# 1. EXTRACT FROM THE THIRTY-THIRD ANNUAL REPORT OF THE MINISTER OF EDUCATION.

# SECONDARY EDUCATION.

# Number of Schools.

The schools usually included in the list of secondary schools in this report which were open in 1909 were thirty-one in number, namely,—

(a.) "Endowed secondary schools" within the meaning of section 89 of the	
Education Act and included in the Eighth Schedule to the Act	26
(b.) Secondary schools within the meaning of the same section (89), but	
	3
(c.) Other endowed secondary schools not coming within the definition of	
section 89	2
	_
Total	31

Four of the endowed secondary schools named in the schedule to the Act had not been established at the end of the year, although there were district high schools in the same places which were to some extent assisted by funds derived from the endowments of the secondary schools. A list of the schools is given in Table J3. The number of district high schools in operation during the year was sixty-two.

# Roll and Staff.

The total number of pupils attending the thirty-one secondary schools in the last terms of 1908 and 1909 respectively were as follows:—

		1908		1909				
	Boys.	Girls.	Total.	Boys.	Girls.	Total.		
Roll (exclusive of lower departments)	2,502	1,678	4,180	2,797	1,870	4,667		
Number in lower departments	88	59	147	114	75	189		
Total	2,590	1,737	4,327	2,911	1,945	4,856		
<b>37 1</b> (1 7 7 7 7 7 )								
Number of boarders (included above)	557	136	693	566	140	706		

In the same years these schools were staffed as follows:—

			1908			·			
		м.	$\mathbf{F}$ .	Total.	M.	F.	Total.		
Regular staff		 125	91	216	131	93	224		
Part-time teachers	•••	 43	25	68	44	33	77		

The average number of pupils per teacher (excluding part-time teachers) is thus seen to have been 20 in 1908, and 21.7 in 1909.

The average number of pupils on the roll of the secondary departments of district high schools in the two years, 1908, 1909, respectively, were—

Boys Girls	•••	•••	•••	 •••	1908. 1,167 1,191	1909. 1,100 1,063
		Tot	tal	 •••	 2,358	${2,163}$

If, instead of taking the average roll throughout the year, we take, as for the secondary schools, the roll at the end of the year, we find the numbers in the secondary departments of district high schools to have been as follows:—

Boys Girls	 	•••	•••	1908. 1,017 1,125	1909. 944 947
	Tot	tal		2.142	1 891

3 E.—6.

Both in the secondary schools and in the secondary departments of district high schools there is a falling-off in the roll towards the end of the year; but the decrease is less marked in the secondary schools than in the secondary departments of the district high schools: in the latter the total roll at the end of the year was 2,142 in 1908 and 1,891 in 1909. The falling-off in the course of the year is more marked in the case of the boys than of the girls: this is due, no doubt, to the fact that more boys leave school to enter employment.

Besides the head teachers, who generally take some part in the secondary instruction, there were employed in 1908 in the secondary departments of district high schools 102 special assistants—55 men and 47 women—and last year 93 special assistants—namely, 43 men and 50 women. The average

number of pupils per teacher was 23.1 in 1908 and 23.3 in 1909.

In addition to those in secondary schools and in the secondary departments of district high schools there should properly be included in the number of pupils under secondary instruction in the Dominion (a) the pupils attending certain day classes in connection with technical schools, which in this regard may be called technical high schools; and (b) the pupils in various institutions for the secondary education of Maori boys and girls.

The total numbers on the roll of technical day schools at any time during

the years 1908 and 1909 were as follows:-

						1908.	1909.
Boys						307	345
Boys Girls	••	•••		•••	•••	392	501
		Totals	•••	•••		699	846

The following was the average roll of pupils in secondary schools for Maoris (all of whom were boarders) for the respective years:—

Boys Girls	 •••	•••	 •••	1908. 136 167	1909. 169 191
	Totals	•••	 •••	303	360

Summarizing all these figures, substituting in the case of the secondary schools the average roll for the roll at the end of the year, and excluding pupils in the lower departments of such schools, we obtain the following statement of the numbers receiving some form or other of secondary instruction during the year 1909 (as nearly as can be estimated):—

Secondary schools		•••	•••		•••	4,834
District high schools						2,163
Technical day schools				•••		846
Maori secondary school	s		•••		• • • •	360
<i>'</i> .	<b>F</b> otal	•••		•••		8,203

The corresponding estimated total for 1908 would be 7,742, so that the decrease in the number of secondary pupils at district high schools has been more than balanced by the increases in the three other groups of schools giving secondary instruction, the total net increase being about 460. The population of the Dominion (exclusive of the Cook Islands) was estimated as 1,008,373 at the 31st December, 1908, so that the proportion of persons receiving some form of secondary instruction in publicly recognized institutions during 1909 was thus 81·4 per 10,000 of the population, In 1906 the corresponding proportion was 72·7 per 10,000, so that there has been a considerable development of secondary education in the Dominion during the three years 1906–9. It may be interesting to note that in Württemberg (a typical German State), New York, and Chicago the latest available figures (1905–6) show the corresponding proportions to have been respectively 71·6, 51·8, 66·8 per 10,000 of the population; while in Switzerland the proportion reaches the astonishingly high standard of 203·1 per 10,000.

# Salaries of Secondary Teachers.

The total amount of the salaries paid to the regular staffs of secondary schools as at the rates paid at the end of the year was £51,681. As might be expected, the salaries paid in the different secondary schools varied considerably; the average for principals and assistants, and that for men and women, respectively, are shown below to the nearest pound:—

Salaries in Secondary Schools.

		De	cember, 190	8	December, 1909					
		$\mathbf{M}$ .	F. All.		М.	F.	All.			
		£	£	£	£	£	£			
Principals		464	341	$\boldsymbol{422}$	474	361	437			
Assistants	•••	224	147	190	230	153	196			
3333 3							222			
Whole staff	• • •	261	168	222	269	175	230			
					- <del></del>					

Note.—The salaries of part-time teachers are excluded from the above comparison.

In the secondary departments of district high schools salaries are uniform in accordance with the Schedule to the Act. The average salaries actually paid to the assistants, in addition to the sums paid by way of extra salary to the head teachers, were, in December, 1908 and 1909.—

					-	190	8.		1909.			
						£ s	. (	đ.	£	s.	d.	
Men	• • •	• • •		• • •	• • •	193 1	7	7	198	2	1

All secon	idary a	issistants	•••	•••		171	9	1	174		$\tilde{2}$	

(The scale of salaries is the same for men and women.)

The total amount paid in salaries from receipts from Government for the secondary departments of district high schools, including the special payments to head teachers, was £18,618; in 1908 it was £20,097.

The professional qualifications of the secondary teachers of the Dominion are shown below:—

Status of Secondary Teachers (Regular Staff only), December, 1909.

Further information in regard to the roll, and staff, and salaries of secondary schools is given in Tables J1, J2, and J3; and further information of the same kind for district high schools is contained in Tables K1 and K2.

# Free Secondary Education.

At the end of 1909 the secondary schools giving free tuition to duly qualified pupils, and receiving grants therefor under the Act, were twenty-eight, as against twenty-seven for the preceding year. The total number of pupils on the roll of these twenty-eight schools, exclusive of pupils in the lower departments of the schools, was 4,088, and out of this total, 3,295, or 81 per cent., were given free places under the regulations. The total annual payment at the rate paid for the last term of the year would be approximately £34,629; the approximate average cost to the Treasury was therefore £10 10s. 2d. per free pupil.

In addition, free tuition was given to 157 others who were holders of scholarships or of exhibitions granted by these schools, or by endowed secondary schools not coming under the conditions for free places, making the total number of free places held at secondary schools 3,452, or 74 per cent. of the roll of all these schools. Further information in regard to the free places and scholarships held at secondary schools will be found in Table J4. Moreover, in reckoning the amount of free secondary education in the Dominion must be included the pupils in attendance at the secondary classes of district high schools, 1,891 in number, all but a comparatively small number of whom were free pupils, receiving free tuition at an average cost to the Government of £9 16s. 10d. per pupil. There should be added also those receiving free education in Maori schools, 124 in number, and the holders of certain free places in technical schools, numbering 846. There is thus an approximate total of 6,313 pupils receiving free secondary education, exclusive of those holders of free places in technical schools who were art students, or were evening students, or were taking courses which may be more approximately described as technical rather than as secondary.

The following table gives a summary of the various secondary free places at the end of the year for which payment was made by Government:—

Free	Places	in	December,	1908	and	1909.
2 , 00	1 00000	010	December,	1000	COTOCO	1000.

		~ <del></del> -	1908			1909	
(i.) Secondary schools—		Boys.	Girls.	Total.	Boys.	Girls.	Total.
(a.) Junior free pupils		1,083	839	1,922	1 ,326	1,004	2,330
(b.) Senior free pupils	• • •	479	346	825	571	394	965
Total		$\frac{1,562}{1}$	1,185	$\frac{-}{2,747}$	1,897	1,398	3,295
(ii.) District high schools		1,017	1,125	2,142	944	947	1,891
(iii.) Maori secondary schools		43	65	108	51	73	124
(iv.) Technical day-schools	•••	307	392	699	345	501	846
Grand total		2,929	$\frac{-}{2,767}$	5,696	3,237	2,919	6,156

In the above table (in the case of the secondary schools and district high schools) the roll at the end of the year has been taken; a fairer estimate of the number of persons receiving free secondary education in public institutions would be obtained by taking the average roll throughout the year and including in the total the holders of foundation and private scholarships or exhibitions who received free tuition not paid for by Government. We obtain thus the following approximate figures:—

Secondary schools	• • •	 			3,615
District high schools		 ***			2,163
Technical day-schools	• • •	 		• • •	846
Maori secondary schools		 •••	• • • •		124
Total	•••	 •••	•••	•••	6,748

The corresponding number for 1908 may be estimated as 6,244, showing an increase for the year 1909 of about 500 in the number in the Dominion who are receiving free secondary education.

The following paragraphs from last year's report are inserted here, with the necessary modifications, in explanation of the conditions upon which Junior and Senior Free Places are obtained:—

"Under the regulations for free places in secondary schools and district high schools boys and girls who qualify for Junior Scholarships, whether they obtain scholarships or not, or pass a special examination for free places, or who obtain certificates of proficiency at the completion of their primary course, become eligible generally for a Junior Free Place, which gives the privilege of two years' free tuition, with a possible extension to a third year without further examination."

"At the end of the period a Senior Free Place is obtainable to the age of nineteen by all who succeed in passing the Civil Service Junior Examination, either in its competitive form or, as slightly modified for the purpose in question, in the form of a qualifying examination only. The Matriculation Examination of the University may also be used for this purpose, and those qualifying for Senior Board Scholarships, whether by means of the Department's examination or not, are also eligible. As, however, various reasons exist in the interests both of the pupil and of the school for dispensing with an external examination whenever this can be done with convenience and safety, the new regulations, gazetted 2nd April, 1908, encourage the use, as a qualification for Senior Free Places, of a slightly modified form of the 'accrediting' system, which has for some time been growing in favour with educational authorities elsewhere, and which forms commonly a characteristic feature of Continental and American schools. after, on the joint recommendation of the principal of the school attended (or, in the case of district high schools, of an Inspector of the district) and of the Inspector-General of Schools, it will be possible for a free pupil who has gone through a satisfactory course of work of sufficient scope to secure, without the restrictions of an intermediate public examination, free secondary education throughout the whole course of his attendance at a secondary school up to the age of nineteen years."

The last-named method of gaining a Senior Free Place is gradually coming into favour: 351 were granted Senior Free Places in this way in December,

1909.

Scholarships held at Secondary Schools and District High Schools.

The scholarships at secondary schools and district high schools are of four kinds,—

(i.) Junior National Scholarships;

(ii.) Education Board Scholarships;

(iii.) Foundation or Governor's Scholarships, given by the governing bodies of secondary schools;

(iv.) Private scholarships, endowed by private donors.

