#### DETAILED TABLES RELATING TO PRIMARY EDUCATION.

The following tables relate to primary education for the year 1922. The extract from the Minister's Report (E.-1) relating to primary education is not being republished this year in this paper.

TABLE A1.—Number of Public Schools, December, 1922, classified according to Grade.

The following notes are appended in explanation of this table:-

A.—The average attendance as given in Table B3 differs from that in Table B2 for the following reasons:—

(1.) Under certain contingencies the regulations provide for the elimination of one or two quarters' averages in the case of any school or department if the grade of the school or department would be raised or maintained by calculating the yearly average attendance on the mean of the remaining quarters' average. The amended average attendance thus ascertained is reckoned for the sole purpose of determining the grade of the school, and consequently this amended average attendance is used in the compilation of Table B3, which gives the schools according to their grades. For statistical purposes the average attendance as given in Table B2 should be taken.

grades. For statistical purposes the average attendance as given in Table B2 should be taken.

(2.) The totals of this table are for the mean of the four quarters of each school taken separately,

not the mean of the gross quarterly totals of all schools.

(3.) New schools, many of which were open for only part of the year, are included as having an average attendance for the whole year; whereas in Table B2 the average attendance is included only for those quarters during which the schools were open.

B.—This table shows the average attendance for determining the grades of schools. For determining the "primary" staffs of schools, however, the figures require to be reduced by the attendance in secondary departments of district high schools, viz.:—

#### APPENDIX A.

#### REPORT OF THE CHIEF INSPECTOR OF PRIMARY SCHOOLS.

Sir,— Wellington, 31st March, 1923.

I have the honour to present my report on primary education for the year 1922. It is pleasing to be able to record a distinct advance towards better conditions of working in the primary schools. During the year additional assistant teachers were allotted to schools where the Inspectors reported there was urgent need for a larger staff than that normally provided. With the same object in view, and in order to increase the efficiency of the larger schools, Inspectors were enjoined to see that all head teachers undertook a fair share of actual teaching and in other respects made themselves a vital factor in establishing the efficiency of their schools. Fortunately, few headmasters fall short in this respect; nevertheless there are some whom the Inspector rarely if ever sees engaged in actual teaching. If such head teachers allow themselves to grow out of touch with modern methods they cannot but fail to be a source of inspiration to their staff. The headmasters of large schools can, if they desire, be a most potent factor in the training of young teachers, and hence a means of raising the standard of efficiency of a very large proportion of the teaching staff throughout the Dominion. The opportunities young teachers have during their training-college course to assimilate and practice good methods of teaching are of necessity very limited, and if their training were continued under progressive headmasters the benefit to the whole profession would be incalculable. I regret that cases have been reported to me of head teachers damping the enthusiasm of young teachers fresh from college by directing them to abandon the more modern methods of instruction and to revert to formal and stereotyped methods. Thus are the hands of the clock set back.

This point requires further emphasis. Common-sense demands that in the interests of general efficiency and public economy there shall be co-ordination of effort on the part of all concerned in primary education. Inspectors, headmasters, lecturers, teachers of method—all who are concerned with the training of young teachers—must, if we are to have a successful service, march with the times, and by careful reading and critical examination of the records of modern educational practice fit themselves to be what the country expects them to be, a source of inspiration to those in their charge. So stagnant has educational thought become in some quarters that one feels more inclined to welcome than to quell the revolutionary, who, with his "mad theories," at least stimulates thought and challenges contradiction. Anything is better than smug content with the "is" or the "has been."

The stereotyped retort of the teacher who is satisfied to make no progress in method is that he fears the new methods may fail to secure for him the same results as he secured from the old. He must, in the modern inelegant phrase, "deliver the goods." What are, or ought to be, "the goods" is a question of vital importance. For the moment, however, we may take it that "the goods" referred to are the ordinary equipment of knowledge (much of it lumber) that the schoolboy has from time immemorial been expected to carry away with him from his school. These are easily measureable results, and, as long as they remain in high favour as providing a ready means of assessing a teacher's efficiency, no teacher can be blamed for adhering to a teaching method that produces them in the shortest possible time. If these so-called results are all we want the traditional moss-covered methods will do: but are they all we want. If not, what better have the newer methods to offer?

The broad distinction between the methods of the past and the methods of to-day may be stated thus: the former made the child the passive recipient, and in most cases the unwilling storehouse, of as much information as the teacher could induce him, or, alas! force him, to hold; the newer methods of teaching aim at securing the co-operation of the pupil, mainly through the interest that certain subjects possess in themselves, or through the satisfaction gained in acquiring knowledge by self-effort. (In one annual report the Inspectors say: "The experience of teachers shows that as a rule anything that interferes with the fulfilment of the contract or assignment of work is an annoyance to the pupil, so eager is he to prosecute his studies unaided.") According to the old method the maintenance of the authority and infallibility of the teacher was of paramount importance; the modern method requires the teacher to point the way and, as it were, to accompany the child in his search for truth. He and the child become co-workers, and the dignity of the rostrum is forgotten. Whether this cooperation of teacher and pupil is best attained through the modern type of oral lesson or through some system of so-called "auto-education" cannot be discussed here. I was gratified, however, to note during the year the awakening of interest among both Inspectors and teachers in the Dalton laboratory plan—a system of setting pupils to work through weekly contracts or assignments of work. Some exceedingly gratifying results of the method were shown me by several teachers; but there are obvious imperfections in the system, and it is by no means the last word in educational advancement. The underlying principles both in the Dalton plan and in the Montessori method are, however, sound; and it is to be regretted that more educators do not realize their value.

There is no doubt at all that the temptation to aim at securing easily measureable results is very difficult to resist. It matters not what the type of school may be, those who are interested naturally demand "results," and it is right that it should be so. But let us be sure that the "results" are worth measuring, and that we do not (because of the difficulty of measurement) ignore altogether results that are of the deepest significance and of the most vital importance to the welfare of the nation. can readily measure a child's ability to read, to speak, and write the mother tongue accurately if not elegantly, and it is right we should do so: the hard-won knowledge of the past must remain a closed book to those who cannot read with fluency and understanding. No one can object to an intelligent method of measuring a child's knowledge of number, spatial measurement, the operation of natural law in his environment, the lives and doings of people in other districts and other countries. to suppose that the acquisition of such knowledge is the only thing or the best thing our schools should aim at is to misconceive altogether the service the schools can and should do for the people. school has completed its task unless the boys and girls who leave its doors are stronger and more refined in character than when they entered. The layman will doubt the possibility of assessing the value of any school or any teacher in this respect, but the experienced educationist finds no difficulty in differentiating between schools and teachers on this very basis, elusive and insubstantial though it may appear. Nor need there be any opposition between the acquisition of knowledge and the building-up of character. As a matter of fact, the one aim reacts on the other. The very search for truth, whether it be in the written description, or in the drawing of a familiar object, or in the securing of an accurate answer to a scientific or mathematical problem, must have a reactive effect on the character of the child who prosecutes the search with earnestness of purpose. The balanced beauty and accuracy of an ornamental design, the emotional reaction of the mind to harmony of colour, to beauty of form, to the charm of music, play no small part in the development and refinement of character.

The theme might be pursued further. It might be shown how widely different is the effect of teaching a child to become adept in arithmetical operations that have no real meaning to him and the effect of basing his arithmetic on the handling and measurement of actual objects and on a clear and practical realization of the meaning of the operations presently to be presented to him in the so-called "problem" The difference in effect must be obvious to every one who troubles to give any thought to the matter; yet, as far as I have observed, formality prevails in the methods of teaching, and there is little attempt to make arithmetic realistic. And there is no doubt at all that the more practical and real arithmetical processes are to the child the less likely he is to be inaccurate in his work; he becomes a better judge of the reasonableness of his results.

The importance of the teaching of English (I use the term in its widest sense) in the primary schools cannot be overestimated. A notable improvement has undoubtedly been made in recent years both in the syllabus of instruction and in the method of teaching the subject; nevertheless we have no greater reason to be satisfied with the present position than educationists in other parts of The school curriculum (not the official syllabus) is still too greatly influenced by the the Empire. demands of the secondary schools, which in turn yield to the demands of the University. As a consequence the teaching of formal grammar occupies far more time in the primary school than the subject is worth. In a city school I have heard Standard V pupils correctly analyse a passage quite difficult enough for a secondary-school class. As a rule the Inspectors report that grammar within the limits of the primary syllabus is well known, while the broader and more useful branches of English are less successfully taught. Rarely is recitation reported as "good," while oral composition in many schools receives little attention. Written composition, as judged by the pupils' essays, has greatly improved in quality during the last decade, but we have not the same satisfaction with other branches of composition—the free composition of science notes or the written reproduction of lessons in history. In all probability the search for a method of improving the teaching of English will read us to a new syllabus and an entirely new text-book.

For a number of years past the teaching of history has been on a very unsatisfactory footing, and we have fully proved the futility of placing any dependence on "incidental" teaching. During the period referred to history was occasionally read, but oral lessons were for the most part discontinued. And even though we have reverted to oral methods of instruction one hears very few well-given lessons. To be successful in this subject the teacher must cultivate the art of telling a story as vividly as possible. No lesson requires more careful preparation, for facts must be marshalled and arranged in correct relation one to another, and the whole story must be told in simple language, so that the pupils' attention is not diverted from the story itself to the language in which is it told. Further, the reproduction of the history lesson gives the teacher an excellent opportunity to train his pupils in continuous oral reproduction. As a rule the commonest form of reproduction consists of scrappy answers to finely divided questions. Recapitulation of this kind is generally valueless, and the information the pupil gains is as meagre and disjointed as the answers to the teacher's questions. The "story-hour" and story-reproduction of the preparatory department, along with the oral reproduction of reading-lessons in the standard classes, should surely lead to something better than one usually hears at the close of a history lesson.

I note that Inspectors still continue to advert in their annual reports to the unsatisfactory

teaching of this subject. The weakness is attributed to various causes:—

Wanganui.—"There appears to be lack of thorough preparation by the teachers, and a failure on their part to realize the value and importance of history in the school course. The schemes presented too often show want of continuity, and fail to provide for impressing upon the children elementary ideas of the growth and development of the nation and its institutions.

Southland.—"We think that the introduction of a suitable historic reader would counteract the antiquated method of 'teaching' by the dictation of notes.'

Wellington.—" We do not find that the syllabus directions in regard to history (Appendix N) work out satisfactorily. The period for the middle division of the State schools is from the Celtic period to the beginning of the Plantagenet period. This leaves the whole range of history from 1145 to the present day to be covered by the senior division in two years. If it is considered what even an outline of modern history means, it is plain that reasonable treatment of the subject is not possible

Hawke's Bay.—" We are of opinion that there is too much detail in respect to the earlier part of

the programme set, while the need of a suitable text-book for New Zealand children is much felt."

Taranaki.—" The practice of giving pupils extensive notes copied from the blackboard or from the teacher's dictation still largely prevails—a practice that cannot be too strongly condemned. important event in history should ever be isolated from what has preceded it. Cause and effect should be linked together, and the story of our country should be treated as one long chain of interesting events.

With regard to the inculcation of patriotism the Taranaki Inspectors say: "In some of our larger schools the inculcation of true patriotism is wisely carried on, usually in a general assembly of the school. By song and speech, by readings and addresses, the minds of the children are influenced for good, and the pupils are taught to see that if a country is worth living in it is also worth loving and respecting. The duties of good citizens are clearly set before the children, who are trained to uphold the right and the good in our community life. But in other schools the teachers show little

interest in either patriotism or civics."

Auckland.—" Teachers themselves, in many cases, have a poor knowledge of the subject, and they appear to teach it with little enthusiasm and certainly with little success. Many fail to realize that the most important aim is the 'making of the citizen.' School libraries seldom contain historical novels or books of biography. Some 30 per cent. of the pupils in our primary schools leave before entering the Sixth Standard, and yet many teachers adopt the periodic method, with the result that large numbers of children leave school without any knowledge of the last two centuries of our history -the period of colonial expansion and its consequent problems, of the industrial

revolution and its results, of parliamentary reform, of the Factory and Education Acts, &c."

With regard to instruction in civics the Auckland Inspectors say: "A definite course of civic instruction is taught in the larger schools, and in the smaller ones the subject is dealt with incidentally. Teachers are earnest and loyal, and endeavour in every way to stimulate their pupils to habits of

industry, and to inculcate the spirit of patriotism.

The problem of educating the retarded pupil is exercising the minds of numbers of educationists in New Zealand as in other countries. In the more progressive American States much investigation has been carried out, and specialist teachers and psychologists have been engaged. In Great Britain much less appears to have been done. In New Zealand classes for retardates have been established in a few schools, but there is great need to deal with the problem in a more comprehensive manner. An expert psychologist is required to direct the method of selecting pupils for the retardate, or, as it is sometimes called, the "ungraded" class. There are at present in the schools retarded pupils of different types: some are of subnormal mentality, some are retarded because between them and their teacher there is no sympathy and no common ground, some have been late in beginning their school life, some fail to respond to the usual methods of teaching, some have flitted from school to school and find themselves held back in each fresh position. It is evident that all these types of retardation cannot be dealt with in the same way. In the meantime teachers make use of intelligence tests, and in special cases enlist the help of School Medical Officers in determining the nature, extent, and cause of mental backwardness. During the year the Wanganui Inspectorate made an interesting investigation into the comparative retardation of pupils who move frequently from school to school. It was found that the average age of the migratory pupil was in general greater than that of the stationary pupil. The difference in a large number of instances was as much as nine months. The difference was less in Standard VI than in other classes, but this was no doubt due to many of the migratory pupils leaving school before they reached that class. In their report on the special class for retardates conducted in Victoria Avenue School the Wanganui Inspectors say: "This class has been continued at Victoria Avenue School under better conditions than last year. A room was fitted up by the Board with a work-bench and other equipment, and a special teacher was appointed to conduct the class. The pupils were all given the Terman intelligence tests for the purpose of obtaining some insight into their individual capacities, and the work has been arranged as nearly as possible in accordance with the result of the test. The demands of the syllabus have been considerably relaxed with regard to formal work, and particular stress has been laid on various forms of handwork. Though classified lower than is usual for entry to manual classes, the elder boys and girls have been allowed to take woodwork and cookery respectively, special courses having been arranged for them by the manual instructors. Garden plots have been assigned to the pupils, who appreciated the opportunity of working outside. Excursions have formed an interesting feature of the activities of the class. The Chief Physical Instructor visited the class and drew up a special programme including more games and less rigid drill. On his recommendation an extension of time for physical instruction was made by including an afternoon period. On our visit to this class we found the pupils working more happily and contentedly than they were when in the ordinary school classes. There is no doubt that much has been done for their mental uplift, and with the experience now gained much more should be possible towards their intellecutal development in the coming year.

I have been gratified to note an awakening of interest in the civic life of the school. Quite a large number of teachers have instituted a prefect and monitor system with excellent results. Taranaki Inspectors write: "The old methods of repressive discipline are dying hard, but wherever a more or less extensive system of self-government is adopted we find that the work of the school proceeds smoothly, pupils are more anxious to give of their best, teachers are less troubled with vexatious details than is the case where every little human is compelled to submit to the sometimes harsh methods of an adult. The more the discipline comes from within and less from without the more pleasant will the teacher's relations with children become. Those alert teachers of large classes who by reading are keeping themselves well acquainted with the rapid development of improved methods of school management find marvellous relief from the nerve-strain entailed by repressive drill-sergeant disciplinary methods. Where classes have been taught to goven themselves by the "moot" or "community" methods the happiest conditions prevail, and teachers find life in their schoolrooms worth living, corporal punishment being in such schools practically unknown.

In concluding I desire to refer briefly to the Department's correspondence classes for pupils in isolated districts, the interchange-of-teachers scheme, and to the training of teachers by Education

Boards.

Correspondence Classes.—These classes were established for children who were too far from a school to be able to attend. It was at first thought that not more than twenty or thirty pupils would be enrolled, but at the time of writing, eighteen months after the inception of the scheme, no less than 576 pupils have been enrolled. There is evidently a good deal of moving to and fro among the backblocks settlers, for the effective roll at present is 317. Even this number is surprisingly large, and indicates how great the need was for classes of the kind. Admirable work has been done, and the progress of the pupils reflects great credit on the teacher in charge. It is hoped that the

instruction by correspondence will be extended to include secondary subjects.

Interchange of Teachers.—A number of Canadian and English teachers, the latter chiefly from London, were accepted for one year's service in New Zealand in exchange for a corresponding number of our own teachers who went abroad. We have received excellent reports from authorities abroad regarding the work done by our teachers, and we have been pleased to receive similar reports on the work done by our visitors. Inspector Brough, from Vancouver, who joined the Auckland District staff in exchange for Inspector McKenzie, who went first to Vancouver and subsequently to Toronto, returned home in August last, his place being taken by Inspector Moshier from Toronto. This interchange of Inspectors and of teachers is, I feel sure, of very considerable benefit to New Zealand. Already we feel that the Canadian and English schools have been brought nearer our doors through the very vivid and informative letters and reports we are constantly receiving.

Training of Teachers.—The Board's classes for the training of pupil-teachers, probatione s, and uncertificated teachers continue to serve a very useful purpose. Two Boards have, in addition, established supplementary model schools for the training of inexperienced teachers. I inspected one of these schools and found that the intensive course of training in school management and in methods of teaching was admirably arranged, and well calculated to be of assistance to untrained teachers in charge of remote country schools. The training of pupil-teachers and probationers in their own schools is receiving close attention from the Inspectors, and there are now fewer instances

of head teachers neglecting their duty in this regard.

