

1928.
NEW ZEALAND.

PULP AND PAPER MAKING

(REPORT ON INVESTIGATIONS INTO SUITABILITY OF SELECTED NEW-ZEALAND-GROWN WOODS FOR).

Laid on the Table of the House of Representatives by Leave.

CONTENTS.

	PAGE		PAGE
LETTER FROM THE DIRECTOR OF FORESTRY TO THE		PULPING TESTS— <i>continued.</i>	
HON. THE COMMISSIONER OF STATE FORESTS ..	4	Sulphite Pulping Studies— <i>continued.</i>	
Results	4	Discussion of Results—	
Purpose of Tests	4	Rimu	16
Location of Study	4	Insignis Pine	17
Future Programme	5	Tawa	18
LETTER FROM THE ENGINEER IN FOREST PRODUCTS		Tawa - Insignis Pine Mixture	19
TO THE DIRECTOR OF FORESTRY	5	European Larch	19
GENERAL :—		Adaptation of Experimental Results to Mill-	
Summary	6	scale Operation	19
Significance	6	Commercial Pulp-mill Trials—	
History	6	General	20
Standards of Comparison	7	Sulphite Pulp-mill Equipment	20
MATERIAL FOR TESTS :—		Cooking-conditions	20
Selection of Woods	7	Discussion of Results	20
Collection—		Pulp-yields	20
First Shipment for Laboratory Semi-commercial		Summary of Sulphite Pulping Studies	21
Tests	7	Alkaline and Semi-commercial Pulping Studies—	
Second Shipment for Mill Trials	8	Objectives and Scope of the Work	21
Physical Properties of the Woods	8	Pulping Processes—	
Physical Properties of the Wood-fibres	9	The Soda Pulping Process	21
Chemical Properties of the Woods	9	The Sulphate, or Kraft, Pulping Process	21
PULPING TESTS :—		The Semi-kraft Pulping Process	22
Objectives	9	The Semi-chemical Pulping Process	22
Preparation of Wood—		Experimental Equipment and Procedure	22
At Laboratory	9	Discussion of Results	22
At Pulp-mill	10	Soda Pulping Tests	23
Groundwood Pulping Studies—		Sulphate Pulping Tests	23
The Groundwood Process	10	Semi-kraft Pulping Tests	23
Factors affecting Quality of Groundwood	10	Semi-chemical Pulping Tests	23
Laboratory Semi-commercial Tests—		Summary of Alkaline and Semi-chemical Pulping	
Selection of Woods	11	Tests	23
Grinder Equipment and Methods of Tests	11	PAPERMAKING TESTS :—	
Tests used to determine Quality of Pulp	11	General	24
Grinding of Insignis Pine and Spruce	12	Newsprint Standards	24
Grinding of Tawa	12	Laboratory Semi-commercial Tests—	
Microscopic Classification of Groundwood Pulps	12	Standard Newsprint from Insignis Pine	24
Commercial Grinding Trials at Ladysmith Pulp-		Newsprint from Tawa, Insignis Pine, Rimu, and	
mill—		European-larch Mixtures	25
Selection of Woods	13	Tawa Sulphite, Tawa Groundwood, and	
Grinder Equipment and Method of Test	13	Insignis-pine Sulphite Mixtures	25
The Grinder-runs—		Substitutions of Rimu and European Larch	
Grinder-run No. 1	13	for Insignis-pine Sulphite	26
Grinder-run No. 2	14	Newsprint Runs using semi-chemical Pulps	26
Grinder-run No. 3	14	Commercial Paper-mill Trials—	
Pulp-yields	14	General	26
Physical Qualities of Tawa Groundwood Pulp	14	Paper-machine Runs at Ladysmith	26
Summary of Groundwood Pulping Studies	15	Paper-machine Runs at Wisconsin Rapids	27
Sulphite Pulping Studies—		Discussion of Results	28
Objectives and Scope of Work	15	Summary of Papermaking Studies	29
The Sulphite Process	15	SIGNIFICANCE OF STUDIES :—	
Laboratory Pulping Studies—		Conclusions	29
Previous Work	16	Recommendations	30
Method of Attack	16	Acknowledgments	30
Equipment and Manipulation	16		
Materials used	16