(i.) Junior National Scholarships.—These scholarships are allotted to the several education districts practically on the basis of population, as in each district there is offered annually one scholarship for each 4,000 or part of 4,000 children in average yearly attendance. The scholarships are awarded by the Education Boards on the results of an examination conducted by the Education Department, and the Boards exercise a certain control over the holders, and pay over to them from time to time the amounts falling due. With the Junior National Scholarships are now incorporated the Junior Queen's Scholarships, which were established by the Victoria College Act, 1897, to enable pupils of public schools in the Victoria College University District to attend a secondary school as a stepping-stone to a course at Victoria College. Twenty Junior Queen's Scholarships, of a total annual value of £437, were held during 1909, but the last of them will come to an end in 1910.

The number and value of the Junior National Scholarships current in December, 1909, in the several education districts are shown in Table L1; the list may be summarized for the whole Dominion as follows:—

Number of scho	larships.							
73		•••						71
Girls	•••	•••	•••	. •••	•••	• • •	• • •	37
		Total		•••	•••		•••	108
Number receivi	ng board	ing-allowa	nce (incl	uded in t	he above	total)	•••	54
Number receiving	ng travel	ling-allowa	ınce (sin	nilarly inc	eluded)		•••	1
Number held at				•••				95
Number held at	district	high school	ols	•••	•••	•••	•••	13
Total	annual ra	ate of payn	nent as i	n Decem	ber, 1909	•••	£2	,748

(ii.) Education Board Scholarships.—The scholarship funds of the Boards are provided by grants which, although not statutory, are of old standing, and amount to 1s. 6d. per head of the average attendance. The conditions of the scholarships are determined by regulations approved in the case of each Board by the Minister of Education. For the award of the Junior Scholarships all the Boards now use the Junior National Scholarship Examination, and for their Senior Scholarships nearly all use the Civil Service Junior Examination; but the awards themselves and the subsequent control of the holders are entirely in the hands of the Boards. The number and value of the Board scholarships in the various districts are shown in Table L2, the totals of which are for the whole of New Zealand:—

Number of sch	nolarship	s,							
Boys		•••					•••		326
Girls		•••	• • •	•••	• • •		•••		207
,		Total				•			533 —–
Total expendi	ture of B	oards on s	cholarsh	ips in 1909				£8	3,694

The most common period of tenure is two years, but in one district the scholarships are tenable for three years, and in three districts scholarships may be in deserving cases extended for a third year if the funds of the Board admit. By the terms of the Act every Education Board scholarship is tenable at a secondary school, or its equivalent, approved by the Board. With very few exceptions Education Board scholars hold secondary free places. In last year's report it was remarked that "the value of the scholarships varies considerably, apparently according to the view taken by each Board, as the circumstances of the different districts hardly seem to explain the great variation." The variation still exists. Taking the whole of the districts we find that there are:—

At £40 per annum	•••	•••		•••		86 s	cholarships.
At £35 " "						8	,, -
At £30 "	•••	•••	•••	•••		30	"

Under £10 and not u		per annum			• • •	116	"
Under £5 per annun	ı					71	,,
-							
To	otal	•••				533	"

(iii.) Foundation (or Governors') Scholarships.—There are also a certain number of foundation scholarships given by the governors of the schools not offering free places under the Act, as well as extra scholarships given by the governors of schools providing such free places.

(iv.) The private scholarships are derived from funds provided by private

donors at certain schools, by bequest or otherwise.

The number of foundation and private scholarships in the last term of 1909 was 191. Of the holders, sixty-four were also Government free pupils under the regulations. The total value of the scholarships in cash was £1,504 16s. In addition, free tuition was given by the schools to holders of foundation and private scholarships to the value of £683, the value of the Government free places already mentioned not being included in this amount.

# Finances of Secondary Schools.

The income of secondary schools is derived from the following sources:—

- (i.) Rents from the special reserves allocated to them by statute;
- (ii.) Statutory grants, given in lieu of special reserves;

- (iii.) Income from the secondary-school reserves controlled by the School Commissioners, divided among the secondary schools in the several land districts in proportion to the number of pupils, exclusive of lower departments;
- (iv.) Interest upon moneys derived from the sale of reserves, and invested in accordance with the Education Reserves Act;

(v.) Statutory capitation upon free pupils under the Act;

- (vi.) Capitation on pupils in classes recognized under the Manual and Technical Instruction Regulations;
- (vii.) Special grants from Government for buildings and apparatus;

(viii.) Statutory subsidies on voluntary contributions;
(ix.) Tuition fees of pupils;
(x.) Boarding fees of pupils;

(xi.) Miscellaneous sources, such as interest on moneys other than those obtained by the sale of reserves, donations, and special endowments (for scholarships, prizes, &c.), rent of premises, &c.

The revenue derived from the sources (i) to (iv) is the income derived from endowments, and the "net annual income derived from endowments" is the average for the three preceding years of this revenue, less the expenditure upon the endowments and investments and upon buildings, and less mortgage and other charges.

Table J gives a summary of the receipts under the several heads named above, and of the various items of expenditure for the year.

Table J.—Summary of the Accounts of Income and Expenditure for 1909 furnished by the Governing Bodies of Secondary Schools.

Receipts.				Expenditure.

<sup>\*</sup> These include, in addition to grants for secondary education properly so called, amounts paid to secondary schools as controlling authorities of technical classes: These amounts in the years 1907, 1908, and 1909 were respectively £1,307, £2,208, and £6,521.

9 E.—6.

As the free-place system is extended, the amount received in tuition fees will naturally diminish, and the capitation grants from Government will increase.

The Education Amendment Act of 1908, by the introduction of a higher scale of capitation on free pupils, benefits not only those secondary schools which have few if any endowments, but also the more numerous class of schools whose income from endowments is small in proportion to the number of pupils; further, it will relieve from anxiety those schools where a necessity arises for a large building expenditure in any year, as the effect of the new sliding scale is that in any year the total of the net annual income from endowments and the capitation—that is, of the moneys available for the payment of staff salaries and working-expenses—cannot, with due safeguards, fall below £12 10s. per pupil a sum which past experience shows to be just sufficient. Generally speaking, the finances of the secondary schools are in a sound condition, notwithstanding the large expenditure under the head of buildings; indeed, it would be as well if the governing bodies of many of the schools would consider carefully the need for increasing the staffs of their schools, and of giving greater encouragement in the form of increased salaries to assistant teachers. At present there is no doubt that in many cases the salaries paid to assistants are far too low. Efficient work cannot reasonably be looked for in a secondary school unless the staff is sufficient and well paid.

For the whole Dominion, if there are taken into account only the secondary schools that admit free pupils under the Act, we find from Table J5 the following position:—

Total number of pupils, excluding lower departments Total net income from endowments (average of three years	 ending	4,421
31st December, 1908)	9	£11,775
Net income from endowments per head		£2·66
Approximate annual rate of capitation		£10·40

" on management Total expenditure per head on staff salaries, and management		£0.64
Total expenditure per head on staff salaries, and management	ıt	£11·24

The last figure given shows as nearly as may be the actual cost per annum for each pupil, exclusive of those in the lower departments. If we include all the secondary schools this average becomes £13.43 per head. Further details of the income and expenditure of the secondary schools will be found in Tables J6 and J7.

Lower Departments.—The Education Act provides that pupils who have not obtained a certificate of competency in the subjects of Standard V or a higher standard of the public-school syllabus may be admitted to a lower department of a secondary school if they are taught in a separate building or class-room and if no part of the actual cost of their instruction is met out of the endowments of the secondary school. There were lower departments in ten secondary schools during 1909; the total number of pupils in those departments was 189 (114 boys, 75 girls); the total cost of their instruction was £1,476; the total amount of fees received on their account was £1,499.

# General Remarks.

Length of Time spent at Secondary Schools.—Table J2 shows the classification of pupils in secondary schools in 1909, according to years of attendance (exclusive of the time, if any, spent in the preparatory departments of such schools). The following is a summary of the returns, so far as they are available, for 1908 and 1909:—

School Age of Pupils in Attendance at Secondary Schools (exclusive of Christ's College) at the End of the Year.

0.1.1.1	! i	190	08—28 Schoo	ols.	1909—30 Schools.						
School Age.		Boys.	Girls.	Total.	Boys.	Girls.	Total.				
First year Second year		951 709	697 517	1,648 1,226	1,139 682	792 535	1,931 1,217				
Third year Fourth (or a higher) year	•••	$\begin{array}{c} 368 \\ 321 \end{array}$	$\begin{array}{c} 311 \\ 231 \end{array}$	679 552	$\begin{array}{c} 424 \\ 316 \end{array}$	280 263	704 579				
Total	•••	2,349	1,756	4,105	2,561	1,870	4,431				

A careful analysis of these figures, compared with those for the preceding years, shows that out of the total number of pupils entering the upper departments of secondary schools—

25.0 per cent. stay one year, 33.5 "two years, 6.9 "three years, and 34.6 "four years or more.

Hence, the average time spent at a New Zealand secondary school by each pupil who enters is a little over two years and a half, exclusive of any time spent in the lower department. This is greater than the average duration of a pupil's stay at a high school in New York or Chicago (where it is about two years), but less than the corresponding period in England, Scotland, Germany, or Switzer-On the other hand, the proportion of the population receiving secondary education at any one time in New Zealand is larger than in Great Britain, although less than it is in Germany, Switzerland, and some other European countries. Economic reasons are, no doubt, to some extent at the root of the difference; indeed, for a young country, the average length of a pupil's course in our secondary schools may be considered fair. It is not, however, long enough to secure the greatest benefit to the community from the secondary-school system, and every effort should be made to extend it. Besides the economic reasons referred to, which lead parents to withdraw their boys and girls from secondary schools to enter employment, there are three main causes operating in New Zealand to shorten the average length of the secondary-school course. One of these has already been mentioned in another section of this report, where it has been pointed out that the undue length of time for which pupils are kept in the preparatory classes of the primary schools carries with it the consequence of an unduly high average age at which pupils gain a certificate of proficiency or otherwise qualify for entrance to a free place at a secondary school. A second cause tends to cut off the secondary course at the other end. Even for those who do not propose to enter the University the Matriculation Examination has come to be regarded as a kind of leaving-examination; but the standard of that examination has hitherto been so low that it has been quite easy for a girl or boy of average ability to pass it after spending three years at a high school, and many have taken only two years to do The University has now set as the standard of work expected the amount of work that might reasonably be covered in a four-years course at a secondary school; and, although this does not require actual attendance at a secondary school for four years, yet the new rule will almost certainly have the healthy result of prolonging the stay of pupils at such schools.

The last cause contributing to the shortness of secondary-school life is of a more general character; it is, in fact, the absence in the community of a hearty and thorough belief in the advantages of education, or, at all events, of secondary education. The average British parent can hardly be expected to grow enthusiastic over the intellectual training to be derived by his children from the study

11 E.- 6.

of mathematics and foreign languages, or even over the moral training the schools afford; if he does not see clearly that his sons and daughters are being prepared for the technical work of their future life he is apt to be somewhat sceptical in regard to the advantages of any education beyond the primary stage. To some extent his scepticism has probably been justified in the past; but the present movement towards making the work of the high schools more vocational in character will, if properly carried out, meet this objection. There seems to be no reason to fear that a thorough mental training could not be obtained as well through the medium of a vocational course as from a course based on oldfashioned lines. Such a vocational course should embrace, inter alia, a sound study of English literature, history and civics, and a first-hand knowledge of the elementary scientific principles underlying the common facts of life, with emphasis upon applied science (including agriculture and commerce) in the case of boys, and upon domestic science and art in the case of girls. If the programmes of our secondary schools were adjusted in this direction, probably there would be a greater inducement for parents to keep their boys and girls longer at school; at all events, there would be less excuse if they did not do so. The present regulations for admission to senior free places (which have been current for more than two years) give full opportunity for the modification suggested; but, so far, not many schools have taken advantage of the options allowed. Briefly, it may be said that under the regulations the only compulsory subjects are English and arithmetic, and the optional subjects include (besides mathematics, foreign languages, and the ordinary branches of science) such subjects as the following: elementary practical agriculture; elementary hygiene (including elementary physiology, with instruction in "health" and in "first aid"); domestic science (including cookery, dressmaking or advanced plain needlework, and housewifery); shorthand, book-keeping, and commercial correspondence; woodwork or iron-To qualify for a senior free place, or for an "Intermediate Certificate," a pupil need not sit for an outside examination; it is sufficient if he or she gives evidence of having diligently and intelligently completed a satisfactory two-years Upon the completion of a similar satisfactory four-years course (that is, two years more) a Senior or "Leaving Certificate" is given.