I regret that space will not permit the insertion in this report of a greater number of ex racts from the Inspectors' district reports, which I have read with much pleasure and profit. The reports contain many useful criticisms and suggestions, publicity to which will be given from time to time in the Education Gazette.

The Director of Education.

I have, &c.,
T. B. STRONG, Chief Inspector of Primary Schools.

#### APPENDIX B.

## REPORTS (ABRIDGED) AND STATEMENTS OF ACCOUNTS OF EDUCATION BOARDS.

### 1. R E:P:O R T S.

#### AUCKLAND.

Auckland, 31st March, 1923.

In accordance with the requirements of the Education Act, the Education Board of the District of Auckland has the honour to submit the following report for the year 1922:—

Board.—The members of the Board in office at the end of the year were as follows: Auckland Urban Area—Mrs. N. E. Ferner, Mr. G. Brownlee, Mr. W. J. Campbell, Mr. J. P. McPhail, Mr. G. W. Murray, and Mr. H. S. W. King; Hamilton Urban Area—Mr. A. E. Manning; North Ward—Mr. J. D. McKenzie and Mr. R. C. Smith; East Ward—Mr. E. C. Banks and Mr. A. Burns; West Ward—Mr. J. Boddie and Mr. J. Patterson. The Board's representatives on kindred bodies were: Auckland University College Council—Mr. G. W. Murray; Auckland Grammar School Board of Governors—Mr. G. Brownlee, Mr. A. Burns, and Mr. G. W. Murray; Seddon Memorial Technical College Board of Managers—Mrs. N. E. Ferner, Mr. H. S. W. King, and Mr. J. P. McPhail; Elam School of Art Board of Managers—Mrs. N. E. Ferner, Mr. W. J. Campbell, and Mr. G. W. Murray; Pukekohe Technical High School Board of Managers—Mr. A. Burns; Whangarei High School Board of Governors—Mr. H. W. Crawford and Mr. J. D. McKenzie; Hamilton High School Board of Governors—Mr. J. Primrose, Mr. G. Edgecumbe, Mr. F. de la Marc. Twenty-three meetings of the Board were held during the year, with an average attendance of nine.

Schools.—The number of schools in operation at the end of last year was 729, including 100 half-time schools. During the year the following schools were opened: Aramati, Selwyn, Parahi, Mangatoi, Kaiatea, Maitahi, Upper Oruaiti, Waiteitei, Point Chevalier (side), Whatoro, Ohuka, Wharekawa, Dunsdale, Cape Colville, Moehau, Awaroa, Curran Street, Amodeo Bay No. 2, Rangitoto No. 2, St. Michael's, Raukokore, Mangarewa, Kaimango, Whitikahu, Maraehako, Riverslea, Anawhata, Mangatara, Ness Valley, Patetere, and Pikowai. The following schools were closed: Waikawau, Lindum Grange, Puketawai, Ponui Island, Waikeri Bay, Cuvier Island, St. Albans, and St. Barnabas.

Attendance. -The number of scholars enrolled at the end of 1922 was 62,910—viz., boys 32,790, girls 30,120 being an increase of 2,593 over the number enrolled at the end of 1921. The yearly average attendance was 55,603, an increase of 3,380.

Buildings. During the year twenty-six new schools were built, and twenty-six schools were enlarged. The large yearly increase in school population that has been going on for some years renders it difficult for the Board to cope adequately with accommodation requirements. The Board regrets to report that in many districts the school accommodation is not yet adequate, and that congested conditions still exist. The Board has, however, done its utmost to improve conditions, and has made large inroads into its Rebuilding Fund for that purpose.

The Board considers that in a short time the necessity will be imperative to erect teachers' residences, especially in rural areas. One of the most pressing difficulties the Board has now to contend with is lack of suitable accommodation for teachers who take up positions in settlements remote from cities.

Finance.—The income for the year ended 31st December, 1922, totalled £726,316 12s. 1d., and the expenditure £744,056 13s. 3d.

Maintenance Fund.—During the year the Board found that its Maintenance Fund was inadequate for the needs of the district, but has now succeeded in bringing its expenditure within its income.

Training College.—During 1922 the number of students attending the Auckland Training College was 352 viz., 98 men and 254 women. The Board continues to use the building known as the "Annex" for the purpose of providing additional accommodation for the training of the students. The City Council has, however, notified the Board that unless at the end of this year a contract has actually been let for the crection of a new training college upon the Mount Eden - Epsom Reserve

the use of the Annex must be discontinued. The Board desires to express satisfaction that your negotiations with various local authorities culminated in an Act vesting a large and valuable property in the Auckland Board as the site for a new training college.

Training-college Hostel.—In the month of March the Board opened a hostel for women students in Gillies Avenue. The number of students who took advantage of the hostel gradually increased,

until towards the end of the year its accommodation was fully taxed.

District High Schools.—The Inspectors' reports upon the work done in the secondary department of district high schools indicate steady and satisfactory improvement. The Board wishes to record its appreciation of the good work being done by the Inspectors in connection with post-primary education. The Senior Inspector, with the assistance of his colleagues, prepared a series of "Courses of Work for District High Schools," for the use of the district high schools in this education district. This series has proved of very great value to teachers of district high schools. During the year district high schools were established at Kaitaia, Opotiki, Rawene, and Te Aroha.

Junior High School.—In October a junior high school was established at Kowhai Road, with a roll number of more than six hundred. This school is in the nature of an experiment, which, it is hoped, will effect a considerable improvement in the education of young people. The pupils of Standards V and VI from neighbouring schools will be drafted into the Kowhai Junior High School, and will receive not only the ordinary primary-school course but the elements of secondary education. The school will be a trying-out ground. Great attention will be paid to the natural bent of each particular child, and he will be trained largely in accordance with that bent. From reports already received the Board is satisfied that the experiment will prove successful, and that such schools will make a distinct advancement in education.

School Stationery.—A committee of the Board spent a considerable amount of time in collecting information concerning the feasibility of establishing a department for the supply of school stationery at a cheap rate to School Committees and to schools, but arrived at the conclusion that the capital cost required for such a project was not warranted. The Board therefore reluctantly abandoned

the proposal.

Substities.—During the year a very large amount of money was subscribed in the Auckland Education District for improvements to schools and their surroundings. The willingness of the public to subscribe liberally for school purposes is a matter for congratulation. To the Board it seems important that a movement having for its object the betterment of school surroundings should be encouraged in the highest possible degree. One point in connection with subsidies requires careful consideration. In the Auckland Education District it has been found not only difficult but impossible to have some of the schools properly cleaned without having recourse to the assistance of the older pupils of the schools. In many cases these children have willingly performed the necessary service at very small remuneration from the Committee. In some cases, with a very fine spirit of self-sacrifice, they have donated the money so earned to the school library or other school requirement. Their efforts have not, however, been encouraged, as the Department has ruled that money earned by school-children for cleaning the school and donated by them to some school purpose is in the nature of a refund and does not carry subsidy. The Board disagrees with this interpretation and has endeavoured to have it reconsidered. The Board knows that the ruling has had the effect of seriously discouraging children in their efforts for the improvement of their school conditions.

Oath of Allegiance.—I have much pleasure in recording the fact that no difficulty was experienced by the Board in obtaining from all the teachers in its service ready compliance with the Act requiring

each teacher to take the oath of allegiance.

Individual Work in Junior Classes.—On the recommendation of the Senior Inspector of Schools, the Board purchased for the use of the preparatory classes in Grades I and II schools apparatus for individual work. This has already proved of great value to schools of the types mentioned.

Continuity of Service.—It has been found that dislocation of the service arises from the fact that many young people take up positions as pupil-teachers and probationers as a stepping-stone to some other occupation. The Board has resolved that in future it will require from young people, before entering the service, a declaration of intention to subsequently enter the Training College and thereafter to take up the work of teaching.

Medical and Dental Inspection of Schools.—The medical and dental officers of the Department still continue to do good work in this district. The establishment of a few dental clinics has proved a great boon to the children of the districts in which they have been established. The Board trusts that the Department will see its way at an early date to extend the principle of establishing dental clinics, especially in rural areas where it is difficult for children to obtain treatment of any sort.

I have, &c.,

The Hon. the Minister of Education, Wellington.

E. C. Banks, Chairman.

#### TARANAKI.

Sir,— New Plymouth, 31st March, 1923.

On behalf of the Taranaki Education Board I have the honour to present the following report of its proceedings for the year 1922:—

Board Members.—During the earlier part of the year the personnel of the Board was as follows: Central Ward—Messrs. R. Masters, M.P., and H. Trimble; North Ward—Messrs. F. Hoskin and P. J. H.

White; South Ward—Messrs. H. J. Eaves and A. Lees; Urban District of New Plymouth—Messrs. R. J. Deare and S. G. Smith, M.P. Messrs. Smith, Trimble, Hoskin, and Eaves were due to retire in August. Messrs. Smith and Eaves were returned unopposed, and Mr. F. H. Sims and Mr. H. Dempsey were elected to the Central Ward and North Ward respectively.

Boards of Managers. - During the year it was decided to place the technical schools under the government of Boards of Managers, and the several elections took place in September. The following is the personnel of each: Stratford Technical High School—Messrs. H. Trimble, R. Masters, M.P., J. H. Thomas, E. S. Rutherford, J. W. Boon, E. Marshall, Dr. W. Gordon, C. Birkett, Vincent Johnson, J. McAllister, W. MacDonald, and Mrs. A. E. Copping; Hawera Technical High School— Messrs. A. Lees, H. J. Eaves, J. B. Murdoch, W. A. Spragg, J. W. J. Harding, F. Mills, R. S. Sage, A. Reid, H. Chapman, G. H. Buckridge, T. C. Hobbs, Mrs. A. M. Buckridge; New Plymouth Technical School—Messrs. P. J. H. White, S. G. Smith, J. S. Connett, G. H. Dolby, A. L. Roberts, W. G. Reid, F. A. Coleman, Walter Bicknell, R. J. Clark. Board's representatives: High Schools Board-Mr. H. Trimble; Boards of Managers Messrs. H. Trimble and R. Masters (Stratford Technical High School), A. Lees and H. J. Eaves (Hawera Technical High School), P. J. H. White and S. G. Smith (New Plymouth Technical College).

Schools. The number of schools under the jurisdiction of the Board at the end of the year was The total roll number for the year was 11,121, an increase of 287 pupils on last year. aggregate average attendance at all the schools was 10,060, which gives a ratio of 0.9045, as compared with 0.8753 for 1921. The following schools were opened during the year: Otaraoa and Opua. The Hapurua School was closed temporarily during the year.

Teaching Staff.—The number of teachers in the Board's service on the 31st December, 1922, was

as follows:

					Male.	Female.	Total.
					47	29	76
					27	60	87
					13	142	155
					7	22	29
					7	30	37
					<b>2</b>		<b>2</b>
					<b>2</b>		<b>2</b>
					3		3
ructre	sses	• •	• •			3	3
	   ors		OFS	OPS	OFS		$\begin{array}{cccccccccccccccccccccccccccccccccccc$

The numbers of uncertificated teachers were 22 male and 91 female, total 113; and licensed teachers, 3 male, 4 female, total 7. There appears to have been much less difficulty in obtaining suitable teachers for all classes of schools, and it is pleasing to note that each year a better class of application is received for entrants into the teaching profession. During the last month of the year there were 113 uncertificated teachers employed in the public schools in this district, this being 35 per cent. of the total number of teachers, exclusive of pupil-teachers, probationers, and instructors. A large proportion of these have made an effort—more or less successful—to qualify for the D certificate. In October the Board carefully considered each case, and decided to advertise a number of the positions held by uncertificated teachers, and warned others that it was their duty to make an earnest effort to qualify next year.

Buildings.—Throughout the year the Board has been greatly exercised upon the congested condition of the schools, more particularly in New Plymouth and Waitara. Increased accommodation has been provided at Okaiawa and Tawhiti by additions in concrete to the existing school buildings. New buildings in concrete and capable of extension are in course of erection at Fitzroy, Courtenay Street (Central Infants'); and by remodelling or making additions the Central (New Plymouth), Carrington, and Oeo Schools have been greatly improved. Three of the Board's type of movable schools have been erected at Matemateaonga, Hapurua, and Astwood. Unfortunately, the newly acquired Ohura residence was totally destroyed by fire.

The new Technical High School at Stratford was opened during the early part of the year by the Hon. Minister of Education.

Finance. The credit balance brought forward from 1921 was £5,904 12s. 3d.; the receipts from all sources amounted to £138,271 17s. 8d.; total, £144,176 9s. 11d. The total expenditure in 1922 was £134,026 19s. 1d., leaving a credit balance on the 31st December, 1922, of £10,149 10s. 10d. The Rebuilding Fund is now reduced to £3,074 5s. 1d.

Instruction Classes for Teachers.—Saturday classes to enable all uncertificated teachers, pupil-teachers, and probationers to receive practical instruction in science and handwork subjects were conducted in Hawera, Stratford, and New Plymouth. In all ninety-eight students enrolled, and (with one or two exceptions) attended with commendable regularity.

Manual and Technical Instruction.—Elementary handwork subjects were taken throughout the year by all schools, but many schools were again handicapped by lack of an adequate supply of material. Needlework has been taught in all schools, and where necessary a competent instructress has been engaged. Manual-training classes have been held in New Plymouth, Inglewood, Stratford, Eltham, Hawera, Waitara, Manaia, and Pungarehu, the subjects comprising woodwork, cookery and domestic science, and rural science.

Agricultural Instruction.—This section of the Board's activities still continues to make satisfactory progress. The work in many of the schools has reached a high standard. Instructive displays have been exhibited in most of the agricultural shows, and indicate many commendable achievements effected on the school property.

Attendance.—The Board's Attendance Officer reports that the general regularity of attendance at schools still shows improvement. The following is an abstract showing the number of schools, teachers, and pupils in the district for the past three years:—

Year en	ding	Schools.	Head or Sole Teachers.	Assistants.	Pupil- teachers and Probationers.	Total.	December Roll.	Average Attendance.
1920 1921 1922	••	158 162 163	154 160 163	137 137 155	55 59 66	346 356 384	$10,439 \\ 10,829 \\ 11,121$	8,917 9,438 10,060

In the course of his duty the Attendance Officer has found it necessary to investigate nine cases

of infringements of the Education Act.

Medical, Dental, and Physical Inspection has proceeded steadily throughout the year, and a decided improvement is noticeable in the physique and vitality of the pupils generally. Nevertheless the scheme cannot be the success it should be unless dental clinics are established and more frequent visits made by the Medical Officer and physical-drill instructor. My Board hopes the time is not far distant when provision can be made to actually and effectively treat children suffering from the various defects reported.

School Committees.—It is pleasing to note the harmonious relations existing between my Board and the School Committees generally. Their loyal support in the administration of the schools evinces a keenness and enthusiasm for the educational welfare of the district which is highly commendable and thoroughly appreciated. Some £1,978 has been been raised by voluntary contribution; many school libraries have been established, and improvements made to grounds and buildings.

The Hon, the Minister of Education, Wellington.

I have, &c., A. LEES, Chairman.

#### WANGANUI.

Sir,—
Wanganui, 31st March, 1923.

I have the honour to present a report on the proceedings of this Board for the year 1922.

Board.—The personnel of the Board at the end of the year was as follows: Messrs. W. A. Collins (Chairman) and E. F. Hemingway, West Ward; Mr. A. J. Joblin and Mrs. N. Dunne, North Ward; Messrs. A. Fraser and H. McIntyre, South Ward; Messrs. J. Aitken and E. V. Laws, Wanganui Urban Area; and Messrs. W. R. Birnie and W. F. Durward, Palmerston North Urban Area. The Board was represented on other bodies as follows: Wanganui Girls' College Board—Messrs. W. A. Collins, A. Fraser, and E. V. Laws; Palmerston North High School Board—Messrs. J. W. Rutherford, W. R. Birnie, and T. R. Hodder; Wanganui Technical College Board of Managers—Messrs. W. Bruce and E. V. Laws; Feilding Technical High School Board of Managers—Messrs. H. McIntyre and H. Tolley. Mr. H. McIntyre represented the Wanganui, Taranaki, Hawke's Bay, and Nelson Education Districts on the Committee of Advice of the Wellington Training College.

Schools and Attendance. New schools were opened at Huikuma, Kauarapaoa, Kirikau, and Te Maire, and a side school at Wharangi. The schools at Burnside, Coal Creek, Kakatahi, and Tupapakura were closed during the year. The Tiriraukawa, Matahiwi, and Taumata Schools were reopened. At the close of the year there were open 205 main schools, five side schools, and one model school. The total roll at the end of the year was 16,801, being an increase of 399 over the previous year. The number on the rolls of the secondary departments of the district high schools was 128, an increase of thirty-six. The average attendance for the year was 15,136, and the average weekly roll number 16,665. The average attendance expressed as a percentage of the roll number was 90-8, which is 0-8 higher than for 1921. The highest attendance during the year was during the December quarter, the average being 15,351. In recent years the attendance has been much affected by epidemics, but there was not nearly so much sickness amongst pupils during last year, and in only a few cases was it necessary to close schools. The Attendance Officer paid 239 visits to schools: 110 informations were laid against parents, and eighty-seven convictions were recorded out of the ninety-two cases proceeded with.

Teachers.—The number of adult teachers on the staff at the end of the year, excluding twenty-five relieving teachers, was 425. Of these, 126 were uncertificated, twenty-one being in charge of Grade 0 schools, forty-six in charge of Grade 1 schools, thirteen in charge of Grade 2 schools, and three in charge of Grade 3 schools; forty-three were assistants. The positions held by uncertificated teachers are in nearly every case at schools situated in remote parts of the district, and although the Board has endeavoured to replace these teachers by those holding certificates it has not been successful. There were twenty male and thirty-six female pupil-teachers, and ten male and twenty-eight female probationers, totalling in all ninety-four. It is gratifying to again be able to report that at the beginning of the year a satisfactory number of males applied for appointment as pupil-teachers and probationers. Another pleasing feature in this connection was the high percentage of applicants who had passed the Matriculation Examination.

