. per cent. of the sum assured, an extra of 20s. per cent., or declined. The alternative of a fixed contingent debt in lieu of extra premium, if not remissible, is always offered.

The true age is taken as the basis of surrender calculations, excepting in the cases of paid-up policies, the surrender values of which are calculated at the rated-up ages.

The Appendices alluded to above have been compiled under the immediate supervision of Mr. Morris Fox, the Actuary to the Department.

J. H. RICHARDSON,

*Government Insurance Commissioner.*

23rd March, 1909.