The following subjects are common to all the secondary schools: English, French, Latin, arithmetic, and other branches of elementary mathematics, and science. In regard to other subjects the following remarks in last year's report still apply:—

Other subjects treated more or less commonly are commercial work, history, geography, drawing in various forms, woodwork for boys, and cookery or dressmaking for girls. In four of the schools German is taught to small classes of pupils, and in three Greek is reported as a subject of instruction. Advantage is taken in most cases to provide a commercial course, in which book-keeping and commercial correspondence and geography, or book-keeping and shorthand, supply the alternative. In general, all but a few pupils take French; in Latin the proportion pursuing the study varies very greatly in different schools, but probably not less than 60 per cent. of the aggregate enrolment are Latin pupils. In science the branches commonly observed are, for boys, physics (elementary physical measurements, electricity and magnetism, heat) and chemistry, with physiology in some cases; for girls, botany or physiology and elementary physics. In nearly all the schools adequate attention is bestowed on physical instruction, and the usual games are entered into with zest.

Except in the substitution of needlework, cookery, or dressmaking for some other form of manual instruction (or, in some instances, in lieu of a second language), in the less frequent provision of an alternative course for commercial work, and the selection made of science subjects, the curriculum in girls' schools cannot be said to differ in a marked degree from that found in schools for boys only.

It is significant that so far hardly a single girls' high school provides a full course in domestic science or hygiene; several of the schools are, however, taking steps to supply this omission. It is equally true in regard to the science of boys' schools that only in two or three cases does it appear that the science is chosen with a definite view to its bearing on agriculture. It would be well if there were more. In schools with suitable environment there seems to be no study that could be more profitably pursued or that could more worthily occupy the attention or enlist the enthusiasm of teachers and pupils alike.

E.—6.

District High Schools.—The course of instruction usually followed in the secondary departments of the district high schools of the Dominion has, hitherto, been drawn up largely with a view to prepare pupils for the Civil Service Junior, Matriculation, and Education Board Scholarship Examinations. In too many cases the curriculum itself and the methods of teaching have been dominated by examination results. It is, however, gratifying to note that in several education districts an earnest endeavour is being made to bring the course of instruction more into harmony with local conditions by providing suitable rural courses, based generally on the suggestive programme issued by the Department last year. Such courses, admittedly tentative in character, are now in operation in four districts, and there are indications that similar courses will be provided in other districts as soon as ways and means permit. The course for boys is not intended to fit them for carrying on agricultural and pastoral pursuits, but is intended to give them a knowledge of the scientific principles upon which the successful practice of these pursuits depends. Similarly, the course for girls is intended to fit them for the work which they, as members of families engaged in such pursuits, may have to perform or superintend. It is worthy of remark that it has been found possible, not only to provide reasonably full courses with a distinct bias towards rural and domestic pursuits, but also to secure adequate opportunities for pupils preparing for the various public examinations. special payment of £5 10s. per annum provided by the Government for each pupil in the secondary department of a district high school taking an approved rural course has enabled Education Boards to augment the available teaching staff by the addition thereto of specially qualified itinerant instructors to teach the significant subjects included in the course.

While it is too early yet to judge of the effect of this departure from old-fashioned methods of secondary education, it will be a matter for surprise if it is not found to be altogether beneficial from the point of view both of the schools and of the pupils. It should at least have the effect of prolonging the period of secondary education in rural districts.

TABLE K2.—FURTHER DETAILS RELATING TO SECONDARY DEPARTMENTS OF DISTRICT HIGH SCHOOLS. Staff and Pupils of Secondary Departments of District High Schools, 1909. 1911. S.B. 320.

Note.—In the column for "Position on Staff," (7), "M" and "F" distinguish sex, "H" means Head of a School, and "A" Assistant in the Secondary Department.

The salaries set down in column (8) are in accordance with the rates in the table and paragraph (a) of Part V of Second Schedule of the Education Amendment Act, 1908.

Each of the four Normal Schools, although not a district high school, has a secondary department in accordance with the regulations for training-colleges.

# 1. Report of the Board of Governors.

Cadet Corps.—The following extract from the headmaster's annual report has reference to the school battalion of Defence cadets: "As soon as we had settled down to our year's work we numbered our cadet force, and found that exactly four-fifths of the boys had volunteered for service. It seemed a fitting opportunity to bring the whole school into the scheme, and the Board passed a resolution making cadet work obligatory on all. I happened to be writing to Lord Roberts later about another

matter, and I informed him of the Board's resolution and its ready acceptance by the parents and boys. In his reply he said, 'I am greatly pleased to learn from your letter that cadet-training has been made universal in your school. You are teaching the Old Country a much-needed lesson, and I can only hope that some day our schools may follow your example; but it is uphill work combating Old World prejudices.' The services of the eight companies were accepted by the Defence Department, and the corps formed into a battalion with a present establishment of 410. All the companies have been supplied with uniforms from the funds of the corps; but the two junior companies will not receive their arms till next year."

Mistresses.—The staff was joined in February, 1909, by Miss Vernon Harcourt, M.A., Trinity College, Dublin, who took the Natural Sciences Tripos at Girton College, Cambridge. In April it was joined by Miss D. R. Robertson, M.A., who took her degree in 1907 at the Otago University.

Distinctions.—Boys: At the December examination of the University of New Zealand, Junior Scholarships were won by A. B. Jameson, C. J. Hosking, R. H. Melville: and Senior National Scholarships by W. M. Jones (under age) and P. S. Smale. Four boys passed with credit, and thirty-nine others passed matriculation. In the Civil Service Junior Examination forty-seven passed, o' whom nineteen obtained credit. Nine gained Senior District Scholarships under the Auckland Education Board.

Girls: At the examinations of December, 1909, two girls (T. Tompkins and H. Adlington) gained Junior University Scholarships. H. Adlington was awarded the Sinclair Scholarship for biology and mathematics. D. Burrow, B. Battersby, and E. Hames obtained Senior District Scholarships under the Auckland Education Board. Twenty-five girls passed matriculation, 162 passed Junior Civil Service, and 29 others gained senior free places. A. Wilson has won the second of two prizes given in the North Island by the British and Foreign Sailors' Society for an essay on Captain Cook. Several girls won prizes at the oral examination held by the Auckland French Club.

Library.—One of the boys' class-rooms has been set apart as a school library, and suitably fitted and furnished by the Board for that purpose. It was opened in June with about 600 volumes, which have been purchased from subscriptions given by old boys of the school.

The School.—During the first term of the year 424 boys and 287 girls were in the two schools, of whom 388 boys and 260 girls held free places under the regulations, and for whose tuition the Government paid at the rate of £3 11s. 3d. a term. £16,675 2s. 1d. has now been spent upon the new girls' school in Howe Street, of which the Government provided £6,000.

The usual distribution of prizes took place in the Choral Hall on the 16th December, 1909: 59 prizes were given to the boys and 52 to the girls; their total cost was £63 13s. 9d. Two prizes were again given by Mr. J. P. Hooton for English essays, and one for practical chemistry by Mr. P. M. Mackay, J.P.

G. MAURICE O'RORKE, M.A., LL.D., Chairman.

# 2. Work of the Highest and Lowest Classes.

Highest—Boys' School: English—Nesfield, English Past and Present; Tennyson, Webb and Rowe's Selections; Shakespeare, Henry IV, Part I, and Macbeth; Spenser, Faerie Queene, Book I; Chaucer, Clerke's Tale. # 1. Report of the Board of Governors.

As it has been customary at the annual meeting of the Board for the Chairman to report on the work done during the year, I now crave your indulgence while a brief retrospect of the past year's work is given.

With respect to the High School, it is highly satisfactory to find that the number on the roll continues to increase. The year 1908 closed with a roll-number of 140; the school reopened in February, 1909, with a roll-number of 170, closing with 158. A satisfactory commencement has been made for the present year, the roll-number to-day being no less than 181—up till now the high-water mark of the school.

The excellence of the work done by the Rector and his staff still continues, as is proved over and over again not only by the splendid educational results, but also by the principles inculcated—a combination which cannot but result in the greatest good for the girls and boys who are fortunate enough to pass an important period of their life at the school. The examination results are as follows: Passed Junior Scholarship Examination with credit, 2; Matriculation, 10; Junior Civil Service, 6; Senior Free Place Examination, 17; gained Wanganui Education Board's Scholarship, 2.

Free Place Examination, 17; gained Wanganui Education Board's Scholarship, 2.

The number of pupils who are remaining for more than one or two years continues to increase, and doubtless this is due to the recognition by the parents of the benefits derived by their children at the High School. There is, however, room for still further improvement in this direction.

The teaching staff has altered in respect of Miss Mills, whose place has been filled by Miss Lynch a former member of the staff. The position formerly occupied by Mr. Reischer, who has left the Dominion, has been filled by Mr. Anderson, and an additional lady teacher, Miss Arnott, has been appointed.

The most important change in the school-work has been the carrying into effect of the Rector's proposal to have separate class-rooms for girls and boys in the lower forms. As the roll increases it is to be hoped that this change will be carried into effect throughout the school.

The boardinghouse erected by Mr. Vernon (under agreement with the Board) has been opened, and has proved a valuable adjunct of the school, the average number of boarders being fifteen. The Board should not lose sight of the fact that by Mr. Vernon's efforts in this direction its revenue has been increased by about £150 per annum.

After the old woodwork-room was vacated by the technical classes, alterations were effected, converting this room into a gymnasium. Although the equipment of the gymnasium has yet to be obtained, the accommodation has been found most useful and beneficial: at the least, the boys have some place of shelter in the wet weather.

The old art-room has been converted into a science-room, and the room formerly used for science purposes has been converted into a class-room. During the vacation the quadrangle has been renovated, and now presents a creditable appearance.

The new sewerage system has been completed at a cost of £200, a special grant being made by the Government for this work. All the alterations and improvements have given good results.

The grounds are at present in very fine order, but I can see no alternative to redraining the football-ground. Time has decidedly proved that the original pipe drains were laid at too great a depth, and accordingly have not given the best results.

#### Finance.

From the balance-sheet you will see that the finances of the High School are thoroughly sound, and there need be no apprehension of any shortage during the coming year either for salaries or maintenance.

The position of the High School Account at the end of the financial year showed a balance of £102 9s. 2d. in the bank, and capitations on last year's work amount to £151 2s. 6d. to be received from the Education Department. This gratifying position is mainly due, in my opinion, to the wise provisions made by the Education Department by which adequate funds are now provided for unendowed secondary schools such as the one now under our control.

# Technical School.

During the last year the new Technical School buildings have been completed, and the classes removed from their various habitations to the new buildings. The total cost of the Technical School site, buildings, and fittings has up to date been £7,755, and of this amount £5,598 was provided by special Government grants. The classes are increasing both in numbers and attendance. Care should be taken that technical work proper be not put to one side for the more easily controlled and, from a financial point of view, more profitable continuation classes, however desirable and necessary these may be.

The roll-number of individual students increased from 315 in 1908 to 481 in 1909, the average roll of weekly attendance being in the latter year 585.

The Director and teaching staff are keenly interested in the prosperity of the school, and the pupils themselves have contributed no little amount to the success of the institution by their enthusiasm and regular attendance.

Finance.—There will be a deficit on the cost of land and buildings over the amounts of grants, contributions, and subsidies, of approximately £160. Surely some concentrated effort could be made to obtain a further contribution of £80, which, with the Government subsidy of 1£ for £1, would put the finances of the technical department on a sound footing.

The only change in the *personnel* of the Board during the year has been the appointment of Mr. Hodder in place of Mr. Bennett (resigned); and it is worthy of some note that with this exception all the Governors have held office since the inception of the Board.