Conveyance and Boarding Allowances.—Conveyance allowance was paid for an average of 132 children attending twenty-eight schools, and boarding-allowances for an average of thirty-three

children in attendance at nineteen schools. The total expenditure in respect of these allowances was £790-19s. 10d.

Voluntary Contributions.—The total amount received during the year by way of voluntary contributions towards improvements to buildings and grounds, purchase of equipment, books for school libraries, &c., was £1,721 6s. 2d.

Health of Children.—Very excellent work continues to be carried out by the School Medical Officer. Co-operation between the parents and the Medical Officer is encouraged, parents being invited to be present at the schools when their children are being medically examined. Many parents avail themselves of this opportunity of discussing with the Medical Officer the very important question of the health of their children. A health camp was again held in the grounds of Mr. B. P. Lethbridge at Turakina. The duration of the camp this year was extended to five weeks, and was attended by some ninety-six children. The total cost of the camp was £302 13s. 9d., and was met entirely by donations from persons who were sympathetic with the idea of holding the camp.

Physical Instruction and School Athletics.—The Department's physical instructor continues to do good work, although the fact of his being in charge of two districts renders it impossible for him to visit all the schools each year. It is sincerely hoped that the Department will in the near future see its way to increase the staff of physical instructors so as to provide at least one for each district. Athletic games in the schools continue to be carried on with enthusiasm. The activities of the Public Schools Amateur Athletic Associations, referred to in my last report, are undoubtedly contributory factors in the keenness displayed by the pupils of both the town and country schools. Sports meetings, and competitions in other sports, such as football, cricket, hockey, and swimming, according to the season, continue to be held. A pleasing feature in regard to these competitions is the enthusiastic manner in which the teachers, School Committees, and others co-operate in the endeavour to create amongst the children a fondness for amateur sport.

Organizing Teachers.—The staff of organizing teachers is now reduced to two. These teachers are carrying out valuable work in assisting inexperienced teachers in charge of small schools in the country districts in the organization of their work. Unfortunately, the Department's policy of reducing the staff of organizing teachers has, of course, limited the field of operation of this otherwise excellent scheme.

Model Country School. - During the year four male and six female teachers attended the model school. In all cases the work of the students was reported as excellent. The teachers concerned should derive considerable benefit from the course, and the experience thus gained should result in a higher standard of efficiency in their work at their schools.

Correspondence Classes for Primary Pupils.—The applications for enrolment in the Department's correspondence classes have not been numerous. Only twenty-two applications were received by the Board during the year.

Instruction of Backward Children.—The special class for retardates formed at the Victoria Avenue School last year continues to show satisfactory results, and has fully justified its establishment.

Buildings and Sites.—Five new schools were completed during the year, while the Marton Junction new school and the remodelling of the Sanson School were nearing completion at the close of the year. A considerable amount of maintenance-work was carried out. The reduction of the maintenance by 10 per cent. was seriously felt, and I trust that the grant will be reinstated at an early date. The Board still adheres to the policy of carrying out all its building operations with its own staff, under the direction of the Architect. The excellence of this system is evidenced by the fine workmanship displayed in the works undertaken—all of which have been completed at a minimum cost. The staff at the Board's workshop has been fully maintained throughout the year in the manufacture of school furniture and requisites. All the work turned out was executed at the lowest possible cost, and was invariably of a first-class order.

Finance.—The net credit balance at the close of the year was £2,040 17s. 10d. The Alexander Bequest and Rees Bequest Trust Accounts were in credit £2,636 12s. 8d. and £1,248 9s. 3d. respectively.

I have, &c.,

The Hon, the Minister of Education, Wellington.

W. A. COLLINS, Chairman.

#### HAWKE'S BAY,

SIR,---

Napier, 29th March, 1923.

In accordance with the provisions of the Education Act, 1914, the Education Board of the District of Hawke's Bay has the honour to submit the following report of its proceedings for the year 1922:—

The Board.—The personnel of the Board at the end of the year was as follows: Napier Urban Area—Messrs. J. Clark Thomson and G. W. Venables; Gisborne Urban Area—Messrs. G. T. Wildish and G. Crawshaw; Hastings Urban Area—Messrs. G. F. Roach (Chairman) and A. W. Hamilton; North Ward Rural Area—Messrs. W. Oates and J. R. Kirk; Middle Ward Rural Area—Messrs. G. McKay, M.P., and A. King; South Ward Rural Area—Messrs. R. Soundy and W. Cuthbertson. The Board's representatives on other educational bodies are as follows: Dannevirke High School Board—Messrs. R. Soundy, T. H. G. Lloyd, and Rev. G. B. Stephenson; Napier High School Board—Messrs. G. F. Roach and R. L. Paterson; Gisborne High School Board—Mr. L. T. Burnard; Napier Technical High School Board—Messrs. G. W. Venables and J. Clark Thomson; Waipawa Technical Classes Association—Mr. C. H. Critchley.

Finance.—The receipts for the year totalled £162,863 12s. 7d., and the payments £157,905 8s. 5d. The credit cash balance on all accounts on 31st December, 1922, was £11,387 6s. 6d. A comparison

with 1921 will show that the financial position of the Board has very much improved during the past year. It has been necessary to restrict expenditure on maintenance as far as possible, but as this account is now on a more satisfactory basis the normal expenditure under this head may now be resumed. The cost of administration in 1922 was 4.43s, per pupil in yearly average attendance, compared with 5.18s, in 1921.

Attendance.—The number on the roll at the end of 1922 was 15,755, compared with 15,242 at the end of 1921, an increase of 513. The attendance for the year 1922 averaged 14,160. The average attendance in 1920 was 12,234, so that the increase in the two years 1921 and 1922 was 1926, which is evidence of the rapidly growing school population of this district, and is ample justification of the many applications made by the Board for new schools and for increased accommodation in existing schools. The following table shows the average roll and average attendance for the years 1921 and 1922:—

			Average Numb on Roll.	er Average Attendance.
Average for 1922	 	 	15,460	14,160
Average for 1921	 • •	 	14,899	13,475
Increase	 	 	561	685

Number of Schools.—The number of schools in operation at the end of 1922 was 183, an increase of eighteen over the number at the end of the previous year. Schools were opened during the year at Drumblair, Hangaroa, Hauturu, Kowhai, Lunesdale, Manganuku, Mangaone, Mangatarata, Mangataura, Matakaoa, Ngapakira, Otawhao, Panikau, Puketawa, Reay Bridge, Tarewa, Te Awaputahi, Te Kohanga, Waimata Household, Waimoko, Waiwhare, Wallace's Crossing, and Whakarau; while the schools at Mangakiore, Mount Herbert, Tangatapura, Tangoio, and Woodlands North were closed.

Proficiency Examination and Junior National Scholarships.—As in former years, a synchronous examination was arranged for the outlying schools, the pupils in the other schools being examined either at convenient centres or at their own schools. For the synchronous examination special papers were prepared by the Inspectors, and the Board arranged for responsible supervisors to be present. The results of the synchronous examination were considered in conjunction with the results obtained in all subjects by the Inspector at his annual visit to the school, while in the centralized school the headmasters were consulted as to the merits of the various pupils. Notwithstanding the fact that the percentage of results was somewhat lower than last year's, the Board considers that a high standard has been maintained. The successes in external examinations, particularly the Junior National Scholarship Examination, would appear to bear this out. The numbers of candidates and certificates obtained were as follows:—

		Downerst	D6-i	G	Perce	ntages
School.	Present		Proficiency.	Competency.	Proficiency.	Competency.
Sole charge		111	78	12	70.2	10.8
Two teachers Three and four teachers		$\begin{array}{c} 147 \\ 175 \end{array}$	104 147	$\begin{array}{c} 19 \\ 12 \end{array}$	70·8 84·0	12·9 6·9
Five teachers and upwards		716	535	84	74.7	11.7

The best results this year thus appear in schools of Grade IIIB and Grade IV, which are more or less country schools having three and four teachers respectively.

The number of Junior National Scholarships gained at the examination held at the end of 1922 was twenty-five, compared with twenty-one in 1921 and ten in 1920.

Teachers.—On the 31st December, 1922, there were in the Board's service teachers classified as follows:—

·	Certifi	cated.	Licen	sed.	Uncertificated. All Teachers.		Total.		
	м.	F.	М.	F.	М.	F.	M.	<b>F.</b>	
Head teachers	65	6					65	6	71
Sole teachers	14	24	<b>2</b>	1	4	65	20	90	110
Assistants	32	142	<b>2</b>	1	2	53	36	196	232
Organizing teacher			• •		• • •		1		1
	112	$\overline{172}$	4	2	6	118	122	292	414
Pupil-teachers							19	29	48
Probationers				• •			9	39	48
Totals, 1922	112	172	4	2	6	118	150	360	510
Totals, 1921	108	182	$^2$	4	10	85	138	339	477

Included in the 124 uncertificated teachers shown above are thirteen relieving teachers and thirty-three engaged in conducting household schools.

Appointment of Teachers.—The appointment of teachers under the Dominion graded list can now be said to be fairly tested. The Board is of opinion that the scheme does not always result in the most efficient teachers being selected for the various positions. This is due partly to the provisions of the Education Act, but more particularly to the unsound basis on which the grading of teachers is carried The graded list is not an efficiency list, and until appointments are made on a scheme based entirely on efficiency some teachers will secure promotion before their more efficient confrères. the grading scheme was introduced the Department stated that an investigation of the appointments made by Boards prior to its introduction showed a chaotic state of affairs, in that many teachers with high grading were in low-paid positions, and that many others with lower grading were in higher-paid positions. The present method of appointment is not going to remedy this, because there is no compulsion in regard to transfer or promotion, and teachers are influenced by domestic reasons, climate, isolation of the particular school, &c., in applying for promotion. Thus, on the average a grading number of twenty-five places lower will secure a position in the northern portion of this district compared with a similar position in the southern portion of the district. An investigation at the present time would no doubt disclose that a state of affairs similar to that pointed out by the Department previously still exists not only in this district, but throughout the Dominion. transfer with payment of travelling-expenses is the only remedy. Teachers are now claiming to be paid entirely according to efficiency. There is no doubt as to the merit of such a claim, but those making it appear so far to have overlooked the essential corollary to such a system of paymentnamely, that Boards should have the right to place teachers where the greatest value can be obtained from their services. Any steps taken to introduce such a system would have the cordial support of

Organizing Teachers.—A great deal of credit must be given to the organizing teachers for the efficient state of the smaller country schools. They have carried out their duties whole-heartedly and to the full satisfaction of the Inspectors. The Board is of opinion that the results obtained are well worth the expense involved in their employment. The Board frequently receives expressions of great appreciation from country residents respecting the services of the organizing teachers. Before the appointment of these organizers country residents whose children were taught by uncertificated teachers had the feeling that they were somewhat neglected, but they now feel that with the organizing teachers visiting the schools regularly and guiding the teachers they need have no fears that the education of their children is not following right lines.

Instruction of Teachers.—Central classes for training pupil-teachers and probationers and uncertificated teachers in elementary science, drawing, and handwork were held at Hastings, Waipukurau, and Gisborne. There were no Saturday classes in 1922. In this district we have found great difficulty in securing efficient instructors for the special subjects for Saturday classes; and, further, the train services and other means of communication are such that it is impossible to concentrate teachers at Saturday classes with a minimum of inconvenience and expense. Apart from this, the Board is firmly convinced that concentrated instruction for a fortnight under the Board's most competent instructors in these subjects gives the students a more efficient training than the intermittent Saturday classes. This opinion is supported by the Inspectors and the headmasters.

Correspondence Instruction for Country Children.—The correspondence instruction has proved a boon to many children in the backblock districts. Many applications still continue to be received as the success of the scheme becomes more known, and any prejudice against it is gradually disappearing. The Board desires to repeat its congratulations to the Department on introducing this scheme, which is undoubtedly a great success.

District High Schools.—At the end of the year there were four district high schools in operation, the Hastings District High School having been disestablished and a technical school established. As in previous years, the first- and second-year pupils of the secondary departments of district high schools took the rural course. The aim of the course is to provide a good general education in secondary subjects, and also to prepare pupils for the Public Service Entrance Examination. The science work has been continued for the third and fourth years, thus enabling pupils to take science for the Matriculation Examination. Approval was given during the year for the establishment of a district high school at Te Karaka, but owing to the impossibility of securing a teacher the opening of a district high school was delayed until the beginning of 1923.

Manual and Technical Instruction.—Handwork: Classes in elementary handwork were conducted in all schools. Needlework was satisfactorily taught in all schools. Special classes were conducted in twenty schools in sole charge of male teachers, but in six schools no instruction was given, as it was impossible to arrange for competent teachers. Agriculture, dairy science, and elementary agriculture: 205 classes (primary and secondary) were recognized for capitation purposes in 1922. The capitation grant made by the Department for equipment and material for science subjects has proved adequate for the purpose, and during the past year the Board has been able to substantially increase the equipment and material in each school. The full requirements of all schools have not yet been met, but it is expected that during the current year there should be no reason on this ground why the teachers should not be able to do satisfactory work. The supplies of handwork material arrived late in the year. The Board regrets to have to refer to the very great delay which occurred in the supply of materials, &c., for 1923, and the fact that the quantities were cut down below actual requirements. Woodwork, cookery, and dressmaking: These classes were conducted at centres to which pupils from the surrounding schools came for instruction. Classes were in operation at Gisborne, Napier, Hastings, Waipawa, Waipukurau, Dannevirke, and Woodville.

Physical Instruction.—An instructress has been permanently located in the district during the past few years, and full attention has been given to this branch of the work.

Medical and Dental Inspection.—The work has proceeded steadily throughout the year, and in order to further assist this work an additional nurse was attached to the district. In past years the need for the establishment of dental clinics in this district has been stressed. One has been established in Napier as from the beginning of the current year, and the Board hopes that the establishment of clinics in other centres in the district will not be long delayed.

Scholarships.—Scholarships in tenure at the end of 1922 were as follows: Junior National Scholarships, 34; Senior National Scholarships, 12; Wairoa County Council Scholarship, 1: total, 47.

Buildings.—Renovation and painting of schools and residences have been proceeding steadily throughout the year, but this most important part of the Board's maintenance-work is still somewhat backward. In order to overtake the leeway a second gang of painters has now been engaged. New schools were completed at Otawhao and Reay Bridge. A portable school building was erected at Wallace's Crossing. A new infant school was erected at Mangapapa. Additional rooms were added to the Havelock North and Wairoa Schools, while additional accommodation at the Hastings Technical High School and at Mahora was provided by the erection of portable buildings. During the year two serious fires occurred: the Pakipaki School was destroyed on the 5th July, 1922, and the Waipukurau School, which had been recently remodelled, on the 11th July, 1922. The rebuilding of the Pakipaki School was completed before the and of last year but away to the dalay in receiving of the Pakipaki School was completed before the end of last year, but owing to the delay in receiving a grant for the work the rebuilding of the Waipukurau School was not commenced until the beginning of the current year. The most important works in progress at the end of the year were a new school at Nuhaka, additions to Parkvale School and Greenmeadows Infant School, erection of a second portable building for Hastings Technical High School, and the erection of portable buildings for the secondary department of the Wairoa District High School. There are many bad cases of overcrowding in the district, and there are also a number of cases in country districts where new schools are required. The Board's workshop is now firmly established, and has proved to be a fine asset for the Board. A large proportion of the joinery and all the furniture required for the various schools are manufactured. Considerable difficulty has, however, been experienced during the year in procuring suitable timber. The Board uses only heart timber, and, while there is ample supply of ordinary building-timber, heart timbers are in short supply. Many jobs have been delayed owing to the difficulty of obtaining suitable timber. The practice has been followed as far as possible in connection with buildings in wood to carry out the work by the Board's own staff.

School Committees. The Board's relations with School Committees have been of a most cordial Committees greatly appreciate the benefits which can be secured by obtaining the Government subsidy on voluntary contributions, and the amount raised throughout the district is steadily on the increase. Committees have found considerable difficulty in carrying on with the funds for incidental expenses granted by the Department. Were it not for the fact that large sums are raised locally, the liabilities of many Committees would not have been met. The self-reliant attitude of many Committees is worthy of high commendation. During the year the Board has had to exercise the strictest economy in regard to the requests of School Committees. Many applications for expenditure, which in the ordinary course would have been granted, have had to be disallowed or deferred. The Board hopes, however, to make some relaxation in this direction during the current year.

The Hon, the Minister of Education, Wellington.

G. F. ROACH, Chairman.

I have, &c.,

#### WELLINGTON.

Education Board Office, Wellington, 31st March, 1923. Sir,— In accordance with the requirements of the Education Act, 1914, I beg to submit the following report of the Education Board of the District of Wellington for the year 1922:

Board. With the exception of the representation of the Marlborough Ward, the Board member-Messrs. T. Moss and W. T. Grundy; (3) Marlborough Ward-Messrs. E. H. Penny and D. McCallum. Mr. Donald McCallum, of Springlands, succeeded Mr. R. McCallum, M.P., who did not seek re-election. Board representatives: High schools—Wellington Colleges, the Chairman; Marlborough College, Messrs. R. McCallum, C. Ferguson, and W. D. Pike; Masterton High School, Messrs. W. T. Grundy, T. Moss, and T. Jordan; Hutt Valley High School, Messrs. G. T. London, E. P. Rishworth, and the Mayor of Petone. Technical schools—Wellington, Messrs. T. Forsyth, J. J. Clark, and A. J. White; Masterton, Mr. W. T. Grundy; Petone, Messrs. G. T. London and D. McKenzie.

