Report of the Director
of the Geological Survey
for the year 1941
The report of the Director of the Geological Survey for the year 1941 is a comprehensive summary of the work of the Survey during the past year. It covers the work of the Survey in the field of geology, and the work of the Survey in the field of mineral resources. The report is divided into two main parts: the first part covers the work of the Survey in the field of geology, and the second part covers the work of the Survey in the field of mineral resources. The report is a valuable document for the public, and for the members of the Survey.