In conclusion, I desire to place on record my heartfelt thanks to my fellow-Governors for their unfailing support and assistance during my two years' occupancy of the chair of this important body, and I vacate the chair with an expression of thanks and goodwill to you all, and to the Principals and staffs of both schools.

WALTER RUTHERFURD, Chairman.

#### 2. Work of the Highest and Lowest Classes.

Highest.—English — Literature — Merchant of Venice, Julius Cæsar, period 1744–1800, Henry Esmond; grammar—Nesfield's Past and Present; précis; Anglo-Saxon and Middle English; essay. Mathematics (Junior University Scholarship standard)—Arithmetic, miscellaneous; algebra, Baker and Bourne; geometry, Baker and Bourne; trigonometry, Pendlebury's Shorter Course. Science (Junior University Scholarship standard)—Electricity and magnetism, Poyser; mechanics, Loney. Latin.—Prose, Arnold, Continuous Selected; translation—Cicero Book III, Virgil's Æneid Book VIII, miscellaneous; history, Merivale and Puller; Antiquities, Book II, Professor Wilkins. French—Wellington College French Grammar; Spier's Rapid Exercises; Polyeucte; Quatre-vingt-treize; unseen translation; proses; essays.

Lowest.—English—Literature—Goldsmith's Traveller, Scott's Talisman, Historical Reader, Lamb's Tales from Shakespeare; grammar, Nesfield's Manual, Parts I and II; history, Ransome, 1603; geography—Europe, trade-routes, British possessions, physical as in Longman II. Mathematics—Arithmetic, Standard VI, Zealandia; algebra, Baker and Bourne, page 158; geometry, Baker and Bourne, Books I and II. Latin—Macmillan's Shorter Course, Part I. French—Siepmann, Part I. Chemistry, or agriculture, or botany—Elementary. Drawing—Elementary design and colour-work. Woodwork or cookery.

#### 1. REPORT OF THE BOARD OF GOVERNORS.

The Board of Governors have to report good work done by the Wellington College and the Wellington Girls' College during last year.

With reference to the work of the two institutions, the results of the University, Civil Service, and Education Board's Examinations were as follows:

Wellington College: Junior University Scholarship, 1; Senior National Scholarship, 2; Gillies Scholarship, 1; credit on Junior University Scholarship, 4; Civil Service Senior, 2; ditto (3 subjects), 1; Matriculation, Medical Preliminary, and Solicitors' General Knowledge, 25; Senior Education Board Scholarship, 10; Civil Service Junior (credit), 11; ditto, 16; Senior Free Place, 48.

Wellington Girls' College: Senior National Scholarship, 3; ditto (credit), 1; Matriculation, 7; Matriculation on Junior Scholarship papers, 3; Junior Civil Service, 10; Senior Civil Service, 2; Senior Education Board Scholarship, 5.

The numbers at the colleges were—Wellington College, 406; Girls' College, 170.

Free-place pupils have been received at the Girls' College to the extent of the present accommoda-Plans have now been approved of an addition to the building in brick, and the work will be put in hand without delay. CHAS. P. Powles, Secretary.

# 2. Work of the Highest and Lowest Classes.

Highest.—Boys' College: English—Nesfield's Historical English, selected portions; Words and their Ways (Greenough and Kittredge); Chaucer's Squire's Tale; Golden Treasury, Part IV; Twelfth Night. French—L'Avare; Tartarin de Tarascon; Fasnacht, Part III; Rey's Composition; Notes on Eteyn Grammar. Latin—Livy, Book V; Notes on Antiquities, &c.; Horace, Odes, III; Bradley. XVII-XXXXVIII; Bradley's Aids to Latin Prose; Roman History to death of Cæsar (Horton's). Mathematics—Hall and Knight's Higher Algebra; geometry, trigonometry, &c., as for Junior Scholarship. Science—Chemistry, Shenstone; Electricity and Magnetism, Poyser; practical qualitative analysis as for Junior Scholarships. Girls' College: English—Chaucer's minor poems; Spenser's Faerie Queene; the Warwick Shakespeare; the Merchant of Venice; Romola; Longmans' Handbook of English Literature, Part III; Nesseld's Historical English and Derivation; Nichol's English Composition and Exercises. Latin-Odes of Horace, Book I; Tristia, Book I; De Senectute; Germania; Hints on Latin Prose; Bradley's Latin Prose Composition; Stedman's Latin Examination-papers; Res Romanæ; Primer of Latin Antiquities; Rivington's Unseens, Book X. French—Monte Cristo; L'Avare; Spier's Rapid French Exercises; French Idioms and Proverbs; Wellington College Grammar (Nutt). Mathematics—Baker and Bourne's Geometry; Ward's Trigonometrical Papers; algebraical exercises; Hall and Knight's Algebra; Workman's Arithmetic. Botany—Dendy and Lucas's Manual; Thompson's No. 2 Botany. Physics—Draper's Heat; problems in heat, light, and sound.

Lowest.—Boys' College: English—Reader, Standard VI Crown Reader; Geography, Standard VI Imperial; Grammar, Notes; History, Simple Studies in English History (Normans and Plantagenets). French—IVc, to end of exercise 18 in Siepmann. Latin—Inglis and Prettyman, to page 30. Mathematics-Algebra, Baker and Bourne, I-VII; geometry, to page 59, Godfrey and Giddons; arithmetic, Standard VI, Southern Cross. Science—Animal Physiology, to page 100 (muscle). Girls' College: Longmans' British Empire Readers, Book V; Stories from Faerie Queene; Laureata; Méthode Naturelle; Macmillan's Junior History Reader; Longmans' Geographical Series, Book I: Pendlebury's Shilling Arithmetic; Eyes and No Eyes, Books III and II; elementary design and brushwork.

# 1. REPORT OF THE BOARD OF GOVERNORS.

The year completes the first year of the High School as an endowed secondary school.

A regular staff of three male teachers and one female has been engaged during the year.

The school roll closed with an attendance of eighty-eight boys and girls

With a very cordial co-operation of the School Commissioners of Auckland, and the aid of the Government, a suitable site for a High School building has been acquired. A school to accommodate 250 pupils is being built, and should be ready for occupation in April, 1910.

Three acres near the school have been purchased as a site for schoolhouses. A schoolhouse for boys

is being built, and should be available for boarders in June, 1910.

The estimated attendance for 1910 is 130.

During the year the school was inspected by Mr. G. Hogben, M.A., Inspector-General of Schools. *Distinctions.*—At the New Zealand University Examinations of December, 1909, one pupil gained a Senior National Scholarship, and one passed the Junior Scholarship Examination with credit, and three passed Matriculation. At the Education Department's Examinations, two gained Senior Board Scholarships, nine gained Senior Free Places, one gained a Junior Board Scholarship, three qualified for Junior National Scholarships, and one gained a Junior Free Place.

Technical Education.—The Education Board of Hawke's Bay has decided to take over the control of the school classes, and has appointed an Instructor in Agriculture. Technical education in the northern portion of the Hawke's Bay Education District would perhaps be better administered by a Board including representatives of the Education Board, the Governors, local governing bodies, associations, and industries. The interest of the district has to be aroused, and the financial support of technical instruction to be better assured.

C. A. DE LAUTOUR, Chairman, W. Morgan, Secretary.

# 2. Work of the Highest and Lowest Classes.

Highest.—English—Nesfield, English Past and Present; Shakespeare, Julius Cæsar; Scott, The Talisman; Chaucer, Prologue; Morris and Skeat, Specimens of Early English. Latin—Horace, Odes I, II, III, Satires; Livy, VIII; Arnold's Prose Composition (Bradley). Mathematics—Hall and Knight's Algebra; Baker and Bourne's Geometry; Hall and Knight's Trigonometry. Mechanics -Loney's Statics and Dynamics; Loney's Hydrostatics. Heat-Glazebrook's Heat; Lardner's Heat. History—Green's History of English People; Mciklejohn's English History. Geography—Meiklejohn's; Tarr's.

Lowest.—English—Nesfield's English Grammar; Shakespeare, Merchant of Venice; Conan Doyle, White Company. Latin—Via Latina (Abbot); Gradation. French—Macmillan's French Course, First Year. Arithmetic—Goyen's Arithmetic and Mensuration. Algebra—Hall and Knight, Elementary Algebra. Geometry—Hall and Stevens's New School Geometry. Physical measurements—Experimental work. History and civics.

# NAPIER HIGH SCHOOL.

Staff.

Boys' School.—Mr. A. S. M. Polson, B.A.; Mr. E. W. Andrews, B.A.; Mr. W. Kerr, M.A.; Mr. A. W. Short, B.A.; Mr. A. B. Fitt, M.A.; Mr. J. H. McW. Finlayson,; Mr. A. F. D. East; Mr. H. V. Phillips.

Girls' School.—Miss A. E. J. Spencer, B.A.; Miss C. R. Kirk, B.A.; Miss J. O. Gillies; Miss D. A. Gillam, M.A.; Miss N. I. McLean, M.A.; Miss I. C. Greig; Miss M. J. Antill; Miss G. G. Anderson.

#### 1. Report of the Board of Governors.

The Governors of Napier High School have the honour to express their satisfaction with the steady progress and success of the schools under their charge.

Although the number of other schools in the district undertaking secondary work has increased, the attendance has been as high as it has ever been. A noteworthy feature is the success that has attended the junior departments, which numbered 38 in the boys' school and 32 in the girls' school.

The two additional class-rooms and new laboratory in connection with the boys' school were completed and equipped during the year, and the science work of the school is now fully organized on a satisfactory basis.

35 E.—6.

Urgent requests were made to the Board to enlarge the girls' school. Very great difficulties presented themselves in carrying out a satisfactory enlargement. A property adjoining the school came into the market, and the Governors purchased it, with the view of providing for all the needs of the girls' school.

The following results were obtained in the last public examinations:-

Boys' School: University Junior Scholarship Examination-1 passed with credit, and 1 qualified for Matriculation and Solicitors' General Knowledge, the latter being more than two years under the age-limit; Medical Preliminary, 2; completed Medical Preliminary, 1; Matriculation and Solicitors' General Knowledge, 6; Senior Civil Service Examination, 1 completed the examination, 2 passed the whole examination, and 1 passed in four subjects; Junior Civil Service, 11 passed, 5 with credit; Education Board Senior Scholarship, 2 won scholarships and 9 others qualified; Senior Free Places (in addition to the foregoing), 17 qualified under regulation 7 (c), and 2 by examination; Education Board Junior Scholarship, I won a scholarship and 2 others qualified; Junior Free Place Examinations, 4; proficiency certificates, 6.

Girls' School: University Junior Scholarship Examination, 1; qualified for Matriculation and Solicitors' General Knowledge, 1; Matriculation, 2; Senior Civil Service, 1 passed in four subjects, 1 in two subjects; first year's term (Victoria College), 1; Junior Civil Service and Senior Free Places,

11; Education Board Junior Scholarship, 2 won scholarships; proficiency certificates, 6.

Former pupils of the schools continue to win successes in the University colleges: in the recent final examinations in medicine at Otago University, two old pupils, Mr. L. E. L. Simcox and Miss Ina Dugleby, were among the graduates, and Dr. Bryden Glendinning has obtained the degree of F.R.C.S., England.

> T. C. Moore, Chairman. DAVID SIDEY, Secretary.

#### 2. Work of the Highest and Lowest Classes.

Highest.—Boys' School: Mathematics—geometry, Godfrey and Siddons; algebra, Hall and Knight; trigonometry, Pendlebury; solid geometry, Davison: all to University Junior Scholarship standard. French—Polyeucte (Corneille); Quatre-vingt-treize (Hugo); Berthou's Modern French standard. French—Polyeucte (Corneille); Quatre-vingt-treize (Hugo); Berthou's Modern French Verse; miscellaneous unprepared passages; Blouet's Prose Composition; phonetic transcript and oral work; Bué's Idioms; Thirion's Irregular Verbs; Stedman's Grammar Questions; Tutorial French Grammar and Syntax: all to Junior Scholarship standard. T. C. Moore, Chairman. David Sidey, Secretary.