Schools and Attendance.—Twenty-one schools were closed and twenty opened or reopened, so

that at the end of the year there were in operation 256 schools. The following shows the average roll and average attendance for the years 1921 and 1922:-

				Roll Number.	Attendance.
Mean for year 1922				26,457	24,289
Mean for year 1921	• •	• •	• •	25,549	23,275
Mean increase				908	1,014

The average attendance was 91.8 per cent. of the average roll, a very good result. The following are the percentages in successive years: 1922, 91.8 per cent.; 1921, 91 per cent.; 1920, 87.5 per cent. The number of prosecutions decreased from forty-nine in 1921 to thirty-five last year, and of convictions from thirty-eight to sixteen last year, the remainder of the cases being withdrawn or deferred on condition of future regularity.

Teaching Staff.—The following were the number of teachers, pupil-teachers, and probationers in

the service of the Board at the end of the year:--

	:	Н	ead Teache	ors.	£	Sole Teacher	rs.		Assistants.		
werman a		Certifi- cated.	Licensed.	Uncertifi- cated.	Certifi- cated.	Licensed.	Uncertifi- cated.	Certifi- cated.	Licensed.	Uncertifi- cated.	
Males Females		87 14	••	i	23 40	3 2	4 74	67 352		$\begin{bmatrix} 2\\47 \end{bmatrix}$

	110	, autonorg	••	••	••			<u> </u>			
			Grand to	tals		25	25	636	861		

The above numbers include the teachers in thirty-seven small household schools. Excluding these, the number of uncertificated teachers has during the past three years decreased by nearly 30 per cent., as the number of qualified trainees of the training college has increased. Notice was given to uncertificated teachers that in the event of certificated teachers becoming available they must be prepared to relinquish the positions they hold.

In addition to the numbers included in the table, the staff also included the following: One organizing teacher; two instructors in agriculture; one supervisor and five instructors in woodwork; five instructors in home science; Training College staff—Principal, Vice-Principal, five lecturers, librarian

Training College.—The Principal and his staff are to be congratulated on an excellent year's work. Two questions arise out of it, and no doubt will receive your careful consideration—namely, whether the time is not due for the abolition of the pupil-teacher and the probationer in favour of the course of training for the profession indicated in the report; and, secondly, whether, in view of the sharp rise in the number of students and of the widening scope of the course of training, the staff of the College should not be further strengthened. The Board is much pleased that at last education has been created an honours subject.

The following are the essential statistics of the Training College: (1.) Total number of students, 277 (74 men and 203 women). (2.) First-year students, 160; second-year students, 117. (3.) Students classified: Division A, 175; B, 86; C, 6; D, 10. (4.) Districts: Wellington, 124; Wanganui, 59; Hawke's Bay, 30; Nelson, 27; Taranaki, 28; Otago, 2; Canterbury, 4; Southland, 1; Auckland, 2. Secondary Education.—The average attendances for the year 1922 at the district high schools in

Secondary Education.—The average attendances for the year 1922 at the district high schools in the district were—Carterton, 62; Eketahuna, 53; Greytown, 25; Hutt, 45; Levin; 62; Masterton, 135 (closed 31st March, 1923): Martinborough, 34: Pahiatua, 37: Petone, 54: total, 507.

135 (closed 31st March, 1923); Martinborough, 34; Pahiatua, 37; Petone, 54: total, 507.

Scholarships.—There were current at the end of 1922 thirty-seven senior and sixty-one junior scholarships. On the 31st December, 1922, one senior and seventeen junior scholarships expired. On the results of the 1922-23 examinations twenty senior and twenty-six junior scholarships were awarded.

Instruction of Teachers.—Week-end classes in drawing and in science, in preparation for the certificate, were held at Wellington (Training College), at Masterton, and, for the first time, at Levin. A fortnight's course, under the management of Inspector Warren, was held during the May term holidays at Blenheim. The correspondence course was discontinued.

Manual and Technical.—Instruction in elementary handwork was given in all schools as prescribed by the syllabus. The pupils of sixty-one schools attended classes for instruction in cookery and woodwork. Swimming and life-saving classes were held in connection with sixteen schools. The withdrawal of recognition of swimming as a subject of instruction after the 30th June has discouraged the teaching of this important subject, but the Board hopes that the Education Department may be able at an early date to resume the recognition.

Special Schools.—The school at Trentham was closed at the end of the year.

Medical and Dental Services.—The development of these services is much appreciated. To assist in the establishment of the schools dental service many communities have offered free rooms for clinics, transport, and even lodgings for the dental nurse. The extension of the dental service to remote districts is much desired, and, the Board understands, will be undertaken as soon as the training of staffs permits.

School Libraries.—The service to the school community by the library department of the City Council is so unobtrusively and so efficiently performed that its great value is apt to be overlooked. It serves thirty large schools, containing quite one-third of our scholars, with well-chosen books, ample in number, nourishing in quality. The success of the Featherston County library has encouraged the formation of a similar exchange in South Wairarapa County. Efficient management merits public approbation and should secure substantial monetary support. Quite considerable sums have been raised for this worthy object. Other public bodies may with advantage, to the extent of their means, follow the worthy examples above mentioned. In each case an essential condition of success is the sound sense and the enthusiasm of the chief librarian and his associates.

Buildings.—Prices were still high and skilled labour by no means plentiful, so that a good deal of work had to stand over for more favourable conditions. Nevertheless much good work was done in overtaking arrears from the war period. Fencing renewals, overhaul of schools and residences, improvement of sanitary conveniences, asphalt and grading, were undertaken, besides smaller works too numerous to specify. The following new buildings were completed: in brick-South Miramar, Te Aro Infants', Training College gymnasium and lecture-hall, Hutt Technical School; in wood-schools, Koromiko (rebuilding) and Dillon's Point (addition); residence, Carluke. Unused schools at Tahuahua and Wairere were removed and re-erected at Mirza and Ngaumu respectively. The Board has recognized that, owing to the exigencies of finance, it was only the most urgent new works that should proceed. It appears to the Board, however, that the time for a more rapid advance to pick up arrears has now arrived, and that permanent buildings to replace temporary ones should be erected at the earliest possible moment. Rapid increase of population, chiefly in the urban and country town areas, must be provided for without delay. Such districts are—Kaiwarra, Clyde Quay, eastern Hutt, south Miramar, Lyall Bay, Petone area, Khandallah, Hataitai, Levin; and, of country places, Pine Valley, Poroutawhao, and Silverstream. The need for replacement of very old schools in the city is recognized, the first of these being the Mount Cook group. The erection of a hostel for Training College students must be faced in the near future. In order to assist in a time of pressing financial difficulty the Board has placed over three-quarters of its Rebuilding Fund at immediate disposal, mostly on the basis of half cost, for works of immediate urgency, including additions, conveniences, sheds, and teachers' rooms. The purchase of sites ahead of requirement is strongly advocated in districts of assured increase. It is before population presses close that choice of land can be made at moderate price. If the future is to be assured, quite twelve to twenty more of such areas should be procured without long delay in districts of growing population.

Finance.—There was on deposit with the Public Trustee and the Bank of New Zealand on the 31st December, 1922, a total sum of £6,000. On that date there was a credit balance on the current account amounting to £6,206 8s. 5d. Unpresented chaques amounted to £842 18s. 9d. The net balance to credit on the 31st December, 1922, was £11,363 9s. 8d.

General.—The Board has received with much satisfaction the evidence furnished by the Inspectors' report that the great majority of our schools are conducted with faithfulness and efficiency. It is a subject of congratulation, too, that the Committees, the School Committees' Association, and the parents take an increasingly keen interest in seconding the efforts of the teachers, both by their personal support and by combined help to promote in various ways pleasure and efficiency. No less than seventy-four Committees applied for subsidy on a total of £2,396 16s. 5d. Many are striving to improve the environment by laying down lawns and flower-beds, and by rearing plantations. For this purpose the Board, as in past years, supplied suitable trees. A number of the schools also raised many trees in excess of their own requirements, and so were able to supply neighbouring schools. The Board strongly urges that the regulations in relation to subsidy under section 159 of the Act should receive the most friendly and liberal interpretation, and that in particular the limitations which were temporarily imposed should be withdrawn, and in no case should be allowed to operate retrospectively. The active good will of its friends is worth much to the school.

The Hon, the Minister of Education, Wellington.

I have, &с., Т. Forsyth, Chairman.

NELSON.

Sir,— Education Office, Nelson, 31st March, 1923.

I have the honour, on behalf of the Board, to present the following report on the proceedings for the year ended 31st December, 1922:—

Board.—The personnel of the Board at the end of the year was as follows: Messrs. F. W. O. Smith (Chairman) and E. E. Boyes, Nelson Urban Area; Messrs. S. B. Canavan and W. C. Baigent, North Ward; Messrs. E. J. Scantlebury and H. J. Hill, East Ward; Mr. G. B. Sinclair and the Hon. W. H. McIntyre, M.L.C., West Ward. The Board's representatives on other bodies were as follows: Board of Managers, Nelson Technical School, F. W. O. Smith and E. J. Scantlebury; Board of Governors, Nelson Colleges and Council of Victoria University College, Mr. F. W. O. Smith. During the year the biennial election of members was held, those retiring being Messrs. E. E. Boyes, S. B. Canavan, A. C. Cottrell, and F. W. O. Smith. The election resulted in the return of the following: Messrs.

E. E. Boyes (Nelson Urban Area), S. B. Canavan (North Ward), G. B. Sinclair (West Ward), and H. J. Hill (East Ward). An election to fill an extraordinary vacancy caused by the resignation of Mr. J. W. Treacher resulted in the election of Mr. F. W. O. Smith.

Schools.—At the end of the year there were open 137 main schools, four half-time schools, and six side schools. New schools were opened at Crushington, Okiwi Bay, and Wangapeka Track (Grade 0), and Whangarei (Grade 1). The school at Whangamoa was closed. The Westport District High School was disestablished, and a technical high school established in its stead.

Attendance.—The total roll at the end of the year was 7,133, being an increase of 105 over that at the end of 1921. The average attendance was 6,554, as against 6,328 for 1921. The average attendance expressed as a percentage of the average roll was 91·2, as compared with 90 for the previous year and 88 for 1920.

District High Schools.—Secondary departments were in operation at Motueka, Reefton, Takaka, and Westport. The number on the roll at the end of the year was eighty-one, a decrease of 109,

which is accounted for by the closing of the secondary department at Westport.

Teaching Staff.—The number of adult teachers in the service of the Board at the end of the year was 241. Of these, 153 were certificated or had licenses to teach and 88 were uncertificated. It is pleasing to note that the number of certificated teachers shows an increase of thirteen over that for the preceding year, and the number of uncertificated teachers a corresponding decrease. The practice of terminating the engagements of all uncertificated teachers, unless of exceptional merit, at the end of each year is resulting in a number of the vacated positions being filled by certificated teachers and ex-training-college students. The percentage of uncertificated teachers is still greater than we wish, but this is to some extent accounted for by the fact that over half of the schools in the district are in grades 0 and 1. There were four male and fourteen female pupil-teachers and six male and eighteen female probationers on the staff at the end of the year. The Board had the services of three organizing teachers throughout the year.

Buildings.—An additional class-room was erected at Stockton, and the new school at Oparara is practically completed. The schools at Brightwater, Brook Street (Nelson), Spring Grove, and Stoke were remodelled. The school at Mapua was removed, enlarged, and re-erected on a new site. A residence was purchased at Denniston for the use of the teacher of the Burnett's Face School. Eleven schools and two residences were repainted, and a considerable amount of repair work was considerable and

Sites.—New sites were acquired at Corbyvale, Mapua, and Ngatimoti, and additions made to the sites at Cronadun, Foxhill, Pangatotara, and Tasman. The old site at Mapua and a portion of that at

Conveyance and Boarding Allowances.—Conveyance allowance was paid for an average of 139 children in attendance at twenty-two schools, and boarding-allowance for thirty-nine children in attendance at eighteen schools. The total expenditure was £1,117 16s.

Voluntary Contributions.— The total amount received during the year by way of voluntary contributions towards improvements to buildings, purchase of sites, improving grounds, library books, &c., was £399 9s. 11d. The thanks of the Board is due to all who assisted in this direction, and it is a matter for regret that the Government has seen fit to place a limit on the amount of subsidy to be paid.

Training of Teachers.—Successful Saturday instruction classes were conducted at Nelson and Westport. During the coming year it is hoped to have such classes established at Motueka. At present trainees and uncertificated teachers in the Motueka, Takaka, and Collingwood districts are unable to receive the benefits of these classes.

Manual Instruction.—Manual-training classes were held at Denniston, Motucka, Nelson, Reefton, Takaka, and Westport. The classes at Nelson and Wakefield were conducted by teachers on the Nelson Technical School staff; those at Denniston and Westport by full-time itinerant instructors. At Motucka, Reefton, and Takaka the domestic-science classes have been efficiently carried on by Miss E. J. Kingsland. The want of a full-time instructor for the woodwork classes is very pressing. The engagement of part-time teachers resident in the districts has been most unsatisfactory, and it is hoped the Department will approve of the Board's application and agree to the appointment of an additional woodwork instructor for the ensuing year. The classes in agriculture throughout the district are still far from satisfactory. There is no doubt that the district is too large to enable one instructor to put the instruction on a sound basis. It is sincerely hoped that improved conditions will prevail in the near future. The Board deplores the lack of facilities for the teaching of swimming throughout the district. It is a matter for considerable regret that even in Nelson there is no proper swimming-bath available. Many teachers have, however, done excellent work in this direction by making use of suitable pools in creeks and rivers where available.

Technical Instruction.—Technical classes were conducted by the Board at Motueka, Reefton, Takaka, and Westport. This was the first year in which classes had been conducted at Motueka, and they met with conspicuous success. The lack of suitable instructors prevented the establishment of classes in woodwork and applied art, for which there was a great demand.

The new Technical High School at Westport was officially opened by the Hon. Minister of Education on the 31st May. The building is a splendid one, and will meet the needs of the Buller district admirably. The building was first occupied by the pupils on the 12th September, the roll number on that day being 112.

Medical Inspection.—The School Medical Officer and school nurses have continued to do good work throughout the year. It is hoped that by the end of 1923 there will be several dental clinics in operation throughout the district. This district is practically devoid of railway services, and owing to there being so few large centres country parents find it a costly matter to have the teeth of

the children attended to. The appointment of dental nurses in the country districts has already proved a great boon to many, but there is ample room for an extension of the scheme.

Physical Instruction.—It is a matter for great regret that the physical instructor appointed to this district was removed to Wellington early in the year. This instructor was doing splendid work in the district, and his services have been sadly missed. One of the instructors from the Wellington District has spent short periods in the Nelson District during the year.

Finance.—The net credit balance over all accounts at the end of the year was £3,636 18s. 3d. I am pleased to record that the General Account is at last in credit, although the amount is small—£36 19s. 8d. Owing to the large percentage of small schools in the district and the correspondingly low administration grant, the matter of keeping the expenditure within the income and at the same time carrying out the work of the office with efficiency is one of extreme difficulty. The special accounts are now all in a satisfactory position with the exception of the Manual and Technical Account.

I have, &c.,

The Hon, the Minister of Education, Wellington.

F. W. O. SMITH, Chairman.

#### CANTERBURY.

Christchurch, 18th May, 1923.

1 have the honour to present the following report of the proceedings of the Education Board

of the District of Canterbury for the year ended 31st December, 1922:-

The Board. -In the month of July, 1922, the biennial election of members took place, resulting in the re-election of Mr. E. H. Andrews (Christchurch Urban Area), Mr. W. A. Banks (Middle Ward), and Mr. T. Hughes (South Ward), and in the election of Mr. W. H. Winsor (Christchurch Urban Area) and Mr. R. Wild (North-west Ward). The nomination of Mr. John Maze for the Timaru Urban Area not having been received in time, and his being the only nomination, the Board, acting on the advice of its solicitors, completed the number of its members by the election of Mr. Maze under section 18 of the Education Act. At a special meeting in September Mr. Armitage was unanimously re-elected Chairman of the Board. During the year the Board held twelve ordinary and two special meetings. Board representatives on High School Boards: Akaroa, Mr. L. J. Vangioni, Mr. A. H. Westenra; Ashburton, Mr. R. Bell, Mr. R. Kennedy; Greymouth, Mr. W. R. Kettle; Hokitika, Hon. H. L. Michel; Rangiora, Mr. H. Boyd, Mr. W. J. Stalker; Timaru, Mr. J. Maze; Waimate, Mr. J. G. Shackleton, Mr. W. Lindsay. Board of Managers of Technical Classes: Ashburton, Mr. G. W. Andrews, Mr. L. Galbraith; Banks Peninsula, Mr. J. D. Bruce; Christchurch, Mr. E. H. Andrews, Mr. A. Peverill, Mr. C. H. Opie; Fairlie, Mr. J. R. Lack; Geraldine, Mr. T. Hughes, Dr. P. W. Hislop; Greymouth, Mr. H. J. Bignell, Mr. F. H. Kilgour; Kaiapoi, Mr. W. Doubleday; Pleasant Point, Mr. J. Maze; Tenuka, Mr. G. W. Armitage; Timaru, Mr. J. G. Gow, Mr. G. J. Sealey; Waimate, Mr. E. Hassall.

