INTRODUCTORY	3
TELEPHONY : AUTOMATIC AND MANUAL	4
Statistical	4
Rival Systems	4
Types of Automatic Telephone Exchange Equipment	4
Telephone-manufacture in the United Kingdom	4
London Automatic Exchange Network	5
Automatic Exchanges visited and compared	5
Cutover Procedure	5
Application of Automatic-switching Methods to the Smaller Telephone Communities	5
Modernized Manual-exchange Equipment	6
Automatic <i>versus</i> Manual	6
Intercommunication between Adjacent Exchanges	6
Provision for Growth of Telephone Systems	6
Prospective Telephone Exchange Installations	7
Power Plant : Machines	7
Power Plant : Dry Batteries	7
Power Plant : Storage Batteries	7
Air-conditioning Plant	7
Fire Precautions	8
Auxiliary Telephone Apparatus : P.B.X. and Interphone ; Telephone Pay Stations	8
Toll Operating Methods	8
Auxiliary Telephone Services : Information, Time, &c., and the Relation of Broadcasting thereto	9
Standards of Transmission	9
Observation and Traffic Studies	9
Rates and Quality of Service	9
TELEGRAPHS	10
Machine Printing (General)	10
Multiplex	10
Simplex or Teletype	10
Commercial and Traffic Aspects of Telegraphy	10
Telegraph Offices visited	11
RADIO-TELEGRAPHS AND TELEPHONES	11
General	11
International Radio-telegraph Conference, 1927	11
Beacon and Direction-finding Stations	11
Marine Radio Installations	11
International Radio-telegraph Communication in relation to New Zealand	12
Trans-oceanic Speech	12
Broadcasting : Statistical	12
British and American Broadcasting in relation to New Zealand	13
Broadcasting : General	13
Departmental Responsibility to Broadcast Listeners in connection with Interference	13
Quality of Broadcast Reception	14
Absorption and Distortion	14
Fading of Broadcasting-stations	14
CARRIER CURRENT	14
Application to Telegraph and Telephone Lines	14
Power-line Carrier Current	15
Voice-frequency Telegraphs	15
FIELD ENGINEERING	15
Scope of Inquiries	15
Telegraph and Inter-urban Telephone-lines	16
Subscribers' Distribution	16
General	16
PROTECTION OF TELEGRAPH AND TELEPHONE PLANT FROM ELECTRIC POWER AND LIGHTNING	17
BUILDINGS	18
ORGANIZATION	18
Causes contributing towards Variations in Telephone Density	18
Research Work	19
Staff Training : Engineering and Technical	19
Specialization	19
Understudies	19
Engineering Conferences	19
Decentralization	20
Staff Conditions	20
Recruiting of Telegraph and Telephone Engineers and Technicians	20
Standardization	20
LABORATORY	21
PLANT ACCOUNTING	21
CONCLUSION	21