Examined and found correct.--R. J. Collins, Controller and Auditor-General,

# DANNEVIRKE HIGH SCHOOL.

Staff.

Mr. J. M. Simmers, M.A.; Miss J. R. Barr, M.A.; Miss G. F. Gibson, M.A.; Mr. H. T. M. Fathers; Mr. R. Gardiner; Miss M. Ritchie.

# 1. REPORT OF THE BOARD OF GOVERNORS.

The Governors of the Dannevirke High School have the honour to report that the school is carried on with marked success, and that the attendance continues to increase. The highest roll-number during the year was ninety-five, and the total number enrolled was ninety-nine. The attendance has been good, amounting to 93 per cent. of the average weekly roll.

In addition to the ordinary classical and mathematical subjects, wider and more advanced instruction has been given in science. With the newly equipped laboratory and the increased staff it has been possible to give more thorough and practical instruction in chemistry. This subject has been taken up as a groundwork for agricultural science, in which it is intended to form classes soon.

Gymnastics for the girls and gymnastics and military drill for the boys have been receiving careful attention. It is intended to form a cadet corps next year.

The pupils have again been very successful in the public examinations.

At the beginning of the year the staff was strengthened by the addition of another assistant.

A. Grant, Chairman.T. Macallan, Secretary.

# 2. Work of the Highest and Lowest Classes.

Highest,—English—Nesfield's Grammar, Anglo-Saxon, Early English, Thackeray's Esmond, Shakespeare's Merchant of Venice and Julius Casar; literature, 1744 to 1800. Latin—Æneid, Book VIII; De Officiis, Book III; unseens in prose and verse; Bradley's Arnold; Ramsay's Antiquities; Tutorial Roman History. French—Wellington College French Grammar; Le Verre d'Eau; Voyage aux Pyrénées. Arithmetic—Pendlebury. Algebra—Hall and Knight, and Tutorial Middle Algebra. Geometry—Hall and Stevens, Parts I to VI. Trigonometry—Lock's Trigonometry. Mechanics—Loney's Statics and Dynamics, Loney's Hydrostatics. Heat—Tutorial Advanced Heat, Glazebrook's Heat.

Lowest.—English—Nesfield's Outline of English Grammar; Kingsley's Westward Ho; Tennyson's Princess; English composition. Latin—Via Latina, to page 83. French—Chardenal's First French

Course; Hogben's Méthode Naturelle. History—Ransome, 1688–1837, with brief survey of earlier periods. Geography—Longmans' No. 3, Physical and Political. Arithmetic—Pendlebury. Algebra—Hall and Knight, to factors. Geometry—Hall and Stevens, Parts I and II. Chemistry—Roscoe and Lunt's Inorganic Chemistry for Beginners. Physiology—Furneaux's Human Physiology. Drawing—Model, freehand, and geometrical as for Civil Service Junior.

#### NELSON COLLEGE.

Staff.

Boys' College.—Mr. H. L. Fowler, M.A.; Mr. G. J. Lancaster, M.A.; Mr. C. H. Broad, B.A.; Mr. W. H. Moyes, M.A.; Mr. J. G. McKay, B.A.; Mr. P. C. Edmondson, B.A.; Mr. C. H. McKay; Mr. M. N. Skelton; Mr. M. S. Hampson; Mr. F. F. C. Huddleston.

Girls' College—Miss M. Lorimer, M.A.; Miss F. M. Kirton, M.A.; Miss M. McEachen, M.A.; Miss A. Eastwood, M.A.; Miss A. O'Callaghan, M.A.; Miss B. E. Baxter, M.A.; Miss B. Nicholson, B.A.; Miss E. F. Chisholm; Miss W. Greenwood; Miss M. Igglesden.

1. REPORT OF THE GOVERNORS.

The number of pupils on the roll at both Colleges for the past year has maintained its previous satisfactory standard.

During the year the term of office as Governors of Mr. Best, Mr. Graham, and Mr. Harkness expired. All of these gentlemen were reappointed.

The Governors desire to thank the parents of pupils who subscribed towards the cost of an asphalt tennis-court, and also the pupils of the late Rev. J. C. Andrew for their generous donation, which has enabled the Governors to award an annual prize for classics.

The Dramatic Society gave a very successful entertainment, assisted by the College Orchestra and Glee Club, for the training of which thanks are due to Herr Lemmer, Mr. James Houlker, and Mr. Huddleston.

The cadet corps continues in a very high state of efficiency, and the team is to be congratulated on again winning the Secondary Schools Shooting Competition.

The Old Girls' Association continues to show a warm interest in the welfare of the Girls' College. The adornment of the walls of the class-rooms with charming pictures is only one testimony among many to the valuable assistance given by the old girls to the College.

### The Staff.

Boys' College.—Early in the year Mr. C. H. McKay took the place of Mr. Sandel, who was obliged to resign his position on account of ill health, and during the year Mr. F. Huddleston joined as a masterin-residence.

Girls' College .- Miss Strang left at the end of Term 1, and Miss B. E. Baxter, M.A., of Canterbury College, was appointed to fill the vacancy.

Boys' College.

The result of the public examinations was very satisfactory. P. Jory and G. J. King gained scholarships in the University Junior Scholarship Examination, and L. Bell gained "credit." Eight boys passed the Matriculation and allied examinations; thirty-three the Junior Civil Service, eight of them with "credit"; and one boy the Senior Civil Service. Six senior boys passed the first year's terms examination of Victoria College, and one the second year's.

#### Girls' College.

G. Everett gained a Training College Scholarship, C. Bartlett obtained the first section of the B.A. Degree, R. Karsten gained credit in the Junior University Scholarship Examination, and L. Rothwell matriculated on the same examination.

Eight girls passed the Matriculation and Solicitors' General Knowledge Examination, and two passed Matriculation only; twenty-four passed the Junior Civil Service Examination, and, in addition, nineteen were awarded Senior Free Places under clause 7 (c). Three girls were granted an extension for one year of the Junior Free Places under clause 5 (1) of the regulations.

Number of pupils on the rolls: Boys' College, 195; Girls' College, 160.

#### 2. Work of the Highest and Lowest Classes.

Highest.—Boys: As required for the First Section of the B.A. and LL.B. Degree Examinations, and for the University Junior Scholarship Examination. In addition to the University work: English—Shakespeare's Julius Cæsar; Golden Treasury of Songs and Lyrics; selections from Chaucer; prose selections (miscellaneous); Nesfield's English, Past and Present; English Lessons for English People; Brooke's Primer of English Literature. Latin—Cicero, Select Orations (King); Vergil, Æneid, VIII; Dies Romani; Bradley's Arnold; Horton's History of Rome; Bradley's Aids to Latin Prose. French—Half-hours with the Best Authors; Gautier's Scenes of Travel; Wellington College French Grammar; Blouet's Composition; Bell's Primer of Philology. Mathematics—Briggs and Bryan's Middle Algebra; Barnard and Child's Senior Geometry; Lachlan and Fletcher's Trigonometry. Science—Shenstone's Chemistry; Draper's Heat; Loney's Statics and Dynamics; Loney's Hydrostatics. Girls: Junior University Scholarship work, and work for second year's terms. Victoria College. Books used—Nesfield's Historical English and Derivation; Esmond; The Merchant of Venice; Julius Cæsar; Hales's Longer English Poems; readings from modern English poets; Secombe's Age of Johnson; Sweet's Anglo-Saxon Primer; Morris and Skeat's Specimens of Early English. French—Wellington College Grammar; Spiers's Rapid French Exercises: Siepmann's Primary French Course (first term); Bué's French Idioms: Victor Hugo's Quatre-vingt-treize; Rousseau's Contrat Social: Corneille's Polyeucte; Longmans' Advanced Unseens. Latin—Bradley's Anold's Prose Composition; Allen's Elementary Latin Grammar; Bradley's Aids to Latin Prose; Æneid, Book VIII; De Officiis, Book III; Selections from Blackie's Senior Unseens; Horton's Roman History; Wilkins's Antiquities. Mathematics—Pendlebury's Trigonometry; Todhunter and Loney's Algebra; Hall and Knight's Algebra; Baker and Bourne's Geometry; Loney's Elements of Statics and Dynamics; Loney's Elements of Hydrostatics. Botany—Evans's and Lowson's Second Stage Bot

Lowest.—Boys: Form II, as for the Sixth Standard of the primary schools. Girls: First year of Civil Service work. Books in English—Nesfield's Manual; Evangeline; selections from the Merchant of Venice; Westward Ho (abridged). Geography—Longmans', Book III. Latin—Scott and Jones, First Latin Course; part of Second Latin Course, and of First Latin Grammar. French—Siepmann's Primary French Course. German—Siepmann's German Primer. Mathematics—Workman's Tutorial Arithmetic; Baker and Bourne's Elementary Geometry; Hall and Knight's Elementary Geometry; Hall and Knight's Elementary Geometry; Hall and Knight's Elementary Algebra. Science—Furneaux's Physiology; Laurie's Botany. History—No text-book.

Staff.

Mr. T. R. Cresswell, M.A.; Miss E. King, M.A.; Miss I. M. Keith, M.A.; Mr. W. Last; Sergeant-major Thompson.

### 1. REPORT OF THE BOARD OF GOVERNORS.

Very satisfactory work has been done in this school during the past year, and the reputation of the school continues to be its best advertisement. For the year 1909 a roll-number of eighty was anticipated, and it is a gratification to the Board of Governors to know that the first term of 1910 is likely to open with an attendance of ninety. The school was inspected by the Secondary Schools Inspector during the year, and the subsequent report was "Highly commendable."

The want of a properly equipped science-room was felt to be a drawback, and this the Board has been able to overcome, with the assistance of the Education Department, and a handsome and com-

modious building in brick is almost ready for use.

At the various annual examinations the school did very well, an excellent percentage of pupils being successful. One youth of fifteen years of age, who sat for the Junior University Scholarship was placed in the credit list. The school cadets have well maintained their reputation for efficiency and enthusiasm.

The school boardinghouse has been well filled, and a new dormitory, provided by the Board, was certainly needed. The splendid large playground belonging to the school enables drill and all sports to be carried on most effectively.

ROBERT BALL, Chairman.

#### 2. Work of the Highest and Lowest Classes.

Highest. — English — Nesfield's Manual; Abbott's English Lessons; Matriculation English (Tutorial Series); Shakespeare, Julius Caesar; Lamb's Essays of Elia; Milton, L'Allegro, Il Penseroso, Lycidas, Paradise Lost, Book II; Coleridge, Ancient Mariner; Gray's Elegy and Bard; portions of Addison's Spectator and Chaucer's Prologue, &c. Latin—Bradley's Arnold; Clement Bryan's Prose; Cicero, In Verrem Actio Secunda; Cæsar, De Bello Gallico, Book V; Vergil, Æneid, Books I and II; Livy, Book I; Roman history to death of Augustus. French—Chardenal, Book II; Hossfeld's Manual; Molière, Les Femmes Savantes; Advanced Passages for French Unseen Translation (Steel). Arithmetic, algebra, geometry, trigonometry—Miscellaneous, as to Junior University Scholarship standard. Heat—Glazebrook and Draper, as to Junior University Scholarship standard. Mechanics—Jessop, as to Junior University Scholarship standard. Botany—Evans's Botany, and additional notes to Matriculation standard.

Lowest.—English—The more elementary portions of Nesfield's Manual; Marmion, Canto II; Conan Doyle's White Company. Arithmetic—Pendlebury, pages 1–240. Algebra—Baker and Bourne, to simultaneous equations. Geometry—Baker and Bourne, Book I, and easy problems and measurements. French—Chardenal, exercises 1–110; conversation, dictation, &c. Botany—Evans; practical work. Latin—Longmans, Part I, exercises 1–50.

ROBERT BALL, Chairman. C. I. Jennings, Treasurer.