Buildings.—In the aggregate the Board expended during the year a sum of £54,972 on new schools and residences and on the maintenance of existing buildings and sites. This amount is somewhat less than the previous year, the reduction being accounted for partly by the fact that high costs in the previous year had been such a drain on the Board's finances that no works except the most urgent could be undertaken. Amongst the larger works carried out were new schools at Kaiata, Kanieri, Phillipstown, Puhipuhi, Takamatua, and Wataroa; additions at Fairlie, Redeliffs, and Timaru South; portable schools at Linwood, Shirley, and Waimairi; technical schools at Greymouth and Timaru; and extensions of sites at Addington and Richmond. School Committees continue to raise large sums, and claim subsidies thereon, for ground improvements, and in some cases even for additions to buildings. In this way much is being done to overcome the money-shortage, and the local authorities deserve the best thanks of the community for the valuable work they are doing for the schools in their respective districts.

Schools. Six schools were closed during the year—Big River, Callaghan's, Christchurch East Infants', Fyvie, Hakataramea Station, Okuru; while an equal number were opened—viz., Bell Hill, Coldstream, Grehan Valley, Kaiata, Okuru (re-opened), and Puhipuhi. This left the number of schools at the end of the year the same as the preceding December—viz., 385—of which nineteen were of Grade 0. The following table shows the number of schools in operation at the end of each year given, also the number of children on the rolls, the number in average attendance, and the attendance expressed as a percentage of the average weekly roll number:—

	Year.		Year. Total of School		Total of Schools.	On Roll at End of Year.	Average Attendance.	Percentage of Attendance.	
1880			185	23,086	16,412	71.1			
1900			335	27,930	23,806	81.6			
920			380	35,370	29,761	85.5			
921			385	36,498	32,763	89.7			
922			385	37,601	33,047	90.1			

Maintenance.—The expenditure on salaries for the year 1922, including £5,188 0s. 2d. house allowance, was £772,654 6s. 1d. This amount was exclusive of £9,120 2s. 1d. paid to teachers in secondary departments and £28,923 0s. 1d. to training-college staff and students, the whole making a total of £310,697 8s. 3d. by way of disbursements in salaries and allowances, as compared with £314,926 13s. for the previous twelve months.

The incidental allowances paid to School Committees amounted to £16,057 1s. 3d. The following table shows the expenditure on salaries, allowances, and incidentals for each year mentioned:—

-	Year.		Salaries and Allowances.		Incident	als.	Totals.		Average Attendance,	
1880 1900 1920 1921	· · · · · · · · · · · · · · · · · · ·		55,318 1 70,978 1	18 7 4 7	\$,071 1 8,064 1 14,303 1 17,381	3 10	£ 8. 63,390 9 79,043 12 299,403 17 332,307 16	$\frac{5}{7}$	$16,412 \\ 23,806 \\ 29,761 \\ 32,763$	
1922	• •		310,697	8 3	16,087	1 3	326,754 9	6	33,047	

School Staffs.—There were 920 teachers in the Board's service at the end of 1922. Of these, 380 were head teachers or in sole charge, and 540 were assistants. There were in addition 108 pupil-teachers and 145 probationers, also 32 sewing-mistresses in small schools in charge of male teachers.

Conveyance of School-children.—The expenditure on the conveyance of children to school was £6,139 17s. 3d., and on the board of children living a long way from the nearest school £1,021 10s. In all, 1,538 children were conveyed to school during the year, whilst board allowance was paid in respect of 170 children. Of the total (£7,161 7s. 3d.) paid in respect of conveyance and board, the Board contributed £209 12s. 9d. out of its ordinary capitation grant.

Finance.—A reference to the balance-sheet shows that the Board has improved its position during the year by about £3,200. By the exercise of the strictest economy (admittedly a doubtful procedure where buildings are concerned) a deficit in the Maintenance Account has been reduced by about £2,000; the Manual Instruction Account is now on a better footing; and the Administration Account, having had to meet fewer deficits on special accounts, has also recovered some leeway. The Board is endeavouring to build up a reserve fund to represent the balance shown to credit for rebuilding purposes, and, provided no exceptional calls are made on the Maintenance Account, the credit balance on the rebuilding fund at the end of the ensuing year will probably be represented by actual cash.

Manual Instruction.—This subject again occupied a prominent position in the curriculum of the primary schools of this district. About 38,000 pupils received instruction in sime form of handwork as a means of maintaining the interest and developing the intelligence of the pupils. For the first time the Department supplied the handwork material required. Unfortunately, supplies did not reach the Board till well on in March or the beginning of April, consequently the whole year's operations were hampered thereby. The material supplied was of good quality. At thirty-two schools in the district where there is no female teacher on the staff instruction in needlework was given by a local instructress. Advanced handwork was taken by all the pupils in the upper standards; 3,342 boys were instructed in woodwork and drawing, and 3,259 girls received instruction in cookery and domestic science. A new and up-to-date manual-training building was opened at Timaru at the beginning of the year, and many of the other buildings were improved and made more convenient. Ninety-six classes were carried on in swimming and life-saving, and keen interest was taken in this subject of instruction.

Agriculture.—About 250 schools were recognized as taking agriculture, and the usual enthusiasm was displayed in the matter of carrying out the different competitions. About 350 pupils took up the rural course of instruction at the eleven district high schools. Fairlie School took up the course for the first time.

Technical and Continuation Classes.—Outside the larger centres very little interest was taken in technical and continuation classes during the year. The Department's proviso requiring that to form a class the number of students under eighteen years of age must be not less than twelve for technical and eighteen for continuation classes could not be complied with in a great many instances. The Technical High School at Greymouth was completed by the Board towards the end of the year, and handed over to the Board of Management at Greymouth.

Teachers' Classes.—In accordance with the Department's recent regulations, all available pupil-teachers and probationers received instruction in home science and the different branches of drawing at Ashburton, Christchurch, Greymouth, and Timaru.

Irregular Attendance.—During the year Court proceedings were taken in seventy-two cases, fines amounting to £23 15s. being imposed. Generally speaking, weather conditions were favourable, and the health of the children good. The Truant Officer pays a tribute to the school nurses, whose services have been of great assistance in deciding as to the fitness or otherwise of some children to attend school or mix with the other children. Little trouble has been experienced regarding children leaving school to go to work, and in nine of such cases investigated all the children returned to school without Court proceedings being necessary.

I have, &c.,

#### OTAGO.

Sir,— Dunedin, 31st March, 1923.

In accordance with the requirements of the Education Act, 1914, I have the honour to present the following report of the Education Board of the District of Otago for the year 1922:—

Board.—The constitution of the Board is now as follows: Urban Area—Messrs. James Wallace, J. H. Wilkinson, R. H. S. Todd, and Leonard Sanderson; North Ward—Messrs. George Livingstone and A. E. Lawrence; Central Ward—Messrs. James Smith and James Horn, M.P.; South Ward—Hon. D. T. Fleming, M.L.C., and Mr. George W. K. Wood. Mr. James Wallace was elected Chairman (his third term in office). Thirty-nine meetings of the Board were held during the year, the average attendance being eight. The following were the Board's representatives on various educational bodies: Council of the University of Otago—Mr. J. Wallace; Otago High Schools Board—Hon. D. T. Fleming, M.L.C., and Mr. W. R. Brugh; Waitaki High Schools Board—Mr. James Mitchell; Boards of Management of Technical Schools—Dunedin, Messrs. J. Wallace, J. H. Wilkinson, and James Horn, M.P.; Oamaru, Messrs. George Livingstone and James Mitchell; Milton, Mr. John Bowie, B.A.

Number of Schools.—The number of schools open at the end of the year (including four household schools) was 259, or five more than in 1921. One hundred and fifty-four schools were sole-teacher schools, forty-eight had two adult teachers, twenty-eight had three adult teachers, and twenty-nine had four or more adult teachers.

Attendance of Pupils.—The average roll, average attendance, and percentage of average attendance for the year were as follows: Average roll, 22,022; average attendance, 20,271; percentage, 92.05. The figures show an increase over the previous year of thirty-one in the roll number, a decrease of four in the average attendance, and a decrease of 0.15 in the percentage of attendance.

The following table shows, since the institution of the Otago education scheme in 1856, the number of schools, teachers, and pupils:—

Year.		Number of Schools.	Number of Teachers.	On the Roll.	Average Attendance.	Percentage of Attendance, Otago District.	Percentage of Attendance for Whole of Dominion,	
185657	• •		5	7	••	236		• • .
1886			181	510	22,255	18,583	83.8	$79 \cdot 3$
1916			261	754	21,880	20,237	92.4	88.6
1921			254	797	21,991	20,275	$92 \cdot 2$	89.8
1922			259	812	22,022	20,271	92.05	• •

The average attendances in the secondary departments of district high schools were: Balclutha, 68; Normal, 52; Tokomairiro, 49; Alexandra, 44; Lawrence, 37; Port Chalmers, 29; Tapanui, 23; Palmerston, 23; and Owaka, 19: total, 344—an increase of 33 over the previous year. Owing to decrease in attendance the Mosgiel District High School was disestablished at the end of June. Secondary classes were started at the Owaka School at the beginning of the year. Grants have been sanctioned for equipping the cookery and science rooms erected last year at the Alexandra District High School, and it is hoped that instruction in these subjects will shortly be commenced.

Teachers.—On the 31st December there were in the Board's service 812 teachers, classified as under:—

				Males.	Females.	Total.
Head teachers			 	98	<b>2</b>	100
Sole teachers			 	41	118	159
Assistant teachers			 	68	273	341
Organizing teacher			 	1		1
Training College sta	ıff		 	6	<b>2</b>	8
				-	Market Street	***************************************
Total of ac	lult teachers	3	 	214	395	609
Pupil-teachers			 	17	45	62
Probationers			 	23	72	95
Teachers of needlew	vork		 		32	32
Manual and technic	eal (special t	eachers)	 . ,	8	6	14
Total of al	ll teachers fo	or 1922	 	262	<b>55</b> 0	812

The following table shows the position with regard to the number of teachers who held teachers' certificates in 1921 and 1922:—

Year.			Classifie	d Teachers.	Holders o	of Licenses.	Unclas Unli	Total Number.	
	3. 0011		Number.	Percentage.	Number.	Percentage.	Number.	Percentage.	Total Number.
1921			500	82·1	13	2.1	96	15.8	609
1922		• •	520	85.4	5	0.8	84	13.8	609

During last year 222 young persons (comprising 154 females and 68 males) entered the teaching profession in Otago, viz.: As pupil-teachers, 21 females and 12 males; total, 33: as probationers, 39 females and 11 males; total, 50: as Training College students, 94 females and 45 males: total, 139. The ratio of male teachers to female teachers employed in this district is—Adult teachers, 100 to 185; pupil-teachers and probationers, 100 to 295. During the year the Board made 165 appointments of adult teachers. Twenty-eight teachers left Otago to take up appointments in other districts—five went to Auckland, five to Hawke's Bay, one to Taranaki, four to Wellington, one to Nelson, nine to Canterbury, two to Southland, and one to Samoa. Seven teachers entered the Otago Board's service from other districts. Of the eighty-three pupil-teachers and probationers admitted to the service fifty-five had passed the Matriculation Examination, twelve had obtained partial Matriculation, one had a lower leaving-certificate, and fifteen had passed the Intermediate or the Public Service Entrance Examination. It is worthy of note that the young people entering the teaching profession in this district have distinctly higher educational qualifications than formerly. Eighty per cent. of those admitted last year had Matriculation or partial Matriculation status. For 1920 and 1921 the percentages were 44 and 55 respectively.

Finance. -The main items of expenditure are shown below in comparison with the figures for the previous year:—

	1921.			1922.			Increase or Decrease.			
Teachers' salaries and lodging-allowances Payments to School Committees for incidental expenses	£ 179,280 10,253	6	- 1	170,962	3		Dec.	£ 8,318 151	2	d. 8 10
School buildings, purchase of sites, manual and technical buildings and apparatus	39,162	4	1	28,781	3	7	Dec.	10,381	0	6
Administration	4,908	18	8	5,090	10	7‡	Inc.	181	11	11

<sup>\*</sup> Includes two-fifths of Training College staff. organizing teachers' travelling-expenses.

† Includes half salary of Training College staff.

† Includes

For the conveyance of children to school and for the board of children who had to live away from their homes in order to attend school the Board expended £3,944 17s. 8d., of which the Department contributed £3,500 8s. 1d. Of the balance, the Board received £9, proceeds of the sale of an unused conveyance, and contributed the sum of £435 9s. 7d. out of its General Fund. The expenditure shows a decrease of £247 17s. 3d. as compared with the previous year. Conveyance allowance was paid in respect of 519 children and boarding-allowance for eighty-seven children. The expenditure on school buildings included—General maintenance, repairs, alterations, small additions, and rents, £4,704 6s. 5d.; new buildings, £8,951 19s. 11d.; rebuilding, £1,814 7s. 10d.; purchase of sites, £1,353 10s.; manual and technical purposes, £1,949 17s. At 31st December, 1921, the net balance to credit of all accounts was £24,003 16s. 11d.; the total receipts for the year 1922 amounted to £294,525 15s. 6d., and the total payments to £290,787 1s. 8d. The net balance to credit at 31st December last was £27,742 10s. 9d.

Junior and Senior National Scholarships.—From the public schools in this district there were for the Junior National Scholarships 240 competitors, and for the Senior eighty-nine competitors; thirty-one juniors (12·9 per cent.) and seventeen seniors (19·1 per cent.) were successful in gaining scholarships. Six of the seventeen senior scholarships awarded were gained by pupils of the Board's district high schools. Of the 231 junior scholarships awarded in the Dominion, Otago public-school candidates gained 15·1 per cent., and of the 130 senior scholarships warded, Otago candidates gained 13·8 per cent.

Inspection of Schools.—The Inspectors group the schools according to their efficiency as follows: Excellent or very good, 17·3 per cent.; good, 50·4 per cent.; very fair, 25 per cent.; fair, 7·3 per cent. As compared with the previous year, the schools in the "good" group have increased by about 6 per cent. of the whole. The highest and lowest groups are about the same as in 1921.

In their report the Inspectors direct attention to the following points:-

(1.) The increased number of changes in the teaching staffs, both in the city and country schools,

noticeable during the past few years, is not conducive to the best interests of the pupils.

(2.) Some teachers who group the upper standards have evidently devoted their efforts chiefly to the preparation of the Standard VI pupils for their proficiency certificates, to the detriment of the other classes of the group, under the impression that the Inspectors' estimate of their efficiency as teachers will be based mainly upon the number of proficiency certificates gained by their pupils. The Inspectors seek to remove this misconception, and point out the futility of the practice and its prejudicial effect upon the progress of the pupils.

prejudicial effect upon the progress of the pupils.

(3.) Experienced teachers are encouraged to carry out experiments in educational practice where they can do so without detriment to the pupils, and the Inspectors report that several well-qualified teachers have lately undertaken work of this nature with satisfactory results. Intelligence tests designed to give some reliable indication of the mental development of the pupils have been carried out in quite a number of schools. The Inspectors' opinion is that, while the results of these tests may be valuable in confirming the teacher's judgment of a pupil's capacity or attainment, it is unwise for a teacher to rely on these alone when determining the classification of his pupils.

A modified form of what is known as the Dalton plan has for some months been in operation in a division of a secondary department of a district high school in this district, the subjects treated being English, history, algebra, and mathematics. The headmaster considers it has been successful, and proposes to extend the method to the senior classes and to include geography and geometry. The Inspectors are inclined to recommend that, for the present, experiments of this nature should be confined to the secondary department, the primary pupils being, they think, too immature mentally to work independently of the help and guidance of the teacher.

(4.) The Inspectors note with approval the increasing number of schools where the services of the pupils are utilized in carrying out playground supervision. The staff are thereby relieved of many small duties, and the pupils receive a good training for using, with advantage to themselves and

others, the larger liberty which will be theirs on leaving school.

(5.) District high schools: Of forty-nine pupils in the secondary departments last year, thirty-six obtained either a full or a partial pass in the Matriculation Examination. The lengthening of the Matriculation course in these schools to four years is deemed advisable, to ensure more thorough and better assimilated work and a sounder preparation for advanced work in the case of those who are

looking forward to a University course.

(6.) Physical instruction: The physical instructors have during the year reported upon the work of 368 teachers, the results being as follows: 27 were excellent, 130 very good, 126 good, 77 very

satisfactory, 7 satisfactory, and 1 fair.

(7.) Special attention is directed to the modes of instruction in reading and composition, and valuable advice is given regarding the teaching of these subjects. The Inspectors are of opinion that the standard of marking adopted by the headmasters in their term examinations in these subjects, especially in Standard VI, is too low, and should be raised.

Of the 2,003 pupils who in 1922 left the primary schools in this district, 1,505 (or 75 per cent.)

had passed Standard VI, and 498 (or 25 per cent.) had not passed that standard.

Public-school Certificates.—Of the 2,074 pupils in Standard VI in the public schools at the time of the annual examinations, 72.9 per cent. gained proficiency certificates, 12.3 per cent. gained competency certificates, and 14.8 per cent. failed. Of the competency certificates, eleven were endorsed for admission to a technical school. The proficiency results were lower by 3.1 per cent.

than in the previous year, and by 7.1 per cent. than in 1920.

