The classes were distributed as follows: Christchurch, ten; Timaru, three; South Canterbury District, five; North Canterbury District, five. The country districts have therefore as many classes as Christchurch. The movement has succeeded in bringing higher education to large numbers of people who formerly did not think it within their reach. A most successful summer school was held at Geraldine, and was attended by fifty-three men and eighty-four women. Two week-end schools were held in South Canterbury.

The great necessity at the present time is for permanent full-time tutors, as then the Workers' Educational Association can best fulfil its real object, in taking higher education into every district and bringing it within the reach of every household. In order that the Workers' Educational Association may continue its useful work it is most essential that it should keep in close touch and co-operation with the trade-unions.

STATEMENT OF ACCOUNTS FOR THE YEAR ENDED 31st DECEMBER, 1924.