The Audit Office, having examined the foregoing accounts prepared in accordance with the provisions of the Education Act, 1908, hereby certifies to the correctness thereof, subject to the exceptions that the payments of £10 10s. and £5 5s. as honoraria to Messrs. Ball and Jennings respectively, who as members of the Board are virtually invested with a fiduciary character, are disallowed as contravening the established rule of law that trustees shall have no allowances or remuneration for their services. They cannot lawfully make payments to themselves for or in respect of their personal labour and services. [Note.—A similar exception was taken in the balance-sheet for 1908.]—R. J. Collins, Controller and Auditor-General.

# CHRISTCHURCH BOYS' HIGH SCHOOL.

Staff.

Mr. C. E. Bovan-Brown, M.A.; Mr. B. K. S. Lawrence, B.A.; Mr. W. Walton, B.A.; Mr. R. M. Laing, M.A., B.Sc.; Mr. A. Merton; Mr. T. H. Jackson, B.A.; Mr. T. W. Cane, M.A.; Mr. R. J. Thompson, B.A.; Mr. W. Watt, M.A.; Mr. S. A. Clark, B.A.; Captain Farthing; Mr. A. Merton; Mr. J. Cook; Mr. W. S. Malaquin; Miss Digby; Mr. T. S. Tankard.

#### 1. REPORT OF HEADMASTER.

The school roll of 1909 was as follows: For the first term, 236; for the second term, 228; for the third term, 217. This includes the Preparatory Form, which had on its roll 21, 18, 20 for the three terms respectively.

There were 118 holders of free places, 67 junior and 51 senior.

The size of the classes in the upper school was larger than ever: there were 108 in the upper school, as against 74 in 1906.

The school needs badly a physical laboratory; also a reading-room and library.

The school sustained the loss of a well-tried master, Mr. J. H. Smith, who died in September last after a long illness; Mr. R. Speight also left the school to take up a position in the Museum. The two vacancies were filled by Mr. R. J. Thompson, B.A., and by Mr. A. Watt, M.A. The work of the school suffered somewhat owing to the long illness of Mr. Smith, particularly in the French classes. He had been a master for fourteen years, always loyal, able, and industrious.

In December last a very complete examination of the middle and lower classes of the school was conducted by Professor Blunt, at the instance of the Board of Governors. Professor Blunt acted as Examiner-in-Chief, and was assisted by Professor Chilton for science, Dr. Hight for English, and Mr. A. C. Gifford for mathematics. The Board of Governors considered the report of a satisfactory nature, showing the school was doing the work for which it was established.

The cadet corps for the second time won the Victory Shield offered for competition in shooting

to the Defence Cadets of Canterbury.

The Board of Governors propose, in the near future, to build a hostel, probably on land immediately adjoining the school. This is much wanted. Many country boys are in unsatisfactory lodgings; and many parents, owing to the absence of a properly supervised boardinghouse, feel compelled to send their sons elsewhere.

The Preparatory Form was examined by one of the Education Board's Inspectors, Mr. E. K. Mulgan. He spoke in appreciative language of the keeness of the boys and their attitude towards work, though finding a little weakness in their composition. Their nature-study work and general intelligence were praised. The whole school was also inspected by Dr. Anderson and Mr. T. H. Gill early in November, and a report has been forwarded to the Board of Governors.

Seventy-five boys entered for outside examinations in December, 1908.

G. H. Robertson, who was here for five years, and during his last year at Wellington College, was third scholar on the Junior University Scholarship list. The other 7 candidates for University Scholarships were young: one was placed on the credit list, 5 qualified for Matriculation, and 1 failed. It was the leanest year since 1894.

For Matriculation there were 24 candidates, and 17 passed. One of these qualified for Medical

Preliminary; two others who passed Matriculation failed for Medical Preliminary.

Forty-four candidates entered for Junior Civil Service or Senior Free Places, and 36 passed. Two obtained Education Board Senior Scholarships. Fourteen of the above entered for Civil Service proper,

and all passed save one, 6 with credit.

The distinctions won by old boys in 1909 were as follows: Mr. D. C. H. Florance obtained his M.Sc.; Mr. D. B. Macleod won the Senior University Scholarship for Chemistry, and Mr. C. M. Stubbs the Senior University Scholarship for Mathematics; Mr. D. B. Macleod also won the Haydon Prize; exhibitions at Canterbury College were gained by four old boys, for Latin, Greek, history, and chemistry. Two old boys proceeded to Cambridge University during the year—Mr. M. B. Martin to King's College to enter a classical course, and Mr. C. M. Bevan-Brown to Emmanuel for a science course.

C. E. BEVAN-BROWN.

#### 2. Work in the Highest and Lowest Classes.

Highest.—Latin—Livy, Book I (Blackie), without vocabulary; Horace, Odes, Book III; Vergil, Eneid, IX; De Officiis, III; Myths and Legends of Ancient Rome; Bradley's Arnold; Bradley's Aids to Latin Prose; Kennedy's Revised Latin Primer; Gepp and Haigh's Latin Dictionary; Robinson's First History of the Romans; Rivington's Class Book of Latin, Unseen, Book VI; Everyman's Library Atlas of Ancient Geography. English—Chaucer's Prologue (Blackie); English Prose, from Mandeville to Ruskin (World's Classics); Shakespeare's King Lear (Pitt Press); Thackeray's Esmond (Macmillan); Palgrave's Golden Treasury; Nesfield's Manual; Nesfield's Historical English; English Literature, Laing (Collins and Sons). French—Angier et Sandeau Le Gendre de M. Poirier (Hachette); Advanced French Composition, Duhamel (Rivingtons); Balzac, Eugenie Grandet (Hachette and Co.); Longmans' Advanced French Unseen (Bertenshaw); French Grammar, Moriarty (Sonnenschein). Mathematics—Borchardt and Perrott's Trigonometry; Baker and Bourne's Algebra (Bell); Elements of Applied Mathematics (Jessop, Bell); Hall and Stevens's School Geometry, Parts I to VI (Macmillan); Hogben's Trigonometry Tables; Pendlebury's Arithmetic. Science—Advanced Inorganic Chemistry, Theoretical (Bailey, London, W. B. Clive). Gymnastics—Tuesday, 4 p.m.

Lowest.—Latin—Elementa Latina (to end of active verbs); Scale Prime; Shorter Latin Primer (for revision of verbs). English—The White Company, Conan Doyle (Longmans), abridged: Lyra Heroica (The Revenge, &c.); Nesfield's Outlines; Parsing Notes; dictation, composition, parsing,

analysis (four forms of predicate and easy subordinate clauses); also one of the sixpenny editions in Lower IV list to be read at home per term. History—First Book of British History (Tout); Longmans' Historical Series for Schools, Book I. Geography—Southern Cross Series, Geography, Standard VI. French—Kirkman, Première Année de Français (A. and C. Black). Mathematics—Pendlebury's New School Arithmetic (Bell and Sons), without answers; Hall and Stevens's School Geometry, Parts I and II, with Lessons in Experimental and Practical Geometry. Nature-study—Insect Life in Australasia (Whitcombe and Tombs). Art—Same as Lower III, but more advanced, and with addition of elementary model-drawing. Writing—Twice a week. Gymnasium—Two lessons a week. Singing—Novello's School Songs, Book 109; Nine Classical Songs; staff notation.

# CHRISTCHURCH GIRLS' HIGH\*SCHOOL.

Staff.

Miss M. V. Gibson, M.A.; Miss C. K. Henderson, B.A.; Miss M. Bell-Hay; Miss F. Sheard, M.A., B.Sc.; Miss K. Gresson, M.A.; Mrs. Longton, M.A.; Miss E. T. Crosby, B.A.; Miss G. Greenstreet, B.A.; Miss M. Barker, M.A.; Miss M. Wills; Miss L. Bing, B.A.; Captain Farthing; Miss N. Gard'ner; Miss A. Rennie; Miss H. Smith; Miss Easterbrook; Miss M. Wauchop.

# 1. REPORT OF THE LADY PRINCIPAL.

The school reopened with a higher roll-number than had previously been attained, and the roll for the three terms of the year was—First term, 235, an increase of 33 on the roll of the third term of 1908; second term, 231; third term, 226 pupils. Of these, 67 held Senior Free Places, 140 Junior Free Places, 3 School Free Places, 11 paid fees, and 5 were in the Preparatory Class, which also pays fees.

The general health during the year was excellent, and the attendance good, the average attendance for the third term, which is always a somewhat broken one, being 209.

As one of the rooms in the main building is doing temporary service as a cloak-room, and another room was badly needed, the Board of Governors decided to purchase an adjacent quarter-acre section to extend the playground, and to utilize part of the dwellinghouse upon it for teaching purposes. This has provided an additional class-room, and a room for holding the dressmaking and singing classes in. It is hoped that the debt of £1,500 incurred by this purchase will be wiped out by annual payments out of the general revenue, extending over the next four or five years.

A much-appreciated work of the year has been the fitting-up of a practical-science room for general use. It is a well-lit room of 28 ft. by 24 ft. on the upper floor of the new wing, and is now provided with sinks and microscope benches for a class of twelve, a physical-science bench also for a class of twelve, and a demonstrator's table and sitting-accommodation for twenty-four pupils.

A sum of £10 was expended on additional physical-science apparatus and a few botanical models; but the school is still only poorly supplied with such aids to teaching.

A new piano for the singing classes has relieved a very long-standing need.

Miss E. Crosby, B.A., who since the middle of 1908 had been absent on sick-leave, took up some of her duties at the beginning of the year, and full work at the beginning of the second term. Miss Ellen Baxter, M.A., who had been acting as Miss Crosby's substitute, was still retained as a part-time teacher until the third term, when she received a permanent appointment at the Nelson Girls' College. Her part-time work was taken up by Miss Margaret Farrow, B.A., another past pupil of this school.

45

As the acquisition of additional rooms made more convenient arrangements for the domestic-training classes practicable, an additional cooking class was arranged for on Monday mornings, and was well attended during the third term. Next year there will also be classes in dressmaking—for girls taking the home-life course—during the ordinary school-hours, instead of on Saturday mornings only as hitherto.

Soon after the beginning of the second term the technical classes were inspected by Mr. Isaac, and a week before the close of the same term Dr. Anderson spent two or three days at the school to see

the general working of all classes, and to hold the test examination for Senior Free Places.

In December the classes below Matriculation standard were thoroughly examined by gentlemen appointed for the purpose by the Board of Governors. An oral examination was first held, and then a further written test was given. The examiners were Professor Blunt, Examiner-in-Chief, Latin, French, and German; Dr. Chilton, science; Dr. Hight, English, history, and geography; and Mr. Gifford, mathematics. Mrs. Blunt, Mrs. Chilton, and Mrs. Hight also kindly examined the work of the needlework, dressmaking, and cookery classes. A full report on all subjects, and a general report summarizing the results as a whole, was sent in to the Board of Governors.

At the December, 1908, University examinations, two pupils, Julia Pegg and Catherine Reynolds, were awarded Senior National and Gammack Scholarships; Ada Fairbairn was also offered a Gammack Scholarship, but did not accept it. Twenty-two pupils passed the Matriculation Examination, five won Senior Board of Education Scholarships, thirteen passed the Junior Civil Service Examination, twenty passed the regular Senior Free Place Examination, twenty-three others were awarded Senior Free Places at the Inspector-General's test examination, and three gained Junior Free Places.

Notable successes gained by past pupils of the school during the year are as follows: Ellen Baxter, degree of M.A., with third-class honours in English and French; May Arnott, Millicent Bailey, Margaret Farrow, Clara Firth, Annette Jacobs, Irene Wilson, all degree of B.A.; Mary Barkar, degree of B.Sc.; Helen Leversedge, exhibition in French, Canterbury College; Alice Candy, the exhibition in economics, and Edith Jackson, that in physical science, at the same College.

MARY V. GIBSON, M.A., Lady Principal.

## 2. Work of the Highest and Lowest Classes.

Highest.—All work as for Junior University Scholarship Examination. Subjects taught—English, Latin, French, German, Roman history, mathematics, physical science (heat), natural science (botany). Lowest.—Work of a standard above Standard VI; first-year work for the Senior Free Place Examination. Subjects taught—English (grammar, composition, literature), arithmetic, Latin, French, English history, geography, book-keeping and shorthand (alternatives with Latin), elementary botany or laws of health, brush drawing, plain needlework, singing, drill.