Manual and Technical .-- In all schools instruction in elementary handwork (paper-work, cardboard, plasticine, brushwork) was given as prescribed by the syllabus. Cookery classes were conducted at thirteen centres and woodwork at 12 centres; thirty-two schools took part in the cookery instruction and thirty-one in the woodwork instruction. Swimming and life-saving classes for the pupils of Standard IV were held as formerly at the Dunedin Municipal Baths, and similar classes for the pupils of Standards IV, V, and VI were conducted at the Oamaru Municipal Baths, and also at the Alexandra, Coal Creek, Duntroon, Tapanui, Waihola, and Naseby Schools. The average attendances at these special classes were: Cookery, 1,315; woodwork, 1,471; swimming and life-saving, 1,332. The expenditure on manual and technical instruction was: Salaries, material, &c., for school classes, £6,231 13s. 9d.; buildings, furniture, and fittings, £1,949 17s.: total, £8,180 10s. 9d.—being a decrease of £3,447 9s. 1d. as compared with the previous year.

Agricultural Instruction.—That the lessons, problems, and manual work associated with a wellmanaged school-garden can be made to contribute materially towards fulfilling the aims of primary education becomes increasingly apparent each succeeding year. It is also gratifying to note that in most of the city schools arrangements have been made for the use of contiguous areas to permit of instruction in elementary agriculture being co-ordinated with the other subjects of the school course. Such co-ordination is no less vital to city children than to those in the country. During the year classes were recognized in 207 primary schools, and the rural science course was followed in the district high schools. The Board continued its support of the efforts which are being made towards improving the school amenities, by arranging for the distribution of 4,100 additional ornamental shrubs from This annual assistance during the past eight years is reflected the Training College students' garden.

in a marked improvement of the grounds of the recipient schools.

School Buildings.—The work of the building department for the year just concluded has been much the same as in recent years. Prices are not by any means back to normal, and for this reason the amount of work that can be carried out is restricted to essentials. Steady progress is, however, being made in overtaking work that fell behind during the war period, and it is hoped soon to have our buildings again in quite a satisfactory condition. This does not apply to interior painting, which cannot be said to be such an urgent matter. In addition to ordinary repairs and painting, &c., the work carried out has included a new brick building at Anderson's Bay to accommodate the infant classes, and a detached building at Seacliff to provide an additional class-room. The S Committee and residents contributed handsomely towards the erection of their building. work has been done in the direction of improving schoolrooms, and providing extra rooms when this could be done at small cost by slight alterations to gymnasiums, or by subdividing rooms too large for present needs. Schools at which such work has been effected include Karitane, Mosgiel, Macandrew Road, Port Chalmers, Weston, and Teaneraki. At Beaumont a hall has been brought into use, and at Musselburgh a church building is being rented. The school hall at Wakari has been enlarged, this work being carried out by the Committee, with the Board's assistance. A good deal of interior renovation has been done to teachers' residences, changes of teachers in the majority of cases making this necessary. The teacher's cottage at Otanomomo has been shifted to a new site beside Outhouses have been renewed and shelter-sheds erected at quite a number of schools. The grounds at North-east Valley, North-east Harbour, and Awamoko have been extended and improved.

Fallen Soldiers' Memorials have been erected at a large number of schools by the residents, the Board's consent being previously obtained. In most cases the memorial has taken the form of entrance gates and arches, the principal ones being North-east Valley, Kaikorai, Mornington, Green Island, Oamaru South, and Palmerston. Rather more than the average amount of asphalting-work has been done. This applies both to new work and repairs. Important remodelling-work at Arthur Street School was entered upon before the year closed.

School Libraries.—Subsidies for the purchase of books, pictures, and book-cases were granted to

sixty-eight schools, the total amount paid by the Board being £156 0s. 11d.

Free School-books.—The children of parents in necessitous circumstances and pupils coming to Otago schools from other education districts where different books were used received grants of books to the value of £58 19s. 6d.

Training College. At the close of the year there were in the College 277 students (202 women and 75 men). Of these, 139 were in their second year and 138 in their first year; 193 belonged to Otago, 61 came from Southland, 10 from Canterbury, 8 from Hawke's Bay, 2 each from Nelson and Taranaki, and 1 from Auckland.

Truancy and Irregular Attendance.—The Attendance Officer reports that 126 notices were served on parents or guardians for infringements of the Education Act, 1914, 147 cases of irregular attendance were investigated, seventeen summonses were laid under section 62 of the Education Act, and fourteen convictions were obtained, three informations being withdrawn on receipt of doctors' certificates. The fines amounted to £3 11s. Pupils to the number of 126 in classes below Standard VI left the city and suburban schools at the end of the December quarter, 1922. Of this number, seventy-six had passed only Standard V, thirty-one Standard IV, seventeen Standard III, and two Standard II. I have, &c.,

The Hon the Minister of Education, Wellington.

J. WALLACE, Chairman.

#### SOUTHLAND.

Sir,—

In accordance with the requirements of the Education Act, 1914, the Education Board of the District of Southland has the honour to submit the following report of its proceedings for the year 1922:—

The Board.—The members in office at the beginning of the year were Messrs. P. A. de la Perrelle, M.P. (Chairman), F. G. Blake, G. F. Johnson, H. E. Niven, F. W. Preddy, H. Smith, J. C. Thomson, M.P., and J. D. Trotter. At the election held in July Messrs. Johnson and Perrelle were re-elected unopposed for the West and Central Wards respectively. For the Invercargill Urban Area Mr. Blake was opposed by Mr. John Stead, the voting resulting in the election of Mr. Stead. For the East Ward no nominations were received. The Board, in terms of section 18 of the Act, elected Mr. H. Smith, the retiring member, to fill the vacancy. Mr. H. E. Niven was elected Chairman. An election was held in October to fill the extraordinary vacancy caused by the death of Mr. Stead, the voting resulting in the election of Mr. A. Bain. The Board's representation on other educational bodies was as follows: Southland Boys' and Girls' High Schools Board—Messrs. P. A. de la Perrelle, M.P., and J. C. Thomson, M.P.; Gore High School Board—Messrs. H. E. Niven, H. Smith, and T. Taylor; Southland Technical College Board—Messrs. H. E. Niven and J. D. Trotter; Otago University Council—Mr. J. C. Thomson, M.P.; Dunedin Training College Committee of Advice—Mr. J. C. Thomson, M.P.

Meetings.—During the year to which this report refers the Board held twelve ordinary and one special meeting, and the executive committee, which consists of all the members of the Board, met

twenty-two times. The attendance of members was very satisfactory.

Schools.—The number of schools in operation at the end of 1922 was 191, a decrease of one under the number at the end of 1921. Now that the financial position of the Dominion has improved, the Board anticipates that new settlement will progress rapidly in this district, and that with the expansion there will be a demand for educational facilities. If the applications now before the Board for the establishment of new schools and the reopening of schools closed during the early part of the year are granted, the number of schools in operation in this district at the end of 1923 should be at least two hundred.

Demonstration School.—The Board desires to congratulate the Department on its action in granting the Board's application for the establishment of Charlton School as a model school for this district. Although we received from the Training College during 1921–23 a larger number of teachers than usual, the proportion of untrained to trained teachers is still too high. The establishment of the model school at Charlton will relieve the situation by giving the inexperienced teacher an opportunity to obtain expert guidance and instruction in methods of teaching and school-management.

Attendance of Pupils.—The attendance at the schools continues to increase steadily. The number on the roll at the end of 1922 was 12,468, an increase of forty-four during the year, and a record for this

district. The average roll was 12,207, and the average attendance 11,063.

The following are the figures for the years named:—

	Year.		Average Roll.	Average Attendance.	Percentage.
1913		 	10,966	9,671	88 <b>·2</b>
1918		 	11,846	10,475	$89 \cdot 2$
$1922 \dots$		 	12,207	11.063	90.0

It may be of interest to note that the average attendance for the year under review, 11,063, was composed of 5,859 boys and 5,204 girls—that is approximately in the ratio of 53 and 47 per cent. for the respective sexes.

The Attendance Officer, in his annual report to the Board, states that he sent out during the year 317 warning notices to defaulters, issued twenty-four summonses, and secured eighteen convictions, the amount of fines inflicted being £5 7s.

Teachers.—At the end of the year there were 474 teachers in the service of the Board, occupying positions as under:—

				Males.	Females.	Total.
Head teachers		 	 	64	17	81
Sole teachers		 	 	48	64	112
Assistant teachers		 	 	23	142	165
Total adult t	eachers	 	 	135	223	358
Pupil-teachers		 	 	15	17	32
Probationers		 	 	8	42	50
Teachers of needlewor	k	 	 		27	27
Manual and technical	teachers	 	 	3	4	7
Totals		 	 	161	313	474

Of the 358 adult primary-school teachers in the service of the Board, 234 held teachers' certificates, 4 held licenses to teach, while 120 were uncertificated. The Board regrets that the uncertificated teacher still remains with it in considerable force. With the substantial increase in the Education vote it was anticipated that the number of uncertificated teachers in the service of this Board would be reduced considerably. During the year several teachers who were "resting on their oars" were notified that unless they secured by the 31st December, 1922, a partial pass for Class D or a license to teach they would be called upon to show cause why their services should not be dispensed with. Although the Board has received into its service this year a larger number than usual of ex-Training College students, the fact remains that the difficulty in filling some of the lower-grade positions in the service has been keenly felt this year.

Instruction of Teachers.—During the year Saturday classes for the training of pupil-teachers, probationers, and uncertificated teachers were held in Invercargill for a period of twenty-seven weeks, and in Gore for twenty-six weeks, there being eighty-four teachers in attendance at Invercargill and thirty-three at Gore. The subjects in which instruction was given and the roll numbers in each case were as follows: Invercargill centre—Drawing (three classes), 49; agriculture (two classes), 56; hygiene, 12; general elementary science, 14; physical drill (two classes), 43. Gore centre—Drawing, 30; agriculture, 20; hygiene, 10; general elementary science, 13. In addition to these Saturday classes, afternoon classes on Tuesdays and Thursdays were held in Invercargill regularly throughout the year for the benefit of town and suburban pupil-teachers and probationers, the number of students attending being twenty-six. Owing to delay in getting the classes established and to the fact of the certificate examinations being held four months earlier than hitherto, instructors found it impossible to overtake the prescribed course of work before the date of the examinations. meet the altered conditions the Board should have the Department's authority to arrange for the commencement of these classes immediately the schools resume after the summer vacation. As a result of the introduction of new regulations the control of the Saturday classes in Invercargill passed out of the hands of the Board, but in view of all arrangements for the year's work having already been made the Board was allowed to continue in charge for the year just ended. The Board would again strongly protest against the control of classes, established for the benefit of its own teachers, being taken from it.

School Libraries.—With a view to the establishment of school libraries, or adding to those already in existence, contributions amounting to £86 13s. 6d. were received during the year from nineteen schools. As these contributions carry a subsidy of an equal amount, and as in addition each contribution, in accordance with the regulations, carries also a grant out of the Board's funds, a sum of over £200 was available for expenditure in connection with the purchase of books or library accommodation. When one considers, however, the educational value of a good school library in increasing a child's general knowledge and in cultivating a love for good literature it is astonishing that a larger number of schools should not have taken advantage of the facilities provided for obtaining without any great effort a supply of approved books.

Teachers' Library.—There is in the Board's Office a library consisting of several hundred books on educational subjects, and available to all teachers in the Board's service. This valuable collection

of books is not, however, used to the extent that it might be. The amount available for expenditure on new books each year is not large, but with a view to keeping the library up to date the stock of books is constantly being added to.

Subsidies on Voluntary Contributions.—During the year applications were received for subsidy on voluntary contributions amounting to £1,169 13s. 3d. Of this sum £797 8s. 1d. was raised for improvements to school gardens and grounds; £86 13s. 6d. for school libraries; £192 4s. 9d. for buildings, school equipment, and material; £23 9s. 10d. for the purchase of basket-balls; £65 15s. 7d. for the purchase of fuel; and £3 11s. 6d. for flags.

for the purchase of fuel; and £3 11s. 6d. for flags.

\*Training College.—Of the forty-four pupil-teachers and probationers who completed their apprenticeship at the end of the year no fewer than thirty-three applied for admission to the Dunedin

Training College in order to further qualify themselves for more efficient service.

Continuous Readers.—Due, no doubt, to the fact that Education Boards had credit balances on account of the School and Class Libraries Account, the Department made no grant to Boards this year for the purpose of supplying schools with supplementary continuous readers, and the free supply of class-books in necessitous cases and in cases where parents who have purchased new books for their children remove to another district. Again the Board would urge the Department to purchase all school material in bulk from the manufacturers, and sell at cost price to Education Boards.

Conveyance and Board of Pupils.—During the year the amount disbursed by the Board on the conveyance and board of children was £2,170–19s., as compared with £1,936 in 1921. Once again the Board would urge the Department (1) to increase the allowance to children who are compelled to use a conveyance owing to the distance of their home from a school, and (2) to pay the allowance to children who ride to school if it can be shown that the road is dangerous for a vehicle driven by a pupil. The Board is firmly convinced that if the above recommendations are acted upon they would prevent the undue multiplication of small schools.

School Certificates.—For the Proficiency Examination 1,055 primary-school pupils out of a roll number of 1,067 were presented for examination. Of these, 742 gained proficiency certificates, 155 gained competency, and 14 gained endorsed competency, while 144 failed. The percentage of passes was 85·4 (proficiency, 69·6; competency, 14·5; endorsed competency, 1·3). For the same examination the private registered schools in this district presented 95 pupils out of a roll number of 95. Of these, 58 gained proficiency certificates, 13 gained competency, and 2 gained endorsed competency, while 22 failed. The percentage of passes was 76·8 (proficiency, 61·1; competency, 13·7; endorsed competency, 2·1).

Elementary Handwork.—Instruction in the usual handwork subjects was given in all schools throughout the district, the requisitioned material being supplied by the Department for instruction in plasticine-modelling, cardboard-work, paper-folding and paper-cutting, pastel-work, and brushwork. All handwork materials are now provided through the Department, but, owing to the delay in receiving supplies, considerable inconvenience was occasioned through schools having, in most cases, no materials to commence the year's work with. The Board would also record its emphatic protest against the reduction that has been made by the Department in the quantity of material requisitioned for. It seems inevitable that work must be seriously hampered, if not discontinued, before the close of the year, through the inadequacy of the supplies available.

Needlework.—Needlework was taught by special instructresses in twenty-seven schools where there was no female teacher. About 275 girls were thus enabled to receive instruction which would otherwise have been impossible. The Board feels, however, that the number of schools where needlework is not taken could be still further reduced, and that with a little effort on the part of Committees suitable instructresses could be secured in other districts also. In forty schools instruction was given in advanced needlework, the average number of girls in attendance being 857.

Woodwork and Cookery.—Classes in these subjects were held as usual in the manual-training schools at Invercargill, Gore, and Riverton. The Riverton classes were held for a period of three months, the average attendance from the thirteen schools represented being 105 boys and 97 girls. At Gore, which is a full-time centre, pupils attended from twenty-four primary schools, the average attendance being 232 boys and 226 girls. In addition four classes both of boys and girls were taken for instruction from the High School, there being an average of 68 boys and 68 girls in attendance. To the Invercargill centre came pupils from eleven town or suburban schools for half-day lessons, and from thirty-four country schools for whole-day lessons, the average number of pupils attending being 604 boys and 594 girls.

Agriculture.—Recognized classes in agriculture were held during the year at 119 schools—an increase of six over the figures for the previous year. The total number of children who received insturction was 1,746. Continued interest is being taken throughout the district in the matter of effecting improvements to and beautifying school-grounds. With this object in view a sum of £797 8s. 1d. was contributed voluntarily, and with subsidy thereon a sum of nearly £1,600 was thus available for this important work. It is to be regretted, however, that in still too many cases the interest of residents cannot apparently be sufficiently aroused to enable a forward move to be made in this direction. The fact that, subject to certain conditions, a pound-for-pound subsidy is available on all contributions raised for purposes of having improvements carried out enables work to be undertaken which would not otherwise be possible.

Physical Measurements.—This subject was given a place in the school curriculum in five schools—a decrease of two schools since the previous year. Only in cases where facilities are not yet available for the establishment of a school-garden is this subject now taken. The number of children receiving instruction was 249.

Swimming.—In view of the importance of having instruction given in swimming wherever possible the Board sincerely trusts that the Department will see its way to reinstate the payment of capitation on school classes conducted in this subject. In the opinion of the Board every encouragement should be given to enable school-children to receive instruction in a subject which should be made compulsory wherever facilities are possible.

Interruptions to School-work.—For some considerable time past the Board and the Inspectors have been of the opinion that an appreciable part of the teaching time in our schools was being appropriated by outsiders in various ways—e.g., for the purpose of addressing the pupils on certain aspects of social life and activity, or of canvassing for the support of charitable institutions. In order to obtain information regarding the matter the Board held a conference with representatives of the School Committees and headmasters of the town schools. As a result of its deliberations the Board has passed regulations which will prevent in future the school hours being encroached upon by outside activities, unless the latter are of undoubted necessity and worth.

Medical Inspection.—The School Medical Officer, together with the school nurse, continue to do excellent work in this district. When the scheme for the medical inspection of school-children by the School Medical Officer was first put into operation a certain amount of opposition was shown by parents; instead of opposition we now find that parents are only too eager to co-operate with the

Medical Officer, who receives frequent requests from parents for a conference.

School Dentists.—Early in the current year (1923) the Board was advised that two school dentists would be appointed for this district on condition that the Board provided a suitable building, rent-free, and bore the necessary expense of fitting it up. The Board readily agreed, recognizing the urgent need for a scheme of dental treatment. In accepting the conditions under which a school dental clinic is to be established in Invercargill the Board is desirous to know why, in one education district at least, the cost of fitting up a room was borne by the Health Department, while this Board is called upon to pay the cost of the necessary fittings.

Physical Instruction.—The Department's physical instructor reports that during the year he paid two visits to sixty schools, and one visit to 110 schools. The instructor reports that the work done at the schools this year shows a great improvement both in the quality of the instruction given by the

teachers and in the general physique of the pupils.

