

GRAPH SHOWING CURVES PLOTTED FROM RELATIVE NUMBERS COMPUTED IN RESPECT OF THE WHEAT HARVEST, AND THE PRICES OF WHEAT, FLOUR, AND BREAD, FROM 1916 TO 1929 (1916 = 1000).

N.B.—It should be particularly noted that the various curves are plotted from relative numbers, not the crude figures; and that a rise or fall in any curve above or below the 1000 mark indicates a percentage rise or fall in comparison with the figure for the first year (calendar year 1916 for prices, and 1916–17 season for harvest).