Staff.

Mr. W. F. Watters, B.A.; Mr. E. T. Norris, M.A.; Miss F. E. Korshaw, M.A.; Miss M. M. Steven, B.A., B.Sc.

#### 1. Report of the Board of Governors.

The personnel of the Board is as follows: Mr. J. Tucker (Chairman), His Worship the Mayor (Henry Davis, Esq.), and Messrs. C. Reid, S. S. Chapman, J. C. N. Grigg, W. B. Denshire, and W. H. Collins; Mr. J. C. N. Grigg being appointed by the County Council in the place of Mr. J. Studholme, who retired from the County Council.

The Board held thirteen meetings, the average attendance being six.

The work of the school for the year was carried out in a very satisfactory manner. Six pupils passed the Matriculation Examination, and twelve passed the Junior Civil Service Examination, three with credit.

47

Staff.—The staff remains the same as the previous year, but it is expected that the increased attendance will warrant the appointment of an additional assistant master next year.

School Attendance.—The attendance showed a considerable increase on that of the previous year, there being a total enrolment of 124, with an average attendance of 110.

The curriculum has been strengthened by the provision of instruction in shorthand and systematic physical drill, while the classes in woodwork, cookery, and dressmaking have been maintained as previously. Next year it is contemplated to provide instruction in typewriting.

School Grounds.—The grounds of the school have been greatly improved by removing trees, levelling,

fencing, and asphalting, and are now in excellent order.

The school was inspected in June by Dr. Anderson, Assistant Inspector-General of Schools.

JOSHUA TUCKER, Chairman,

# 2. Work of the Highest and Lowest Classes.

Highest.—English (Upper VI).—English literature—Life and works of most prominent authors and poets from 449 to 1850, with extracts from the best-known of their works; Nesfield's Historical English and Derivation, pages 1–149, 173–79, 252–58; Nesfield's Manual, revised; set works—Henry Esmond, with notes on it and the author's life and works; a résumé of each of the latter; Selections from Tennyson, with notes; life and works of Tennyson (metre, diction, &c., of poems); Anglo-Saxon Primer (Sweet) translated; Second Middle English Primer; Chaucer's Prologue, translated. Arithmetic—Goyen's Higher Arithmetic, revised. Geometry—Baker and Bourne's, Books I to IV, inclusive, revised; and Books V, VI, VII, taken with chief exercises thereon. Algebra—Hall and Knight's Algebra used, and work taken to end of permutations and combinations, page 328; graphs, taken from Baker and Bourne's Geometry. Trigonometry—Pendlebury, to page 208. Heat—Glazebrook, chapters 1–12, excluding 11. Botany—As for Junior University Scholarship and Matriculation; Cavers's Plant Biology. Latin—Cæsar de Bello Gallico, IV; Virgil, Æneid, VIII; Cicero, De Officiis, III, to chapter 9; Longmans' Latin Prose; Unseens; Roman History and Antiquities. French—Siepmann, Part II; Matriculation French Course (Weekley); Exercises from Tutorial French Composition; M. Pinson; Picciola; phonetics.

Lowest.—English—Ivanhoe and Marmion, Canto I; Nesfield's Junior Composition, chapters 2 and 3; elementary parsing, analysis, and synthesis; essays. Latin—Longmans' Latin Course, to deponent verbs. French—Siepmann, Part I. Algebra—Baker and Bourne, to page 93. Geometry—Baker and Bourne, propositions of Book I and practical work. Arithmetic—Goyen's Higher Arithmetic, to page 141. Science—Elementary agriculture as for Junior Civil Service syllabus. Book-keeping—Grierson, to page 50. Shorthand—Greig's Handbook. Woodwork, cooking, dressmaking, according to Department's course.

#### Staff.

Boys' School.—Mr. G. A. Simmers, M.A.; Mr. R. H. Rockel, M.A.; Mr. G. T. Palmer, M.A.; Mr. A. G. Johnson, B.Sc.; Mr. R. Grant; Mr. G. O. Chaplin; Sergeant-major Healey.

Cirls' School.—Miss B. M. Watt, M.A.; Miss J. Mulholland, M.A.; Miss F. J. W. Hodges, M.A.; Miss E. Roid; Miss E. L. Wilson,

#### 1. Work of the Highest and Lowest Classes.

University Junior Scholarship work. Mathematics-Hall and Stevens's Highest.—Bous: Geometry; Hall and Knight's Algebra; Borchardt and Perrott's Trigonometry; Goyen's Arithmetic. Mechanics—Loney's Mechanics and Hydrostatics. Electricity and magnetism—Poyser's Magnetism and Electricity, with Lecture and Laboratory Notes. English—Low's English Language; Nesfield's Historical English Grammar; Abbot's How to Write Clearly; Chaucer and Tennyson Epochs (Stobart); Henry Esmond; Merchant of Venice; Fowler's English Essays. German-Buckheim's Composition; Auc's Grammar; Die Humanisten; Der Neffe als Onkel; and selections from Heine's prose works. Latin—Livy, IX, 1–19; Vergil, Georgic IV; Tutorial Latin Reader; Tutorial Latin Grammar; Macmillan's Latin Course, Part III; Shuckburgh's Roman History; Stedman's Latin Examination Papers; Blackie's Latin Unseens, Intermediate. French—Tutorial French Grammar; Tutorial French Composition; Vecqueray's French Examination-papers; Hugo, Quatre-vingt-treize; Corneille, Polycucte; Blackie's French Unseens, Intermediate. Girls: English—Nesfield's English Grammar, Past and Present; Nesfield's Outlines of English Grammar, and Oral Exercises in English Composition; R. S. Wood's Word-building and Composition, Book VI and Book VII; Great Authors, Part I; Chaucer's Prologue; Thackeray's Henry Esmond; Shakespeare's King John; Milton's Comus and Lycidas; Blackmore's Lorna Doone; Southern Cross Poetry Books, Book II, Senior: also selected English essays; Anthology of English Verse; Tennyson's Princess; Nicholls's Exercises in English Composition. Latin-Bryan's Latin Prose Exercises; Arnold's Latin Prose Composition; Latin Dictionary; Allan's Elementary Latin Grammar; Matriculation Selections from Latin Authors; Allan's First Latin Exercise-book; Casar, Book II; Bell's Scalae Primæ; Bell's Concise Latin Course; Bell's Latin Course, Part 1; Discernenda Latina; Dona Reginæ; Cicero's Orations against Catiline, l and II. French-Matriculation French Course; Longmans' Advanced French Unseens; Carl Heath's Stories and Anecdotes; Matriculation French Reader; Bué's Idioms; Le Tour du Monde; Méthode Naturelle; French Vocabularies for Repetition; Le Petit Grandpère; Fleur de Neige. Mathematics -Bradford's Intermediate Arithmetic; Goyen's Advanced Arithmetic and Elementary Algebra; Baker and Bourne's Algebra, Part I; Borchardt and Perrott's Trigonometry, Part I; Hall and Stevens's School Geometry, I and II, with introductory course; Parts III and V, V and VI; Hall and Knight's Algebra. Botany—Study of Botany, by Dendy and Lucas; Evans's Botany; Youman's Botany; and Lawson's Botany. Mechanics—Loney's Mechanics and Hydrostatics for Beginners. History— Green's Shorter History of English People, I; Nelson's Highroads of History, IV and V; Creighton's History Primer, Rome; Wilkins's Primer of Roman Antiquities. Geography—Longmans', Book II; New Century Geographical Reader, VI. Scripture-Life of Christ.

Lowest.—Boys: English—Nesfield's Outlines of English Grammar; Nesfield's Oral Exercises; Water-babies; Christmas Carols; Morte d'Arthur; Lady of Shallot. Latin—Tutorial Junior Latin Course, first half of book. French—Siepmann's Primary French Course. Arithmetic—Bradford's Intermediate Arithmetic. Algebra-Baker and Bourne's Elementary Algebra, Part I. Geometry-Hall and Stevens's School Geometry, Part I. Science—Hadley's Magnetism and Electricity for Beginners; and Hadley's Practical Exercises in Magnetism and Heat. Geography—Bosworth, Short Geography of the World; Lyde, Man on the Earth. Girls: English—Nesfield's English Grammar, Past and Present; Nesfield's Outlines of English Grammar, and Oral Exercises in English Composition; R. S. Wood's Word-building and Composition Book VI and Book VII; Great Authors, Part I; Chaucer's Prologue; Thackeray's Henry Esmond; Shakespeare's King John; Milton's Comus and Lycidas; Blackmore's Lorna Doone; Southern Cross Poetry Books, Book II, Senior. Latin—Bryan's Latin Prose Exercises; Arnold's Latin Prose Composition; Latin Dictionary; Allan's Elementary Latin Grammar; Matriculation Selections from Latin Authors; Allan's First Latin Exercise-book; Cæsar, Book II; Bell's Scale Primæ; Bell's Concise Latin Course; Bell's Latin Course, Part I; Discernenda Latina; Dona Reginæ. French-Matriculation French Course; Longmans' Advanced French Unseens; Carl Heath's Stories and Anecdotes; Matriculation French Reader; Bué's Idioms; Le Tour du Monde ; Méthode Naturelle ; French Vocabularies for Repetition ; Le Petit Grandpère : Fleur de Neige. Mathematics - Bradford's Intermediate Arithmetic; Goyen's Advanced Arithmetic and Elementary Algebra; Baker and Bourne's Algebra, Part I; Borchardt and Perrott's Trigonometry, Part I; Hall and Stevens's School Geometry, I and II, with introductory course; Parts III and V, V and VI. Botany—Study of Botany, by Dendy and Lucas; Evans's Botany; Youman's Botany. Mechanics—Loney's Mechanics and Hydrostatics for Beginners. History—Green's Shorter History of English People, I; Nelson's Highroads of History, IV and V; Creighton's History Primer, Rome; Wilkins's Primer of Roman Antiquities. Geography—Longmans', Book II; New Century Geographical Reader, VI. Scripture—Life of Christ.

# WAITAKI HIGH SCHOOL.

Staff,

Boys' School.—Mr. F. Milner, M.A.; Mr. G. H. Uttley, M.A.; Mr. P. McCallum, M.A.; Mr. M. K. McCulloch, M.A.; Mr. D. S. Chisholm M.A.; Mr. H. H. Allan, M.A.; Mr. R. C. Ongley; Miss M. McCaw; Mr. F. Kibblewhite, Girls' School.—Miss C. Ferguson, M.A.; Miss V. M. Greig, M.A., B.Sc.; Miss A. M. Budd, M.A.; Miss M. G. McCaw; Sergeant-major Kibblewhite.

# 1. Report of the Board of Governors.

The Board of Governors beg to report a continuance of the marked success that attends the two schools under their administration, as evidenced by the rapidly increasing rolls and the satisfactory examination results gained by both institutions. The roll of the boys' school reached 202 at the opening of the year, of whom 145 were boarders, from all parts of the Dominion. With regard to the work of the schools, it is satisfactory to note that four out of the ten Junior Scholarships awarded by the University Senate were this year gained by Waitaki, and that the boys' school had the distinction of gaining both the first and the second place for the Dominion.

During the year the Board of Governors have developed and improved the equipment of the schools at very considerable expense. Towards the close of the year an important contract was let for the levelling of spacious playgrounds, comprising 13 acres. Moreover, the environment of the school is rapidly being transformed and beautified.

DUNCAN SUTHERLAND, Chairman.