Organizing Teachers.—The Inspectors report that the Board's organizing teachers continue to do

yeoman service among the teachers under their charge.

Buildings.—For some years past the Board has carried out its building programme—new buildings, additions, maintenance, &c.—with its own staff of workmen. While recognizing that the ordinary repairs to school buildings and teachers' residences can be carried out more satisfactorily by day labour, the Board is now strongly of the opinion that all new works should be tendered for, a course that is being followed by all public bodies dealing with Government grants, and by practically all commercial firms. During the past year the following works were completed: Gore (new school); St. George (addition); Morton Mains Siding (new residence). The works now in hand are—Ercetion of a new school at Otama; additional conveniences at St. George; addition to residence at Lochiel. Owing to the action of the Government in reducing the amount of the maintenance grant for 1922 by 10 per cent. (approximately £600) the Board has been somewhat hampered in carrying out its general repair work in connection with school buildings and teachers' residences.

Financial.—A reference to the Board's balance-sheet will disclose a considerable improvement in regard to the Board's financial position. The credit balance at the beginning of the year was £3,924 3s., and at the end of the year this stood at £8,715 11s. 2d. The total receipts during the year were £138,881 4s. 4d., and payments £134,089 16s. 2d., to which must be added £1,585 2s. 10d. issues from workshop in excess of purchases. Although the Board has a credit balance at the end of the year of £8,715 11s. 2d., it is to be noted that practically the whole of the Rebuilding Fund, amounting to

£3,500, is earmarked for expenditure in 1923.

I have, &c.,

The Hon. the Minister of Education, Wellington.

HORACE E. NIVEN, Chairman.

# H. EXTRACTS FROM THE ANNUAL REPORTS OF PRINCIPALS OF TRAINING COLLEGES.

# 1. AUCKLAND.

# (H. G. Cousins, M.A., Principal.)

I beg to submit my annual report for the year 1922. The admission of a large number of students, supplementing those already in College, led to considerable overcrowding and made the year's work very difficult. The total admissions for the year were 61 men and 124 women—total, 185 new students. The following shows the numerical strength of the College at the end of the year: Men: Division A, 57; Division B, 34; Division D, 3; clause 33 (4), 3: total men, 97. Women: Division A, 222; Division B, 27; Division D, 2: total women, 251. Total men and women, 348.

Ratio of numbers of men to women:---

|                  |      |      | Men.   |   | Women. |           | Mon    | . V | vom  | en.       |
|------------------|------|------|--------|---|--------|-----------|--------|-----|------|-----------|
| $\mathbf{Y}$ ear | 1920 | <br> | <br>66 | : | 133    | <br>Ratio | 1.     | :   | $^2$ | (approx.) |
| 99               | 1921 | <br> | <br>68 | : | 205    | <br>,,    | 1      | :   | 3    | ,,        |
| ,,               | 1922 | <br> | <br>98 | : | 254    | <br>,,    | $^{2}$ | :   | 5    | ,,        |

These rather sudden changes are interesting. In 1920 we had an increased number of men following on the return to the Dominion of men of the New Zealand Expeditionary Force. In 1921, when the Minister called for a large number of students to be trained, we admitted few extra men, though the increase in the number of women was about 50 per cent. This year has seen a marked increase in the number of men, bringing the ratio of men to women to 2:5, as against 2:6 for 1921. There is little doubt that this change is due to a decreasing attractiveness of other professions and industries under the Dominion's changing economic conditions. This is shown clearly, I think, in the large increase in the number of men who have come into College under Division B—i.e., directly from a secondary school. Whereas 36 per cent. of the men are of Division B, only 9 per cent. of the women are of this division.

With 254 women in College the Wellesley Street building that was occupied by them in 1921 was quite inadequate, and considerable reorganization of the work resulted. The men who had been located at the annex were brought back to Wellesley Street and the annex was used for half of the women, the other half working at Wellesley Street. At the end of the half-year a change was made so that those women who had been located at the annex returned to Wellesley Street, and vice versa. As some subjects, as drill, had to be taken entirely at the annex, and others, like model lessons, at Wellesley Street, where the Normal School children were at hand, both students and staff had a considerable amount of journeying backwards and forwards from one building to the other. In spite of our best efforts at organization, all kinds of difficulties have arisen in the working of a College under these conditions. One of the greatest difficulties has been the great congestion in the common rooms and study-rooms, and particularly in the library.

The practical training of 352 students was no slight task. The staffs of the Normal and Richmond Road Schools were supplemented by the appointment of a considerable number of "associated normal teachers" in city and suburban schools to carry out this important work. In the third term the new Curran Street School also took up this work, and the number of "associated normal teachers" in other schools was reduced accordingly. The difficulty of keeping all these teachers closely in touch with the College aims, so as to maintain a unity of effort and purpose, has not been adequately met during the year, and it will be necessary to effect an improvement next year. As the capability of teachers for this work varies very greatly, it was only to be expected that we could not get within convenient reach of the College a sufficient number of teachers really skilled in this work. The difficulty has been made greater by the fact that some of the teachers newly appointed are quite inexperienced in this work.

On the academic side much good work has been done during the year. Blackboard drawing has shown a distinct general advance, and excellent work has been achieved by a considerable number of students. The plan of providing in the College for classes for the "Class C" course in English instead of at the University has now been carried through its second year, and is proving highly successful. I have noted with pleasure the improved knowledge of psychology since extra time was allotted to this subject on the appointment of Dr. Fitt to the staff two years ago. Speaking generally, and considering the variety of subjects with which the students have to deal, the work done has been of good standard, a pleasing feature being the amount of originality shown. This was very evident in handwork, where a great deal of very good work was done.

evident in handwork, where a great deal of very good work was done.

With the exception of a few students who misjudged at the beginning of the year what they could accomplish and fell far short of their aim, the work of our students at the University this year has been very satisfactory, as I have no doubt the result of the November examinations will show. This is especially true of the outgoing men, of whom the great majority have seriously attempted a University course, most of them successfully. My list of recommendations for trained-teachers' certificates this year shows success above the average on the part of the students in raising their academic status. This, no doubt, is partly the result of the strengthening of our staff two years ago.

Now that the College has grown to be so large it is evident that there enters each year a number of students who lack enthusiasm for their profession and who are not prepared to give much in the way of service, being satisfied with the minimum of achievement. They live selfish lives, seeking pleasure at the expense of energy required for their professional work. As some of them have considerable ability, their influence is demoralizing to other students. I think it would be a good thing for the profession if the money spent on them could be saved and expended on those whose enthusiasm will lead them to fine achievement.

A week's refresher course in drill, held under the Director of Physical Culture, Mr. Longworth, a short time before the strain of the University examinations was to make itself felt, proved both enjoyable and helpful to the students.

The year has been memorable for the opening of a College hostel for women at Rocklands Hall, Epsom. In spite of some initial financial loss, this institution gives promise of being a most successful adjunct to our College, and I think it will not be long before the financial basis is quite satisfactory. In every way it is proving helpful, and I think the Board has reason to be proud of it.

Before concluding my report I want to make quite clear the need for better conditions under which to carry on the College work. What has been accepted as a temporary arrangement with a view to complying with the Minister's request that as many students as possible should be trained is in no way satisfactory for the general working of the College. Already there is evidence that harm is resulting from the congestion and the awkward conditions under which the work is being carried on. To some extent this harm will be cumulative, and therefore it is very desirable that better arrangements should be made at the earliest possible time.

### 2. WELLINGTON.

# (J. S. TENNANT, M.A., B.Sc., Principal.)

I have the honour to submit the following report on the work of the College for 1922:—
Roll.—The total roll for the year was—Senior students, 117; junior students, 160: total, 277.
While force of circumstances has necessitated and justified, as a temporary measure, this large increase, the staff are unanimous in their opinion that the present numbers are too large, even given adequate accommodation and staffing. Our contention is based mainly on the fact that a training college is not so much a teaching institution as it is one in which the student should come into personal contact with both the ideals and the practice of his preceptors. It is, of course, easy to have an efficient staff of both lecturers and masters of method, but it becomes impossible in a large institution to have the same persons performing those different but complementary duties. The total of 277 is made up of 203 women and 74 men—numbers which maintain the increase in the proportion of men noticeable since the war period. The accompanying table illustrates both aspects:—

|        | Yea   |     |  | Ŋ    | Number of Studen | nts.    | P <b>e</b> rcenta | ge of Roll. |
|--------|-------|-----|--|------|------------------|---------|-------------------|-------------|
|        | t. Ga | ır. |  | Mon. | Women.           | Totals. | Men.              | Women       |
| 1906   |       |     |  | 12   | 34               | 46      | 26.1              | 73.9        |
| 1914   |       |     |  | 27   | 85               | 112     | $24 \cdot 1$      | 75.9        |
| 1917   |       |     |  | 14   | 106              | 120     | 11.7              | 88.3        |
| 1921   |       |     |  | 49   | 147              | 196     | 25.0              | 75.0        |
| 1922   |       |     |  | 74   | 203              | 277     | $26 \cdot 7$      | 73.3        |
| (1923) |       |     |  | 66   | 228              | 294     | 22.5              | 77.5)       |

Classification.—The classification of students according to their various qualifications is as follows Division A, 175 (95 probationers and 80 pupil-teachers); Division B, 86 (no previous teaching experience); Division C, 6 (graduates); Division D, 10 (refresher course for teachers). The increase in the number of B students is more marked than in previous years, but the 1923 admissions show only a total of 21, with every prospect of none at all for 1924. While we recognize the prior claim of the junior teacher (pupil-teacher and probationer), we understood that the general policy of the Department was the gradual elimination of the pre-college apprenticeship and the ultimate substitution of a post-college probationership. Many of our best students come under the B and C divisions, and even if the present policy is adhered to we would most strongly recommend that a definite proportion of places be reserved for those divisions.

Districts.—The following shows the education districts from which the students were drawn: Wellington (including Marlborough), 124; Wanganui, 59; Hawke's Bay, 30; Taranaki, 28; Nelson, 27; Canterbury, 4; Otago, 2; Southland, 1; Auckland, 2: total, 277.

Accommodation.—This year the problem of accommodating students has not been so acute, as,

Accommodation.—This year the problem of accommodating students has not been so acute, as, owing to the financial stringency, many householders were very glad of the opportunity of augmenting reduced incomes by taking a few boarders. It must be remembered, however, that this relief is not only unsatisfactory, but is, in a district like Kelburn, only a temporary phase. One unfortunate result of this condition of things was that the competition of amateur boardinghouse-keepers gave some people the idea that the established hostels were exploiting students. It should be more clearly understood that the student allowance is an allowance, not a salary, and that it should be spent mainly in securing such suitable living-conditions as will enable the student most effectively to complete his or her professional training. Taking all the factors into consideration, we consider the

allowance paid to students, and hostel charges made on them, entirely reasonable.

Curriculum.—This staff provides instruction in the fourteen subjects prescribed in Training College Regulations, and, in addition, optional courses in English, history, psychology, geography, and phonetics—all subjects bearing very intimately on school-work. As supplementary to the physical drill, a considerable amount of time was devoted to organized games and swimming. Miss Aitken this year started a life-saving class, and some eighty students secured the Royal Life-saving Society's certificate or medallion. In this connection it is interesting to know that one of our students during the vacation justified this instruction by meritoriously rescuing a drowning person on the Napier beach.

University Classes.—The students, in addition to the Training College work, attended University classes as follows: English, 53; education, 130; mathematics, 26; Latin, 16; philosophy, 63; geology, 4; French, 14; history, 15; chemistry, 13; economics, 12; physics, 9; geography, 5; botany, 6; zoology, 3: total, 396. The term-examination results in this part of the work were—First-class passes, 21; second-class passes, 71; third-class passes, 210. The actual degree results are not yet available, but we can say in general terms that the year in this respect is the best we have ever had

Education as a University Subject.—At the beginning of the session Victoria College Council allowed me to associate members of the Training College staff in the University work, and I think

the results speak for themselves: B.A. pass—92 candidates, 87 passed; advanced—1 candidate, 1 passed; honours—1 candidate, 1 passed; diploma—2 candidates, 2 passed. The year is notable in that the University for the first time accepted its full responsibility in the higher training of the teaching profession. That the younger members of that profession appreciated their opportunity has been evidenced in many ways—most notably in the desire expressed by many to make some original contribution towards constructive education. The relationship of the training college to the University and secondary school is a somewhat anomalous one, which might, with benefit to all concerned, be made more definite. The constitution of the present Board of Advice appears to be the means whereby reforms might be most simply inaugurated. In raising this point I trust your Board will not misunderstand my motive. Its management of the institution in the past has invariably been directed towards its efficiency, but there are now many factors involved which are beyond its power of control (e.g., secondary teaching practice, certification of teachers, &c.), but over which the managing body should have more executive power.

Certificates.—One hundred and twenty-two students completed their course of training in December, and on the joint results of examinations and College recommendations the following certificates were issued: No recommendation (course incomplete), 6; D, 10; D and partial C, 26;

C, 70; B, 9; A, 1: total, 122.

Since its inception in 1905 the College has turned out over 1,000 certificated teachers—that is practically one-fifth of the total number of teachers now employed in the primary schools of the Dominion. I think I may, on behalf of these students, at least make the claim that their work and influence have brought college and school closer together, both in practice and in aims and ideals. The recent revision of the Teachers' Certificate Regulations has materially assisted in this

direction by requiring a larger measure of more purely professional work.

All our students were, within a reasonable time of the close of their training, placed in positions. One aspect of this matter appears to us to deserve mention. For several years the proportion of students appointed to assistantships in large schools has steadily decreased, while the number of pupil-teachers and probationers entering the College has increased. The result is that our ideal of a post-college probationership appears to be further off than ever. I quite admit that the preparatory year or two years of teaching experience has certain advantages, but, notwithstanding these, we are convinced that (1) the average pupil-teacher at a very critical period of his life acquires loose and irregular habits of study; (2) his practice in teaching, however carefully supervised (of necessity it is often not supervised at all), is entirely empiric, and, having no foundation in principle, becomes merely learning "the tricks of the trade." I further question either the fairness or the expediency of asking a busy teacher to undertake such double training. The post-college probationership obviates both those disadvantages, and would give what might practically be a third effective year of training—all students on leaving the College to become probationary teachers in selected schools for one or two years. The present two years of preliminary apprenticesnip could well be spent under expert direction at a secondary school, as is done in several of the Australian States.

I have discussed this matter on many occasions with the staff (both of the College and the normal schools), and, while opinions are divided on matters of detail, it is generally acknowledged

that-(1) By the second year there is practically no difference in the teaching-capacity shown by A and B students; (2) the B students are generally the more onthusiastic about their professional work; (3) the average B student has a more substantial scholarship; (4) no serious falling-off in the

quality of entrants would follow the complete elimination of the pupil-teacher.

Teaching Practice.—The problem of providing adequate teaching practice for nearly three hundred students has been our greatest difficulty, and it appears to us that the only satisfactory solution is the association of all the best city schools for practice purposes. The present system of payment to selected teachers places too many limitations on both College and headmaster. We feel that the school rather than the individual teacher should undertake the work, and be recompensed by a more liberal staffing. Arrangements for the practice of those who intend taking up secondary teaching are most unsatisfactory, as the whole responsibility of providing this practice is thrown on the College, which has no official connection whatever with the secondary schools available. The disestablishment of the secondary department at Thorndon in 1917 was agreed to on the understanding that the Education Department would make other official provision. This has never been done, and we are forced to the position of asking for the re-establishment of our secondary depart-

Social, &c.-Every student, in addition to his own work, is called upon to take his part in the College life by being an active member of the glee and dramatic clubs, the Debating Society, and the Students' Association. The benefits resulting have been manifest in many ways, but in none more conspicuously than in the fact that the whole institution has never worked more smoothly and effectively. The school has long been divided on the supposedly rival claims of the individual as opposed to those of the community, but it is slowly learning that they are complementary aspects of human progress. Great discoveries, great undertakings, great ideas, are the result of social as much as individual work, and consequently education cannot afford to neglect any means that make for training in citizenship, and its institutions must provide opportunities for actual living as citizens. The teaching of history, or civics, or morality, or patriotism alone is futile, just because it is true that thought is useless unless it leads to action. The school is a community "in little," but no school is so small that it cannot provide the best possible training-ground for all the civic virtues that really count. The potential power of a training college is such that the responsibilities outlined above appear to us to require continual reiteration.

Buildings, Grounds, &c.—The most noteworthy events of the year were the completion of the College Hall in July, the acquisition of the school-garden at Thorndon, and the levelling of the playground at Kelburn. The College Hall has enabled us to increase the number of students materially, to encourage the expressive side of our art work, especially in physical culture, music, and drama, and to give more concrete form to the corporate life of the school and the College. The school owes more to the play group and the playground than it does to any other educational factor, and that community which fails to provide adequately for the proper direction of this most natural of youthful impulses must be prepared to pay dearly for its lack of foresight, in a stunted physical, mental, social, and moral life. We stress this aspect of the play question because (1) we wish the assistance we have received from both the Board and Committee to be fully appreciated, and because (2) the public is inclined to overestimate the physical at the expense of the mental and social benefits derived from properly organized play.

### CHRISTCHURCH.

### (J. E. Purchase, M.A., Principal.)

I have the honour to submit my report on the Christchurch Training College for the year ending 31st December, 1922. The progress in all branches of work indicated in my report of last year has been continued, the gains have been consolidated, and further advances made in several directions.

