Of the total number of habitual criminals released on probation 51·4 per cent. were returned to prison either for non-compliance with the conditions of probation or for committing further offences. No offences are recorded against the remaining 48·6 per cent., but our tables show that 3·9 per cent. died or were transferred to mental hospitals, while 19·9 per cent. left the Dominion or absconded. This leaves a definite percentage of 24·8 who have remained in the Dominion and have not further offended.

Since 1917 the Board has dealt with the following hard-labour cases:-

Totals	878	4,575	1,340	7	116	92	7,008

The statistics that appear in the tables set out in the report show that, as heretofore, not a fourth of those who have undergone reformative treatment have again offended. This is certainly a gratifying result. Improvements are continually being made in the administration of our prison institutions,