#### 2. Work of the Highest and Lowest Classes.

Highest.—Boys: English—Shakespeare's Hamlet; Wordsworth's Poems (selections); Tennyson's Poems (selections); Chaucer's Prologue; Spenser's Faerie Queene, Book I; Dickens's Tale of Two Cities; Nesfield's English Past and Present; Milton's Samson Agonistes; Browning's Minor Poems. Latin—Ovid's Metamorphoses (selections); Vergil's Æneid, VIII; Horace, Odes, III; Cicero, In Catilinam; Cæsar, Gallic War, VII; Kennedy's Primer; Bryan's Cæsar's Prose; Bradley's Arnold. French—Bué's Idioms; Wellington College French Grammar; Berthou's Selections from French Verse; Berthou's Selections from French Prose; Victor Hugo's Les Miserables (selections); Stendhal's Une Episode de Guerre; Weekley's French Prose Composition. Mathematics—Baker and Bourne's Algebra; Hall and Stevens's Geometry; Hall and Knight's Elementary Trigonometry. Science—Tutorial Chemistry, Parts I and II; Draper's Heat. Girls: English—Gwynne's English Literature; miscellaneous readings from standard works (Chaucer to Carlyle); Nesfield's Historical Grammar. Latin—Bradley's Arnold, supplemented by Roby's Grammar; miscellaneous reading from Cicero, Cæsar, Vergil, Ovid, Horace, Livy, &c.; Roman History and Antiquities (Merivale). French—Miscellaneous work for Junior University Scholarship standard. Mathematics—Ditto. Science (heat and botany)—Ditto. Drawing—Model and brushwork.

Lowest.—Boys: English—Fenimore Cooper's The Pathfinder; Kingsley's Water-babies; Yoxall's Speller; Burns and Hight's English Exercises for Public Examinations; Arnold Foster's Citizen Reader; Mackenzie Wallace's Web of Empire; Nesfield's Junior Course of English Composition. Latin—Morris's Elementa Latina; Scale Primæ. French—Chardenal's First French Course; also selected translations from fairy tales. Mathematics—Baker and Bourne's Elementary Algebra, Part I, up to problems on simple equations; Hall and Stevens's Geometry, Books I and II; Eggars's Practical Exercises in Geometry. Arithmetic—Pendlebury's New Schoo! Arithmetic. Science—Physiology, Murché's Physiology. Girls: English—Logie Robertson's English Prose: Jennings's English Poetry; Nesfield's Manual of English Grammar. French—Bell's First French Course and part of Second. Latin—Declensions and conjugations, with general work from blackboard; no textbook. Arithmetic—Pendlebury's, up to interest. Algebra—Addition, subtraction, multiplication, division, brackets, simple and simultaneous equations. Geometry—Elementary work from blackboard. Botany—Leaves, stems, flowers, fruits, dealt with in an elementary way. Physiology—Murché's whole book. Scripture—The Voyages of St. Paul. Drawing—Model, freehand, brushwork.

#### OTAGO BOYS' AND GIRLS' HIGH SCHOOLS.

Staff

Boys' School,—Mr. W. J. Morrell, M.A.; Mr. M. Watson, M.A.; Mr. J. McPherson, F.E.I.S.; Mr. F. H. Campbell, M.A.; Mr. R. A. McCullough, M.A.; Mr. E. J. Parr, M.A., B.Sc.; Mr. J. Reid, B.A.; Mr. J. G. Fullarton, B.A.; Mr. H. Chapman, B.A.; Mr. W. A. Armour, M.A.; Mr. J. G. Paterson, M.A., M.Sc.; Mr. R. Coghill; Mr. D. Sherriff; Mr. J. Hanna.

Girls' School.—Miss M. E. A. Marchant, M.A.; Miss F. M. Allan, M.A.; Miss H. Alexander, B.A.; Miss S. C. C. McKnight, M.A., M.Sc.; Miss E. E. Little; Miss F. Campbell, M.A.; Miss L. A. N. Downes, B.A.; Miss M. W. Alves; Miss E. M. Campbell; Miss M. McLeod; Mr. J. Hanna; Mr. W. O. Taylor, F.R.C.O.; Miss J. C. Longford.

#### 1. REPORT OF THE BOARD OF GOVERNORS.

In compliance with your letter of the 10th December last I have the honour to forward the following general report on the schools for the year ending 31st December, 1909.

The schools were inspected towards the end of the year by the Assistant Inspector-General of Schools, Dr. Anderson, and Inspector Gill, who expressed satisfaction with the work and organization, and also with the efficiency of the staffs.

During the year the attendance in both establishments showed a satisfactory increase.

In September last the Board accepted tenders for the erection of a section of the new Girls' High School, the cost of which, including lighting, heating, and ventilation, competitive designs, architect's fees, inspection, &c., amounted to about £9,300. It is expected that the building will be completed in about three or four weeks' time. The section referred to will afford accomodation for the present number of pupils, but it is anticipated that ere long the whole building, as shown in the competitive design which was approved by you, will have to be completed.

The information asked for in the circular before referred to, with balance-sheet and statement of income and expenditure, was forwarded to your Department in April last.

#### 2. Work of the Highest and Lowest Classes.

Highest.—Boys: English—Shakespeare, Henry IV, Part 1; Chaucer, Squieres Tale; Palgrave's Golden Treasury, Books II and III (selections); Peacock, Selected English Essays; Nesfield's Historical English; Nichol and McCormick, Exercises on English Composition. Latin-Livy, Book I; Cicero, Pro Lege Manilia; Horace, Odes, Book II; Vergil, Æneid, VI; sight translation, prose composition, and grammar papers; Shuckburgh, History of Rome; Wilkins, Roman Antiquities. French — Daudet, Jack, Part I; Corneille, Le Cid; Victor Hugo, Waterloo; composition, grammar, phonetics, &c. Mathematics—Arithmetic (whole subject); algebra, Baker and Bourne, to permutations; geometry, Baker and Bourne, Books I-VII; trigonometry, Pendlebury. Science—Chemistry—The metals, revision of non-metals, elementary qualitative analysis; physics—heat. Girls: English—Chaucer, part of the Prologue and extracts from Tales; Shakespeare, King Lear, Hamlet, and Romeo Chaucer, part of the Prologue and extracts from Tales; Shakespeare, King Lear, Hamlet, and Romeo and Juliet; Spenser, Faerie Queene (part); Milton's Paradise Lost, Book II (part), Samson Agonistes; Historical English Grammar; composition, &c.; literature, general, with readings from modern poets. Latin—Sallust, Catiline War (part); Livy, Book III, 7 chapters; Horace, Odes, Books II and III (part), 3 Epistles; Middleton's Latin Verse; Marchant's Latin Unseens; composition, grammar, &c.; Roman History and Antiquities. French—Macmillan's Advanced Exercises; Wellington College Reader; Boïelle, Poetry; Barlet and Masom, Higher French Reader; grammar, composition, &c.; Berthou, Specimens of Modern French Verse. Mathematics—Arithmetic, the whole subject; algebra and propositions inclusive: geometry, Englid Books I. H. H. V. VI. VII. Beker and to permutations and combinations, inclusive; geometry, Euclid, Books I, II, III, V, VI, VII, Baker and Bourne; trigonometry, Lock's Trigonometry to solutions of triangles. Science — Botany, the morphology and physiology of the botanical types specified in the Junior Scholarship schedule; physics, as defined in the Junior Scholarship schedule. Commercial work—Elementary book-keeping; shorthand and typewriting.

Lowest.—Boys: English—Winbolt, English Poetry; Scott, Ivanhoe; Irving, Companions of Columbus; Gow's Method of English, Part I. English History—Tout, First Book of British History, to 1714. Geography-British Isles, Europe, Asia (Longmans); (IIIB) Africa also. Latin-Macmillan's Shorter Latin Course, Part I; Bell's Scalæ Primæ, (IIIB) chapters 35-45; (IIIc), chapters 1-12. French —Siepmann's Primary French Course, Part I (IIIB); lessons 1-24; (IIIc) 1-16. Mathematics—Workman's School Arithmetic, to compound interest; algebra, Baker and Bourne, (IIIB) to simultaneous equations, (IIIc) to easy problems; geometry, Baker and Bourne, (IIIB) Books I and II, 1-9; (IIIc) Book I (with some omissions). Science—Elementary Inorganic Chemistry (Newth). Girls: English—Literature, In Golden Realms, Midsummer Night's Dream; reader, Citizen Reader, Literary Reading and Composition; grammar, parsing and analysis; Nesfield's Aids to the Study and Composition of English; composition; geography, A Brief Introduction to Commercial Geography. French-Siepmann, Part I. Mathematics—Arithmetic, fractions, decimals, proportion, proportionate division, percentage; algebra, Hall and Knight, to simultaneous equations; geometry, practical work. Science—Botany, Structure of Flowering Plants; Introduction to Elementary Botany, by Charlotte Laurie. Cookery—The theory and practice of plain cooking. Commercial work—Elementary. Needlework— Measurements, drafting of patterns, making of blouse and skirt.

# GORE HIGH SCHOOL.

Staff.

Mr. Joseph Hunter, M.A.; Mr. W. T. Foster, M.A.; Miss Helen P. Kerse, M.A.

#### 1. Report of the Board of Governors.

The School and Staff.—The school was established on the 1st September, 1908, and the work was carried on in a portion of the Gore District High School buildings, with Mr. J. Golding, M.A., as head-master; Mr. J. Brunton, M.A., first assistant; and Miss Sinclair, lady assistant. This arrangement continued until Easter, 1909, when the new staff was appointed as follows: Rector, Mr. Joseph Hunter, M.A.; first assistant, Mr. W. T. Foster, M.A.; lady assistant, Miss Helen P. Kerse, M.A.

School Accommodation.—Owing to the arrangement with the Southland Education Board, the occupation of the Gore District High School buildings ceased on the 31st December, 1908. The Board

of Governors then made arrangements (pending the erection of our new High School buildings) with the proprietor of the old Methodist church buildings in Mersey Street as a temporary school. To meet our requirements, a small building to accommodate twenty-five pupils had also to be erected. This accommodation has been all too meagre for the requirements of the school. The Board has been in frequent communication with the Education Department, and, in addition, has had interviews with the Inspector-General and the Hon. Mr. Fowlds (Minister in charge of the Department) regarding plans, &c., for our new school. Matters have so far progressed that at the present moment the specifications and approved detailed plan are almost completed.

The Board desire to express their appreciation of the services of the staff—viz., Messrs. J. Hunter, M.A., Rector; W. T. Foster, M.A., first assistant; and Miss H. P. Kerse, M.A., lady assistant—and have reason to believe that, notwithstanding the numerous difficulties consequent upon hampered accommodation, splendid work has been done in the interests of our young people attending the school.

ANDREW MARTIN, Chairman, Board of Governors. George Brett, Secretary.

#### 2. Work of the Highest and Lowest Classes.

Highest.—English—Nestield's Manual of English Grammar and Composition, Parts I, II, and III; Meiklejohn's Spelling-book; Shakespeare's Macbeth; Macaulay's Essays on Pitt and Chatham. Latin—Composition, Via Latina (the whole); Allen's Latin Grammar; Cæsar, Gallic War, Book I; sight translation, Excerpta Facilia. French—Chardenal, to the end of the Second Course; Eve and De Baudiss's Wellington College Grammar; Berthou's Specimens of French Prose; Richard et Quetin's Vocabulary. Arithmetic—The whole subject; Goyen's Higher Arithmetic and Elementary Mensuration. Algebra—Hall and Knight's; covered Matriculation course. Geometry—Hall and Stevens's: covered Matriculation course. Trigonometry—Pendlebury's, to the solution of triangles (inclusive). Geography—Longmans' Series, Books II and V. History—Ransome's History of England; covered Matriculation course.

Lowest.—English—Nesfield's Manual of English Grammar and Composition, (1) Part I, to page 117, (2) Part II, chapters 14 and 19, (3) Part III, chapters 24 and 25; (4) common figures of speech; Yoxall and Gregory's Spelling-book; Shakespeare's Tempest. Nesfield's Oral Exercises in English Composition, pages 1–156, chapters 1–6. Latin—Elementa Latina (the whole); Allen's First Latin Exercise-book, to exercise 27. French—Chardenal's First French Course, to the end of the second conjugation. Arithmetic—Workman's School Arithmetic, sections 1, 2, 3, 4, 5, 6, 7, 8, and 10. Algebra—Hall and Knight's, to chapter 17, omitting chapters 9, 10, 13, 14, and cube root. Geometry—Hall and Stevens's, to page 83. Geography—Longmans' Series—Book II, Europe; Book V, Elementary Physical Georaphy. History—Ransome's, part of the Matriculation course.