One hundred and twenty-eight students completed their training. Very many are already appointed to positions in the service, and are, I hope, happily engaged in putting into practice the principles learned at College. The total number of students in attendance during the year was 244 (71 men and 173 women).

There still is in evidence among the first-year students a lack of knowledge of subjects required in a primary school, and I must once again urge that the secondary-school course for prospective teachers contain history, geography, nature-study, and drawing. It is to be regretted that so many enter College with little knowledge of these subjects. This necessitates the formation of extra classes after hours, attendance at which is a strain upon students and staff alike. Speaking generally, the young people offering for the profession are of a very suitable type, both intellectually and physically. The medical examination revealed very few weaknesses. It is distinctly noticeable that leave of absence for sickness is required by graduate students much more frequently than is required by any other class of student. This is probably due to the fact that the long University course has made too severe a demand upon their physical strength.

More extensive use has been made of associated schools in which to obtain teaching practice. Linwood entirely, and Richmond and Phillipstown partially, afford facilities for training students on the professional side. The associated teachers are very keen, enthusiastic and sympathetic, and of proved ability. They have given their best to assist the students, and their help is gratefully acknowledged. In order to obtain practice for teaching in a secondary school, arrangements were made with the Board of Governors and the Principal whereby the Girls' High School afforded teaching practice for graduate students. This arrangement was highly appreciated by the students allotted to that school, and must be regarded as the most important extension made during the year.

The attendance at the special class for backward children still continues disappointingly low. Probably this is due to difficulty of transport. I feel sure that there must be in the city schools a number of children labouring through the class subjects with great difficulty who would derive great benefit from the special methods adopted. Excellent work has been accomplished by the children who have regularly attended, and good progress has been made. The approach to the ordinary school subjects through manual activity has proved very successful. The children have acquired increased muscular control, and are enabled thereby to do much more for themselves. In addition, the work has been of such value educationally that their general progress has been most marked.

The training of students has been carried on in the manner indicated in last year's report. As a result of the restrictions placed upon students with regard to attendance at lectures at Canterbury College, Training College has become more nearly self-contained. This is logically the result of the growth of numbers and increase in staff. I regret, however, that it has resulted in the discontinuance of students at a course of lectures in economic geography. The subject does not form part of any degree course taken by our students, being a portion of the Bachelor of Commerce degree, but was so particularly adapted for our students that a very valuable source of instruction has been closed to us. The addition of the pass English to our time-table has very considerably increased the work in that subject, but it has had compensations. In most subjects the course taken has been the prescription for the teachers' C certificate, as contained in the Department's regulations.

\*\*Education.—As in previous years, the preliminary course in the principles of education has been taken at Training College, and the senior work—second year—at Canterbury College. The work was generally well done, and the examination results satisfactory. The number of students preparing education for honours and M.A. or the diploma is increasing each year. Five candidates sat for diploma last year, and all were successful. The subject is growing in favour, too, among outside students, so that the classes at Canterbury College are very largely attended.

Second-year English.—The work produced by students this year is a big improvement on last year's, and the general interest displayed augurs well for the future of these teachers. The course in general has been a survey of English literature, tracing the development of the drama, poetry, the essay, the novel, of foreign influences at different periods, with more attention to modern literature. The treatment of various forms of literature in the class-room has not been overlooked, though the main

object of the lectures has been cultural. In the realm of poetry the students were allowed a wide field of choice, and had to present their own criticisms and appreciations. In this way interest was stimulated both in pre-Tennysonian poets and in the great number of twentieth-century poets. connection with the English course a drama club was formed, though, unfortunately, all work had to be done out of College hours. Numbers of students, both first and second year, joined up. principal object was to read and study plays, and the second to produce them. In this way students gave readings of various plays of Goldsmith, Sheridan, Shaw, Gilbert, Barrie, and Galsworthy. Professor Shelly delivered lectures illustrated by readings on Ibsen and the Irish school. Reading and speaking have much improved. But, quite apart from this, the real object has been achieved during the English course-increased interest in drama, poetry, and all forms of literature, and there is in addition a seeking for advice on reading.

First-year English.—The work covered in English for first-year students was the work set out for the C certificate examination. The course was mapped out as a two-year course—the comparative study of literature and its development to be continued in the second year. Regular essay work was done throughout the year, the general level of attainment reached being very pleasing. Towards the end of the year attention was given to some modern tendencies in literature. A suggested improvement for the coming year is a less rigid adherence to the prescribed books and period, so as to

enable a wider acquaintance to be obtained with nineteenth-century and modern literature.

Physiography.—The first year's course has been devoted almost entirely to the physical-geography portion of the syllabus. Notwithstanding the fact that many students showed a lack of such knowledge as might be expected from a study of the usual matriculation course in the subject, a very good average standard has been reached. The work of the second-year students has been consistently good, covering the whole syllabus, with application of principles to the study of local physical features and general continental structures. This latter should give a particularly valuable conception of geography as a school subject.

Nature-study. -- The first-year course has been arranged with two main objects in view-(a) To give instruction in basic principles of plant and animal life, growth and reproduction; (b) to accustom students to the use of material available in their school district for seasonal outdoor study. The course has been made as practical as possible, and students have been encouraged to make individual

collections and to work out the life-history of some insect.

Elementary Science and Agriculture.—This course extends over two years, the first being devoted to a study of elementary science bearing on agriculture. Notwithstanding the disparity in the knowledge of chemistry and physics possessed by entrants, a satisfactory general course has been arranged to allow the maximum amount of individual work. The agriculture course of the second year has completely covered the Class C requirements, and the majority of the students have reached a good standard. The practical course has included visits to the Rangiora High School Farm and to Lincoln College. Wherever possible the course has had direct reference to school-garden work.

Elementary General Hygiene, Second Year.—Elementary general hygiene, as laid down in the

C syllabus, has been taken by the second-year women. The lectures have fully covered the ground of the syllabus, the work being covered in twenty lectures, with supplementary lectures on the care of a baby, general amelioration, and the care of subnormal children. The attention of students was drawn to the Department's pamphlet on the care of children, and the topics it contained reviewed. The students have also attended lectures given by Dr. Eleanor Baker and Dr. Truby King. Excursions were arranged to (a) the drainage farm, to study the means of purifying sewage; (b) Kaiapoi and Radley mills, to see the development of clothing from the raw product; (c) the yeast-factory, to see the result of fermentation, the manufacture of yeast and of vinegar; (d) Edmond's factory, to see the manufacture of baking-powder, &c. Apart from the main object of these excursions, the women displayed a keen interest in the general working-conditions and surroundings at each factory.

Hygiene, First Year.--The course has extended through three terms, with both men and women The ground covered included—(a) The general laws of health, and the importance in the first year. of the teaching of hygiene; (b) various affections and departures from the normal likely to come within the teacher's experience, including the care of abnormals, &c.; (c) food and diet, and the care of the teeth; (d) common infectious diseases, signs and symptoms, and precautions to be taken; (e) school sites, buildings, furniture, lighting, ventilation, &c. Attention has been drawn to specific

improvements in hygienic and other ameliorating conditions in modern schools.

General Science (based on Home Science).—This work is all done in the laboratory. of the first term the women were reclassified, so that those who had done a considerable amount of elementary science before reaching Training College were able to go ahead with more advanced work. A group of twenty-four did more elementary work, and fifty-six were in the upper groups. programme of work was based on a general home-science course, likely to be useful for practical work

Secondary-school Methods and Principles of Education.—The lectures to Division C students (twelve in number) in training for secondary-school work have fallen into three groups: (a) The taking of formal lessons; (b) the taking of subjects on the aesthetic side; (c) modern experiments in education. Under (a), attention has been given to methods of teaching English in all its branches, modern languages, Latin, geography, history, science, and mathematics. The general aim in teaching these subjects has been dwelt on, and suggestions as to formal lessons given. Under (b), the importance has been stressed of music, general literature, and rhythmic dancing, &c., as expressions of art, as well as art generally so styled; and the need for more cultural work in our secondary schools. Then, on general educational lines we have devoted attention to the various methods in vogue in secondary schools, and the experiments being tried out in various countries. For instance, the Dalton laboratory scheme, junior high schools, different schemes making for self-government and auto-teaching, direct methods

of class-teaching, &c., have all been discussed. Practice work has been done at the Normal High School, including the cookery department, and at the Girls' High School.

Art Work.—The course in drawing was very much on the lines adopted last year, the first-year students taking blackboard drawing, and colour-work on brown paper, and the second-year students water-colour design and carton work. In the blackboard class simple basic principles were taken with the object of developing the constructive side of the work by the building-up of a given subject from basic forms and the simpler rules of perspective. The first-year students devoted one period a week to colour-work, with good results. To the second-year students a few lessons in landscape work from nature were given, followed by a series of lessons designed to assist them to illustrate fairy-A course of lessons was also given in water-colour work, the drawing and painting of flowers and common objects, together with the application of these to design and decorative work. The course in carton consisted of the making of geometrical solids and models based on them, and the application of carton to the subjects of the school curriculum. Special classes were held for those students who had not passed the drawing required for the D certificate. Lectures on British art and artists and the art of the Renaissance were given to the students. In this connection it is interesting to report the formation of a College art club for the purpose of mutual help in the study of the history of art and art matters generally. A class for certificated teachers was held throughout the year.

Constructive Handwork.—The first-year woman students were given a course in handwork, including paper-work, toymaking, modelling, raffia and cane work, and sewing. The work was of a practical nature, aiming at originality of construction and design, rather than uniformity, and requiring for the Throughout the course the students worked with enthusiasm, most part easily obtainable material. Special interest was displayed in toymaking, the toys being and the results were most creditable. well constructed and useful, while the display of basket-work could not be graded other than excellent.

Woodwork.--First-year male students took a course in woodwork, which proved both useful and educational. Constructive principles were exemplified, and during the year very good work was Such valuable work has been done by this done in making equipment and articles of various kinds. class that its discontinuance this year is a matter of sincere regret.

Second-year History. The course for second-year students was again directed towards stressing the social and industrial development of the peoples of the world, England's history being taken as the basis for study. Political and religious movements were taken only in so far as they affected the welfare of the people as a whole. The main aim was to show how a realization of citizenship required a knowledge of the development of the people from primitive stages, through all the changes economic, social, and political leading to present-day conditions. The course was supplemented by a course of New Zealand civics.

First-year History.—The course of lectures dealt mainly with the growth of the British Colonial Empire, more especially with Canada, India, South Africa, Australia, and New Zealand. In addition a short course of civics was covered. The main object in dealing extensively with this phase of The main object in dealing extensively with this phase of

history was to give an appreciation of the principles of citizenship.
"Special" Class.—The work of the "Special" class in the Normal School, Christchurch, has been carried on under the same conditions and on the same lines as in 1921. At the beginning of the year it was very disappointing to find that five of the ten pupils of the 1921 class did not return. This was due to several causes—age, removal from district, and in two cases to the fact that the parents did not realize what special and individual teaching might do for their children. to point to the need for an agreement being made by the parents ensuring that the children enrolled in this class shall stay for a definite period if they are found suitable. The class for a time numbered ten, but at present the number on the roll is eight. The attendance is very good considering that all the children except one come from a distance. The children admitted during the year are of a distinctly better type mentally than those who left. All the children, with the exception of one girl, have made definite progress in reading, writing, and number work. The girl referred to has made very definite progress in handwork, and is now able to concentrate for several minutes at a time on such simple occupations as bead-threading, cutting paper in strips, &c. The two oldest girls have Quite a number of useful articles have been made during the made garments that they can wear. year with sugar-bags and wool. During the last term the children were very busy making little Christmas gifts for their people at home and for the little ones at school.

Methods of Teaching. - A course in methods of teaching, covering the two years of training, is taken by all students. During the opening term of the first year attention was given to the great principles that underlie all sound educational training, and to the importance of, and the relation between, three factors—the child, the teacher, and the material for instruction. Experience has proved the necessity for emphasizing this section of the work, as a large proportion of the students, while pupil-teachers or probationers, gain a certain amount of skill in the giving of a lesson, but lack any intelligent appreciation of the principles upon which teaching practice is based. Lectures on particular methods, on the scope and aim of some of the subjects of the curriculum, and on the drawing up of notes of lessons, completed the course for the first session. For second-year students lectures on the remaining school subjects were given, with frequent opportunities for the discussion of problems arising directly from the subjects of lectures or from difficulties that presented themselves during the students' teaching practice. The high level of interest displayed by the class, and the soundness of the conclusions arrived at, made this one of the most encouraging features of this branch A course of lectures dealing with kindergarten theory and practice was given. of their studies. Students of both years attended, and part of the second-year course was taken up with handwork in its application to the work of the infant department.

Teaching Practice.—On account of the large numbers only one half of either first- or second-year students could be given teaching practice and observation at one time, and these groups were allotted to the Normal School and to the associated schools. Before attending the practising schools the students were set a certain amount of observation work connected with one or two of the pupils of the class with which they were associated. It was not expected that any material addition to the sum of educational knowledge would result, but it was hoped that by turning the students' attention to a study of "the child" as opposed to "the children" or "the class" a more intelligent view-point might be of the classes, and their supervision and instruction were principally in the hands of the teaching staff.

Two model schools are attached to the Normal School, one in charge of a sole teacher and another representing the lower half of a two-teacher school. In view of the large number of students who will begin their teaching-work in one or other of such schools, all women students spent a period in the latter type of model school, and all students, men and women, a period in the sole-charge school. The establishment in the near future of other model schools will provide opportunities for longer periods of practice than have been available during the year.

Students of Division C or graduate students gave the whole of their one year of training to teaching practice, excepting certain hours when they attended lectures bearing on their professional training. On account of the particular character of the work they intended doing in the future they were attached to the two divisions of the secondary department of the school and to Standards V and VI.

Associated Schools.—Owing to the increased number of students in training it was found necessary to add Richmond and Phillipstown to the list of associated schools. As these schools are adjacent to Linwood the arrangement worked very satisfactorily, and the students were under the same Practically all the students attended one or other of the schools for a period of practice teaching and observation, and they displayed much earnestness in the work allotted to them. Besides the particular lessons set for preparation, they were given, in all cases, an opportunity for continuous teaching, either taking charge of a class for a period or giving a series of lessons on some particular subject. In addition to the criticism of the set lessons, an hour a week was set aside for a general talk and discussion on the points that arose during the course of teaching.

### DUNEDIN.

# (E. PINDER, M.A., Principal.)

There left at the end of last year 37 men and 91 women-128. Of these, three gained the A certificate, fifteen gained B, sixty-six gained C, six gained D, and thirty-eight gained partial In University work four gained B.A. degree, and twenty-two passed in one or two sections of B.A. There entered at the beginning of this year 45 men and 94 women, who, together with the number left in last year—viz., 30 men and 113 women—made up the number of students in College this year to 75 men and 207 women: total, 282. Of these, five left during the year, reducing the number to 277, made up of 192 A division, sixty-one B division, seven C division, fourteen D, one soldier, and two supernumeraries.

University results this year were: Class examinations—22 first class 103 second class, and 306 third class. Of the 277 students, 125 are taking a section of a degree, the increase being caused mainly by the fact that students can now take their degree in three sections of two subjects each

instead of, as formerly, two sections of three subjects each.

In athletics the College has been very active this season, putting four hockey, four basket-ball, and two football teams into the competitions. The A1 team in hockey were runners-up for the championship; the B1 team share the cup with Ravensbourne; the B2 team were runners-up for the B championship. In basket-ball A1 team were runners-up in A grade championship. In football the College put in two teams into second-grade Rugby. The A1 team were runners-up in second-grade championship, and the combined A1 and A2 teams defeated Southland teachers and also a team from Christchurch Training College. The usual number of debates and socials was held, and this part of the College activities was most successful and enjoyable.

I have now been Principal of the Dunedin Training College for ten years. During that time it has grown from 119 to 280, and buildings and staff have correspondingly increased. My period here has been very enjoyable indeed, and on the eve of retirement I take the opportunity of thanking the Board and Department for the consideration they have always shown to my requests, and the staff

for the conscientious and capable manner in which they have worked.

# APPENDIX E.

# PUBLIC SCHOOLS AND TEACHERS.

List of the Public Schools in the several Education Districts, with the Average Attendance, Grade of School, and Names, Positions, Classification, and Salaries of the Teachers, as in December, 1922.

Note 1. -The schools are placed in alphabetical order, the grade for 1922 being shown in column 2.

Note 2.—The average attendance of half-time schools is shown for each school as for the group—viz., Awakino (25), and Mokau (34); similarly the attendance of main and side schools, and of the primary and secondary departments of district high schools, is shown separately for each school or department.

Note 3.—In column (5), "Position," "H" means head of school; "S," sole teacher; "A," assistant; "I," infant mistress; "Pt," pupil-teacher; "Pr," probationer; and "D," assistant in secondary department of a district high school. In the case of normal schools, "N" means assistant or head of model school; "N (D)," assistant in secondary department. Teachers on leave of absence are included. Relieving teachers filling vacant positions are indicated by "R," and those taking the place of teachers absent on leave but whose names are on the list are indicated by "R." "Sup" means supernumerary teacher not included in staff.

Note 4.—A residence is either provided for the sole or head teacher, or house allowance is paid according to the following scale: Grade I, £30 per annum; Grades II and III, £40 per annum; Grade IV, £50 per annum; Grades V, VI, and VII, £60 per annum.

Note 5.—Headmasters of district high schools (other than normal district high schools) receive £30 per annum in addition to salary shown in column (7) unless the average attendance of the secondary department exceeds sixty, when they receive £50 per annum.

Norm 6.—The salaries of assistants in secondary departments of district high schools are not shown in this Appendix; they may be found in E.—6.

NOTE 7 .- Organizing teachers are shown on the last page.
