15 E.—7.

Education.—The position of the Department of Education in the College has this year become acute. The provision of advanced and honours courses, and of a diploma of Education, has entailed an enormous amount of extra work, and the Council has therefore made a temporary arrangement with the Education Department providing for assistance to Professor Tennant. The Council, however, is strongly of opinion that a new departure should be made next year, and that a professor should be appointed who, while still co-operating with the Training College, would be able to give his whole time to the University work. This change will, of course, involve additional financial aid from the Government, and it is hoped that the Department may be able to see its way to grant this in time for an appointment to be made next year.

Workers' Educational Association.—Good work continues to be done by this association within the College district. The question of finance, as hitherto, continues somewhat to retard the good work, and it is again suggested that the Government grant should be distributed with some regard to the size and population of the district covered and the work actually done.

Chairman of Victoria University College Council.

The Hon. the Minister of Education, Wellington.
